A. Advertisements may only be used (and copies of the advertisements may be sent to persons who have not received a prospectus of the Options Clearing Corp.) if the material meets the requirements of Rule 134 under the Securities Act of 1933, as that rule has been interpreted as applying to options. Under Rule 134, advertisements must be limited to general descriptions of the security being offered and of its issuer. Advertisements under this rule shall state the name and address of the person from whom a current prospectus of the Options Clearing Corp. may be obtained. Such advertisements may have the following characteristics:

(i) The text of the advertisement may contain a brief description of such options, including a statement that the issuer of every such option is the Options Clearing Corp. The text may also contain a brief description of the general attributes and method of operation of the exchange or exchanges on which such options are traded and of the Options Clearing Corp., including a discussion of how the price of an option is determined on the trading floor(s) of such exchange(s);

(ii) The advertisement may include any statement required by any State law or administrative authority;

(iii) Advertising designs and devices, including borders, scrolls, arrows pointers, multiple and combined logos and unusual type spaces and lettering as well as attention getting headlines and photographs and other graphics may be used, provided such material is not misleading.

B. The use of performance figures, including annualized rates of return, are not permitted in any advertisement pertaining to options.

.03 Sales literature pertaining to options must be preceded or accompa-

EXCHANGE'S STATEMENT OF BASIS AND PURPOSE

membership for necessary prepublication approval (see Rule 991(c)); and (3)

the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies

reasonable basis or forecasts of future events which are unwarranted or which are not clearly labeled as fore-

mailing not accompanied or preceded by a current prospectus of The Options Clearing Corporation.

V 43/210 OC 30 78

.03 Sales literature pertaining to options must be preceded or accompanied by a current prospectus of the Options Clearing Corp. and shall conform to the following standards:

A. Such literature may contain project performance figures (including projected annualized rates of return in connection with covered call option writing programs) provided that:

(i) No suggestion of certainty of future performance is made;

(ii) Parameters relating to such performance figures are clearly established (e.g., to indicate exercise price of option, purchase price of the underlying stock and its market price, option premium, anticipated dividends, etc.);

(iii) Commissions, transaction costs, and interest charges (if applicable with regard to margin transactions) are included in all calculations; and such returns are plausible and are intended as a source of reference or a comparative device to be used in the development of a recommendation;

(iv) Any assumptions made in such calculations are clearly identified (e.g., "assume option expires," "assume option unexercised," "assume options exercised," etc.); and

(v) Further provided, in the case of literature relating to annualized rates of return, that such returns are not calculated on any more than four (4) consecutive 3-month option periods; any formulas used in making calculations are clearly displayed; and a statement is included to the effect that the annualized returns cited might be achieved only if the parameters described can be duplicated.

B. Sales literature featuring records and statistics concerning past recommendations shall include the date of each initial recommendation, the price(s) of such security at that date and at the end of the period when liquidation of the security position(s) was suggested, and the trend of the market during that period. Records and statistics must be confined to a specific "universe," e.g., (i) the work of one research analyst for a period of at least 1 year; (ii) the work of an entire firm for a period of at least 1 year; (iii) the results of all accounts under management for a period of at least 1 year; or (iv) some other clearly definable area which can be fully isolated and circumscribed. All such sales literature shall state that the results presented should not and cannot be viewed as an indicator of future performance.

C. All sales literature shall state that supporting documentation for any claims, comparisons, recommendations, statistics, or other technical data will be supplied upon request.

EXCHANGE'S STATEMENT OF BASIS AND PURPOSE

The purpose of the proposed rule change is to amend Exchange Rule 991 (concerning advertisements, market letters, and sales literature relating to options) to conform with similar proposals of other options exchanges and to reflect uniform policies and standards applicable to options sales communications directed to public investors by Exchange members and members organizations.

As used herein, communications with the public involving options include, in a broad sense, both advertisements and sales literature (as those terms are defined in paragraph (e) of proposed Rule 991). Basically, a communication which meets the standards of an advertisement may be disseminated to the public without a prospectus; sales literature, however, must be preceded or accompanied by a prospectus.

The proposed rule sets forth the several procedures and standards which member firms must follow in preparing (and obtaining approval, where required) options related advertisements and sales literature. In part, the rule incorporates traditional standards of truthfulness and good taste required of nonoptions marketing material and clarifies certain specific requirements pertaining to exchange-traded options.

While all options exchanges presently have rules similar to Exchange Rule 991, the exchanges have sought to further refine such rules in light of experiences gained since the establishment of their respective options program. In recognition of the need for uniformity in the area of communications with the public relating to exchange-traded options, representatives of the Amex, CBOE, Midwest, Pacific, and Philadelphia Exchanges have conducted during the past several months an in-depth review of present rules. Two of the objectives of the review were: (i) To prepare rule changes which would reflect uniform policies and standards applicable to communications with the public concerning options; and (ii) to prepare an industry-wide publication which would amplify on such rules and assist firms in their preparation of such communications.

In addition to retaining certain specific requirements (such as OCC prospectus availability) and general requirements (such as general standards of truthfulness and good taste discussed above), the proposed rule seeks to: (i) Expand the definitions of the terms "advertising" and "sales literature" (see Rule 991(e)); (2) eliminate, in the case of dual members, the need for approvals of advertisements by more than one exchange and permit a firm to submit advertisements to any one exchange in which it maintains a membership for necessary prepublication approval (see Rule 991(c)); and (3) establish uniform standards to be used in discussion of rates of return, annualized returns, recommendations and performance figures (see Rules 991.02 and 991.03).

Following Commission approval of the proposed rule change, the options exchanges intend to jointly publish a booklet, tentatively entitled. Guidelines for Options Communications, which is designed to assist member firms maintain proper standards in their preparation of communications with the public. The booklet will also serve to explain and amplify upon exchange rules relating to option sales communications and insure a uniform reference source applicable to all firms who communicate with the public respecting options.

The basis for the proposed rule change is found in section 6(b)(5) of the Act which provides, in pertinent part, that Exchange rules be designed to promote just and equitable principles of trade and protect investors and the public interest.

No written comments were solicited or received from Exchange members, participants or others in connection with the proposed rule change. Some dual member organizations, however, have orally indicated that, in certain respects, present rules lack specific standards which the exchanges will employ in approving and commenting upon options-related advertisements and sales literature. They have cited instances when identical advertisements submitted to more than one options exchange have received varying (and sometime inconsistent) comments which resulted in delays in obtaining publication approvals.

The proposed rule change will not impose any burden on competition.

On or before December 4, 1978, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned, self-regulatory organization consents, the Commission will:

(a) By order approve such proposed rule change; or

(b) Initiate proceeding to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written date, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying at

the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned, self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before December 29, 1978.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

OCTOBER 20, 1978.

CHICAGO BOARD OPTIONS EXCHANGE, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1) as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on September 8, 1978 the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

EXCHANGE'S STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

(Brackets indicate deletions: italics indicate new material)

SALES COMMUNICATIONS

Rule 9.21. *(a) Approval by Registered Options Principal. All advertisements and sales literature issued by a member or member organization pertaining to options shall be approved in advance by a general partner or officer of the member organization who is a Registered Options Principal, and copies thereof, together with the names of the persons who prepared the material and, in the case of sales literature, the source of any recommendation contained therein shall be retained by the member or member organization and be kept readily available for examination by the Exchange for a period of three years.*

(b) Standards of Approval. No advertisement or sales literature shall be approved under paragraph (a) of this Rule which:

(i) contains any untrue statement or omission of a material fact or is otherwise false or misleading;

(ii) contains promises of specific results, exaggerated or unwarranted claims, opinions for which there is no reasonable basis or forecasts of future events which are unwarranted or which are not clearly labeled as forecasts;

(iii) contains hedge clauses or disclaimers which are not easily identifiable, which attempt to disclaim responsibility for the content of such literature or for opinions expressed therein, or which are otherwise inconsistent with such advertisement or sales literature;

(iv) fails to meet general standards of good taste, judgment and truthfulness common to the securities industry;

(v) would constitute a prospectus as that term is defined in the Securities Act of 1933, unless it meets the requirements of Section 10 of said Act.

(c) Exchange Approval Required for Options Advertisements. In addition to the approval by a Registered Options Principal required by paragraph (a) of this Rule, every advertisement of a member or member organization pertaining to options shall be submitted to the Department of Sales Practice Complaince of the Exchange at least ten days prior to use (or such shorter period as the Department may allow in particular instances) for approval and, if changed or expressly disapproved by the Exchange, shall be withheld from circulation until any changes specified by the Exchange have been made and further, in the event of disapproval, until the advertisement has been resubmitted for, and has received, Exchange approval. The requirements of this paragraph shall not be applicable to:

(i) advertisements submitted to and approved by another self-regulatory organization having identical requirements regarding approval of advertisements pursuant to an arrangement approved by the Exchange;

(ii) advertisements in which the only reference to options is contained in a listing of the services of a member organization; and

(iii) advertisements approved within the last six months.

(d) Except as otherwise provided in the Interpretations and Policies hereunder, no written materials respecting options may be disseminated to any person without prior or contemporaneous dissemination to such person of a current prospectus of the Options Clearing Corporation.

(e) Definitions. For purposes of this Rule, the following definitions shall apply:

(i) The term "advertisement" shall include any material that reaches a mass audience through public media such as newspapers, periodicals, magazines, radio, television, telephone recording, motion picture, audio or video device, billboards, signs, or through letters designed for customer mailing not accompanied or preceded by a current prospectus of The Options Clearing Corporation.

(ii) The term "sales literature" shall include any communication for distribution to customers or the public (or which may be made accessible to customers or the public) which contains any analysis, report, recommendation, opinion, prediction or comment with respect to options, underlying securities or market conditions, or any seminar text which pertains to options and which is communicated to customers or the public at seminars, lectures or similar such events, or any exchange-produced.

Interpretations and Policies • • •

.01 The special risks attendant to options transactions and the complexities of certain options investment strategies shall be reflected in any advertisement or sales literature which purports to discuss the uses or advantages of options. In the preparation of communications respecting options, the following guidelines should be observed:

A. Any statement referring to the opportunities or advantages presented by options should be balanced by a statement of the corresponding risks. The risk statement should reflect the same degree of specificity as the statement of opportunities, and broad generalities should be avoided. Thus, a statement such as "with options, an investor has an opportunity to earn profits while limiting his risk of loss", should be balanced by a statement such as "Of course, an options investor may lose the entire amount committed to options in a relatively short period of time."

B. It should not be suggested that options are suitable for most investors, or for small investors. Indeed, it is strongly suggested that there be included in all literature discussing the use of options a warning to the effect that options are not for everyone.

C. Statements suggesting the certain availability of a secondary market for options should not be made.

.02 Advertisements pertaining to options shall conform to the following standards:

A. Advertisements may only be used (and copies of the advertisements may be sent to persons who have not received a propsectus of The Options Clearing Corporation) if the material meets the requirements of Rule 134 under the Securities Act of 1933, as that Rule has been interpreted as applying to options. Under Rule 134, advertisements must be limited to general descriptions of the security being offered and of its issuer. Advertisements under this Rule shall state the name and address of the person from whom a current prospectus of the Options

Clearing Corporation may be obtained. Such advertisements may have the following characteristics:

achieved only if the parameters described can be duplicated.

B. Sales literature featuring records

proval required by paragraph (a) of

following characteristics: (i) The advertisement should state the name and

C. Until the existence of the Exchange's secondary market has been demonstrated by experience, Chicago

Two of the objectives of the review were: (i) to prepare rule changes which would reflect uniform policies

V 43 / 210 0 C 30 0 7 8

Clearing Corporation may be obtained. Such advertisements may have the following characteristics:

(i) The text of the advertisement may contain a brief description of such options, including a statement that the issuer of every such option is The Options Clearing Corporation. The text may also contain a brief description of the general attributes and method of operation of the exchange or exchanges on which such options are traded and of The Options Clearing Corporation, including a discussion of how the price of an option is determined on the trading floor(s) of such exchange(s);

(ii) The advertisement may include any statement required by any state law or administrative authority;

(iii) Advertising designs and devices, including borders, scrolls, arrows, pointers, multiple and combined logos and unusual type spaces and lettering as well as attention getting headlines and photographs and other graphics may be used, provided such material is not misleading.

B. The use of performance figures, including annualized rates of return, are not permitted in any advertisement pertaining to options.

.03 Sales literature pertaining to options must be preceded or accompanied by a current prospectus of The Options Clearing Corporation and shall conform to the following standards:

A. Such literature may contain projected performance figures (including projected annualized rates of return in connection with covered call option writing programs) provided that:

(i) no suggestion of certainty of future performance is made;

(ii) parameters relating to such performance figures are clearly established (e.g., to indicate exercise price of option, purchase price of the underlying stock and its market price, option premium, anticipated dividends, etc.);

(iii) commissions, transaction costs and interest charges (if applicable with regard to margin transactions) are included in all calculations; and such returns are plausible and are intended as a source of reference or a comparative device to be used in the development of a recommendation;

(iv) any assumptions made in such calculations are clearly identified (e.g., "assume option expires", "assume option unexercised", "assume options exercised," etc.); and

(v) further provided, in the case of literature relating to annualized rates of return, that such returns are not calculated on any more than four (4) consecutive 3-month option periods; any formulas used in making calculations are clearly displayed; and a statement is included to the effect that the annualized returns cited might be achieved only if the parameters described can be duplicated.

B. Sales literature featuring records and statistics concerning past recommendations shall include the date of each initial recommendation, the price(s) of such security at that date and at the end of the period when liquidation of the security position(s) was suggested, and the trend of the market during that period. Records and statistics must be confined to a specific "universe", e.g., (i) the work of one research analyst for a period of at least one year; (ii) the work of an entire firm for a period of at least one year; (iii) the results of all accounts under management for a period of at least 1 year; or (iv) some other clearly definable area which can be fully isolated and circumscribed. All such sales literature shall state that the results presented should not and cannot be viewed as an indicator of future performance.

C. All sales literature shall state that supporting documentation for any claims, comparisons, recommendations, statistics or other technical data, will be supplied upon request.

[Advertisements, Market Letters and Sales Literature

Rule 9.21 (a) Approval by Registered Options Principal. All advertisements, market letters and sales literature issued by a member organization pertaining to options shall be approved in advance by a Registered Options Principal who is an officer or partner of the member organization, and copies thereof together with the names of persons approving their issuance, the names of persons who prepared the material and the source or any recommendations contained therein shall be retained by the member organization and be readily available for examination by the Exchange for a period of three years.

(b) Standards of Approval. No advertisement, sales literature or market letter shall be approved under paragraph (a) of this Rule which:

(i) contains any untrue statement or omission of a material fact or is otherwise false or misleading;

(ii) contains promises of specific results, exaggerated or unwarranted claims, opinions for which there is no reasonable basis or forecasts of future events which are unwarranted or which are not clearly labeled as forecasts;

(iii) fails to meet general standards of good taste and judgement common to the securities industry;

(iv) would constitute a prospectus as that term is defined in the Securities Act of 1933, unless it meets the requirements of Section 10 of said Act.

(c) Exchange Approval Required for Advertisements. In addition to the approval required by paragraph (a) of this Rule, every advertisement of a member organization pertaining to options shall be submitted to the Department of Compliance of the Exchange at least ten days prior to use (of such shorter period as the Department may allow in particular instances) and, if expressly disapproved by the Exchange, shall be withheld or withdrawn from circulation until changes specified by the Exchange have been made and the advertisement re-submitted for Exchange approval.

(d) Definitions. For purposes of this Rule, the following definitions shall apply:

(i) advertisements include any material for use in any newspaper or magazine or other public media or by radio, telephone recording, motion picture or television.

(ii) sales literature and market letters include any communication for distribution to customers or the public which contains any analysis, report, recommendation, opinion, prediction or comment with respect to options, underlying securities, or market conditions.

. . . Interpretation and Policies:

.01 In addition to adhering to the general standards of truthfulness and good taste prescribed by Rule 9.21, the advertisements, market letters and sales literature of Exchange members covering Chicago Board Options should reflect the following factors.

I. Chicago Board Options are securities registered under the Securities Act of 1933, and they are the subject of a currently effective registration statement. Section 5 of the Securities Act prohibits the use of any written material or radio or television advertisements (or other material constituting a "prospectus" as defined in the Act) relating to a registered security unless certain conditions are met. With respect to advertisements and sales literature covering Chicago Board Options, the following rules must be observed:

A. Except as provided in paragraph B below, no written material with respect to Chicago Board Options may be sent to any person unless prior to or at the same time with the written material a current Options Prospectus was sent to such person.

B. Advertisements may be used (and copies of the advertisements may be sent to persons who have not received a prospectus) if the material meets the requirements of Rule 134 under the Securities Act of 1933, as that Rule has been interpreted as applying to Chicago Board Options. Under Rule 134, advertisements are limited to general descriptions of the security being offered and of its issurer. In the case of Chicago Board Options, advertisements under this Rule must have the following characteristics: (i) The advertisement should state the name and address of the person from whom a current Options Prospectus may be obtained (this would usually be the member sponsoring the advertisement); (ii) The text of the advertisement may contain a brief description of Chicago Board Options, including a statement that the issuer of every Chicago Board Option is the Chicago Board Options Exchange Clearing Corporation. The text may also contain a brief description of the general attributes and method of operation of the Exchange and the Clearing Corporation, including a discussion of how the price of an Option is determined on the Exchange's trading floor; (iii) The advertisement may include any statement or legend required by any state law or administrative authority; (iv) Advertising designs and devices including borders, scrolls, arrows, pointers, multiple and combined logos and unusual type faces and lettering as well as attention-getting headlines and photographs and other graphics may be used, provided such material is not misleading.

II. There are special risks attendant to options transactions and certain options transactions involve complex investment strategies. These factors should be reflected in any communication (including advertising, sales literature and similar material) which purport to include any discussion of the uses or advantages of Chicago Board Options. Although it is up to each member in preparing its communications concerning Chicago Board Options to take into consideration these factors, the following points of particular importance are presented for the general guidance of members in this regard:

A. Any statement referring to the opportunities or advantages presented by Chicago Board Options should be balanced by a statement of the corresponding risks. The risk statement should reflect the same degree of specificity as the statement of opportunities, and broad generalities should be avoided. Thus, a statement such as, "With options, an investor has an opportunity to earn profits while limiting his risk of loss," should be balanced by a statement such as, "Of course, an options investor may lose the entire amount committed to options in a relative short period of time."

B. It should not be suggested that options are suitable for most investors, or for small investors. Indeed, it is strongly suggested that there be included in all Chicago Board Options literature discussing the uses of options a warning to the effect that options are not for everybody.

C. Until the existence of the Exchange's secondary market has been demonstrated by experience, Chicago Board Options literature should reflect the untried nature of this aspect of the Exchange. Accordingly, statements suggesting the certain availability of the Exchange's secondary market should not be made. Instead, any reference to the secondary market should be expressed in such terms as, "The Exchange's secondary market is intended to provide a means for the liquidation of positions in options", or, "If the price of the underlying stock goes down the holder of a Chicago Board Option may be able to realize any remaining value of the Option by selling it in the secondary market". (Italics used for illustrative purposes only).]

EXCHANGE'S STATEMENT OF BASIS AND PURPOSE

The purpose of the proposed rule change is to amend Exchange Rule 9.21 (concerning advertisements, market letters and sales literature relating to options) to conform with similar proposals of other options exchanges and to reflect uniform policies and standards applicable to options sales communications directed to public investors by Exchange members and member organization.

As used herein, communications with the public involving options include, in a broad sense, both advertisements and sales literature (as those terms are defined in paragraph (e) of proposed Rule 9.21). Basically, a communication which meets the standards of an advertisement may be disseminated to the public without a prospectus; sales literature, however, must be preceded or accompanied by a prospectus.

The proposed rule sets forth the several procedures and standards which member firms must follow in preparing (and obtaining approval, where required) of options related advertisements and sales literature. In part, the rule incorporates traditional standards of truthfulness and good taste required of non-options marketing material and clarifies certain specific requirements pertaining to exchange-traded options.

While all options exchanges presently have rules similar to Exchange Rule 9.21, the exchanges have sought to further refine such rules in light of experiences gained since the establishment of their respective options programs. In recognition of the need for uniformity in the area of communications with the public relating to exchange-traded options, representatives of the Amex, CBOE, Midwest, Pacific and Philadelphia Exchanges have conducted during the past several months an in-depth review of present rules. Two of the objectives of the review were: (i) to prepare rule changes which would reflect uniform policies and standards applicable to communications with the public concerning options; and (ii) to prepare an industry-wide publication which would amplify on such rules and assist firms in their preparation of such communications.

In addition to retaining certain specific requirements (such as general standards of truthfulness and good taste discussed above), the proposed rule seeks to: (1) expand the definitions of the terms "advertising" and "sales literature" (see Rule 9.21(e); (2) eliminate, in the case of dual members, the need for approval of advertisements by more than one exchange and permit a firm to submit advertisements to any one exchange in which it maintains a membership for necessary prepublication approval (see Rule 9.21 (c); and (3) establish uniform standards to be used in discussion of rates of return, annualized returns, recommendations and performance figures (see Rule 9.21.02 and Rule 9.21.03).

Following Commission approval of the proposed rule change, the options exchanges intend to jointly publish a booklet, tentatively entitled Guidelines for Options Communications (see draft of booklet attached as exhibit 2) which is designed to assist member firms in maintaining proper standards in their preparation of communications with the public. The booklet will also serve to explain and amplify upon exchange rules relating to option sales communications and ensure a uniform reference source applicable to all firms who communicate with the public respecting options.

The basis for the proposed rule change is found in Section 6(b)(5) of the Act which provides, in pertinent part, that exchange rules be designed to promote just and equitable principles of trade and protect investors and the public interest.

No written comments were solicited or received from Exchange members, participants or others in connection with the proposed rule change. Some dual member organizations, however, have orally indicated that, in certain respects, present rules lack specific standards which the exchanges will employ in approving and commenting upon options-related advertisements and sales literature. They have cited instances where identical advertisements submitted to more than one options exchange have received varying (and sometime inconsistent) comments which resulted in delays in obtaining publication approval.

The proposed rule change will not impose any burden on competition.

On or before December 4, 1978, or within such longer period (i) as the Commission may designate up to 90

days of such date if it finds such longer period to be appropriate and

days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) by order approve such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before December 29, 1978.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority

GEORGE A. FITZSIMMONS,
Secretary.

CHICAGO BOARD OPTIONS EXCHANGE, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. 94-29, 16 (June 4, 1975), notice is hereby given that on October 13, 1978, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

EXCHANGE'S STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The proposed change requires a number of technical changes in CBOE's Constitution and Rules. Set forth below is a description of such changes:

THE CHAIRMAN OF THE BOARD

CONSTITUTION

1. Section 3.2 *Annual Election Meeting.* This proposed change deletes the provision which refers to electing the Chairman and Vice Chairman of the Board.

2. Section 4.3 *Nominating Procedure.* This proposed modification also deletes the requirement to nominate a Chairman and Vice Chairman of the Board.

3. Section 5.3 *Counting of Ballots.* This proposed amendment deletes language which relates to the membership election of Chairman and Vice Chairman of the Board. In addition it deletes the requirement that one of the off-floor directors be a member, which change when it had been approved by the membership some months ago in section 6.1 of the Constitution was not made to this section.

4. Section 6.3 *Resignation, Disqualification and Removal of Directors.* The proposed change to this section relates to the substitution of the Chairman of the Board for the President as one of the persons to whom a director may tender his resignation.

5. Section 7.2 *The Executive Committee.* This change will specifically provide that the Chairman of the Board, Chairman of the Executive Committee, the President and at least four other directors be designated voting members of the Executive Committee.

6. Section 8.1 *Designation; Number; Election.* This new section completely replaces the old section 8.1 and specifies that (a) the Chairman of the Board be elected by a two-thirds affirmative vote of the directors, which directors may prescribe his duties and tenure of office, (b) officers, other than the Chairman of the Executive Committee shall be appointed by the Chairman of the Board, subject to the Board's approval and (c) certain offices may not be held by the same person.

7. Section 8.2 *Chairman of the Board of Directors.* This new section replaces a portion of the provisions of Section 8.3 and describes the position and responsibilities of the Chairman of the Board.

8. Section 8.7 *Removals.* This section replaces part of old section 8.2 which has been deleted and sets forth the required votes by the Board of Directors to remove the Chairman of the Board (two-thirds), the Chairman of the Executive Committee (two-thirds) and the President (two-thirds). It also sets forth the board's ability to remove any other officers when the best interests of the Exchange would be served thereby.

9. Sections 8.8 *Vice President;* 8.9 *Secretary;* 8.10 *Treasurer.* These sections reflect the replacement of the President by the Chairman of the Board as the person in addition to the Board which can prescribe the duties of the above described officers.

10. Section 11.3 *Departments.* This section replaces the President with the Chairman of the Board as the individual able to authorize Exchange departments, subject to Board approval.

RULES

11. Rules 2.15 *Departments of the Exchange.* This change provides that the Chairman of the Board, not the President, shall be the head of the Executive Department.

CHAIRMAN OF THE EXECUTIVE COMMITTEE

CONSTITUTION

1. Section 3.4 *Special Meetings.* This proposal substitutes the Chairman of the Executive Committee for the President as one of the officers who can call a Special Meeting of Members.

2. Section 4.1 *Nominating Committee.* This modification provides that the Chairman of the Executive Committee and not the Chairman of the Board shall choose, subject to Board approval, the seventh member of the Nominating Committee for a 1-year term.

3. Section 4.2 *Nominating Committee Vacancies.* This proposal allows the Chairman of the Executive Committee instead of the Board Chairman to fill vacancies on the nominating Committee subject to Board approval.

4. Section 5.1 *Election Committee.* This proposal empowers the Chairman of the Executive Committee to appoint the Election Committee instead of the Chairman of the Board.

5. Section 6.7 *Special Meetings.* This modification provides that the Chairman of the Executive Committee in addition to the Chairman of the Board can call a Special Meeting of Directors.

6. Section 7.1 *Designation of Committees.* This modification replaces the Chairman of the Board with the Chairman of the Executive Committee as the individual responsible for designating members of Exchange Committees.

7. Section 7.3 *The Appeals Committee.* This proposal substitutes the Chairman of the Executive Committee for the Chairman of the Board as the person responsible for designating the Chairman of the Appeals Committee.

8. Section 7.4 *Appeals Committee Vacancies.* This amendment requires that the Chairman of the Executive Committee instead of the Board Chairman select those persons to fill vacancies on the Appeals Committee.

9. Section 8.1 *Designation; Number; Election.* This new section additionally provides that the Chairman of the Executive Committee be a director who owns or directly controls his own membership and shall be elected each year by an affirmative vote of the majority of the members of the Board of Directors.

10. Section 8.3 *Chairman of the Executive Committee.* This new section replaces old section 8.3 and provides that the Chairman of the Executive Committee shall also function as the Vice Chairman of the Board. In addition, it sets forth the functions and responsibilities of such member officer.

11. Section 8.4 *Acting Chairman.* This new section provides, in the event there is a vacancy in both the office of Chairman of the Board and that of the Chairman of the Executive Committee, the means by which an Acting Chairman is to be chosen.

12. Section 8.5 *Vacancy In Office of Chairman of Executive Committee.* This section specifies the means by which the Board shall choose a new Chairman of the Executive Committee if such office becomes vacant prior to the end of the incumbent's term and the qualifications of such replacement.

13. Section 11.4 *Officers and Employees Restricted.* This amendment sets forth an exception for the Chairman of the Executive Committee to the prohibition against dealing in options traded on the Exchange as well as against dealing in securities underlying such options.

RULES

14. Rule 2.1 *Establishment of Committees.* This proposed change requires the Chairman of the Executive Committee to appoint, subject to Board approval, the members of Exchange Committees.

15. Rule 2.23 *Liability for Payment.* This proposed modification empowers the Chairman of the Executive Committee to suspend members for nonpayment of dues, fees, charges, etc.

16. Rule 16.1 *Summary Suspension.* This proposal replaces the President with the Chairman of the Executive Committee as one of the persons having powers of summary suspension.

THE PRESIDENT

CONSTITUTION

1. Section 6.6 *President.* This new section replaces old section 8.4 in its entirety, and provides that the President shall be the Chief Operating Officer of the Exchange. This section also sets forth the responsibilities of the President.

COMPOSITION OF THE BOARD

CONSTITUTION

1. Section 6.1 *Number, Election and Term of Office of Directors.* These changes relate to the deletion of the membership election of the Vice Chairman position, the increase in public directors from three to four, the change in the term of office of public directors from 3 years to 2 years and the specification that off-floor directors shall be employed by member organizations which primarily conduct a nonmember public customer business.

2. Section 6.4 *Filling of Vacancies.* This section provides that vacancies in elected director positions may be filled by an affirmative vote of a majority of directors, and that a vacancy in the office of an appointed director shall be filled by the Chairman of the Board with the approval of the Board.

EXCHANGE'S STATEMENT OF BASIS AND PURPOSE

The purposes of this rules change are (1) to better define the respective responsibilities and roles of the Chairman of the Board and the President and their means of selection, (2) to set forth the means of selection and the scope of the responsibilities of the Chairman of the Executive Committee; and (3) to modify the composition of the Board by the addition of one more public director and by the specification that the member organizations whose executive officers occupy six places on the Board of Directors be organizations which are primarily engaged in doing a public customer business.

With respect to the first purpose set forth above, it is proposed that the Exchange's Chairman of the Board become a full-time chief executive officer, selected by the Board. The duration of his term and his compensation would be determined by the Board. This proposal contrasts with the present means of electing a Board Chairman from among the membership for a 1-year term. The duties of the senior full-time staff official would be comprised of those chief executive responsibilities presently undertaken by the Board Chairman (an exception would be the appointive powers of Board Chairman which would be transferred to the Chairman of the Executive Committee, see below), and by the President, who presently functions as the Chief Executive Officer. This change will create a greater degree of governmental continuity at the Chairman level. This is believed to be desirable to strengthen the Exchange's administrative effectiveness and to strengthen the confidence of its members, the financial community and the investing public in the Exchange's conduct of its affairs. The remaining portion of this first modification to the Exchange's administrative structure pertains to the Office of the President. It is proposed that the President act as the Chief Operating Officer of the Exchange. His responsibilities would be primarily administrative; however, he would retain his positions as a member of the Board of Directors and of the Executive Committee.

The second purpose of this rules change deals with the selection and responsibilities of the Chairman of the Executive Committee. Since the Board Chairman's position is to be filled by a nonmember on a full-time basis, the position of Chairman of the Executive Committee was designated as the principal Exchange member position. In order to maintain member involvement and representation on the senior management level of the Exchange, the responsibilities of the person holding this office would include: (1) Functioning as Vice Chairman in case of the absence of or inability to act as the Board Chairman or a vacancy in the Office of Chairman of the Board; (2) selection with Board approval, the chairmen and members of all standing committees and the coordinating of all committee actions; and (3) functioning as Chairman of the Executive Committee. In contrast with the present election by the membership of a Vice Chairman of the Board for a 1-year term, the Chairman of the Executive Committee would be selected by the Board from the Board's elected member directors who own or control their own memberships for a 1-year term. This method of selection should serve to foster a complementary working relationship between the senior staff official (Board Chairman) and the senior member director (Chairman of the Executive Committee).

The final purpose of this proposed rules change is the modification of the composition of the Board. As described in the chart set forth below, the Board is now comprised of 21 persons, which include a Chairman, Vice Chairman, and 15 directors each separately elected from among the membership, a President and three public directors. As mentioned above, the position of Vice Chairman is proposed to be absorbed into the position of Chairman of the Executive Committee, which latter position would then be filled by the Board from among the 15 elected directors. Consequently, this change would eliminate the separately elected position of Vice Chairman with the result of reducing the total number of Board members to 20 from 21. Therefore, in order to restore the Board to the level of 21 persons it is proposed to add 1 more public director for a total of 4. It is also proposed that two public directors be appointed each year for 2-year terms instead of one public director appointed each year for a 3-year term. It is believed that enlarged public representation can make a meaningful contribution to the Board's effectiveness.

Present	*Proposed*
1 Chairman of the Board elected by the membership.	1 Chairman of the Board selected by the Board.
1 Vice Chairman of the Board elected by the membership.	Chairman of the Executive Committee/ Vice Chairman of the Board chosen by the Board from among the 15 elected directors.
1 President selected by the Board.	1 President selected by the Board.
	4 Public directors selected by Chairman of the Board and approved by the Board.
3 Public directors selected by the President and approved by the Board.	6 Floor members* elected by the membership.
6 Floor members* elected by the membership.	6 Off-Floor executive officers* of member firms elected by the membership.
6 Off-Floor executive officers* of member firms elected by the membership.	3 Members who function in any capacity elected by the membership
3 Members who function in any capacity elected by the membership..	
21	21.

*See Section 6.1 of the Exchange Constitution for description of these categories.

The other modification of the Board's composition is the proposed requirement that the six Board members employed by member organizations (two elected each year for 3-year terms) be associated with organizations which are primarliy engaged in doing a public customer business. As now specified, the executive officers of such member organizations do not have to be members themselves (see SR-CBOE-1978-19), and such individuals may not be primarily engaged in

business on the Exchange floor. However, an executive officer of any

filing with respect to the foregoing and all written submissions will be

Pursuant to the procedure which would be formally established by the

such last sale reports will be preceded on the consolidated tape by an indica-

began a phased implementation of the ITS.[7]

The amendments to the Plan are in-

identifiers for less than all market centers reporting transactions in the consolidated system would be discrimi-

business on the Exchange floor. However, an executive officer of any member firm, without regard to the type of business such firm conducts, could now be elected to fill one of these six Board seats. The proposed rule change would assure that those six places on the Board which are reserved for member firm executives are filled by executive officers of organizations whose primary business is acting on behalf of public customers purchasing securities as demonstrated by the totality of an organization's business activities. This proposal will foster a more balanced representation of those member firms responsible for the transmission of public customer orders to the Exchange for excution. Those firms which do not meet the public customer business criteria set forth above will continue to have the same opportuntity as presently exists to seek representation on the Board, for 3 of the 15 member places on the Board may be held by individual members or nominees of member organizations without regard to the type of business conducted by the individual or the organization.

The basis for the proposed rules change is found in section 6(b)(3) of the act which provides for the fair representation of its members in the administration of its affairs and the selection of its directors and that one or more directors be representative of investors. Moreover, section 6(b)(5) of the act is also applicable, for the modifications in the administration of the Exhange as proposed herein will operate to promote just and equitable principles of trade, and protect investors and the public interest.

Comments have been solicited from members pursuant to a Special Meeting of the Membership on October 4, 1978 which resulted in 797 votes in favor of these proposed changes and 94 votes against.

These proposed rules changes do not impose any burden upon competition.

The foregoing rule change has become effective, pursuant to section 19(b)(3) of the Securities Exchange Act of 1934. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before November 20, 1978.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 15253; File No. S7-433]

CONSOLIDATED TAPE ASSOCIATION

Receipt of Amendments to Plan

OCTOBER 20, 1978.

The Consolidated Tape Association (the "CTA") has submitted to the Commission proposed amendments to various sections of the joint industry plan (the "Plan") filed with and declared effective pursuant to Rule 17a-15 [17 CFR 240.17a-15] under the Securities Exchange Act of 1934 (the "Act") governing the consolidated transaction reporting system ("consolidated system"). The Commission is soliciting comments with respect to the proposed amendments.

I. AMENDMENT SUBMITTED ON JANUARY 12, 1978

On January 12, 1978, the CTA submitted to the Commission, and on June 15, 1978, the CTA resubmitted to the Commission, a proposed amendment to section X(a) of the Plan which would establish procedures to be followed in recommending dissemination on a current and continuous basis, of last sale reports for any security eligible for reporting in the consolidated system ("Eligible Security") which is the subject of a regulatory halt.[1] The Plan does not presently contain such a procedure. The procedure to be established by the amendment has been implemented by the Plan participants with the informal concurrence of the Commission's staff.

Pursuant to the procedure which would be formally established by the amendment, the primary market must promptly notify the processor of the Plan when it determines that adequate publication or disclosure of information has occurred so as to permit termination of a regulatory halt (the "First Notice"). No sooner than 15 minutes after receipt of the First Notice, the processor must inlcude on the consolidated tape any indication of interest, or other message, received from the primary market, any other participant or any "other reporting party"[2] which is a national securities exchange, relating to the Eligible Security. In the event that the primary market has caused the processor to include an indication of interest on the consolidated tape with respect to the affected Eligible Security within the 30-minute period (the "Notice Period") following receipt of the First Notice, the processor is required to recommence real time dissemination of last sale reports which are received from any participant or other reporting party which is an exchange after the conclusion of the Notice Period. However, in the event that the primary market does not transmit such an indication of interest to the processor within the Notice Period, the primary market is required to cause the processor to include an administrative message on the consolidated tape within 5 minutes after the expiration of the Notice Period. The administrative message will, in most instances, announce that unusual market conditions exist on the primary market, such as a large influx of orders or an order imbalance in the affected Eligible Security. In such event, the processor is required to recommence real time dissemination of last sale reports in the affected Eligible Security 5 minutes after the printing of the administrative message. Alternatively, the administrative message may announce a continuation of the regulatory halt, in which case dissemination will not recommence until a new first Notice and Notice Period have occurred.

The amendment also includes certain technical modifications to section X(a) of the Plan. It provides that Plan participants may communicate by telephone with the primary market during a regulatory halt to determine the rationale for such halt; however, such communications are required to be kept confidential. In addition, the proposed amendment clarifies the procedures to be followed by the processor in the daily reporting of last sale reports received during a regulatory halt.[3] The amendment provides that

[1] Section X(a) contemplates the announcement of a regulatory halt when the primary market has determined (i) that there are matters relating to an Eligible Security or the issuer thereof which have not been adequately disclosed to the public or (ii) that there are regulatory problems relating to an Eligible Security which should be clarified before trading is permitted to continue.

[2] An "other reporting party" reports last sale transactions in the same manner as Plan participants. However, such an entity has no voting rights under the Plan.

[3] On this date, the Commission has declared effective an amendment to the Plan

Footnotes continued on next page

such last sale reports will be preceded on the consolidated tape by an indication that a regulatory halt is, or was, in effect on the primary market, and the reason for the halt.

II. FIRST AMENDMENT SUBMITTED ON APRIL 5, 1978

On April 5, 1978, the CTA submitted to the Commission a proposed amendment to section XI(c) of the Plan which would reduce charges to vendors for access to the Network A high speed line.[4] If the vendor accesses the Network A high speed line directly the charge would be reduced from $750 to $500 per month. If the vendor accessses the Network A high speed line via another vendor the charge would be reduced from $500 to $250 per month. The reduction in these charges, which reflects decreasing costs to the CTA of disseminating last sale information through the Network A high speed line, was implemented, effective January 1, 1978.

III. SECOND AMENDMENT SUBMITTED ON APRIL 5, 1978

On April 5, 1978, the CTA submitted to the Commission, and on April 25, 1978, the CTA resubmitted to the Commission, proposed amendments to sections V(e), VIII(f), XI(a)(ii) and XI(b)(ii) of the Plan. These amendments have been proposed by the CTA in connection with the implementation of the Intermarket Trading System ("ITS"), a market linkage system providing facilities and procedures for (i) rapid and efficient routing of orders and administrative messages between and among the participants, and (ii) participation, under certain conditions, by all participants in opening transactions in the primary market. The ITS is being implemented pursuant to a plan ("ITS Plan") filed with the Commission on March 9, 1978, by the NYSE, the American Stock Exchange, Inc. ("Amex"), Boston Stock Exchange, Inc., Pacific Stock Exchange, Inc., and Philadelphia Stock Exchange, Inc. On April 14, 1978, the Commission issued an order ("Approval Order") temporarily approving the ITS Plan for a period not to exceed 120 days, pending solicitation of public comment and final consideration of the ITS Plan under Section 11A (a)(3)(B) of the Act,[5] and on April 17, 1978, the participants began a phased implementation of the ITS.[7]

The amendments to the Plan are intended to comply with the terms of a Commission order ("Exemptive Order") issued simultaneously with the Approval Order, granting exemptions from Rule 17a-15 under the Act for a period of 120 days or until the Commission took final action with respect to the ITS Plan, whichever occurred first.[7] The Exemptive Order [8] was issued in response to a request by the participants in the ITS that, in conjunction with the implementation of ITS, the Commission either amend Rule 17a-15 under the Act or issue an exemptive order pursuant to paragraph (h) of the Rule, to permit the dissemination of last sale reports on moving ticker displays without any indication of the market of execution of all transactions effected in any market center which was scheduled to participate or was participating in the ITS (including transactions not effected through, and securities not traded in, that system).[9] In the Exemptive Order, the Commission stated its findings that

> no significant deprivation of market information would occur if moving tickers were permitted to display last sale reports without any market identification.[10]

In addition, the Commission noted that deletion of market identifiers would eliminate reporting disparities between the "primary" exchange markets and other market centers and might avoid tape delays. Therefore, the Commission determined that, during the 120-day period for which temporary ITS approval had been granted, it was not necessary in the public interest or for the protection of investors that last sale reports in eligible securities be accompanied by market identifiers when disseminated in moving ticker displays.

However, the Commission also noted that, in its view, removal of market identifiers for less than all market centers reporting transactions in the consolidated system would be discriminatory and anticompetitive as to those market centers not participating in ITS. Accordingly, although the Commission granted the relief requested (by permitting the CTA and the Securities Industry Automation Corp., the processor of the consolidated system, to report transactions effected in market centers which had agreed to participate in the ITS without market identifiers for dissemination on moving ticker displays), that relief was conditioned on the prompt removal as soon as technically feasible of such identifiers on moving ticker displays for all transactions as to which last sale information is reported in the consolidated system, regardless of the market of execution.[11] The proposed amendments to the Plan are designed to effectuate the terms of the Exemptive Order and otherwise accommodate the implementation of the ITS.

A. AMENDMENT TO SECTION V(e)

Requirements with respect to market identification are currently contained in both section V(e) [12] and VIII(f) of the Plan. The amendments to section V(e) of the Plan would generally consolidate and clarify [13] these requirements and would also include the following substantive changes.

1. *Deletion of market identifier from moving tickers.* The amendment would revise the terms of the Plan to provide that, commencing upon the approval of the ITS Plan by the Commission, all transactions effected in any market center participating in the ITS Plan will be disseminated for moving ticker purposes without market identification. In addition, the amendment would require the deletion of market identifiers from moving ticker displays with respect to all transactions, including those effected in market centers not participating in the ITS Plan, as soon as technically possible.[14]

Footnotes continued from last page

which would establish a procedure for storing and reporting last sale information received by the processor of the Plan during a regulatory halt. Securities Exchange Act Release No. 15252 (Oct. 20, 1978).

[4] Network A disseminates last sale reports of transactions executed in all reporting markets for securities listed on the New York Stock Exchange, Inc. ("NYSE").

[5] See Securities Exchange Act Release No. 14661 (Apr. 14, 1978), 43 FR 17419.

[6] On August 11, 1978, the Commission issued an order extending the Commission's temporary approval of the ITS Plan for an additional 12 months. See Securities Exchange Act Release No. 15058 (Aug. 11, 1978).

[7] See Securities Exchange Act Release No. 14662 (Apr. 14, 1978), 43 FR 17422.

[8] On August 11, 1978, the Commission also issued an order extending the Commission's temporary exemptions from Rule 17a-15 for an additional 12 months. See Securities Exchange Act Release No. 15059 (Aug. 11, 1978).

[9] Rule 17a-15(b) currently provides that: "[e]ach composite tape or interrogation system, in displaying last sale reports, shall identify the marketplace where each transaction was executed." The Rule defines the term "composite tape" to mean a "moving, real-time last sale reporting system."

[10] Exemptive Order, *supra* note 7, 43 FR 17422.

[11] As of April 24, 1978, market identifiers were deleted from moving ticker displays with respect to all transactions, including those effected in market centers not participating in the ITS.

[12] Section V(e) currently sets forth market identification requirements for moving ticker displays. Pursuant to this section, any moving ticker display must indicate the market of execution for each last sale report transmitted for ticker display purposes, except that transactions occurring on the NYSE or Amex are to be "identified" by the absence of any market identifier.

[13] Section VIII(f) of the Plan sets forth market identification requirements with respect to last sale reports disseminated by means of high-speed data transmission lines and displayed on interrogation devices. These requirements are identical to requirements for ticker displays.

[14] Based upon the Approval Order, the CTA has implemented this amendment to

Footnotes continued on next page

2. *Market identification of ITS transactions.* The amendment would

conditions the Applicant was unable to sell any of its shares pursuant to the

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

V 43/210 OCT 30 78

2. *Market identification of ITS transactions.* The amendment would also set forth provisions with respect to market identification of last sale reports effected through the ITS and displayed on interrogation devices. Pursuant to the amendment, last sale reports effected through the operation of ITS would, when transmitted by means of the high-speed line and displayed on interrogation devices, be accompanied by an alphabetic symbol identifying the market in which the ITS transaction was received and accepted.[15] However, the amendment would provide that, as soon as possible, such last sale reports would be accompanied by a symbol or symbols identifying both the market in which the seller was located and the market in which the buyer was located at the time of the ITS transaction.

B. AMENDMENT OF SECTION VIII(f)

Section VIII(f) currently requires that, except to the extent permited by an effective exemption from Rule 17a-15, interrogation devices displaying last sale reports with respect to any Eligible Security must be capable of displaying the most recent last sale report with respect to such security, as disseminated by the processor of the system, accompanied by an identifier as to the market of execution. The amendment would add a new provision to section VIII(f) to permit deletion of market identifiers from consolidated last sale displays (but not individual market displays) available through vendor interrogation devises. Pursuant to the proposed amendment, any interrogation device may be programed in such a fashion that, when queried by the easiest access routine, it will display the most recent sale price (together with the open, high, and low prices) in a particular security without regard to the market in which the sale took place and without identifying the market.[16]

C. AMENDMENTS TO SECTIONS XI(a)(ii) AND XI(b)(ii)

To clarify procedures for allocation of income and expenses associated with the dissemination of last sale reports in the consolidated system, the CTA has proposed amendments to sections XI(a)(ii) and XI(b)(ii) of the Plan which would provide that transactions effected through the ITS would be deemed to have been reported to the processor of the system by the party which supplied the sell side of the transaction.

IV. AMENDMENT SUBMITTED ON SEPTEMBER 5, 1978

On September 5, 1978, the CTA submitted to the Commission several proposed amendments to section XI of the Plan. The amendments are intended to reduce the costs of the regional exchanges which are Plan participants or other reporting parties.

The first of the amendments ("first amendment"), a new paragraph to section XI (c), would eliminate or reduce certain of the charges imposed by the CTA on participants or other reporting parties which are national securities exchanges ("CTA exchanges") for receipt of consolidated last sale information with respect to Eligible Securities. This provision has been implemented by the CTA, effective retroactive to August 1, 1978.

The CTA currently imposes three types of charges on vendors and their subscribers for receipt of last sale information. These charges consist of (i) access charges to cover the cost of operation of the high-speed data transmission lines over which last sale information is transmitted to interrogation devices; (ii) display charges based upon the number of moving tickers and interrogation devices operated by the recipient; and (iii) computer program charges for the right to process last sale information for a variety of purposes. Prior to the implementation of the first amendment, certain of these charges were imposed on CTA exchanges. Display charges related to the use of moving tickers an interrogation devices were imposed on all of such exchanges, and access charges and computer program charges were imposed on certain of such exchanges.

The first amendment would eliminate or reduce certain of these charges. Display charges related to the use of interrogation devices would be eliminated and display charges related to the use of moving tickers would be reduced to a level which would reimburse the CTA for its costs in providing these facilities. The first amendment would also eliminate computer program charges. However, the first amendment would not effect access charges.

The first amendment provides that the elimination of display charges related to the use of interrogation devices and the reduction of display charges related to the use of moving tickers would, however, be conditioned on the participant or other reporting party being subject to, and not in breach of, a contract with the NYSE or the Amex which would require that (i) the consolidated last sale information may be furnished only at premises occupied solely by the Plan participant or other reporting party, or on the trading floor(s) of the participant or other reporting party; (ii) the consolidated last sale information may be used by the participant or the other reporting party solely for regulatory and surveillance purposes or for other purposes specifically approved by the CTA; and (iii) the consolidated last sale information may not be retransmitted from, or otherwise made available to, any person not located within or on such premises or trading floor(s).

The second of the amendments ("second amendment"), a new subsection (d) to section XI, would permit any of the CTA exchanges to enter into an agreement with the Plan processor to use the high-speed line by which the processor disseminates last sale information to vendors for the purpose of disseminating last sale information relating to transactions in securities other than Eligible Securities. No agreement of the type contemplated by the second amendment has as yet been executed.

Currently, the CTA exchanges, at their own expense, transmit to vendors and other persons over high-speed lines last sale information with respect to securities listed solely on regional exchanges which are not Eligible Securities ("regionally listed securities"). The second amendment would permit regional exchanges to report last sale information with respect to regionally listed securities through the facilities of the CTA rather than through existing facilities. The regional exchanges have indicated that the reporting of last sale information with respect to regionally listed securities through the facilities of the CTA may be more efficient and less costly than current methods.

The second amendment provides that a CTA exchange may not enter into the type of agreement contemplated by its terms unless (i) the agreement does not interfere with the implementation of, operations under, and rights and obligations created by, the Plan, and contracts made, and the exercise of authority delegated, pursuant to the Plan; and (ii) the agreement

Footnotes continued from last page

the Plan. All such market identifiers were deleted from moving tickers with respect to ITS participants as of April 17, 1978, and with respect to all last sale reports disseminated in the consolidated system as of April 24, 1978. *See* note 11, *supra.* On this date the Commission is proposing to amend Rule 17a-15 to require the deletion of market identifiers from moving ticker displays. *See* Securities Exchange Act Release No. 15251 (Oct. 20, 1978).

[15] This aspect of the amendment to the Plan has been implemented by the CTA Plan participants with the informal concurrence of the Commission's staff.

[16] The deletion of market identifiers from consolidated last sale displays available on interrogation devices would require an amendment to or exemption from Rule 17a-15 under the Act. On this date the Commission has published for comment proposed Rule 11Ac1-2 under the Act, which would require the deletion of market identifiers from consolidated last sale displays. See Securities Exchange Act Release No. 15251 (Oct. 20, 1978).

does not have any impact on, and is wholly independent of, the provisions of section XI of the Plan and the computations under such section.

V. REQUEST FOR COMMENT

In order to assist the Commission in determining whether to approve the proposed amendments, interested persons are invited to submit their views and comments on these proposals in writing to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549, on or before November 29, 1978. In particular, the Commission is interested in receiving comments concerning the deletion of market identifiers from moving ticker displays and consolidated displays available through vendor interrogation devices. The amendments to the Plan will be available for public inspection in the Commission's public reference room. All such communications should refer to File No. S7-433.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 10449]

MONEY POOLERS INCOME TRUST

Filing of Application

OCTOBER 23, 1978.

Notice is hereby given, that Money Poolers Income Trust ("Applicant"), 518 Beach 140th Street, New York, N.Y. 11694, 811-2523, registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified management investment company, filed an application on November 28, 1977, and an amendment thereto on September 25, 1978, pursuant to section 8(f) of the Act for an order of the Commission declaring that Applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein which are summarized below.

Applicant, organized under the laws of the State of New York, registered under the Act on September 19, 1974. On the same date it filed a registration statement (File No. 2-54403) under the Securities Act of 1933 for the public offer and sale of shares of its capital stock. This registration statement was declared effective on November 25, 1975; however, no shares were ever sold to the public and thus no shares are currently outstanding. The application states that because of economic conditions the Applicant was unable to sell any of its shares pursuant to the public offering.

The application further states that at a special meeting of Applicant's board of trustees held on July 5, 1977, the trustees determined that Applicant should cease to be an investment company and that an application should be filed with the Commission seeking an order of the Commission terminating the Applicant's registration under the Act.

Applicant represents that it has no unpaid expenses or claims against it and that it is not a party to any litigation or administrative proceedings, that no shares have been sold, no assets have been transferred to a separate trust, and that there are no outstanding subscriptions for sale of shares. It also states that steps will be taken upon the receipt of the requested order of the Commission to liquidate and dissolve the trust pursuant to the laws of the State of New York.

Section 8(f) of the Act provides, in pertinent part, that whenever the Commission, on its own motion or upon application, finds that a registered investment company has ceased to be an investment company it shall so declare by order, which order may be subject to appropriate conditions, and upon effectiveness of such order the registration of such company shall cease to be in effect.

Notice is further given, that any interested person may, not later than November 16, 1978 at 5:30 p.m., submit to the Commission in writing a request for hearing on the application accompanied by a statement as to the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit, or in case of any attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application herein will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 34-15257; File No. SR-MSRB-78-12]

MUNICIPAL SECURITIES RULEMAKING BOARD

Self-Regulatory Organizations; Proposed Rule Changes

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(b)(1), notice is hereby given that on October 10, 1978 the abovementioned self-regulatory organization filed with the Securities and Exchange Commission the proposed rule changes as follows:

STATMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGES

The proposed rule changes would effect the following changes in rule G-8:

(1) Subparagraph (E) of rule G-8(a)(xi), which requires municipal securities brokers and municipal securities dealers to maintain a record of the name and address of the employer of each customer, would be deleted.

(2) Subparagraph (I) of rule G-8(a)(xi), which requires municipal securities brokers and municipal securities dealers to maintain a record of whether a customer is employed by another broker, dealer or municipal securities dealer, would be modified to provide that when a customer is so employed the record must also contain the name of his employer.

(3) The proposed rules changes would also make certain related technical changes, including the redesignation of the subparagraphs following subparagraph (E) to reflect its deletion. The text of the proposed rule changes appears below.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule changes are as follows:

PURPOSE OF PROPOSED RULE CHANGES

Rule G-8(a)(xi) currently requires municipal securities brokers and municipal securities dealers to obtain certain basic information from each customer. The Board explained in its initial rule filing relating to rule G-8 (File No. SR-MSRB-76-4) that such information is "necessary to identify the customer, establish the customer's creditworthiness and authority to effect transactions, and demonstrate adequate internal supervision of the

account." On reconsideration of subparagraph (E) of rule G-8(a)(xi), the Board rules G-26 and G-27 will require municipal securities brokers and

account." On reconsideration of subparagraph (E) of rule G-8(a)(xi), the Board has determined that the information required to be obtained under the subparagraph imposes an unnecessary burden on municipal securities brokers and municipal securities dealers and therefore should be deleted from rule G-8. The Board believes that the deletion of the subparagraph will not contravene any of the purposes for requiring customer account information to be obtained and, to the extent that information required by the subparagraph may otherwise be relevant, other Board rules negate the need for it.

The Board's reconsideration of subparagraph (E) was prompted by recent comments received from several members of the municipal securities industry who indicated that they have encountered difficulty in complying with the subparagraph. One of the reasons cited for this difficulty is that information as to the name and address of the customer's employer is not required under the rules of any other self-regulatory organization or the Commission. Accordingly, such information may not be obtained at the time accounts are opened for customers who intend to trade only in corporate securities. Securities firms therefore have to establish special office and recordkeeping procedures to obtain the required information in the event a municipal securities transaction is ever effected for such accounts.

As indicated above, the Board believes that the deletion of subparagraph (E) will not contravene the stated purposes for requiring municipal securities brokers and municipal securities dealers to obtain customer account information. The information required by subparagraph (E) is not necessary to identify the customer since other provisions of rule G-8(a)(xi) accomplish this purpose more directly, and such information is not pertinent to the matter of whether a customer is authorized to effect transactions. Nor does information as to the name and address of a customer's employer provide meaningful information with respect to a customer's creditworthiness. Such information provides little insight, if any, with respect to a customer's financial resources or prospects. Further, to the extent that information regarding a customer's occupation may be tangentially relevant to this question, the Board notes that subparagraph (D) of rule G-8(a)(xi) requires municipal securities brokers and municipal securities dealers to obtain information regarding the occupation of each customer. Adequate internal supervision of customer accounts will not be affected by the deletion of subparagraph (E). In this regard, the Board notes that proposed Board rules G-26 and G-27 will require municipal securities brokers and municipal securities dealers to implement strict supervisory control over customer accounts and transactions in such accounts.

The Board also notes that proposed rule G-19 on suitability of recommendations imposes an affirmative obligation on municipal securities brokers and municipal securities dealers to obtain the necessary information in order to make a determination that a recommendation is suitable for a customer. Accordingly, although the specific identity of a customer's employer may not generally be relevant for such a determination, a municipal securities broker or municipal securities dealer would be required by this rule to obtain such information in those cases in which it may be relevant.

Information concerning a customer's employer will be relevant in the situation in which a customer is employed by another broker, dealer or municipal securities dealer. In such circumstances, a record of the identity of the employer will be necessary for the purpose of compliance with the Board's proposed rule G-28, relating to transactions with employees and partners of other municipal securities professionals. Accordingly, the Board has determined to amend subparagraph G-8(a)(xi)(I) (to be redesignated G-8(a)(xi)(H)) to require the recordation of the identity of an employer if the customer is employed by another broker, dealer or municipal securities dealer.

Basis Under the Act for Proposed Rule Changes

The Board has adopted the proposed rule changes pursuant to section 15B(b)(2)(G) of the Securities Exchange Act of 1934, as amended (the "Act"), which requires and empowers the Board to adopt rules prescribing the records to be made and kept by municipal securities brokers and municipal securities dealers and the periods for which such records shall be preserved.

Comments Received From Members, Participants, or Others on Proposed Rule Changes

Comments were not solicited or received on the proposed rule changes. However, as noted above, the Board received comments from industry members critical of the requirement to obtain for each customer the name and address of the customer's employer.

Burden on Competition

The Board is of the opinion that the proposed rule changes will not impose any burden on competition.

On or before December 4, 1978, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule changes, or

(B) Institute proceedings to determine whether the proposed rule changes should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before November 21, 1978.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,
Secretary.

October 20, 1978.

Text of Proposed Rule Changes [1]

Rule G-8; Books and Records to be Made by Municipal Securities Brokers and Municipal Securities Dealers.

(a) Description of Books and Records Required to be Made. Except as otherwise specifically indicated in this rule, every municipal securities broker and municipal securities dealer shall make and keep current the following books and records, to the extent applicable to the business of such municipal securities broker or municipal securities dealer:

(i) through (x) No change.

(xi) Customer Account Information. A record for each customer, other than an institutional account, setting forth the following information to the extent applicable to such customer:

(A) through (D) No change.

[(E) name and address of employer;]

(E)[(F)] name and address of beneficial owner or owners of such account if other than the customer and transactions are to be confirmed to such owner or owners;

(F)[(G)] signature of municipal securities representative or general securities representative introducing the account and signature of a municipal securities principal or general securities principal indicating acceptance of the account;

(G)[(H)] with respect to discretionary accounts, customer's written authorization to exercise discretionary power or authority with respect to the account, written approval of municipal securities principal who supervises the account, and written approval of municipal securities principal with respect to each transaction in the account, indicating the time and date of approval;

(H)[(I)] whether customer is employed by another broker, dealer, or municipal securities dealer *and, if so, the name of his employer;* and

(I)[(J)] in connection with the hypothecation of the customer's securities, the written authorization of, or the notice provided to, the customer in accordance with Commission rules 8c-1 and 15c2-1.

For purposes of this subparagraph, the terms "general securities representative" and "general securities principal" shall mean such persons as so defined by the rules of a national securities exchange or registered securities association. For purposes of this subparagraph, the term "institutional account" shall mean the account of an investment company as defined in section 3(a) of the Investment Company Act of 1940, a bank, an insurance company, or any other institutional type account. Anything in this subparagraph to the contrary notwithstanding, every municipal securities broker and municipal securities dealer shall maintain a record of the information required by items (A), (C), *(F)*, (G), [(H)] and *(I)*[(J)] of this subparagraph with respect to each customer which is an institutional account.

(xii) No change.

(b) through (g) No change.

October 20, 1978.

[Release No. 15248; SR-MSRB-77-12]

MUNICIPAL SECURITIES RULEMAKING BOARD

Filing of Amended Proposed Rule Change by the Municipal Securities Rulemaking Board and Order Approving That Rule Change

October 19, 1978.

The Municipal Securities Rulemaking Board (the "MSRB"), Suite 507, 1150 Connecticut Avenue NW., Washington, D.C. 20036, submitted on October 17, 1978, an amended proposed rule change under Rule 19b-4 amending proposed rule G-28, which was filed as part of a series of proposed rules and rule amendments previously filed with the Commission (File No. SR-MSRB-77-12). The general purpose of that series is to codify basic standards of fair and ethical business conduct for municipal securities professionals. The Commission today approved, with the exception of the proposed amendment to rule D-8, and proposed rules G-23 and G-28, that series of proposed rules and rule amendments (Securities Exchange Act Release No. 15247 (Oct. 19, 1978)).[1] Proposed rule G-28 was originally filed with the Commission on September 20, 1977 (Securities Exchange Act Release No. 13987 (Sept. 22, 1977), 42 FR 49856 (Sept. 28, 1977)), and previously was amended on February 28, 1978 (Securities Exchange Act Release No. 14519 (Mar. 2, 1978), 43 FR 9672 (Mar. 9, 1978)). Proposed rule G-28 establishes procedures for municipal securities professionals which are opening and maintaining accounts for employees and partners of other municipal securities professionals (or for their spouses or minor children) or effecting transactions in such accounts. The amendment would modify proposed rule G-28 to make it applicable only in the case where the municipal securities professional knows that a customer is an employee or partner or another municipal securities broker or municipal securities dealer, or that the customer is the spouse or minor child of such a person.

The text of proposed rule G-28, as amended, is as follows:

Rule G-28—Transactions With Employees and Partners of Other Municipal Securities Professionals

(a) *Account instructions.* No broker, dealer, or municipal securities dealer shall open or maintain an account in which transactions in municipal securities may be effected for a customer who such broker, dealer, or municipal securities dealers knows is employed by, or the partner of, another municipal securities broker or municipal securities dealer, or for or on behalf of the spouse or minor child of such a person, unless such broker, dealer, or municipal securities dealer first gives written notice with respect to the opening and maintenance of such account to the municipal securities broker or municipal securities dealer by whom such person is employed or of whom such person is a partner.

(b) *Account transactions.* No broker, dealer, or municipal securities dealer shall effect a transaction in municipal securities with or for an account subject to section (a) of this rule unless such broker, dealer, or municipal securities dealer:

(i) Sends simultaneously to the employing municipal securities broker or municipal securities dealer a duplicate copy of each confirmation sent to the customer, and

(ii) Acts in accordance with any written instructions which may be provided to the broker, dealer or municipal securities dealer by an employing municipal securities broker or municipal securities dealer with respect to transactions effected with or for such account.

(c) *Effectiveness.* The requirements of this rule shall become effective on December 18, 1978.

The Commission finds that the proposed rule, as amended, is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the MSRB and, in particular, the requirements of Section 15B and the rules and regulations thereunder. In addition, the Commission finds good cause for approving the proposed rule prior to the thirtieth day after the date of publication of notice of filing of the amendment to the proposed rule. The proposed rule is one of a series of fair practice rules, the majority of which were approved by the Commission earlier today. Approval by this order of proposed rule G-28, will permit brokers, dealers, and municipal securities dealers to implement procedures for compliance with proposed rule G-28 and the other fair practice rules at the same time.

Interested persons are invited to submit written data, views, and arguments concerning the proposed rule change on or before November 20, 1978. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, 500 North Capitol Street, Washington, D.C. 20549. Reference should be made to File No. SR-MSRB-77-12.

Copies of the submission and all subsequent amendments, and copies of all written statements with respect to the proposed rule change which are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of section 552 of Title 5, United States Code, will be available for inspection and copying at the Securities and Exchange Commission's Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of the filing and of any subsequent amendments will also be available at the principal office of the above-mentioned self-regulatory organization.

[1] The Commission deferred for future consideration the proposed amendment to rule D-8, the definition of "bank dealers," which would exclude the fiduciary activities of a bank municipal securities dealer from the scope of MSRB regulation, and proposed rule G-23, which concerns the activities of financial advisors.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the

above-mentioned proposed rule changes be, and they hereby are, ap-

dual listing would fragment the market for such stock.

been mailed. The amount of such late charge shall be fixed from time to time

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule, as amended, be and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01-M]

[Release No. 15247; SR-MSRB-77-12]

MUNICIPAL SECURITIES RULEMAKING BOARD

Order Approving Proposed Rule Changes

On September 20, 1977, the Municipal Securities Rulemaking Board (the "MSRB"), Suite 507, 1150 Connecticut Avenue NW., Washington, D.C. 20036, filed with the Commission, pursuant to section 19(b) of the Securities Exchange Act of 1934 (the "Act"), and Rule 19b-4 thereunder (17 CFR 240.19b-4), a series of 17 proposed rules collectively referred to as the MSRB proposed rules of fair practice. The MSRB filing also included three proposed definitional rules and two proposed amendments to rules currently in effect.

The MSRB's proposed fair practice rules represent a first attempt to codify basic standards of fair and ethical conduct for brokers, dealers, municipal securities dealers, and their associated persons in the municipal securities business. Pursuant to this objective, the proposed omnibus fair practice rule (proposed Rule G-17) would establish the general standard for conduct of a municipal securities business, requiring a municipal securities professional to deal fairly with all persons and not to engage in any deceptive, dishonest, or unfair practice. The other proposed fair practice rules would provide, in essence, an elaboration upon this general standard, by establishing guidelines for particular subject matters such as the suitability of recommendations and transactions, professional advertising, the administration of discretionary and other customer accounts, supervision of employees, the determination of prices and commissions for municipal securities, disclosures in connection with new issue municipal securities, and advertisements of such securities.

The proposed definitional rules which the MSRB included in its filing would define the terms "customer," "discretionary account," and "associated person." The proposed definitions would apply to all MSRB rules, not merely the proposed fair practice rules. The two proposed amendments to current rules would (i) amend the definition of "bank dealer" in MSRB Rule D-8 to exclude from regulation by the MSRB the fiduciary activities of bank municipal securities dealers, except as otherwise explicitly provided by an MSRB rule, and (ii) amend MSRB Rule G-13 concerning quotations to provide that no municipal securities broker or municipal securities dealer shall knowingly misrepresent a quotation relating to municipal securities made by any other broker, dealer, or municipal securities dealer.

The MSRB filed substantive amendments to certain of the proposed rule changes on February 28, 1978, June 30, 1978, and August 23, 1978. Notice of the proposed rule changes, and their amendments, together with the terms of substance thereof, was given by publication of Commission releases (Securities Exchange Act Release Nos. 13987 (Sept. 22, 1977), 14519 (Mar. 2, 1978), 14943 (July 7, 1978), and 15138 (Sept. 7, 1978)) and by publication in the FEDERAL REGISTER (42 FR 49856 (Sept. 28, 1977), 43 FR 9672 (Mar. 9, 1978), 43 FR 30379 (July 14, 1978), and 43 FR 41111 (Sept. 15, 12978)). All written statements with respect to the proposed rule change which were filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person were considered by the Commission and were made available to the public at the Commission's Public Reference Room (File No. SR-MSRB-77-12).

The Commission finds that proposed Rules G-17 through G-22, G-24 through G-27, G-29 through G-33, D-9 through D-11, and the proposed amendment to Rule G-13 are consistent with the requirements of the Act and the rules and regulations thereunder applicable to the MSRB and, and in particular, the requirements of section 15B and the rules and regulations thereunder.[1]

Commission approval of a proposed rule change is based on the limited finding that such proposal is consistent with the Act. Accordingly, the Commission does not necessarily view the formulation of any particular proposed rule change approved by this order as the best formulation for purposes of meeting the MSRB's statutory mandate to propose and adopt rules that shall "be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, * * * and, in general, to protect investors and the public interest * * *."[2] In particular, the Commission intends to consider whether additional disclosure concerning underwriting arrangements should be required. Furthermore, although the Commission views the proposed rules of fair practice approved by this order as a worthwhile initial step towards codifying basic standards of fair and ethical conduct for municipal securities professionals, the Commission understands that the MSRB will continue to study whether it is necessary or appropriate to develop additional rules of fair practice.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the

---

[1] In order to avoid any misinterpretation, it is necessary to clarify the manner in which proposed Rules D-11 and G-18 approved by this order would operate.

Proposed Rule D-11 is a definitional rule which, in general, provides that unless the context otherwise requires or a rule of the MSRB otherwise specifically provides, the terms "broker," "dealer," "municipal securities broker," "municipal securities dealer," and "bank dealer" shall be deemed to include their respective associated persons. Proposed Rule D-11, in its present form, could have an unintended result if applied to associated persons in situations where they perform functions other than those of a broker, dealer, or municipal securities dealer. The MSRB staff has indicated to the Commission staff that it will recommend that the MSRB amend proposed Rule D-11 to clarify that the rule refers to associated persons only to the extent such associated persons are performing, either with or for the municipal securities professional with which they are associated, "municipal securities dealer activities," as defined in Rule G-1(b) of the Board. Although Rule G-1(b) refers to "dealer activities," it includes activities performed by municipal securities brokers and has been used by the MSRB as a general description of the activities of a municipal securities professional. *See* MSRB Rule G-3(a)(i). The Commission is of the opinion that such an amendment would clarify the scope of proposed Rule D-11.

Proposed Rule G-18 requires that a municipal securities professional acting as agent shall make a reasonable effort to obtain a price for the customer that is fair and reasonable. The MSRB has indicated that such a professional may utilize the services of a "broker's broker" to obtain the fair and reasonable price for his customer (File No. SR-MSRB-77-12, p. 9 (Sept. 20, 1977)). It should be noted, however, that if a municipal securities professional uses the services of a "broker's broker," although the rule does not require him to duplicate the efforts of the municipal securities professional, he continues to have a duty to assure that a reasonble effort has been made to obtain a fair and reasonable price. The MSRB has interpreted proposed Rule G-18 to require a municipal securities professional acting as agent for a customer exercise the same high degree of care as the professional would if acting for its own account (File No. SR-MSRB-77-12, p. 8 (Sept. 20, 1977)). Furthermore, common law agency principles would not be effected by Commission approval of MSRB proposed Rule G-18, but would continue to apply to a municipal securities professional acting as agent for a customer (section 28(a) of the Act). Those principles impose a duty upon the agent to obtain the best price discoverable in the exercise of reasonable diligence (*Securities and Exchange Commission, Report of Special Study of Securities Markets,* H. Doc. No. 95, Pt. 2, 88th Cong., 1st Sess. 623, n. 223 (1963)).

[2] Section 15B(b)(2)(C) of the Act.

above-mentioned proposed rule changes be, and they hereby are, approved.

The Commission has determined to defer consideration of the proposed amendment to Rule D-8, the definition of "bank dealer," which would exclude the fiduciary activities of a bank from the scope of MSRB regulation, proposed Rule G-23, which concerns the activities of financial advisors, and proposed Rule G-28, which concerns transactions with employees and partners of other municipal securities professionals.[3]

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc. 78-30500 Filed 10-27-78; 8:45 am]

[8010-01-M]

[File No. 1-4511]

PACIFIC NORTHWEST BELL TELEPHONE CO.

Application to Withdraw From Listing and Registration

OCTOBER 23, 1978.

The above-named issuer has filed an application with the Securities and Exchange Commission, pursuant to section 12(d) of the Securities Exchange Act of 1934 and Rule 12d2-2(d) promulgated thereunder, to withdraw the specified security from listing and registration on the American Stock Exchange, Inc. ("Amex").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

The common stock of Pacific Northwest Bell Telephone Co. (the "Company") has been listed for trading on the Amex since September 14, 1961. On February 17, 1978, the stock was also listed for trading on the New York Stock Exchange, Inc. ("NYSE"). In making the decision to withdraw its common stock from listing and registration on the Amex, the company considered the direct and indirect costs and expenses attendant on maintaining a dual listing on both exchanges. The company does not see any particular advantage in the dual trading of its stock and believes that dual listing would fragment the market for such stock.

The application relates solely to the withdrawal from listing and registration on the Amex and shall have no effect on the continued listing of such common stock on the NYSE. The amex has posed no objection in this matter.

Any interested person may, on or before November 24, 1978, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission will, on the basis of the application and any other information submitted to it, issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01-M]

[Release No. 34-15256; File No. SR-SCCP-78-4]

STOCK CLEARING CORP. OF PHILADELPHIA

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on October 3, 1978, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

TEXT OF PROPOSED RULE CHANGE

The Stock Clearing Corp. of Philadelphia ("SCCP") proposes a new Rule 25 and supplementary material establishing a late charge to be imposed by SCCP on clearing members for delinquent payment of dues, fees, fines, or other charges owed SCCP. The text of the proposed rule and supplementary material follows (italics indicate new material):

Rule 25. There shall be imposed upon any clearing member using the facilities or services of the Clearing Corporation, or enjoying any of the privileges therein, a late charge until payment is received of dues, fees, fines, or other charges imposed by the Clearing Corporation and not paid within thirty (30) days after notice thereof has been mailed. The amount of such late charge shall be fixed from time to time by the Board of Directors. If any clearing member shall fail to pay such dues, fees, fines, or other charge, including late charges, within ninety (90) days after notice thereof has been mailed, the Controller shall so notify the Board of Directors which shall take such action as it may deem appropriate.

** * * Supplementary Material*

The amount of the late charge authorized by Rule 25 has been established at the rate of one percent (1%) per month.

BASIS AND PURPOSE OF PROPOSED RULE CHANGE

The purpose of the proposed rule is to promote efficiency of operation and adequate cash flow for provision of services in a membership organization.

The proposed rule is consistent with the requirement that clearing agency rules provide for equitable allocation of reasonable dues, fees, and other charges among participating members. Delinquent members should not expect to be subsidized indirectly by SCCP and other members whose payments are timely.

SCCP believes that the late charge is an equitable allocation made to encourage uniformity in timely payment. The period allowed for timely payment and the rate of the delinquent charge are in line with standard commercial usage.

No comments have been solicited or received by SCCP regarding the proposed rule change.

SCCP believes that no burden on competition will be imposed by the proposed rule change.

The foregoing rule change has become effective, pursuant to section 19(b)(3) of the Securities Exchange Act of 1934. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate the rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-

[3] The proposed amendment to Rule D-8 raises considerations which have not yet been resolved. Proposed Rule G-23 was recently amended by the MSRB, and the MSRB has requested that the Commission defer consideration of that rule so that action on the other rules filed will not be delayed pending analysis by the Commission and its staff of whatever comments are received with respect to the amendment. Proposed Rule G-28 was amended by an MSRB filing of October 17, 1978, and today was approved by the Commission in a separate release (Securities Exchange Act Release No. 15246 (Oct. 19, 1978)).

[8010-01-M]

[Release No. 34-15258; File No. SR-NASD-78-12]

NATIONAL ASSOCIATION OF SECURITIES DEALERS, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on September 25, 1978, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

TEXT OF NASD'S PROPOSED RULE CHANGE

The following is the full text of the proposed amendment to Schedule D of Article XVI of the bylaws of the National Association of Securities Dealers, Inc. Part IV of Schedule D shall be amended by the addition of section H as follows (new material is italicized):

H. Late Fees.

All NASDAQ Service Charges which are past due for 60 days or more shall be subject to a late fee of 10 percent of the amount past due.

NASD'S STATEMENT ON PURPOSE OF PROPOSED RULE CHANGE

A small number of NASDAQ subscribers fail to make payment in a timely manner. Such failure leads to additional costs for followup procedures and other collection efforts. The Association does not believe that the costs of such collection efforts should continue to be borne by all NASDAQ subscribers, but should be borne by those subscribers who caused them. The proposed amendment establishing a 10 percent late fee on accounts past due 60 days or more is intended to recover the costs of the followup procedures and collection efforts.

NASD'S STATEMENT ON BASIS UNDER THE ACT FOR PROPOSED RULE CHANGE

Section 15A(b)(5) provides that an association of brokers and dealers shall not be registered as a national securities association unless the Commission determines that the rules of the association provide for equitable allocation of reasonable dues, fees, and other charges among members and issuers and other persons using any facility or system which the association operates or controls.

NASD'S STATEMENT ON COMMENTS RECEIVED FROM MEMBERS, PARTICIPANTS, OR OTHERS ON PROPOSED RULE CHANGE

Article XVI, section 3 of the Association's bylaws provides that membership approval of a change in schedule D is not necessary. However, comments from the membership were solicited. Of four comments received, three were unqualifiedly favorable. The fourth comment was generally favorable but indicated some reservation with respect to assessing the late fee on bona fide disputed items. The Association will not assess a late fee in the case of a bona fide dispute.

NASD'S STATEMENT ON BURDEN ON COMPETITION

The Association believes this proposal will not impose a burden on competition.

Within 35 days of the date of publication of this notice in the FEDERAL REGISTER, or within such longer period: (i) As the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding; or (ii) as to which the abovementioned self-regulatory organization consents, the Commission will: (a) By order approve such proposed rule change; or (b) institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six (6) copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before November 14, 1978.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

OCTOBER 20, 1978.

[8010-01-M]

[Release No. 34-15259; File No. SR-NASD-78-15]

NATIONAL ASSOCIATION OF SECURITIES DEALERS, INC.

Self-Regulatory Organizations; Proposed Rule Change

On September 25, 1978, the National Association of Securities Dealers, Inc. ("NASD"), rescinded a rule which had become effective upon filing (SR-NASD-78-9 filed July 25, 1978) pursuant to section 19(b)(3)(A) of the Securities Exchange Act of 1934 and which had increased the variable portion of its annual membership assessment. It simultaneously submitted a new proposal (SR-NASD-78-15) identical in substance to the one submitted as File No. SR-NASD-78-9. That proposal became effective upon filing pursuant to section 19(b)(3)(A) of the Securities Exchange Act of 1934. Thus, the Commission may summarily abrogate it on or before November 24, 1978.

Publication of the original submission was made in 43 FR 37046 (August 21, 1978). Interested persons are invited to submit written data, views and arguments concerning the new submission on or before November 14, 1978. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Reference should be made to File No. SR-NASD-78-15.

Copies of the submission and of all written comments will be available for inspection at the Securities and Exchange Commission's Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of the filing will also be available at the principal office of the NASD.

For the Commission by the division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

OCTOBER 20, 1978.

[Public Notice CM-8/122]

STUDY GROUP 1 OF THE U.S. ORGANIZATION FOR THE INTERNATIONAL TELEGRAPH AND TELEPHONE CONSULTATIVE COMMITTEE (CCITT)

Meeting

The Department of State announces that Study Group 1 of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT) will meet on November 20, 1978 at 10 a.m. in room 856 of the Federal Communications Commission, 1919 M Street, NW., Washington, D.C. This Study Group deals with U.S. Government regulatory aspects of international telegraph and telephone operations and tariffs.

The Study Group will discuss international telecommunications questions relating to telegraph, telex, data, videotex, maritime mobile and leased channel services in order to develop U.S. positions to be taken at international CCITT meetings to be held in December 1978 and during 1979, in Geneva, Switzerland.

Members of the general public may attend the meeting and join in the discussion subject to instructions of the Chairman. Admittance of public members will be limited to the seating available.

Requests for further information should be directed to Mr. Richard H. Howarth, State Department, Washington, D.C. 20520, telephone 202-632-1007.

Dated: October 20, 1978.

RICHARD H. HOWARTH,
Chairman,
U.S. CCITT National Committee.

[Public Notice 636; Delegation of Authority No. 104-12]

ASSISTANT SECRETARY FOR INTERNATIONAL NARCOTICS MATTERS

Delegation of Authority

By virtue of the authority vested in me by section 621(a) of the Foreign Assistance Act of 1961, as amended (75 Stat. 445, 22 U.S.C. 2381), and by section 4 of the Act of May 26, 1949, as amended (63 Stat. 111, 22 U.S.C. 2658), State Department Delegation of Authority No. 104 of November 3, 1961 (26 FR 10608), as heretofore amended, is hereby further amended as follows:

Section 6(b)(5) is amended to read as follows:

"(5) To the Assistant Secretary for International Narcotics Matters:

"(A) Those functions conferred upon the President by section 481 of the Act, together with all those authorities contained in the Act, to the extent necessary or appropriate to accomplish the purposes of Section 481 of the Act: *Provided:* That Department of State procurement for the international narcotics control program shall be carried out in accordance with Department of State Procurement Regulations (41 CFR Chapter 6).

"(B) Those functions conferred upon the Secretary of State by the determination of the President pursuant to section 604(a) of the Act, dated October 18, 1961 (26 FR 10543), and by section 4 of Executive Order 11223 of May 12, 1965 (30 FR 6635).

"(C) The functions of negotiating, concluding and terminating international agreements relating to international narcotics control programs subject to the concurrences required by the State Department Circular 175 Procedure."

This delegation of authority supersedes and cancels Delegation of Authority No. 104-9 of November 16, 1973 (Public Notice 408, 38 FR 34130): *Provided:* That all determinations, authorizations, regulations, rulings, orders, directives, contracts, agreements, and other actions made, issued, or entered into with respect to any function affected by this delegation of authority and not revoked, superseded, or otherwise made inapplicable before the effective date of this delegation of authority shall continue in full force and effect until amended, modified, or terminated by appropriate authority.

Pending appointment of an Assistant Secretary for International Narcotics Matters, the functions delegated herein may be performed by the Senior Advisor for International Narcotics Matters.

Dated: October 12, 1978.

CYRUS R. VANCE,
Secretary of State.

Federal Highway Administration

[FHWA Docket No. 76-9]

BAYONNE BRIDGE, GOETHALS BRIDGE, GEORGE WASHINGTON BRIDGE, AND OUTERBRIDGE CROSSING TOLLS

Order of the Administrator

The Federal Highway Administrator in his order of August 9, 1977, directed the Port Authority of New York and New Jersey (PANYNJ) "to prepare and submit to the Administrator and all parties a comprehensive feasibility study and recommendations for peak-hour charges and the impact that carpooling and commuter discounts have upon congestion" within one year of the date of the final order, November 7, 1977.

The PANYNJ on September 20, 1978, requested an extension of the time to file this feasibility study to January 30, 1979. The request of PANYNJ which states its reasons for the extension was served on all parties of record, and the Administrator by order of September 28, 1978, served notice on all parties for objections to the extension of time for filing this study to be filed with the Administra-

tor by close of business October 13, 1978.

ington, D.C. 20590, telephone 202-426-2872.

but does not significantly alter the closing procedures.

tor by close of business October 13, 1978.

The Administrator has received only one comment on his order of September 28, 1978, and that was from the Environmental Defense Fund stating no objections to the granting of this extension. The Fund indicated that its primary interest in the study is not that it be completed by a specific date, but that it be as comprehensive, well-designed and scientifically reliable as possible.

Wherefore, the Administrator finds that there are no objections to the granting of this extension and the Administrator's decision of August 9, 1977, is hereby amended to direct that the feasibility study for peak-hour charges and the impact that carpooling and commuter discounts have upon congestion shall be filed with the Administrator by January 30, 1979. All other portions of the August 9, 1977, and November 7, 1977, orders shall remain in full force and effect.

Issued this 19th day of October 1978, in Washington, D.C.

KARL S. BOWERS,
Federal Highway Administrator.

National Highway Traffic Safety Administration

NATIONAL HIGHWAY SAFETY ADVISORY COMMITTEE

Public Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463, 5 U.S.C. App. I), notice is hereby given of a meeting of the National Highway Safety Advisory Committee's Highway Safety Data Task Force. This meeting will take place on November 15 and 16 starting at 9 a.m. in room 6200 of the Department of Transportation Headquarters Building.

The Task Force will hear briefings from NHTSA and FHWA on the need for data, its sources and quality, and data systems presently in operation or planned to collect that data.

Attendance is open to the interested public, but limited to the space available. With the approval of the chairperson, members of the public may present oral statements at the meeting. Any member of the public may present a written statement to the Committee at any time.

This meeting is subject to the approval of the appropriate Department of Transportation officials. Additional information may be obtained from the NHTSA Executive Secretary, Room 5215, 400 Seventh Street SW., Washington, D.C. 20590, telephone 202-426-2872.

Issued in Washington, D.C., on October 23, 1978.

WM. H. MARSH,
Executive Secretary.

St. Lawrence Seaway Development Corporation

PROCEDURES FOR CLOSING OF 1978 NAVIGATION SEASON

On April 4, 1978, the St. Lawrence Seaway Development Corporation published in the FEDERAL REGISTER (43 FR 14197) proposed procedures to be implemented during the closing of the 1978 navigation season on the Montreal-Lake Ontario section of the St. Lawrence Seaway. The public was invited to submit comments on those procedures by April 15, 1978. Subsequently, it was decided, after consultation with the Canadian St. Lawrence Seaway Authority, to extend the comment period to May 1, 1978 (43 FR 17089). On August 1, 1978, Seaway Notice Affecting Navigation No. 20 of 1978 was distributed to mariners describing the procedures finally adopted.

The purpose of announcing the closing procedures is to provide for a more orderly end to the navigation season on the St. Lawrence Seaway than has been effected over the past several years and to minimize the operating difficulties and uncertainties encountered both by users of the system and the Seaway entities of the United States and Canada. Additionally, it is hoped that by being made aware of the closing procedures, vessel operators and owners will schedule their end-of-season transits so as to avoid the very real possibility of being trapped in the Seaway system throughout the winter.

Several comments were received in response to the proposed closing procedures. These were jointly reviewed by the Seaway Corporation and the St. Lawrence Seaway Authority of Canada. The procedures have also been discussed with representatives of affected segments of the vessel industry. As a result of the Seaway entities' joint review and discussions with industry representatives, the procedures have been revised as follows:

(1) The reference to December 17 as the official closing date of the Seaway system has been eliminated as it resulted in some confusion.

(2) The identification of the reporting point for vessels transiting downbound has been changed from "CIP Whaleback" to "CIP Crossover Island." This reflects a recent change in Seaway communication procedures but does not significantly alter the closing procedures.

(3) The dollar amounts of the operational surcharge to be assessed those vessels reporting after December 15 at the designated call-in points, and which are able to complete their transits, have been reduced from $25,000 for each day late in reporting with a $100,000 maximum surcharge to $20,000 a day with an $80,000 maximum.

(4) The restrictions dealing with vessel dimensions, draft and horsepower have been substantially revised from those proposed on April 4. Such restrictions will now become effective December 7 rather than December 5 and will be somewhat less stringent than those originally considered. More stringent restrictions will, however, be in effect for transits on and after December 12.

(5) A provision has been added to the procedures which requires that each vessel have sufficient aft draft to fully submerge its propeller.

The closing procedures are being established in the United States by the St. Lawrence Seaway Development Corporation pursuant to authority contained in the Act of May 13, 1954 (33 U.S.C. 981-988).

To provide for an orderly end to the 1978 navigation season for the Montreal-Lake Ontario section, the following procedures are established:

1. Upbound vessels transiting into the Great Lakes and wishing to return downbound through St. Lambert Lock will be accepted for transit at CIP 15, Welland Canal up to 2400 hours, December 6, 1978.

2. Downbound vessels will be accepted for transit at CIP Crossover Island up to 2400 hours, December 15, 1978.

3. Upbound vessels will be accepted for transit at Cap St. Michel up to 2400 hours, December 15, 1978.

4. Vessels which have complied with these call-in procedures will be cleared through the system, operating conditions permitting.

5. Vessels which have not reported at the designated call-in points at Crossover Island and Cap St. Michel may be allowed to transit if, in the sole judgment of the Seaway entities, such transits can be permitted. If such transits are allowed, these transit privileges will be assessed an operational surcharge for the transit as follows:

For vessels reporting on: December 16, 1978, $20,000; December 17, 1978, $40,000; December 18, 1978, $60,000; December 19, 1978; and thereafter, $80,000.

The Seaway entities, in their discretion, may adjust the above dates and corresponding surcharges should circumstances within their operational control so require.

ST. LAMBERT-IROQUOIS SEGMENT

Unique ice conditions are encountered in the St. Lambert-Iroquois Segment. The limits of this Segment are defined as CIP 2 (upbound) and Cardinal (downbound). To reduce the problem of lengthy delays caused by vessels operating in ice, the following restrictions, if necessary, will apply during the 1978 navigation season:

1. From 0001 hours on December 7, vessels in the following categories will not be accepted for transit between St. Lambert and Iroquois Locks:

UPBOUND

(a) Vessels with a power-to-length ratio of less than 20:1 (kW/meter).
(b) Vessels with a forward draft of less than 40 dm.

DOWNBOUND

(a) Vessels with a power-to-length ratio of less than 15:1 (kW/meter).
(b) Vessels with a minimum forward draft of less than 20 dm.

2. From 0001 hours on December 12, vessels in the following categories will not be accepted for transit between St. Lambert and Iroquois Locks:

UPBOUND

(a) Vessels with a power-to-length ratio of less than 24:1 (kW/meter).
(b) Vessels with a forward draft of less than 50 dm.

DOWNBOUND

(a) Vessels with a power-to-length ratio of less than 15:1 (kW/meter).
(b) Vessels with a forward draft of less than 25 dm.

In all cases, the aft draft is to be sufficient to have the propeller fully submerged.

NOTES.—(i) The above draft limitations do not apply to tugs.

(ii) For determining the power-to-length ratio, the information contained in the Lloyd's Registry will be used.

(iii) Vessel operators may utilize a tug of about 3,000 HP to augment the power of a vessel. In calculating the vessel's power-to-length ratio, 50 percent of the tug's horsepower can be added to the vessel's power.

Operators are reminded that the above restrictions are minimum and do not assure transit, and that the Seaway entities will adjust the restrictions as ice conditions may dictate.

Dated: October 24, 1978.

D. W. OBERLIN,
Administrator, St. Lawrence Seaway Development Corporation.

[Department Circular Public Debt Series No. 27-78]

TREASURY BONDS

Series 2003-2008

Washington, October 26, 1978.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of the Second Liberty Bond Act, as amended, invites tenders for approximately $1,750,000,000 of the United States securities, designated Treasury Bonds of 2003-2008 (CUSIP No. 912810 CE 6). The securities will be sold at auction with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued to Government accounts and Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts may also be issued for cash to Federal Reserve Banks as agents of foreign and international monetary authorities.

2. Description of Securities

2.1. The securities will be dated November 15, 1978, and will bear interest from that date, payable on a semiannual basis on May 15, 1979, each subsequent 6 months on November 15 and May 15, until the principal becomes payable. They will mature on November 15, 2008, but may be redeemed at the option of the United States on and after November 15, 2003, in whole or in part, at par and accrued interest on any interest payment date or dates, on 4 months' notice of call given in such manner as the Secretary of the Treasury shall prescribe. In case of partial call, the securities to be redeemed will be determined by such method as may be prescribed by the Secretary of the Treasury. Interest on the securities called for redemption shall cease on the date of redemption specified in the notice of call.

2.2 The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any possession of the United States, or any local taxing authority.

2.3. The securities will be acceptable to secure deposits of public moneys. They will not be acceptable in payment of taxes.

2.4. Bearer securities with interest coupons attached, and securities registered as to principal and interest, will be issued in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of coupon, registered and book-entry securities, and the transfer of registered securities will be permitted.

2.5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., Eastern Standard time, Thursday, November 2, 1978. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Wednesday, November 1, 1978.

3.2. Each tender must state the face amount of securities bid for. The minimum bid is $1,000 and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.11 percent. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender and

the amount may not exceed $1,000,000.

3.3. All bidders must certify that they have not made and will not make any agreements for the sale or purchase of any securities of this issue prior to the deadline established in section 3.1. for receipt of tenders. Those authorized to submit tenders for the account of customers will be required to certify that such tenders are submitted under the same conditions, agreements, and certifications as tenders submitted directly by bidders for their own account.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are only permitted to submit tenders for their own account.

3.5. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by a deposit of 5 percent of the face amount of securities applied for (in the form of cash, maturing Treasury securities or readily collectible checks), or by a guarantee of such deposit by a commercial bank or a primary dealer.

3.6. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, a coupon rate will be established, on the basis of a one-eighth of 1 percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 92.500. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will only be notified if the tender is not accepted in full, or when the price is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in section 1, and to make different percentage allotments to various classes of applicant when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1. Settlement for allotted securities must be made or completed on or before Wednesday, November 15, 1978, at the Federal Reserve bank or branch or at the Bureau of the Public Debt, wherever the tender was submitted. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing U.S. securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received at such institution no later than:

(a) Thursday, November 9, 1978, if the check is drawn on a bank in the Federal Reserve District of the institution to which the check is submitted (the Fifth Federal Reserve District in case of the Bureau of the Public Debt), or

(b) Wednesday, November 8, 1978, if the check is drawn on a bank in another Federal Reserve District.

Checks received after the dates set forth in the preceding sentence will not be accepted unless they are payable at the applicable Federal Reserve bank. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment is not completed on time, the deposit submitted with the tender, up to 5 percent of te face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered as deposits and in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." If new securities in coupon form are desired, the assignment should be to "The Secretary of the Treasury for coupon (securities offered by this circular) to be delivered to (name and address)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to Federal Reserve bank or branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5.4. If bearer securities are not ready for delivery on the settlement date, purchasers may elect to receive interim certificates. These certificates shall be issued in bearer form and shall be exchangeable for definitive securities of this issue, when such securities are available, at any Federal Reserve bank or branch or at the Bureau of the Public Debt, Washington, D.C. 20226. The interim certificates must be re-

turned at the risk and expense of the

ties. Additional amounts may also be

on the tender form in lieu of a specified yield. No bidder may submit more

close to 100.000 and a lowest accepted price above the original issue discount limit of 92.500. That rate of interest

turned at the risk and expense of the holder.

5.5. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, to receive payment for and make delivery of securities on full-paid allotments, and to issue interim certificates pending delivery of the definitive securities.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

Paul H. Taylor,
Fiscal Assistant Secretary.

Treasury Securities—Treasury Announces Auction of 3½-Year Notes, 10-Year Notes, and 30-Year Bonds

Supplementary Statement

The announcement set forth above does not meet the Department's criteria for significant regulations and, accordingly, may be published without compliance with the Departmental procedures applicable to such regulations.

[Department Circular Public Debt Series—No. 26-78]

TREASURY NOTES OF NOVEMBER 15, 1988

Series B-1988

Washington, October 26, 1978.

1. Invitation For Tenders

1.1. The Secretary of the Treasury, under the authority of the Second Liberty Bond Act, as amended, invites tenders for approximately $2,500,000,000 of United States securities, designated Treasury Notes of November 15, 1988, Series B-1988 (CUSIP No. 912827 JE 3). The securities will be sold at auction with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued to Government accounts and Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts may also be issued for cash to Federal Reserve Banks as agents of foreign and international monetary authorities.

2. Description of Securities

2.1. The securities will be dated November 15, 1978, and will bear interest from that date, payable on a semiannual basis on May 15, 1979, and each subsequent 6 months on November 15 and May 15, until the principal becomes payable. They will mature November 15, 1988, and will not be subject to call for redemption prior to maturity.

2.2. The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any possession of the United States, or any local taxing authority.

2.3. The securities will be acceptable to secure deposits of public moneys. They will not be acceptable in payment of taxes.

2.4. Bearer securities with interest coupons attached, and securities registered as to principal and interest, will be issued in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of coupon, registered and book-entry securities, and the transfer of registered securities will be permitted.

2.5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve banks and branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., Eastern Standard time, Wednesday, November 1, 1978. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Tuesday, October 31, 1978.

3.2. Each tender must state the face amount of securities bid for. The minimum bid is $1,000 and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.11 percent. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender and the amount may not exceed $1,000,000.

3.3. All bidders must certify that they have not made and will not make any agreements for the sale or purchase of any securities of this issue prior to the deadline established in Section 3.1. for receipt of tenders. Those authorized to submit tenders for the account of customers will be required to certify that such tenders are submitted under the same conditions, agreements, and certifications as tenders submitted directly by bidders for their own account.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are only permitted to submit tenders for their own account.

3.5. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by a deposit of 5 percent of the face amount of securities applied for (in the form of cash, maturing Treasury securities or readily collectible checks), or by a guarantee of such deposit by a commercial bank or a primary dealer.

3.6. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, a coupon rate will be established, on the basis of a one-eighth of 1 percent increment, which results in an equivalent average accepted price

close to 100.000 and a lowest accepted price above the original issue discount limit of 97.500. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will only be notified if the tender is not accepted in full, or when the price is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1. Settlement for allotted securities must be made or completed on or before Wednesday, November 15, 1978, at the Federal Reserve bank or branch or at the Bureau of the Public Debt, wherever the tender was submitted. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received at such institution no later than:

(a) Thursday, November 9, 1978, if the check is drawn on a bank in the Federal Reserve District of the institution to which the check is submitted (the Fifth Federal Reserve District in case of the Bureau of the Public Debt), or

(b) Wednesday, November 8, 1978, if the check is drawn on a bank in another Federal Reserve District.

Checks received after the dates set forth in the preceding sentence will not be accepted unless they are payable at the applicable Federal Reserve Bank. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment is not completed on time, the deposit submitted with the tender, up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered as deposits and in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." If new securities in coupon form are desired, the assignment should be to "The Secretary of the Treasury for coupon (securities offered by this circular) to be delivered to (name and address)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve bank or branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5.4. If bearer securities are not ready for delivery on the settlement date, purchasers may elect to receive interim certificates. These certificates shall be issued in bearer form and shall be exchangeable for definitive securities of this issue, when such securities are available, at any Federal Reserve bank or branch or at the Bureau of the Public Debt, Washington, D.C. 20226. The interim certificates must be returned at the risk and expense of the holder.

5.5. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, to receive payment for and make delivery of securities on full-paid allotments, and to issue interim certificates pending delivery of the definitive securities.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

Paul H. Taylor,
Fiscal Assistant Secretary.

foreign and international monetary authorities.

2. DESCRIPTION OF SECURITIES

2.1. The securities will be dated November 15, 1978, and will bear interest from that date, payable on a semiannual basis on May 15, 1979, and each subsequent 6 months on November 15 and May 15, until the principal becomes payable. They will mature May 15, 1982, and will not be subject to call for redemption prior to maturity.

2.2. The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any possession of the United States, or any local taxing authority.

2.3. The securities will be acceptable to secure deposits of public moneys. They will not be acceptable in payment of taxes.

2.4. Bearer securities with interest coupons attached, and securities registered as to principal and interest, will be issued in denominations of $5,000, $10,000, $100,000, and $1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of coupon, registered and book-entry securities, and the transfer of registered securities will be permitted.

2.5. The Department of the Treasury's general regulations governing U.S. securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. SALE PROCEDURES

3.1. Tenders will be received at Federal Reserve banks and branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., e.s.t., Tuesday, October 31, 1978. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Monday, October 30, 1978.

3.2. Each tender must state the face amount of securities bid for. The minimum bid is $5,000 and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.11 percent. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender and the amount may not exceed $1,000,000.

3.3. All bidders must certify that they have not made and will not make any agreements for the sale or purchase of any securities of this issue prior to the deadline established in section 3.1. for receipt of tenders. Those authorized to submit tenders for the account of customers will be required to certify that such tenders are submitted under the same condlitions, agreements, and certifications as tenders submitted directly by bidders for their own account.

3.4. Commercial banks, which for this purpose are definded as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are only permitted to submit tenders for their own account.

3.5. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve banks; and Government accounts. Tenders from others must be accompanied by a deposit of 5 percent of the face amount of securities applied for (in the form of cash, maturing Treasury securities or readily collectible checks), or by a guarantee of such deposit by a commercial bank or a primary dealer.

3.6. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, a coupon rate will be established, on the basis of one-eighth of 1 percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 99.250. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will only be notified if the tender is not accepted in full, or when the price is over par.

4. RESERVATION

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this section is final.

5. PAYMENT AND DELIVERY

5.1. Settlement for allotted securities must be made or completed on or before Wednesday, November 15, 1978, at the Federal Reserve bank or branch or at the Bureau of the Public Debt, wherever the tender was submitted. Payment must be cash; in other funds immediately available to the Treasury; in Treasury bills, notes or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing U.S. securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received at such institution no later than:

(a) Thursday, November 9, 1978, if the check is drawn on a bank in the Federal Reserve District of the institution to which the check is submitted (the Fifth Federal Reserve District in case of the Bureau of the Public Debt), or

(b) Wednesday, November 8, 1978, if the check is drawn on a bank in another Federal Reserve District.

Checks received after the dates set forth in the preceding sentence will not be accepted unless they are payable at the applicable Federal Reserve bank. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment is not completed on time, the deposit submitted with the tender, up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forefeited to the United States.

5.3. Registered securities tendered as deposits and in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." If new securities in coupon form are desired, the assignment should be to "The Secretary of the Treasury for coupon (securities offered by this circular) to be delivered to (name and address)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve bank or branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5.4. If bearer securities are not ready for delivery on the settlement date, purchasers may elect to receive interim certificates. These certificates shall be issued in bearer form and shall be exchangeable for definitive securities of this issue, when such securities are available, at any Federal Reserve bank or branch or at the Bureau of the Public Debt, Washington, D.C. 20226. The interim certificates must be returned at the risk and expense of the holder.

5.5. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. GENERAL PROVISIONS

6.1. As fiscal agents of the United States, Federal Reserve banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, to receive payment for and make delivery of securities on full-paid allotments, and to issue interim certificates pending delivery of the definitive securities.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

PAUL H. TAYLOR,
Fiscal Assistant Secretary.

SUPPLEMENTARY STATEMENT

The announcement set forth above does not meet the Department's criteria for significant regulations and, accordingly, may be published without compliance with the Departmental procedures applicable to such regulations.

[M-172, Amdt. 3; Oct. 25, 1978]

CIVIL AERONAUTICS BOARD.

Notice of addition of item to the October 26, 1978, agenda.

TIME AND DATE: 10 a.m., October 26, 1978.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: 3a. Docket 26291, Petition for immediate restoration of adequate air service for American Samoa (Memo 7651-D, BPDA, BIA, BCP, OCCR, OGC).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: The Board in its closed meeting on October 24, 1978, voted to add this item to the October 26, 1978, agenda in order to hold discussion of adequacy aspects in public session as soon as possible. Accordingly, the following Members voted on October 24, 1978, that agency business requires the addition of item 3a to the October 26, 1978, agenda and that no earlier announcement of this addition was possible:

Member, Elizabeth E. Bailey
Member, Gloria Schaffer
Member, Marvin S. Cohen

All amemdments to previously announced agendas are publicly posted at the Board's offices, sent to the FEDERAL REGISTER for publication, and mailed to parties to docketed cases affected by the change. We regret any inconvenience that may be caused by these changes or the delayed receipt of our notices.

[6320-01-M]

4

[M-173, Amdt. 3, Oct. 24, 1978]

CIVIL AERONAUTICS BOARD.

Notice of addition of item to the October 24, 1978, agenda.

TIME AND DATE: 2 p.m., October 24, 1978.

PLACE: Room 1011, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: (6) BIA briefing concerning ongoing consultations with the Netherlands and proposed ad referendum agreement with Peru.

STATUS: Closed.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: This meeting will concern the Board's view about implementation of U.S. policies in Dutch and Peruvian negotiations. Public disclosure, particularly to foreign governments with whom the United States is or will be negotiating, of the opinions, evaluations, and strategies of the Board and its staff could seriously compromise the ability of the U.S. Delegations to achieve agreements which would be in the best interests of the United States. Accordingly, the following Members have voted that public observation of this item would involve matters the premature disclosure of which would be likely to significantly frustrate implementation of proposed agency action within the meaning of the exemption provided under 5 U.S.C. 552b(c)(9)(B) and 14 CFR 310b.5(9)(B) and that the meeting on this item will be closed.

Chairman, Alfred E. Kahn
Member, Elizabeth E. Bailey
Member, Gloria Schaffer
Member, Marvin S. Cohen

On Saturday, October 21, 1978, negotiations with Peru were recessed. The Department of State orally requested the Board's views on the next steps the United States should take with respect to these negotiations as soon as possible in order that the Department of State may quickly respond to the Peruvian Government. The Director of BIA received a phone call from the U.S. Delegation Chairman to the Dutch negotiations in the Hague on October 24. The chairman requested the Board's views on the course of action that should be taken with respect to these negotiations prior to the next session on the morning of October 25. Accordingly, the following Members have voted that agency business requires the addition of this item to the October 24, 1978, agenda and that no earlier announcement of this addition was possible:

Chairman, Alfred E. Kahn
Member, Elizabeth E. Bailey
Member, Gloria Schaffer
Member, Marvin S. Cohen

PERSONS EXPECTED TO ATTEND

See M-173 dated 10-20-78.

GENERAL COUNSEL CERTIFICATION

I certify that this meeting may be closed to the public under 5 U.S.C. 552b(c)(9)(B) and 10 and 14 CFR Section 410b.5(9)(B) and (10) and that the meeting may be closed to public observation.

PHILIP J. BAKES, Jr.,
General Counsel.

All amendments to previously announced agendas are publicly posted at the Board's offices, sent to the Federal Register for publication, and mailed to parties to docketed cases affected by the change. We regret any inconvenience that may be caused by these changes or the delayed receipt of our notices.

OCTOBER 26, 1978.

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION.

TIME AND DATE: Wednesday, October 25, 1978, 11 a.m.

PLACE: Room 610, 1730 K Street NW., Washington, D.C. 20006.

STATUS: Closed (pursuant to 5 U.S.C. 552b(c)(10)).

MATTER CONSIDERED: Grundy Mining Co., 78-3424 (6th Cir. filed August 3, 1978). This meeting involved the Commission's participation in a civil action.

VOTE: Voting to close the meeting: Commissioners Waldie (Chairman), Jestrab, Lawson, and Nease. It was determined by this vote that Commission business required that this meeting be closed. Further, the Commission members voted to hold the meeting immediately on the basis that agency business so required and to issue public notice as soon as practicable.

ATTENDANCE: Present at the meeting were: Commissioners Waldie (Chairman), Jestrab, Lawson, and Nease; Al Treherne; Robert Phares; Mary Masulla; General Counsel Robert Pleasure; and Gerry Dixon, Secretary.

CONTACT PERSON FOR MORE INFORMATION:

Office of Executive Director, 202-653-5644.

CERTIFICATION OF CLOSED MEETING

The General Counsel, in accordance with section 3(f)(1) of the Government in the Sunshine Act (5 U.S.C. 552b(f)(1)), hereby certifies that the Commission meeting of October 25, 1978, at which the Commission discussed a civil action (Grundy Mining Co., No. 78-3424 6th Cir. filed August 3, 1978) was properly closed to the public on the basis of the exemption set forth in 5 U.S.C. 552b(c)(10).

ROBERT PLEASURE,
General Counsel.

11

SECURITIES AND EXCHANGE COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 43 FR 49109, October 20, 1978.

STATUS: Open meeting; closed meeting.

DATE AND TIME: Wednesday, October 25, 1978, 10 a.m.

PLACE: Room 825, 500 North Capitol Street, Washington, D.C.

The following item will not be considered by the Commission at the open meeting scheduled for Wednesday, October 25, 1978, at 10 a.m., but has been rescheduled for consideration on Wednesday, November 1, 1978:

Consideration of whether or not to approve proposed rules submitted by the Securities Investor Protection Corporation setting forth requirements for the closeout or completion of open contractual commitments. For further information, please contact Linda Kurjan at 202-755-7470.

The following items will be considered by the Commission at a closed meeting scheduled for Wednesday, October 25, 1978, immediately following the 10 a.m. open meeting:

Access to investigative files by Federal, State or self-regulatory authorities.
Formal order.
Other litigation matters.
Subpena enforcement actions.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meeting may be considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)(A), and (10) and 17 CFR 200.402 (a) (8), (9)(i), and (10).

Chairman Williams and Commissioners Loomis, Evans, Pollack, and Karmel determined that Commission business required consideration of these matters and that no earlier notice thereof was possible.

OCTOBER 24, 1978.

12

SECURITIES AND EXCHANGE COMMISSION.

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of October 30, 1978, in Room 825, 500 North Capitol Street, Washington, D.C.

An open meeting will be held on Wednesday, November 1, 1978, at 10 a.m. Closed meetings will be held on Tuesday, October 31, 1978, at 10 a.m., and on Wednesday, November 1, 1978, immediately following the 10 a.m. open meeting.

The Commissioners, their legal assistants, the Secretary of the Commission, and recording secretaries will attend the closed meetings. Certain staff members who are responsible for the calendared matters may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meetings may be considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)(A), and (10) and 17 CFR 200.402(a) (8), (9)(i), and (10).

Chairman Williams and Commissioners Loomis, Evans, Pollack, and Karmel determined to hold the aforesaid meetings in closed session.

The subject matter of the closed meeting scheduled for Tuesday, October 31, 1978, at 10 a.m., will be:

Access to investigative files by Federal, State or self-regulatory authorities.
Formal order of investigation.
Freedom of Information Act appeal.
Institution of administrative proceedings of an enforcement nature.
Institution of injunctive actions.
Order compelling testimony.
Settlement of administrative proceedings of an enforcement nature.
Settlement of injunctive action.
Other litigation matters.

The subject matter of the open meeting scheduled for Wednesday, November 1, 1978, at 10 a.m., will be:

1. Consideration of the application of John R. Patterson asking permission for him to become associated with Offerman & Co., Inc., a registered broker-dealer, as a registered representative in a nonsupervisory, nonproprietary capacity with adequate supervision. For further information, please contact David P. Tennant at 202-376-2036.

2. Consideration of an application filed by Claremont Capitol Corp., a nondiversified closed-end, management investment company registered under the Investment Company Act of 1940 (the "Act"), and Mr. Allen H. Parkinson, the Chairman of the Board of Infoton, Inc., pursuant to section 17(b) of the Act requesting an order of the Commission exempting the proposed sale by Claremont to Mr. Parkinson of 237,500 shares of common stock of Infoton at approximately $0.63 per share from the provisions of section 17(a) of the Act. For further information, please contact Glen A. Payne at 202-755-1739.

3. Consideration of whether or not the Commission should: (1) Issue notice of an application filed by Foster Management Co. for an order pursuant to section 206A of the Investment Advisers Act of 1940 and (2) authorize its Secretary to issue an order "By the Commission" granting the application, if no requests for a hearing are received. For further information, please contact Mark J. Mackey at 202-755-1547.

4. Consideration of the issuance of an interpretative release reflecting the views of its Division of Investment Management with respect to rule 13f-1 and related form 13F under the Securities Exchange Act of 1934. For further information, please contact Mark J. Mackey at 202-755-1547.

5. Consideration of whether or not to adopt an amendment to rule 6 of the Commission's Rules of Practice to specify which persons should receive notice of Commission stop order proceedings. For further information, please contact Linda Griggs at 202-755-1803.

6. Consideration of a proposed release announcing (1) the adoption of revised guidelines for the disclosure of projections of future economic performance, and (2) the proposal of rules that would provide a "safe-harbor" from the liability provisions of the Federal securities laws for projections that are prepared with a reasonable basis and disclosed in good faith. For further information, please contact Steven J. Paggioli at 202-376-8090.

7. Consideration of whether or not to approve proposed amendments to rules relating to the form of filings received by the Commission under the Federal securities laws whereby all such filings will be numbered sequentially from the first page of the filing through the last page of any exhibit or attachment thereto. For further information, please contact Roderic L. Woodson at 202-523-5530.

The subject matter of the closed meeting scheduled for Wednesday, November 1, 1978, immediately following the 10 a.m. open meeting, will be:

Litigation matters.
Freedom of Information Act appeal.

FOR FURTHER INFORMATION, PLEASE CONTACT:

Beverly C. Rubman at 202-755-1103.

AIRWORTHINESS REVIEW PROGRAM AMENDMENT NO. 7

Airframe Amendments; Final Rule

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The purpose of these amendments to the Federal Aviation Regulations is to update and improve the airframe and crashworthiness standards applicable to the type certification of aircraft, and to make related changes to the operating rules contained in Part 121. These amendments are part of the Airworthiness Review Program.

EFFECTIVE DATE: December 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Adolfo O. Astorga, Airworthiness Review Branch (AFS-910), Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone 202-755-8714.

SUPPLEMENTARY INFORMATION: These amendments are the seventh in a series of amendments to be issued as part of the Airworthiness Review Program. The following amendments have previously been issued as part of this Airworthiness Review Program:

Title—FR citation

Form number and clarifying revisions (40 FR 2576; Jan. 14, 1975).
Rotorcraft anticollision light standards (41 FR 5290; Feb. 5, 1976).
Miscellaneous amendments (41 FR 55454; Dec. 20, 1976).
Powerplant amendments (42 FR 15034; Mar. 17, 1977).
Equipment and systems amendments (42 FR 36960; July 18, 1977).
Flight amendments (43 FR 2302; Jan. 16, 1978).

The amendments now being issued are based on five Notices of Proposed Rulemaking—Notice 75-10, published in the FEDERAL REGISTER on March 7, 1975 (40 FR 10802); Notice 75-19 published in the FEDERAL REGISTER on May 19, 1975 (40 FR 21866); Notice 75-23 published in the FEDERAL REGISTER on May 27, 1975 (40 FR 23048); Notice 75-26 published in the FEDERAL REGISTER on June 10, 1975 (40 FR 24802); and Notice 75-31 published in the FEDERAL REGISTER on July 11, 1975 (40 FR 29410).

The amendments based on Notice 75-10 were deferred in the series of amendments titled "Miscellaneous Amendments" so that they could be considered with the final disposition of certain proposals in Notices 75-23, 75-26, and 75-31. The amendments based on Notice 75-19 were deferred in the series of amendments titled "Powerplant Amendments" so that they could be considered with the final disposition of certain proposals in Notice 75-31. The amendments based on Notice 75-23, including the related amendments based on Notice 75-10, were deferred in the series of amendments titled "Equipment and Systems Amendments" for further consideration and review.

The amendments based on Notice 75-31, and the related amendments based on Notices 75-10, and 75-19, implement the rotorcraft proposals or parallel proposals for the other aircraft airworthiness Parts. These proposals were brought forward for consideration with the final disposition of the proposals in Notice 75-26 in order to dispose of all the outstanding rotorcraft proposals and allow the announcement of a rotorcraft regulatory review. The discussions of the comments received for the deferred proposals from Notice 75-10 are included under the heading of the related proposals from Notices 75-23, 75-26, and 75-31. The discussions of the comments received for the deferred proposals from Notice 75-19 are included under the heading of the related proposals from Notice 75-31.

Interested persons have been afforded an opportunity to participate in the making of these amendments and due consideration has been given to all matter presented. A number of substantive changes and changes of an editorial and clarifying nature have been made to the proposed rules based upon relevant comments received and upon further review within the FAA. Except for minor editorial and clarifying changes and the substantive changes discussed below, these amendments and the reasons for them are the same as those contained in Notices 75-10, 75-19, 75-23, 75-26, and 75-31.

DISCUSSION OF COMMENTS

The following discussion is keyed to like-numbered proposals contained in Notices 75-23, 75-26, and 75-31, and is presented in the same order as the corresponding amendments to be found in the rules portion of this document.

Proposal 7-1. One commentator recommended that the 25 feet per second head-on gust requirement in proposed § 23.345(c) be deleted because there had been no recorded failures of any flaps or flap structure attributed to head-on gusts and the proposal would increase the power-off flap loads. The FAA believes that a majority of the recorded flap and flap support structural failures resulted from head-on gusts. The amendment to § 23.345(c) is adopted without substantive change.

Based on the comments received and upon further review within the FAA, the proposal for new § 23.345(f) is withdrawn.

Proposal 7-2. One commentator objected to the proposal to amend § 23.561(b)(2) to require a 3.0g rearward ultimate inertial load for seat attachment design. The commentator stated that it is unreasonable to expect rearward inertia forces that are twice the sideward and equal to upward inertia forces. Upon further review, the FAA believes that it does not have enough information at this time to specify the minimum value to be used as a rearward ultimate inertia force. The proposal is withdrawn. However, the proposal to add a new § 23.785(h) concerning seat track retention is adopted. See Proposal 7-11.

Proposal 7-3. Several commentators objected to the proposal to amend § 23.603 and to similar proposals to amend §§ 25.603, 27.603, and 29.603. These proposals would require the applicant to show that the materials used for safety-critical parts will maintain their design properties throughout their service lives, taking into consideration the environmental considerations expected in service. The commentators stated that there is no satisfactory means of showing compliance for many materials. The limiting factors in achieving this objective were stated to be as follows: (1) A complete definition of the operating environment; (2) an understanding of interactive effects; and (3) test methods which correlate with service. After consideration of the comments received, and after further review of the materials used on modern aircraft, the FAA agrees that there may be significant difficulties in developing means to show compliance with the proposed amendments. The FAA believes, however, that the design characteristics of some materials used on aircraft may be affected by environmental conditions and that, where such materials are used in safety-critical parts, the effects of the environment upon them must be considered. The FAA further believes that the term "environmental conditions" should be clarified.

Accordingly, the proposals to add new §§ 23.603(a)(3), 25.603(c), 27.603(c), and 29.603(c) are revised to require only that the suitability and durability of materials used for safety-critical parts must take into account the effects of environmental conditions,

such as temperature and humidity, expected in service.

Two commentators, while agreeing with the proposal for § 25.603, stated that the proposed requirement should apply also to fabrication methods. The FAA does not have any information at this time to indicate that the change recommended by these commentators is necessary, and the commentators did not provide any. These commentators also suggested that the term "design values" be substituted for the proposed term "design properties" to let the designer anticipate deterioration. The FAA believes that the change suggested by these commentators is unnecessary in view of the revision made in the rule as adopted.

Two commentators stated that the proposal for § 27.603(c) is not needed since the proposed requirements appear to be covered in present §27.609. The FAAS does not agree. Section 27.609 requires that each part of the structure must be protected from deterioration or loss of strength in service due to any cause, including weathering, corrosion, and abrasion, and it further requires provisions for ventilation and drainage where necessary for protection. Proposed new § 27.603(c) is concerned with the suitability of materials which may undergo changes in design characteristics, regardless of the degree of protection that is provided them.

One commentator objected to the proposal for § 27.603, stating that the subject material is adequately covered in §§ 27.613 and 27.619. The FAA does not agree. The practical effect of § 27.613 is to require that the effects of temperature on certain allowable stresses be considered where thermal effects are significant under normal operating conditions. Section 27.619 requires that special factors of safety be applied for each part of the structure whose strength is uncertain, likely to deteriorate in service before normal replacement, or subject to appreciable variability because of uncertainties in manufacturing processes or inspection methods. The FAA believes that §§ 27.613 and 27.619 do not specifically provide for the long-term behavior of certain modern construction materials and that the proposals to amend §§ 23.603, 25.603, 27.603, and 29.603 are necessary.

Proposal 7-4. For comments concering the subject matter of the proposal to amend § 23.605, see Proposal 7-29. The proposal is adopted without substantive change.

Proposal 7-5. No unfavorable comments were received on the proposal to amend § 23.613(c). Accordingly, the proposal is adopted without substantive change.

Proposal 7-6. One commentator objected to the wording of proposed § 23.629(a) which states, "It must be shown by any one of the methods specified in paragraphs (b), (c), or (d) of this section that the airplane is free from flutter * * *" The commentator recommended that proposed § 23.629(a) be revised to clarify that combinations of the methods in proposed §§ 23.629 (b), (c), and (d) may be used to show freedom from flutter. The FAA agrees, and the proposal is revised accordingly. The commentator also recommended that proposed § 23.629(a) be revised to clarify that the flutter substantiation requirements of proposed § 23.629 are not applicable to minor structural items such as fairings, lights, and antennas which will not affect safety of flight. The FAA does not agree. The FAA believes that flutter in minor structural items can have an adverse effect upon safety of flight.

One commentator questioned who decides which of the methods specified in paragraphs (b), (c), or (d) are to be applied. The applicant can select any one of the methods specified in paragraphs (b), (c), or (d), or a combination of these methods.

One commentator objected to the requirement in proposed § 23.629(a)(1) that adequate tolerances must be established for quantities which affect flutter, including speed, damping, mass balance, and control system stiffness. The commentator stated that all quantities which affect flutter may not be significant and recommended that proposed § 23.629(a)(1) be reworded to state "those quantities or parameters that would significantly degrade the critical flutter speed are to be considered and pertinent tolerances established where necessary." The FAA believes that all quantities which affect flutter should be considered. However, the use of the word "adequate" indicates that the tolerance to be established will vary, depending on the significance of the quantity considered. Proposed § 23.629(a)(1) is adopted without substantive change.

Two commentators objected to the requirement in proposed § 23.629(a)(2) that natural frequencies of main structural components be determined by vibration tests. It was stated that this proposed change would impose a burden in the case of simple aircraft meeting the requirements of proposed § 23.629(d), and it was recommended that the words "or other approved methods" be reinstated. Upon further review, the FAA believes that the current requirement of "vibration tests or other approved methods" has provided satisfactory results in the past. Proposed § 23.629(a)(2) is revised accordingly.

The FAA believes that the intent of proposed § 23.629(b) may be unclear, since the term "stability" may be applicable either to the structural vibration modes, as intended, or to the airplane itself. The proposal is revised for clarity.

One commentator objected to the wording of proposed § 23.629(c)(1) that "proper and adequate attempts to induce flutter have been made." The commentator stated that this might be interpreted to allow pilot control impulse of the controls and this would not necessarily excite high frequency modes which may exist. The FAA believes that the wording as proposed is adequate. The proposed requirement to develop a vibratory response of the structure during the test will indicate the attempts to induce flutter, and the adequacy of the excitation can be evaluated by reference to the data record. Proposed § 23.629(c) is adopted without substantive change.

One commentator recommended the deletion of proposed § 23.629(d), which allows the use of Airframe and Engineering Report No. 45 in showing the airplane to be free from flutter but submitted no justification for the deletion. Since this report has been used for years with satisfactory results, the FAA believes that this alternative procedure, as revised and set forth in proposed § 23.629(d), should be continued.

One commentator recommended that proposed § 23.629(d)(3)(iii) be revised to state whether a trim-adjustable stabilizer would qualify as a fixed stabilizer. The FAA does not believe that any revision is necessary. The "degree of fixity" governs whether a trim-adjustable stabilizer can be considered a fixed stabilizer in regard to the use of Report No. 45. Some designs may have a high enough "degree of fixity" to allow treatment as fixed stabilizers, while others do not. Accordingly, § 23.629(d)(3)(iii) is adopted without substantive change.

One commentator objected to the proposed § 23.629(f) which would require that the airplane be free from flutter, control reversal, and divergence after the failure of any single element in the primary control system, any tab control system, or any flutter damper. The commentator stated that this requirement would add weight and cost, particularly in light single engine aircraft, since it would require that virtually all primary control systems, tab control systems, and flutter dampers be made fail-safe. The FAA believes this comment has merit, and proposed paragraph (f) is revised to require that airplanes that meet the criteria of paragraphs (d)(1) through (d)(3) of § 23.629 need to be shown to be free from flutter, control reversal, and divergence with a failure of any single element in the tab control system only. The FAA believes that the requirements of Report No. 45 satisfactorily consider

the failure of any single element in the primary flight control system, and flutter dampers are not appropriate

Proposal 7-10. Two commentators questioned the benefit of the ski shock absorption test in proposed §§ 23.737

to justify imposing such a regulation. This commentator further suggested

Proposal 5-18. One commentator objected to the proposal to amend § 23.1545, contending that it would

5-24, 5-58, and 5-41, respectively). Other related proposals affecting §§ 25.1329, 27.1329, and 29.1329 were

tion requirements set forth in § 23.1337(b)(1).

Accordingly, proposed § 23.1585(e) is

V43/210 OC30 78

the failure of any single element in the primary flight control system, and flutter dampers are not appropriate for airplanes designed to the requirements of Report No. 45. Further, tab control systems, which have been a significant cause of flutter problems, can be designed to prevent flutter after the failure of any single element by balancing or by structural fail-safe means with a minimum cost and weight increase. The FAA further believes that, for airplanes having a configuration or operating speed that does not meet the criteria of paragraphs (d) (1), (2), and (3), the requirement for considering single element failures should be applied to the primary flight control system, any tab control system, and any flutter damper. The FAA believes that for current complex, high-speed designs, the proposed flutter requirements can be met with minimum cost and effects by use of the current state-of-the-art methods of balancing and structural fail-safe features.

One commentator agreed in principle with the proposal to revise § 23.629, but stated that suitable methods of compliance should be specified. The FAA does not believe the rule needs further change but will consider the issuance of guidance material as to applicable means of compliance.

Proposal 7-7. One commentator objected to the proposed amendment to § 23.677 concerning an aural warning device for certain longitudinal trim systems. The device would provide an aural warning when the horizontal stabilizer trim is in transit due to trim system operation or when the power or thrust controls are advanced to the takeoff position with the stabilizer trim set in a position outside the approved range for takeoff. The commentator stated that the warning would tend to be ignored in a cockpit environment which already contains many aural warnings. The commentator also objected to the cost and complexity that this requirement would add. The FAA agrees, and the proposal to add a new § 23.677(d) is withdrawn.

Proposal 7-8. No unfavorable comments were received on the proposal to amend § 23.701. However, after further review, the FAA believes that the proposed change is not appropriate and is not needed for Part 23 airplanes. The proposal is withdrawn.

Proposal 7-9. No unfavorable comments were received on the proposal to amend § 23.723(a) which would allow the use of analysis to supplement tests to substantiate landing load factors. However, the FAA has revised the proposal based on comments received on Proposal 7-34. See Proposal 7-34.

Proposal 7-10. Two commentators questioned the benefit of the ski shock absorption test in proposed §§ 23.737 and 25.737. The commentators noted that the conditions which may cause ski failure in service do not correspond to the conditions of the proposed shock absorption test. Based upon these comments and upon further review within the FAA, the FAA believes that it does not have enough information at this time to specify requirements for ski shock absorption tests and the proposals are withdrawn.

Proposal 7-11. No unfavorable comments were received on the proposal to add a new § 23.785(h). Accordingly, the proposal is adopted without substantive change. The proposal as adopted is redesignated as § 23.785(l) in view of the adoption of §§ 23.785 (h), (i), (j), and (k) by Amendment 23-19 (42 FR 30601; June 16, 1977).

Proposal 7-12. No unfavorable comments were received on the proposal to add a new § 23.853(e). However, to insure consistent interpretation, the applicable portions of Appendix F to Part 25 are set forth in a new Appendix F to Part 23, and the corresponding reference in the proposal is revised accordingly.

In addition, the FAA believes that the proposed requirement for a vertical self-extinguishing test may be unduly restrictive for electrical wire and cable insulation and for certain small parts. An exception is therefore provided for these items.

Proposal 7-13. One commentator agreed with the intent of the proposal to add a new § 23.863, but stated that without appropriate explanatory material, the proposed rule could be applied in a manner beyond the limits of cost and engineering practicality for many general aviation airplanes. The FAA will consider the issuance of appropriate guidance material. The proposal is adopted without substantive change.

Proposal 7-14. No unfavorable comments were received on the proposal to revise § 23.1307(a). However, a commentator suggested that a provision be added to allow the type design to include a seat or other facility (such as a stretcher) that is intended to be occupied on takeoff, during flight and on landing. The FAA believes that Part 23 airplanes utilized for a special purpose should be allowed to have installed berths, such as those approved under § 23.785, as well as approved seats. Proposed § 23.1307(a) is revised accordingly.

Proposals 5-7, 5-24, 5-41, 5-58, 2-84, 2-129, and 2-184. Proposal 5-7 of Airworthiness Review Notice No. 5 (Notice 75-23), to amend § 23.1329 is similar to proposals to amend §§ 25.1329 and 29.1329 and to the proposal to add a new § 27.1311 (Proposals 5-24, 5-58, and 5-41, respectively). Other related proposals affecting §§ 25.1329, 27.1329, and 29.1329 were included in Airworthiness Review Notice No. 2 (Notice 75-10) as Proposals 2-84, 2-129, and 2-184, respectively, and their disposition was deferred for consideration with Proposals 5-24, 5-41, and 5-58, respectively.

Several commentators objected to the above proposals. After consideration of the comments received, and after further review, the FAA believes that except for proposed §§ 23.1311(h) and 25.1329(h) of Proposals 5-7 and 5-24 respectively, which are discussed below, Proposals 2-84, 2-129, 2-184, 5-41, and 5-58 and the remainder of Proposals 5-7 and 5-24 are premature, and they are withdrawn.

One commentator objected to the language "means independent of the mode selector switch" in proposed § 23.1311(h) on the ground that it would require separation of the mode selector from the mode indicator, constituting an unnecessary and burdensome restriction for single and two-axis automatic pilot systems. The FAA believes, after further consideration, that the need to provide reliable mode selection information to the pilot exists only when the automatic pilot system can be coupled to airborne navigation equipment such as VOR and ILS (localizer and glide slope). Accordingly, the proposal is revised to incorporate that qualification.

Several commentators stated that the proposed requirement attempts to provide design details instead of stating the intent, which tends to retard advances in technology, and that it does not take into account modern panels which incorporate illuminated mode indications that give positive indication of the selected mode but are not "independent" of the mode selector switch. The FAA agrees that the proposed requirement is unnecessarily restrictive, and the proposals are revised to specify that selector switch position is not acceptable as a means of indication instead of requiring the means of indication to be independent of the selector switch.

Commentators objected to the phrase "and the availability status of each alternative system" in proposed §§ 23.1311(h) and 25.1329(h), contending that compliance may not be possible for some systems, and that even when possible, the added complexity would reduce reliability and create confusion in the cockpit. The FAA agrees, and the phrase is deleted.

One commentator suggested that proposed § 23.1311(h) be revised to require that the mode selector indication for the automatic pilot system differ from that for the flight director system. The FAA does not have sufficient information at the present time

to justify imposing such a regulation. This commentator further suggested that when automatic pilot mode selection indication is provided for both pilot and copilot, those indications must agree. This would merely require that both mode selection indications be correct, and the FAA does not believe that the revision suggested by the commentator is necessary.

In view of the withdrawal of the proposals to redesignate § 23.1329 as § 23.1311 and to add a new § 23.1311(g), proposed § 23.1311(h) is redesignated § 23.1329(g) and is adopted with the revisions discussed above. Proposed § 25.1329(h) (Proposal 5-24) is adopted with the revision discussed above for § 23.1311(h).

Proposal 7-15. Several commentators objected to the wording "the highest loads expected in service under any loading condition" in the proposals to revise §§ 23.1413(a), 25.1413(b), 27.1413(a), and 29.1413 which would broaden the rated strength requirements for safety belts and harnesses. The commentators contended that this wording was unreasonable, vague, and would be difficult to administer. The FAA believes that research and development work in the area of full scale dynamic testing of airplanes and mathematical modeling of the man-seat combination is needed to develop a more definitive standard. The proposed revisions of §§ 23.1413(a), 25.1413(b), 27.1413(a), and 29.1413 are withdrawn.

Proposal 7-16. One commentator objected to the proposal to add a new § 23.1416 which would add pneumatic de-icer boot system requirements. The commentator stated that the words "any forseeable" in paragraph (b) are too broad and suggested that the nominal system operating parameters for each component should be used as a basis for establishing a factor of the nominal as design limit. The FAA disagrees that a factor is appropriate but agrees that the criteria should be revised. Accordingly, the words "any foreseeable" in proposed § 23.1416 are deleted and the words "any normal" are inserted in their place. The same commentator objected to the wording of proposed § 23.1416(c) on the ground that it could be interpreted to mean a pressure gauge would be required in the cockpit. The commentator recommended revising paragraph (c) to require that means be provided to indicate to the flight crew that the pneumatic de-icer boot system is receiving adequate pressure during the inflation cycle. The FAA agrees. This revision would make it clear that the use of pressure switches and indicator lights would be allowed in lieu of a pressure gauge. The proposal is revised accordingly.

Proposal 5-18. One commentator objected to the proposal to amend § 23.1545, contending that it would result in an unwarranted economic burden on aircraft owners. The FAA does not agree. The proposed requirement that the airspeed indicator be marked according to indicated airspeed is necessary to provide a more useful airspeed reference for operation of the airplane. In addition, the FAA does not believe that the proposed requirement would result in an appreciable increase in cost to aircraft owners compared to the current requirements.

Another commentator (who concurred with the proposed revision of § 23.1545) stated that the amount of information required on the airspeed indicator is reaching the point where confusion may be a factor, and that the reference to radials and arcs in § 23.1545 apparently prohibits the use of linear (horizontal or vertical) gauges. The FAA recognizes that indicator markings, if excessive, may cause confusion but believes that the proposed marking requirements are well within safe limits. With respect to linear-scale gauges, it is not the intent of the proposal to prohibit their use. The proposal, as well as present § 23.1545, describes marking for circular airspeed indicators since current airspeed indicators are circular. Analogous markings could be devised for linear-scale instruments and approved under airplane type certification equivalent safety provisions. Accordingly, the proposal to amend § 23.1545 is adopted without substantive change.

Proposal 8-22. For a comment related to proposed § 23.1557(f), see Proposal 8-24. The proposal is revised for the reasons discussed in Proposal 8-24.

Proposal 8-23. No unfavorable comments were received on the proposal to delete § 23.1583(i). Accordingly, the proposal is adopted without substantive change.

Proposal 8-24. Proposed §§ 23.1585(e) and (f), together with Proposal 8-23 for § 23.1583, would transfer information concerning the meaning of the zero fuel indication from the operating limitations section to the operating procedures section of the Airplane Flight Manual. One commentator stated that any reference to "fuel remaining" when the fuel quantity indicator reads "zero" invites pilot error or misinterpretation. The FAA does not agree. The reference to "fuel remaining" appears in the current rule, and the FAA does not have any information at this time to indicate that it has resulted in pilot error or misinterpretation. However, after further review, the FAA believes that the information that is required to be furnished under proposed § 23.1585(e) should be clarified in view of the fuel gauge calibration requirements set forth in § 23.1337(b)(1).

Accordingly, proposed § 23.1585(e) is revised by adding the language "in level flight" so that the section reads in part "* * * when the fuel quantity indicator reads "zero" in level flight, any fuel remaining in the fuel tank cannot be safely used in flight". Similar revisions are made to proposed §§ 25.1585(d), 27.1585(d), and 29.1585(d). Proposed §§ 23.1585(f), 25.1585(e), 27.1585(e), and 29.1585(e) are adopted without substantive change.

In view of the adoption of new §§ 23.1585(e), 27.1585 (c), and (d), and 29.1585 (c) and (d) in Airworthiness Review Amendment 6 (43 FR 2302; January 16, 1978), proposed §§ 23.1585 (e) and (f), 27.1585 (d) and (e), and 29.1585 (d) and (e) are redesignated and adopted as §§ 23.1585 (f) and (g), 27.1585 (e) and (f), and 29.1585 (e) and (f), respectively.

Proposal 7-17. The proposed amendment to § 25.305(d) and the proposed new Appendix G to Part 25 (Proposal 7-55) are being deferred until final rule making action is taken with respect to Airworthiness Review Notice No. 8 (Notice 75-31; 40 FR 29410; July 11, 1975).

Proposal 7-18. One commentator suggested that proposed § 25.331(a)(4) be revised to allow the trim system to operate at its maximum rate with normal aerodynamic load instead of requiring the flight test trim conditions specified in § 25.255. The FAA believes that there is insufficient data for rulemaking action to make the suggested revision. Another commentator recommended that proposed § 25.331(a)(4) be revised to exclude the effect of out-of-trim conditions as a consideration for the accelerated pitching conditions of proposed § 25.331(c) but retained for the zero pitching acceleration conditions of proposed § 25.331(c). The FAA disagrees. Out-of-trim conditions may exist in zero pitching acceleration maneuvers as well as in accelerated pitching maneuvers and should be considered in both cases. Section 25.331(a)(4) is amended as proposed.

One commentator suggested that proposed § 25.331(c)(1) be revised to clarify the type of pitching parameter to be considered, and to allow for the optional use of transient rigid body response for airplane loads. The FAA agrees. The use of transient rigid body response will yield conservative, but easier-to-calculate loads. The proposal is revised to allow for the use of transient rigid body response and to clarify the type of pitching parameter to be considered.

The same commentator suggested that proposed § 25.331(c) be revised to state that airplane loads which occur

V

subsequent to the occurrence of maximum positive pitching acceleration

and also stated that it does not define the control movement to be considered

investigated under § 25.473. The FAA believes that the suggested rewording

specific proposal is needed. The proposal to revise § 25.491 is withdrawn.

a test program requirement since this would require specific FAA approval

clarification would result from the recommended revision. The proposal is adopted without substantive change.

V 4 3 / 2 1 0 OC 30 78

subsequent to the occurrence of maximum positive pitching acceleration need not be considered. The FAA disagrees. The commentator did not submit, and the FAA is not aware of, time-history data that shows that the transient down tail load will always reach its peak value at the same time that the elevator surface reaches its maximum prescribed throw and that the pitching acceleration will also always reach a maximum in the nose-up direction at the same time.

The same commentator further suggested that proposed § 25.331(c)(1) be revised to make the requirements applicable to configurations with conventional trailing-edge elevator controls, and that configurations using an all-movable horizontal stabilizer should be designed to the specified control displacements of current § 23.531(c)(3). The commentator stated that applying the proposed requirements to configurations using an all-movable horizontal stabilizer for primary pitching control results in an entirely different type of loading condition than was originally intended for elevator-controlled airplanes. This results, the commentator stated, from the fact that all-movable stabilizers have much lower rate capabilities than elevators; approximately 6 degrees per second for all-movable stabilizers versus 30 to 40 degrees per second for elevators. The FAA does not have sufficient data to support the distinction suggested by the commentator.

Another commentator objected to combining the requirements for "checked maneuver at speeds between V_A and V_D" and the requirements for "specified control displacement" in proposed § 25.331(c)(2). This commentator stated that he is not aware of any evidence that the present required levels of pitching acceleration have resulted in unsafe designs, and that the design requirement should involve either the use of rational time history analyses or, alternatively, the use of the present acceleration criteria. The proposal to amend § 25.331(c)(2) contains the current requirements except that a rational pitching motion-time profile is required rather than optional. The present acceleration criteria were derived from the behavior of airplanes much older than, and different from, those of current design. The FAA does not have enough information regarding the conservatism these criteria provide for modern designs. However, since the rational time history analysis method does consider the behavior of the modern airplanes, that method is specified.

Two commentators stated that proposed § 25.331(c)(2) is not clear with respect to whether pitching accelerations greater than the values quoted in the formula are to be used for design, and also stated that it does not define the control movement to be considered nor state whether the limit load factor must be reached. In addition to proposed § 25.331, the strength criteria contained in other sections of the Subpart must be considered in establishing structural design criteria. With respect to control movement and load factor, the FAA does not have any information at this time which would indicate that specific constraints on control movement or load factor are necessary.

The proposal to amend § 25.331 is adopted with the revisions discussed above.

Proposal 7-19. Several commentators, including the initial public proponent, objected to the proposal to add a new § 25.341(d) to require the empennage to be designed for gusts which are not purely vertical or lateral in direction. The commentators referred to existing conservatisms in the rules which have resulted in satisfactory service experience to date, and stated the need for further review and evaluation. The FAA, upon further review, believes that there is insufficient data to substantiate the need for the additional requirement at this time. The proposal to add a new § 25.341(d) is withdrawn.

Proposal 7-20. One commentator objected to deletion of the words "as speed brakes" in the proposal to amend § 25.345(c). The commentator stated that the removal of the words "as speed brakes" would increase structural weight, not only in the flaps, but also in the wings and horizontal tail. The FAA agrees that airplane loads, and weight, may increase as a result of this proposed amendment. However, the FAA believes that an airplane should be designed for any condition in which the airplane is normally operated. Airplanes are now commonly flown in en route conditions with flaps deployed for purposes other than as speed brakes, and the airplane structure should be designed for the appropriate loads regardless of the operational reason. Another commentator objected to the deletion of the words "as speed brakes" on the ground that removal would leave unanswered questions on flaps up-down cycling, gust encounters, upsets, and overspeed. The FAA does not have any information at this time which indicates that additional requirements related to these factors are necessary. The amendment to § 25.345(c), is adopted as proposed.

Two commentators suggested rewording the proposed new § 25.345(d) by replacing the word "landing" with the word "maneuvering" to make it clear that the proposed requirement is not intended as an additional landing condition to be investigated under § 25.473. The FAA believes that the suggested rewording would lead to a possible misunderstanding due to altitude effects which may result in a more severe load being applied to the airplane. The intent of the proposal is to provide an additional landing condition to be investigated, but not under § 25.473, at maximum takeoff weight with a maneuvering load factor of 1.5g and the flaps and similar high lift devices in the landing configuration. Accordingly, the proposed new § 25.345(d) is adopted without substantive change.

Proposal 7-21. Several commentators stated tht the proposal for § 25.351(a), which would extend the upper limit of the speed range specified in current § 25.351(a) from V_A to V_D, is unduly severe and recommended that the pilot's maximum rudder pedal force be 300 pounds from V_{MC} to V_A and 200 pounds from V_C/M_C to V_D/M_D with linear variation between V_A and V_C/M_C. In addition, one commentator stated that the proposed extension of the upper limit of the speed range would penalize aircraft utilizing manual control systems. The commentator further stated that reducing rudder control force at the higher speeds would be consistent with probable operational practice. The FAA believes that the capability of current jet transports for high rudder forces throughout the design envelope has resulted in a high degree of structural integrity during recovery maneuvers, and that this capability must be ensured in future designs. The proposal to amend § 25.351(a) is adopted without substantive change.

Proposal 7-22. Two commentators expressed a need for clarification of the terms "sudden engine stoppage" as used in the proposal to amend § 25.361(b) and "torque for maximum continuous take-off power" as used in the proposed lead-in of § 25.361(c). Actually the word "take-off" did not appear in Notice 75-26. However, since both terms occur in the current rule and were used in the same sense in the proposal, the FAA does not believe further clarification is needed. Accordingly, the proposal is adopted without substantive change.

Proposal 7-23. All of the comments received in response to proposed § 25.491 either questioned the definition of the words "roughest runway and taxiway profiles to be expected in normal operations", or questioned the means of showing compliance. Two commentators stated that the costs of conducting dynamic analyses are high and that the proposal would cause an unjustified economic penalty by requiring dynamic analyses whether needed for a particular configuration or not. The FAA agrees that a more

specific proposal is needed. The proposal to revise § 25.491 is withdrawn.

Proposal 7-24. Although no unfavorable comments were received on the proposed new § 25.499(e), two commentators stated that some factor above the nominal values of torque and static reaction is needed to cover possible increases of loads. The FAA does not believe at this time that a factor for nose gear loads due to steering is needed. Accordingly, the proposal is adopted without substantive change.

Proposal 7-25. One commentator objected to the 1.5g rearward ultimate inertia force requirement of the proposed § 25.561(b)(3)(v) because of inadequate substantiation. The commentator stated that the current research on crashworthiness should be completed before the proposal is finalized. After consideration of this comment, and after further review, the FAA agrees that the proposal to add a new § 25.561(b)(3)(v) is premature, and it is withdrawn.

After consideration of the comments received on the proposal to add a new § 25.561(d) concerning structural crashworthiness requirements for certain multi-deck airplanes, and after further review, the FAA believes that it does not have enough information to set forth a rule of general applicability at this time. Accordingly, the proposal to add a new § 25.561(d) is withdrawn.

Proposal 7-26. After consideration of the comments received on the proposal to add a new § 25.563(b), concerning structural ditching requirements for certain multi-deck airplanes, and after further review, the FAA believes that it does not now have enough information to set forth a general standard which would be appropriate for both partial and full multi-deck configurations. The proposal to add a new § 25.563(b) is withdrawn.

Proposal 7-27. The proposal to revise § 25.571(c)(1), concerning fatigue requirements, is withdrawn in view of the separate rulemaking action that has been initiated to consider the fatigue requirements for transport category airplanes (see Notice 77-15; 42 FR 41236; Aug. 15, 1977).

Proposal 7-28. For comments related to the proposal to add a new § 25.603(c), see Proposal 7-3.

Proposal 7-29. One commentator objected to the proposed amendment to § 25.605(b) which would require that new aircraft fabrication methods be substantiated by a test program. The commentator stated that, to meet current § 25.605, manufacturers presently conduct many tests before new fabrication methods are used, especially where the airworthiness of the airplane is involved. The commentator felt that the present regulations are adequate and questioned the need for a test program requirement since this would require specific FAA approval of the test program. Such approval, the commentator stated, would only increase the expense and require additional time to coordinate. The FAA does not agree that current § 25.605 is adequate. Current § 25.605 requires only that the processes requiring close control to produce a consistently sound structure be performed under an approved process specification. The FAA believes that the proposed rule is necessary to insure that all new aircraft fabrication methods are tested to determine their soundness. In addition, the manfuacturers who currently perform an adequate test program should have no difficulty in meeting the proposed requirement. The proposal to amend § 25.605 is adopted without substantive change.

Proposal 7-30. No unfavorable comments were received on the proposal to amend § 25.613(e). Accordingly, the proposal is adopted without substantive change.

Proposal 7-31. One commentator recommended that the proposed amendment to § 25.629(d)(1)(ii) be revised to include the words "affecting divergence or flutter". The FAA does not believe the change is needed since words to this effect are used in the lead-in of present § 25.629(d)(1).

One commentator objected to the requirement in proposed § 25.629(d)(1)(ii) that freedom from flutter or divergence be shown for any combination of failures not shown to be extremely improbable. The commentator stated that the cost would far outweigh any theoretical improvement to safety over what is presently provided. The FAA disagrees. Service experience has shown that combinations of failures can be expected and, therefore, unless combinations of failures are shown to be extremely improbable, they must be considered in design for freedom from flutter and divergence.

One commentator recommeded that the proposed § 25.629(d)(4)(vi) requirement for consideration of any single failure in any flutter damper system be revised to exclude active control systems for damping and apply only to flutter dampers connected to a control surface. The FAA disagrees. Failures in all flutter damping systems must be considered if the freedom-from-flutter requirement of § 25.629(d)(1) is to be demonstrated. The proposal is adopted without substantive change.

Proposal 7-32. One commentator on the proposed amendment to § 25.697(b), concerning lift and drag device controls, recommended that the word "inadvertent" in both sentences of the proposal be replaced with the word "unintentional" or "unintended". The FAA does not believe that a clarification would result from the recommended revision. The proposal is adopted without substantive change.

Proposal 7-33. One commentator objected to proposed § 25.701(a) which would provide for the use of equally reliable means instead of a mechanical interconnection for the synchronization of flaps on opposite sides of an airplane. The commentator questioned what would be as reliable as mechanical interconnection. The FAA believes that there are devices which are available or may become available that are at least as reliable as a mechanical system in this application and would be acceptable alternatives. However, to clarify the intent of the proposed rule, the proposal is revised to read "approved equivalent means" instead of "equally reliable means".

Proposal 7-34. One commentator recommended that proposed § 25.723(a) be revised to state that the analysis which may be used to substantiate landing gear limit load factors for increases in takeoff and landing weights must be based on identical landing gear systems. The commentator expressed the opinion that the use of the word "similar" might cause confusion and allow deviations from the original intent that the analysis must be based on landing gear tests conducted on a landing gear system with identical, not similar, energy absorption characteristics. The FAA agrees, and the proposal is revised accordingly.

Proposal 7-35. For a discussion of the withdrawal of proposed § 25.737, see proposal 7-10.

Proposal 7-36. One commentator opposed the proposal to add a new § 25.773(d) to add markers or other guides to enable pilots to position themselves for optimum outside visibility and instrument scan. The commentator stated that he knew of no airplane that has a position for maximum outside visibility that coincides with optimum eye position for instrument scan. Another commentator concurred with the proposal but recommended that it be revised to clarify that the optimum "combination" of outside visibility and instrument scan is sought. The FAA agrees that what is intended is an optimum combination, and proposed new § 25.773(d) is revised accordingly.

Proposal 7-37. No unfavorable comments were received on the proposal to amend § 25.777. Accordingly, the proposal is adopted without substantive change.

Proposal 7-38. Several commentators objected to the requirements of proposed new § 25.789(b) that would require each major galley component, including serving carts, drawers, and compartments, to have a placard indicating its maximum load. The com-

mentators stated that drawers and compartments are designed for

FAA believes that the proposal may be misconstrued, since certain operating

posal in the manner suggested by these commentators. One commenta-

more megaphones simultaneously during the demonstration could confuse and misdirect evacuees. The FAA

seat required by present § 25.807(a)(7)(vi) must be a flight attendant seat which complies with the

warranted. The FAA believes that the evaluation of slide designs during airplane type certification does establish

V 4 3 / 2 1 0 0 C 3 0 7 8 V

mentators stated that drawers and compartments are designed for weights that can reasonably be expected in service. Two commentators stated that placarding galley components would not increase the level of safety for the occupants of the airplane, and would not guarantee adherence to the indicated maximum load during operation. Based on these comments, and upon further review within the FAA, the proposed new § 25.789(b) is withdrawn.

No unfavorable comments were received on proposed new § 25.789(c). Accordingly, the proposal is adopted without substantive change and redesignated as § 25.789(b).

Proposals 7-39 and 7-79. Numerous commentators objected to Proposal 7-39 to add a new § 25.802 to establish standards for evacuation alarm systems, and to Proposal 7-79 to add a new § 121.292 to require that evacuation alarm systems be installed on all passenger-carrying airplanes. After considering the comments received, and after further review, the FAA believes that rulemaking on the subject of evacuation alarm systems in passenger-carrying airplanes is premature. Accordingly, the proposals to add new §§ 25.802 and 121.292 are withdrawn.

Proposal 7-40. Proposed § 25.803(c) would replace the present emergency evacuation demonstration conditions with conditions which satisfy both Part 25 and Part 121, thus providing for one demonstration that serves both airworthiness and operational requirements. One commentator stated that the aircraft manufacturer should not be the sole demonstrator of emergency evacuations and recommended that more than one demonstration be required to rule out a "long shot" success. The commentator did not present any data to show that additional demonstrations by persons other than the manufacturer are needed. The FAA believes that demonstrations made under the prescribed conditions and using the prescribed procedures will yield comparable results, and that the manufacturer is competent to conduct such demonstrations.

Two commentators objected to proposed § 25.803(c)(4) which would require that the airplane's normal electrical power sources be de-energized and stated that the existing wording "using only the emergency lighting system" is preferred. The FAA agrees and § 25.803(c)(4) is revised to state that only the airplane's emergency lighting system may provide illumination, except as noted in paragraph (c)(1).

No unfavorable comments were received on proposal § 25.803(c)(5), to require that all emergency equipment must be installed in accordance with §§ 25.1411 and 25.1415. However the FAA believes that the proposal may be misconstrued, since certain operating rules of the chapter also state emergency equipment installation requirements. Proposed § 23.803(c)(5) is revised to specify that all emergency equipment that is required for the planned operation of the airplane must be installed.

A statement of required crewmember qualifications was inadvertently omitted from proposal § 25.803(c). Present Part 121 App. D paragraph (a)(12) states a requirement for a regularly scheduled line crew, and present § 25.803(c)(6) states a requirement merely for persons who have knowledge of the exits and emergency equipment. The FAA believes that the training and knowledge levels associated with a regularly scheduled line crew are appropriate for any demonstration that is conducted for the introduction of a type and model of airplane into passenger-carrying operations, whether the demonstration is conducted for compliance with Part 121 alone or for dual compliance with Parts 25 and 121. Accordingly, the crew requirements of present part 121 App. D paragraph (a)(12) are set forth as new § 25.803 (c)(7)(i). The crew requirements of present § 25.803(c)(6) have been shown adequate for airplane type certification under Part 25. These requirements are set forth in a new § 25.803 (c)(7)(ii) to provide for situations where separate demonstrations of compliance with type certification and operating rules may be necessary or appropriate.

One commentator suggested deletion of the requirements of §§ 25.803(c)(7)(ii) and (c)(7)(iii) requiring at least 5 percent of passengers be over the age of 60 and 5-10 percent be children under the age of 12 years. The FAA believes that age distribution should be considered in the selection of test subjects, and that the proposed requirements are realistic in terms of the age distribution of airline passengers. The proposed §§ 25.803(c)(7)(ii) and (c)(7)(iii) are adopted without substantive change. One commentator requested that, due to laws governing employment and insurance for persons under 18 years of age, § 25.803(c)(7)(iii) be modified to provide an equivalency by adding the words "or at least 5 percent, but not more than 10 percent must be adults between the ages of 50 to 60 years of age." A second commentator suggested essentially the same wording, citing data showing comparable evacuation times for persons under 12 and in the 50 to 59 age group and relating one instance where this equivalency was allowed during evacuation testing. The FAA does not now have enough information on evacuation times for the various age groups to revise the proposal in the manner suggested by these commentators. One commentator recommended that proposed § 25.803(c)(7)(iv) be modified to require the three life-size dolls to have height and weight equivalent to a child. The FAA believes the terms "life-size" and "simulate live infants" adequately express this intent. The proposed § 25.803(c)(7)(iv) is adopted without substantive change.

One commentator stated that reference to the words "crewmembers, mechanics, and training personnel" in § 25.803(c)(7)(v) is only appropriate if tests are being conducted by the operator rather than the manufacturer. The FAA disagrees since such training personnel are also employed by the manufacturer. Accordingly, §25.803(c)(7)(v) is adopted as proposed.

One commentator suggested that the carry-on baggage, blanket, and pillow requirements of § 25.803(c)(10) be deleted since there would be a reduced risk of injury during the test without significant effect on the results. The FAA does not agree since such items are intended to help simulate actual emergency evacuation conditions and might significantly affect the results of an evacuation test. Proposed § 25.803(c)(10) is adopted without substantive change.

One commentator suggested that § 25.803(c)(12) should state that no "prior" indication may be given of the exits to be used and that the word "advised" is more appropriate in § 25.803(c)(14) than the word "warned". The FAA agrees with both clarifications and the amendments are revised accordingly.

Although no adverse comments were received on the proposed requirements for multi-deck airplanes in § 25.803(c)(16), the FAA believes that it does not now have enough information to establish comprehensive evacuation criteria for multi-deck airplanes and the multi-deck requirements of § 25.803(c)(16) are deleted.

One commentator objected to the requirement in proposed § 25.803(c)(18) that all the emergency equipment that is normally available, including slides, ropes, lights, and megaphones, must be fully utilized during the demonstration. The commentator stated that the utilization of ropes and megaphones places an undue and unrealistic burden on the evacuation demonstration. The commentator believes that the use of ropes at over-wing exits introduces the hazard of tripping and entanglement, and could result in a reduced evacuation flow rate, and that the use of megaphones limits the ability of the flight attendant to effect rapid egress of participants by denying the use of one hand and by restricting the line of vision. The commentator also objected that the use of two or

more megaphones simultaneously during the demonstration could confuse and misdirect evacuees. The FAA recognizes that certain items of emergency equipment are installed for purposes other than evacuating occupants from an airplane after an aborted takeoff and that a need to control the use of communications devices may exist. These factors should be considered in each applicant's approved procedures. Proposed § 25.803(c)(18) is amended to state that the applicant's approved procedures must be fully used during the demonstration.

Several commentators objected to the proposed amendment to § 25.803(d) which would allow analysis in showing that the airplane is capable of being evacuated within 90 seconds. One commentator stated that analysis alone is an incomplete means of showing compliance and should not be allowed. Another commentator stated that extrapolations based on analytical testing have no practical relation to actual conditions which occur in accidents and in evacuation demonstrations. The FAA agrees that the limitations on the use of analytical procedures should be made clear. The requirement that the Administrator find the analysis data acceptable was intended to preclude approvals which might be based on insufficient test data, such as in the case of a completely new airplane model or a model which has major changes or a considerably larger passenger capacity than a previously approved model.

Accordingly, § 25.803(d) is revised to clarify the intent.

No unfavorable comments were received regarding proposed §§ 25.803 (c)(1), (c)(2), (c)(3), (c)(6), (c)(7)(i), (c)(8), (c)(9), (c)(11), (c)(13), (c)(15), and (c)(17). Accordingly, these proposals are adopted without substantive change.

It should be noted that the deletion of several proposed paragraphs and the insertion of a new § 25.803(c)(7) has required the redesignation of the adopted paragraphs.

The proposal to revise §§ 25.803 (c) and (d) is adopted with the changes discussed above.

Proposal 7-41. One commentator objected to the proposal to revise § 25.807(a)(7)(vi), stating that a flight attendant seat can be so mounted relative to an exit or to other seats that the flight attendant's access to the exit itself is restricted. The commentator recommended that the proposal be revised to specify that forward facing seats be placed aft of the emergency exit, and aft-facing seats be placed forward of the emergency exit, so that no flight attendant is seated with the attendant's back to the exit. The intent of the proposals to revise § 25.807(a)(7)(vi) is to specify that the seat required by present § 25.807(a)(7)(vi) must be a flight attendant seat which complies with the requirements of §§ 25.785 (h) and (i). The FAA is not aware of any unsatisfactory service history with respect to the orientation of seats provided in accordance with present § 25.807(a)(7)(vi), and the commentator did not provide any information which would indicate that a problem exists. The FAA believes that revising the proposal in the manner suggested by the commentator would unduly restrict design. Accordingly, the proposal is adopted without substantive change.

Proposed § 25.807(c)(7) is based on the existing special conditions developed for the current wide body jet airplanes. Based on the comments received, and upon further review within the FAA, the FAA believes that it does not have enough information to adopt a rule of general applicability to multi-deck airplanes at this time. Proposed § 25.807(c)(7) is withdrawn.

Proposal 7-42. Several commentators objected to proposed new § 25.809(f)(1)(iv) which would require that the emergency exit means to assist the occupants in descending to the ground be usable without outside assistance in 25-knot winds. One commentator stated that the proposed section was not clear with respect to whether deployment into a 25-knot wind was required in addition to operation in 25-knot winds after deployment. Proposed § 25.809(f)(1)(iv) is revised to state the requirement more clearly. Another commentator proposed that the weight of one person on the device be allowed to ground it to make it usable. The FAA agrees that the assistance of one person should be allowed. Proposed § 25.809(f)(1)(iv) is revised accordingly. In response to another comment questioning the state-of-the-art, the FAA believes that the proposed requirement, as revised to allow the assistance of one person after deployment, is within the state-of-the-art.

Another commentator stated that the provision concerning wind force direction in proposed § 25.809(f)(1)(iv) was vague. The FAA disagrees since the critical wind direction may vary for each assisting means and the applicant must demonstrate which direction is most critical.

Several commentators objected to the 98 percent reliability requirement in proposed new § 25.809(f)(1)(v) as being difficult to interpret given a relatively small sample size and indicated that tests conducted on new designs may not adequately represent the reliability level in service. Another commentator stated that the reliability requirements in proposed § 25.809(f)(1)(v) were excessive and unwarranted. The FAA believes that the evaluation of slide designs during airplane type certification does establish a level of in-service performance if the slides are maintained properly. The FAA agrees, however, that the amount of testing that would be required to obtain data for the proposed determination of 98 percent reliability may be excessive for the systems under consideration. A more direct testing method, requiring fewer tests, has been found to provide an acceptable measure of egress system reliability in recent airplane type certifications. Proposed § 25.809(f)(1)(v) is revised to specify the use that method.

One commentator asked how the inertial forces specified in proposed § 25.809(f)(i)(v) would be applied. In practice, this has been done by applying equivalent static loads. (Clearly, test methods will have to be developed for dynamic testing if future designs indicate a need for it.) This commentator also asked whether the last sentence of proposed § 25.809(f)(i)(v) is necessary. The FAA believes that with the test method specified, the testing series must be restarted following failure to ensure that the reliability assessment is valid. The last sentence of § 25.809(f)(i)(v) has been rewritten to make this clear.

Proposal 7-43. One commentator objected to proposed § 25.811(e), stating that the present operating instructions have historically proven adequate to open doors and that there is no need for the additional requirements. The FAA does not agree and believes that the need for the proposed requirements has been established by recent adverse service experience.

One commentator questioned whether proposed § 25.811(e)(2) is applicable to Type II exits. The FAA is unaware of any need for extending this requirement to Type II exits at this time. Consistent with the proposal, the requirement applies only to Type A and Type I exits.

One commentator recommended that proposed §§ 25.811 (e)(2)(i), (e)(2)(ii), and (e)(3) be revised to require that a minimum brightness remain after a substantial amount of weathering in service. The FAA believes that a requirement for a minimum brightness belongs in the operating rules and that it is correctly stated in § 121.310(e)(2) of the Federal Aviation regulations.

Another commentator suggested that the alternative requirements for Type I and Type A passenger exit operating handles set forth in proposed § 25.811(e)(2) (i) and (ii) be made applicable to Type III exit operating handles. The FAA does not agree. The alternative provisions referred to are allowed for Type I and Type A exits be-

cause a specified level of illumination must be provided at these exits. How-

posal 7-81 for § 121.310(1) is revised to require flashlight stowage provisions

the suggested revision is unnecessary. The same wording is used in current

ods to prevent hot gas reverse flow, which would provide at least an equiv-

preted the proposal to apply to both the APUs which are installed in the

is a controlling factor in extinguishing a fire within that fire zone. No accept-

V 43 / 210 OCT 30 78

cause a specified level of illumination must be provided at these exits. However, since illumination levels are not specified for all Type III exit installations, a self-illuminated operating handle must be provided.

One commentator objected to the proposed ±0.5-inch tolerance for the location of the projected point of the arrow for rotary handle markings. The commentator indicated that current door rigging variations cannot always meet the proposed tolerance. The FAA agrees. To allow for rigging variations, proposed § 25.811(e)(4)(ii) is revised to require that centerline of the exit handle be within ±1-inch of the projected point of the arrow when the handle has reached full travel and has released the locking mechanism.

One comment on proposed § 25.811(e)(4)(ii) suggested that no marking is a substitute for having a door mechanism designed so that it is unmistakable when full travel of the mechanism has been reached. It is not clear what the commentator is recommending. However, the proposal requires marking of the handle position at the full travel limit, after the locking mechanism has been released. Since persons unfamiliar with the mechanism may be required to operate it in an emergency, the marking is needed to insure that they move the handle to full travel against any resistance which may be felt.

Proposed § 25.811(e) is adopted with the revision discussed above. In addition, several nonsubstantive changes have been made for clarity.

Proposal 7-44. No unfavorable comments were received on the proposal to amend § 25.812(e). Accordingly, the proposal is adopted without substantive change.

Two commentators questioned proposed §§ 25.812 (f) and (g) to provide emergency lighting coverage with the airplane in abnormal attitudes. One of the commentators contended that present standards have historically provided satisfactory lighting and that a "battery of lights" would be necessary to comply with the proposal. Based on the comments received, and after further review within the FAA, the proposed changes to §§ 25.812 (f) and (g) are withdrawn.

Several commentators objected to the proposal to add a new § 25.812(1). One commentator stated that the meaning of "high intensity" is subject to broad interpretation and that a flashlight could provide an acceptable level of illumination. Current § 121.549(b) provides for a readily available flashlight for each crewmember, and the FAA believes that the intent of the proposal can be met by specifying an accessible flashlight storage means. The proposal to add a new § 25.812(1) is withdrawn and Proposal 7-81 for § 121.310(1) is revised to require flashlight stowage provisions that are readily accessible from each flight attendant seat and to allow 2 years for compliance.

Proposal 7-45. One commentator objected to the proposal to revise § 25.813(c)(1) to add a requirement that "there must be no interference in opening the exit." The commentator considered this proposal to be interpretive material better suited for Advisory Circular action and stated it was not clear. The FAA disagrees. Many emergency exits need more clearance than the projected exit opening to prevent interference when opening the exit, and this proposal would make it clear that adequate clearance is required. The commentator suggested adding after the word "protrusions" the words "to prevent exit door ready removal" in § 25.813(c)(1). The FAA does not believe proposed § 25.813(c)(1) needs clarification, and the suggested wording could lead to misinterpretations.

Another commentator recommended that the requirement of § 25.813(c)(1) be applied to airplanes having 9 to 19 passenger seats. The FAA disagrees. Current requirements of § 25.813(c)(2) consider emergency exit access for airplanes having 19 or less passengers. Service experience has shown no need to change the requirements of § 25.813(c)(2).

After consideration of the comments received, and after further review, the FAA believes that proposed § 25.813(g) to establish material and systems requirements and proposed §§ 25.813 (h) and (i) to establish passageway design requirements are premature, and they are withdrawn.

Proposal 7-46. In view of the amendment of § 25.831 by Airworthiness Review Amendment No. 5 (42 FR 36960; July 18, 1977), the FAA believes that proposed § 25.831(g) is not necessary and it is withdrawn.

Proposal 7-47. No unfavorable comments were received on the proposal to amend § 25.863. One commentator asked for an explanation of the means to show compliance with the proposed requirements of paragraph (d). The areas where flammable fluids or vapors could escape by the leakage of a fluid system must be identified and defined as part of type design data submitted by the applicant for type certification. The proposal is adopted without substantive change.

Proposal 8-43. One commentator contended that proposed § 25.901(d) will be difficult to administer because the term "applicable provisions of this subpart" will not be consistently interpreted. The commentator suggested that the applicable provisions be clearly defined. The FAA does not agree with the commentator and believes the suggested revision is unnecessary. The same wording is used in current § 25.901(b)(1) with respect to propulsion powerplant installations, and has been administered without difficulty.

One commentator suggested that only those auxiliary power units (APU) that are classed as essential power units need to meet the applicable provisions of the subpart. Several other commentators suggested that the applicable provisions should be clearly defined to differentiate between essential and nonessential APU installations. The FAA does not agree with these comments. The FAA believes that appropriate requirements for safety must be applied to all APU installations. No justification has been shown for the operation of a nonessential or a ground operation only APU at a safety level that is different from that which is required for an essential APU.

The proposal is adopted without substantive change.

Proposal 8-46 and 3-35. Disposition of Proposal 3-35 to amend § 25.1103 (Notice 75-19) was deferred so that it could be considered in connection with Proposal 8-46. One commentator on Proposal 3-35 suggested that the proposed revision to § 25.1103(d), concerning ducts other than induction system ducts, be placed in a separate section of Part 25. The FAA believes that it is more appropriate to include the requirement in § 25.1103 and to expand the heading of that section to include a reference to air duct systems. Proposal 3-35 is adopted without substantive change. However, § 25.1103(d) as adopted reflects a change proposed by Proposal 8-46. With respect to Proposal 8-46, one commentator suggested that the phrase "unless it can be shown that a duct failure will not result in an additional fire hazard" be added to proposed § 25.1103(b). The FAA does not believe that the suggested condition could be met. The ducts under consideration are those which are contained within fire zones, including the auxiliary power unit fire zone. Duct failures in such areas could allow fire to spread, possible outside the fire zone, or could reduce the effectiveness of installed fire-extinguishing systems.

Several commentators suggested that it would be difficult to establish the "sufficient distance upstream of the auxiliary power unit compartment" specified in proposed § 25.1103(e). The FAA believes that the proposed standard is appropriate. In this instance, a more definitive standard, taking into account all of the factors that might be involved, would tend to restrict design flexibility unnecessarily.

One commentator objected to proposed § 25.1103(e), contending that its language precluded the use of methods to prevent hot gas reverse flow, which would provide at least an equivalent level of safety. The FAA knows of no practical method other than fireproofing to prevent hot gas reverse flow in induction system ducts. If such a method were developed, the applicant could apply for its approval under the "equivalent safety" provisions of § 21.21(b)(1). This commentator also contended that if proposed § 25.1103(f) is met, it is unrealistic to consider a fire caused by hot gas reverse flow burning in the air induction system. The commentator suggested, instead, a requirement to determine the maximum intake duct temperature that could occur under hot gas reverse flow conditions and to use a duct material that can resist these temperatures. The commentator apparently misinterpreted the proposal. Proposed § 25.1103(e) requires that certain portions of each auxiliary power unit induction system duct be fireproof, and proposed § 25.1103(f) states heat tolerance requirements for those portions of the induction system other than those which are specifically required to be fireproof. However, the FAA believes the proposed language may be unclear. Therefore, that portion of § 25.1103(f) which states requirements for the heat tolerance of materials be revised to clarify the applicability and is moved to § 25.1103(e).

Two commentators suggested that proposed § 25.1103(f) be revised to allow the use of materials that may absorb or trap non-hazardous quantities of flammable fluids (or flammable fluids that could present a hazard to the aircraft). These commentators contended that proposed § 25.1103(f) would prevent the use of certain sound suppression materials that trap small quantities of fluids. The FAA agrees and § 25.1103(f) is revised accordingly.

One commentator suggested that an acceptable alternative to compliance with proposed § 25.1103(f) would be to show that any fire which may occur is contained within the induction system. The FAA does not believe that it would be possible to contain a fire in the induction system since the induction system is a passage which is open at both ends.

Substantively identical revisions are made to Proposal 8-73 for § 29.1103.

Proposal 8-47. Two commentators on proposed § 25.1142 stated that there was no need for starting control on the flight deck for auxiliary power units (APU) that are operable only on the ground. The FAA believes that any APU installed on the airplane, whether or not intended only for ground use, should be able to be operated by the flight crew since its improper operation or malfunction could affect the safety of the aircraft. The commentators appear to have interpreted the proposal to apply to both the APUs which are installed in the airplane and to those stationary, portable, or mobile units which are external to the airplane and are considered to be ground support equipment. The proposal is therefore revised to clarify that it is applicable only to installed APUs.

One commentator stated that APU and engine standards in Part 25 should be separated to insure consistent administration. The FAA does not agree with this commentator, and believes the suggested revision is unnecessary. The APU and engine standards in Part 25 have been administered without difficulty for years.

Another commentator stated that the proposal should be revised to differentiate between essential and nonessential APUs. For a discussion of this comment, see Proposal 8-43.

Proposals 8-49 and 3-41. Disposition of Proposal 3-41 to amend § 25.1195(b) (Notice 75-19) was deferred so that it could be considered in connection with Proposal 8-49. One commentator objected to Proposal 3-41 and suggested that it be revised to read "* * * all extinguishers are not required to crossfeed all engines, but two shots to each engine are required." The proposal deletes the last sentence of present § 25.1195(b) to avoid the possible interpretation that a particular discharge must be directable to every fire zone. Such an arrangement would be acceptable, but individual systems which have a dual discharge capability may be confined to serve a particular fire zone. The proposal is considered equivalent to the wording preferred by this commentator.

Another commentator stated that the proposal does not meet the intent of the explanation unless the last sentence of present § 25.1195(b) is deleted. The proposal includes this deletion. This commentator further stated that the proposed wording contradicts the exemptions allowed by § 25.1195(a). The FAA does not agree. Section 25.1195(b) applies only to non-excepted fire zones. Proposal 3-41 to amend § 25.1195(b) is adopted without substantive change.

One commentator objected to the requirement in Proposal 8-49 for § 25.1195(b) that the test fully simulate actual critical airflow conditions, stating that there should be provisions in the regulations to allow the use of test results and analysis to show compliance. Another commentator objected to the proposal because it does not allow demonstration of compliance by a combination of analysis and analogy with similar engine installations that have been subjected to full scale fire tests. The FAA does not agree with these comments. Distribution of the extinguishing agent within a fire zone is a controlling factor in extinguishing a fire within that fire zone. No acceptable procedure has been found to demonstrate extinguishing agent concentration by analysis, or by reference to tests or service experience on similar powerplant installations, or by reference to tests conducted under conditions other than those encountered in service. Compliance with proposal § 25.1195(b) must be based on actual or simulated flight tests which fully provide the critical airflow conditions to be encountered in flight.

One commentator objected to the words "under critical airflow conditions," "any fire," and "preventing reignition" as meaningless when engine breakup or cowling damage occurs. A second commentator objected to the proposal because no hole size is specified. However, the proposal is based on the assumption that the fire zones under consideration remain intact, with no engine breakup or cowling damage and with only those holes that are present during normal operation. Therefore, no damage factors are specified.

Several commentators objected to the words "and preventing reignition" for the reason that there is no practical way to determine compliance unless the fire and potential reignition sources are defined. These commentators suggested that this requirement should be changed to "and minimize the probability of reignition." The FAA agrees that the language "and preventing reignition" may imply that extinguishing agent concentration must be maintained indefinitely. The FAA believes that this is beyond the present state-of-the-art, and the proposal is revised in the manner suggested by these commentators. Three of these commentators further objected to the proposed requirement for an extinguishing agent concentration capable of "extinguishing any fire" in a fire zone because there is no practical way to determine compliance unless the fire is defined. The FAA agrees, and the proposal is revised to incorporate the words "extinguishing fires" to be consistent with the provisions of present § 25.1195(b).

One commentator stated that the use of full-scale fire tests, evidence of similar powerplant configurations, and analysis were proposed as part of Airworthiness Review Notice No. 3 (Notice 75-19; 40 FR 21868; May 19, 1975) to show compliance with the requirements of §§ 25.1181 through 25.1203, and that this proposal is in conflict with Notice 75-19. The proposal in Notice 75-19 to which the commentator refers has been adopted as § 25.1207 (Airworthiness Review Amendment No. 4, effective May 2, 1977). Section 25.1207, as adopted, provides for those cases when tests are

specifically required. However, in light of the adoption of proposed

cated adjacent to a floor level exit may be required to use the public ad-

torcraft. The commentators stated that these proposed requirements are not reasonable for normal category ro-

V 43/210/OCT 30 78

specifically required. However, in light of the adoption of proposed § 25.1195(b), the FAA believes that § 25.1207 could be confusing and it is revised for clarity. Additionally, this commentator stated that the method of demonstrating satisfactory fire extinguishing capability should be by agreement between the manufacturer and the certificating authority. The FAA does not agree. Objective rules are needed to ensure that a consistent level of safety is maintained.

One commentator stated that the proposal refers to critical airflow conditions while the explanation refers to flight conditions, which are not necessarily the same thing. The FAA agrees that clarification is necessary. The proposal is revised to specify critical airflow conditions in flight.

Proposal 8-49 to amend § 25.1195(b) is adopted with the revisions discussed above. Similar revisions are also made in connection with Proposal 8-75 for § 29.1195(d).

Proposal 7-48. No unfavorable comments were received on the proposal to amend § 25.1307(a). Accordingly, the proposal is adopted without substantive change.

Proposal 5-24. For comments related to the proposal to revise § 25.1329(b), see Proposal 5-7.

Proposal 7-49. One commentator suggested deletion of the words "Such as automatic life raft releases" from proposed § 25.1411(a)(1) since they imply that the requirement is intended to apply only to equipment for ground emergency use. The FAA agrees. This implication is not intended, and the proposal is revised in the manner suggested by this commentator.

Several commentators objected to proposed § 25.1411(a)(2) and to its companion proposal for § 121.309(a)(2) (Proposal 7-80) regarding accessibility of standard emergency equipment to flight attendants. In light of the comments received, and after further review, the FAA believes that it should not be required that safety equipment such as fire extinguishers, portable oxygen bottles, and first aid kits be positioned adjacent to each flight attendant seat and be readily accessible to the seated flight attendant. From a safety standpoint, it is not essential that this equipment be used from a seated position, and from a practical standpoint it would be difficult to provide for the installation of the equipment in the confined areas proposed. Safety equipment should be installed in accessible areas of the aircraft where it would be available during an emergency. However, the FAA believes that when a public address system is provided in compliance with the operating rules of this chapter, the flight attendant seated in any of the seats located adjacent to a floor level exit may be required to use the public address system. Therefore, at least one public address system microphone intended for flight attendant use should be positioned at each floor level exit and be readily accessible to a flight attendant seated in any seat adjacent to the exit. The proposal to amend § 25.1411(a)(2) is revised accordingly. The proposal for § 121.309(a)(2) is revised in a substantively identical manner and is adopted as part of § 121.318(b), which is concerned with public address systems.

One commentator objected to the proposed requirement in § 25.1411 (a)(2) that "no equipment may be located as to adversely affect the safety of the flight attendant under any condition," stating that compliance would be clearly impossible to achieve. The FAA agrees that the proposed requirement may be too restrictive and it is deleted.

No unfavorable comments were received on the proposal to add a new § 25.1411(b)(3). The FAA believes that the requirements to identify the contents of storage compartments and containers are adequately covered in § 25.1541(c). The proposal for § 25.1411(b)(3) is withdrawn.

No unfavorable comments were received on the proposal to amend § 25.1411(d) and it is adopted without substantive change.

Two commentators objected to the proposal to add a new § 25.1411(h) which would require that emergency equipment be clearly marked to indicate its method of operation if it is not obvious. The commentator objected to passengers operating emergency equipment without assistance from flight attendants and also pointed out that current § 25.1561 already requires the marking of safety equipment as to its method of operation. After further review, the FAA believes that although crewmembers are not always available, the current marking instructions set forth in § 25.1561 cover passenger use. Proposed new § 25.1411(h) is withdrawn.

Proposal 7-50. The proposal to amend § 25.1413(b) is withdrawn. For comments related to the withdrawal, see Proposal 7-15.

Proposal 7-51. Two commentators objected to the proposal to add a new § 25.1415(b)(4), which would require that one-half of the non-portable rafts be considered unusable for ditching. The commentators stated that the requirement that one-half of the rafts be considered unusable is unrealistic. The FAA does not agree since a nonportable raft, or a raft which by design cannot be used at other than its primary exit, may not be operable if that exit malfunctions or if ditching conditions are such that that exit cannot be used. However, after consideration of the comments received, and after further review, the FAA believes that it does not have enough information to prescribe a rule of general applicability for the design of ditching provisions which incorporate non-portable rafts. Accordingly, proposed new § 25.1415(b)(4) is withdrawn. The FAA believes that with the withdrawal of proposed § 25.1415(b)(4), the reference to portable rafts that is contained in proposed § 25.1415(b)(3) may be interpreted as allowing the use of nonportable rafts. This effect is not intended, and proposed new § 25.1415(b)(3) is withdrawn.

Several commentators objected to the proposal to add a new § 25.1415(b)(5), which would require that means be provided to assist the airplane's occupants in boarding the rafts from the airplane without entering the water. The commentators contended that for certain sea conditions no means has been demonstrated for boarding rafts from airplanes without the possibility of the occupants entering the water. The FAA agrees and proposed new § 25.1415(b)(5) is withdrawn.

Proposal 7-52. No unfavorable comments were received on the proposal to add a new § 25.1416 which adds pneumatic de-icer systems requirements. However, the FAA has revised the proposal based on the comments received on Proposal 7-16. See Proposal 7-16.

Proposal 7-53. Several commentators recommended revisions to the proposal to add a new § 25.1423 which would establish intercommunication equipment requirements for multideck airplanes. One commentator recommended that the lead-in paragraph be revised to make the requirements applicable to airplanes with adjacent occupiable decks or compartments (excluding lavatories) and that the intercommunication and the two-way alert means be required between each occupiable deck or compartment and the flight deck. The same commentator recommended that the intercommunication system and the two-way alert means be capable of providing crewmembers on all decks or occupiable compartments an immediate indication of an emergency situation on any deck or occupiable compartment (excluding lavatories). In the light of the comments received, and after further review, the FAA believes that it does not now have enough information to specify intercommunication equipment requirements appropriate for all transport category airplanes. The proposal to add a new § 25.1423 is withdrawn.

Proposal 8-57. One commentator suggested that proposed new § 25.1522 be revised so that it would also apply

to auxiliary power units (APU) that do not meet the requirements of TSO-C77, (§ 37.183). The FAA does not agree. The proposal recognizes that operating limitations established under a TSO do not have to be reestablished as a part of airplane type certification. However, an airplane type certificate applicant would have to develop appropriate operating limitations during the airplane type certification for any installed APU not manufactured under the provisions of a TSO. Such APU operating limitations would then become part of the aircraft type design. The proposal has no applicability in the situation discussed by the commentator.

Another commentator, while agreeing with the proposal, suggested that proposed § 25.1522 be revised to require also that each APU meet the requirements of TSO-C77. The FAA does not agree. TSO-C77 is applicable only to gas turbine powered APU's. The suggested revision would require that APU's other than gas turbine units be manufactured to the standards which are appropriate to, and established only for, the manufacture of gas turbine auxiliary power units.

The proposal is adopted without substantive change.

Proposal 7-54. One commentator objected to the proposal to amend § 25.1561(c) which makes clear that the removal of required emergency equipment from the stowage provisions be "easy." The commentator suggested replacement of the word "facilitate" between the words "and" and "removal" with the words "provide easy accessibility and rapid" in § 25.1561(c). The FAA does not believe that the recommended revision is necessary to accomplish the intent of the proposal and the proposal is adopted without substantive change.

Proposal 8-60. No unfavorable comments were received on the proposal to delete § 25.1583(g). Accordingly, the proposal is adopted without substantive change.

Proposal 8-61. For a comment related to the proposal to amend § 25.1585, see Proposal 8-24. Proposed § 25.1585(d) is revised for reasons stated in the discussion of Proposal 8-24. Proposed § 25.1585(e) is adopted without substantive change.

Proposal 7-55. For a discussion of the deferral of the proposal to add a new Appendix G to Part 25, see Proposal 7-17.

Proposal 8-63. No unfavorable comments were received on the proposal to revise § 27.79(b)(2). Accordingly, the proposal is adopted without substantive change.

Proposal 7-56. For comments related to the proposal to add a new § 27.603(c), see Proposal 7-3.

Proposal 7-57. For comments related to the proposal to amend § 27.605, see Proposal 7-29.

Proposal 7-58. One commentator apparently misunderstood the proposed addition to the lead-in of § 27.613(d). The commentator stated that the proposal did not change the current rule. However, the proposal would add the words "or other values approved by the Administrator." to the lead-in. With this change, the Administrator may allow the applicant greater flexibility in the selection of design values. The proposal is adopted without substantive change.

Proposal 7-59. Several commentators objected to the proposed amendments of §§ 27.671 and 29.671 on the ground that they would require extensive redundancy in the mechanical portion of the flight control system and require that the rotorcraft be capable of continued safe flight and landing if all engines fail. The commentators stressed that no current state-of-the-art designs can meet the proposed requirements and that redundancy may cause less reliable structure as a result of extreme complexity. One commentator stated that adequate safety can be achieved by proper design and fatique testing and analysis. After consideration of the comments received, and after further review, the FAA believes that it does not have enough information at this time to set forth an appropriate general standard for control system performance following failure or malfunction. The proposed changes to §§ 27.671 and 29.671 are withdrawn.

Proposal 7-60. No unfavorable comments were received on the proposal to revise § 27.675(d)(1). Accordingly, the proposal is adopted without substantive change.

Proposal 7-61. The proposed deletions of §§ 27.695 and 29.695 are related to the proposed revisions of §§ 27.671 and 29.671. In consideration of the withdrawal of the proposed revision of §§ 27.671 and 29.671, the proposed deletions of §§ 27.695 and 29.695 are withdrawn. See Proposal 7-59.

Proposal 7-62. Several commentators objected to the requirement in proposed §§ 27.737 and 29.737 that compliance with shock absorption tests must be demonstrated with ski components installed on rotorcraft. The commentators emphasized that the design of helicopter landing gear, such as standard skid designs, is such that ski installations will not generally change energy absorption characteristics. The FAA agrees. The proposals to amend §§ 27.737 and 29.737 are withdrawn.

Proposal 7-63. Several commentators objected to the proposed amendment to § 27.853 which would impose certain of the compartment interior fire protection requirements for transport category airplanes on normal category rotorcraft. The commentators stated that these proposed requirements are not reasonable for normal category rotorcraft and are more severe and more restrictive than the current requirements for normal category airplanes. The FAA agrees, and the proposal to amend § 27.853 is withdrawn.

Proposal 7-64. Two commentators objected to the proposal to add a new § 27.863 that would require protection from a flammable fluid or vapor fire outside the engine compartment. The commentators stated that the small, unsophisticated fluid carrying systems in normal category rotorcraft make this an unnecessary and expensive compliance item without increasing safety. The FAA disagrees. The agency believes that the smaller and less complex fluid carrying systems will be able to meet this requirement with correspondingly small and simple means. The proposal is adopted without substantive change. Also see the comments for Proposals 7-47 and 7-75.

Proposal 7-65. The proposal to amend § 27.1413(a) is withdrawn. For comments related to the withdrawal, see Proposal 7-15.

Proposal 7-66. Several commentators objected to the proposals to add new §§ 27.1463 and 29.1463 to require a means to prevent persons from inadvertently contacting the tail rotor of a rotorcraft. The comment was made that the only practical way to prevent a person from contacting a tail rotor is to make it physically impossible for the person to reach the tail rotor. This could be accomplished by raising the tail rotor or by using shrouds and screens. On smaller rotorcraft shrouds and screens would have to be used to prevent tail rotor contact by a person since it would be impossible to raise the tail rotor sufficiently. It was contended that providing a shroud and screen of sufficient strength and rigidity to accomplish its purpose, without itself causing a hazard due to deformations to be expected in service, would add excessive weight in a weight critical area of many rotorcraft designs. The FAA agrees with these comments and after further consideration the proposals to add new §§ 27.1463 and 29.1463 are withdrawn.

Proposals 5-51 and 5-65. Two commentators objected to proposed §§ 27.1545(a) and 29.1545(a) on the ground that these provisions are appropriate only to fixed-wing aircraft. Apparently these commentators construed the reference to paragraph (b) in proposed §§ 27.1545(a) and 29.1545(a) as referring to the markings specified in proposed § 23.1545(b). However, the paragraph (b) that is referred to in proposed § 27.1545(a) is current § 27.1545(b), and the paragraph referred to in proposed § 29.1545(a) is current § 29.1545(b).

Sections 27.1545(b) and 29.1545(b) have not been changed. Accordingly,

Proposal 7-68. For comments concerning the subject matter of the pro-

Also see the discussion of Proposals 7-47 and 7-64.

limit and that output is not directly controlled by the pilot under normal

For reasons that are stated in the discussion of Proposal 8-47, proposed

quire a demonstration upon a major change in cabin interior configuration

V 43/210 OC 30 78

Sections 27.1545(b) and 29.1545(b) have not been changed. Accordingly, the proposals to revise §§ 27.1545(a) and 29.1545(a) are adopted without substantive change.

Proposal 8-65. No unfavorable comments were received on the proposal to delete § 27.1583(f). Accordingly, the proposal is adopted without substantive change.

Proposal 8-66. No unfavorable comments were received on the proposal to amend § 27.1585; however, proposed § 27.1585(d) is revised for reasons stated in the discussion of Proposal 8-24. Proposed § 27.1585(e) is adopted without substantive change. In view of the adoption of new §§ 27.1585 (c) and (d) in Airworthiness Review Amendment No. 6 (42 FR 2302; January 16, 1978), proposed §§ 27.1585 (d) and (e) are redesignated and adopted as §§ 27.1585 (e) and (f), respectively.

Proposal 8-68. In the proposed amendment of § 29.75, one commentator objected to the use of the 50-foot height criterion for the determination of Category A landing distance. The commentator suggested a rewording that was identical to the proposal except that the 50-foot height criterion would be replaced by a requirement that the approach flight path cross the edge of the heliport at an altitude of 25 feet or less. According to the commentator, the 50-foot altitude criterion is inconsistent with past practices of some certification programs and there has been no adverse experience with the use of a 25-foot altitude "window." The FAA does not agree with the commentator. The FAA is aware of only one instance in which a 25-foot height criterion was used. In that instance, a 25-foot height was specified for landing operations to be conducted on a 2,300-foot runway. The FAA is not aware of any certification experience involving the use of a range of altitudes over the edge of the heliport (the "altitude window" concept) in the determination of Category A landing distances.

The commentator also suggested that the Category A performance requirements should be edited as a group and put into language which is understandable to people who work with helicopters. However, the commentator did not make any specific recommendations, and the FAA has no information which would indicate that Category A performance requirements are difficult to understand.

The proposal to amend § 29.75 is adopted without substantive change.

Proposal 7-67. For comments related to the proposal to add a new § 29.603(c), see Proposal 7-3. Section 29.603(c), as adopted, differs from the proposal for the reasons discussed in Proposal 7-3.

Proposal 7-68. For comments concerning the subject matter of the proposal to amend § 29.605, see Proposal 7-29. The proposal is adopted without substantive change.

Proposal 7-69. No unfavorable comments were received on the proposal to amend § 29.613(d). Accordingly, the proposal is adopted without substantive change.

Proposal 7-70. The proposal to amend § 29.671 is withdrawn. For a discussion of the withdrawal, see Proposal 7-59.

Proposal 7-71. No unfavorable comments were received on the proposal to amend § 29.675(d)(1). Accordingly, the proposal is adopted without substantive change.

Proposal 7-72. The proposal to delete § 29.695 is withdrawn. For discussion related to the withdrawal, see Proposal 7-61.

Proposal 7-73. The proposal to amend § 29.737 is withdrawn. For discussion related to the withdrawal, see Proposal 7-62.

Proposal 7-74. Several commentators objected to the proposal to amend § 29.853, which would impose certain of the compartment interior fire protection requirements for transport category airplanes on transport category rotorcraft. The commentators cited the favorable service experience to date, the smaller cabins of transport category rotorcraft relative to transport category airplanes, the ability of helicopters to land quickly, and the fact that helicopter cabins are not pressurized, as reasons not to impose transport category airplane requirements on transport category rotorcraft. The FAA disagrees. The service experience cited is based on the relatively small current civil fleet of transport category rotorcraft. However, the current fleet is increasing in size both with respect to the number of rotorcraft and with respect to the size of rotorcraft.

In response to another comment, proposed § 29.853(a) has been further revised to set forth the applicable requirements contained in §§ 25.853 (a) and (b) rather than cross referencing those regulations.

However, the cross-reference to Appendix F of Part 25 for test procedures has been retained. See also the discussion of Proposal 7-12.

Proposal 7-75. Two commentators objected to the proposal to revise § 29.863 on the ground that the present regulations provide an adequate level of safety without adding unnecessary cost to the certification program. The FAA believes that the proposed requirements are necessary to insure protection from a flammable fluid or vapor fire. The proposal is adopted without substantive change. Also see the discussion of Proposals 7-47 and 7-64.

Proposal 8-69. No unfavorable comments were received on the proposal to amend § 29.901. For comments related to the like proposal to amend § 25.901, see Proposal 8-43. The proposal is adopted without substantive change.

Proposal 8-70. One commentator objected to the requirements in proposed § 29.923(a) that the tests be conducted on the rotorcraft and that the test torque be absorbed by the actual rotors to be installed. This commentator stated that the testing of larger drive systems while installed on the rotorcraft is impractical and, in some cases, unconservative in view of the manner in which the rotorcraft must be attached to the ground to absorb the powers involved. Another commentator also objected to the requirement that the 200-hour test be conducted on the rotorcraft. This commentator stated that for conventional rotorcraft with anti-torque tail rotors, or those with contra-rotating rotors, the test purpose could be fulfilled by conducting the test on a suitable rig, if it can be demonstrated that the distortion and vibration conditions are the same as those met on the rotorcraft. The requirements to which these commentators objected are contained in present § 29.923 and were merely restated for clarity in the proposal. Further, the FAA believes these requirements are necessary to insure the validity of the test results.

One commentator suggested that for clarity § 29.923(a) should read "• • • for at least 200 hours plus any extra time required to meet paragraphs (b)(2) and (k) of this section where more than two engines are fitted in the rotorcraft." The FAA believes that the applicability of §§ 29.923 (b)(2)(ii) and (k)(2) to multi-engine rotorcraft is clearly stated and that the revision suggested by this commentator is unnecessary.

The proposal to amend § 29.923 is adopted without substantive change.

Proposals 8-71 and 2-164. Disposition of Proposal 2-164 to amend § 29.927 (Notice 75-10, 40 FR 10802; March 7, 1975) was deferred so that it could be considered in connection with Proposal 8-71. One commentator on Proposal 2-164 to amend § 29.927(b)(2) questioned whether due consideration had been given to the 30-minute emergency power rating when establishing the 15-minute time requirement for the torque transmission test. The 30-minute rating is substantiated by the endurance testing specified in proposed § 29.923, while the proposed 15-minute time requirement is associated with testing which must be done if turbine engine output can exceed the highest engine or transmission torque

limit and that output is not directly controlled by the pilot under normal operating conditions. The highest engine or transmission torque limit is usually associated with takeoff torque, and the 15-minute test would be done at a torque level substantially higher than that associated with the 30-minute rating. The FAA therefore believes that due consideration has been given to the 30-minute ratings, and Proposal 2-164 is adopted without substantive change.

One commentator on Proposal 8-71 agreed with the concept that the overspeed test should be a "proof" test, but questioned the use of maximum continuous speed as a datum. The commentator stated that the use of 120 percent of maximum continuous speed would be acceptable provided this value is at least equal to 105 percent of rotor never-exceed speed and 115 percent of takeoff speed. Maximum continuous speed is used as a reference speed in other required testing of the rotor drive system, and the FAA believes it is appropriate to retain it for consistency. Further, the FAA does not have any information at the present time to indicate that the additional requirements recommended by the commentator are necessary.

One commentator objected to the provisions "After completion of the 200-hour, tie-down test and without intervening major disassembly" in proposed § 29.927(d). The FAA agrees that this provision is inappropriate. The intent of the proposal was to dissociate the overspeed test from the 200-hour, tie-down test since the tests are unrelated. The proposal is revised by striking the words "After completion of the 200-hour, tie-down test and without intervening major disassembly."

Proposal 8-72. No unfavorable comments were received on the proposal to amend § 29.1091 and it is adopted as proposed.

Proposal 8-73. For comment related to the proposal to revise § 29.1103, see Proposal 8-46. The proposal is revised for the reasons discussed in Proposal 8-46.

Proposal 8-74. One commentator objected to the requirement in proposed § 29.1142 that controllability from the flight deck must be provided for auxiliary power units (APU), contending that nonessential APUs should be excluded from the requirement. The FAA does not agree. The commentator has not presented any reason to justify distinguishing between APUs on the basis of the essential or nonessential nature of the services provided by the APU. The FAA believes the flight crew should be provided a means to control an emergency involving any installed auxiliary power unit.

For reasons that are stated in the discussion of Proposal 8-47, proposed § 29.1142 is revised by inserting the word "installed" between the words "each" and "auxiliary."

Proposal 8-75. For comments related to a proposal similar to the proposal for § 29.1195(d), see Proposal 8-49. Section 29.1195(d), as adopted, differs from the proposal for the reasons discussed in Proposal 8-49.

Proposal 7-76. The proposal to amend § 29.1413 is withdrawn. For a discussion of the withdrawal, see Proposal 7-15.

Proposal 7-77. The proposal to add a new § 29.1463 is withdrawn. For a discussion of the withdrawal, see Proposal 7-66.

Proposal 8-76. No unfavorable comments were received on the proposal to add a new § 29.1522. For comments related to the proposal to add a new like section under Part 25, see Proposal 8-57. The proposal to add new § 29.1522 is adopted without substantive change.

Proposal 5-65. For comments related to the proposal to revise § 29.1545(a), see Proposal 5-51. The proposal is adopted without substantive change.

Proposal 8-78. No unfavorable comments were received on the proposal to delete § 29.1583(g). Accordingly, the proposal is adopted without substantive change.

Proposal 8-79. No unfavorable comments were received on the proposal to amend § 29.1585; however, proposed § 29.1585(d) is revised for reasons stated in the discussion of Proposal 8-24. Proposed § 29.1585(e) is adopted without substantive change. In view of the adoption of new §§ 29.1585 (c) and (d) in Airworthiness Review Amendment No. 6 (43 FR 2302; January 16, 1978), proposed §§ 29.1585 (d) and (e) are redesignated and adopted as §§ 29.1585 (e) and (f), respectively.

Proposal 7-78. One commentator suggested that the proposal to amend § 121.291 be revised to allow an air carrier to utilize the results of an evacuation demonstration conducted by another air carrier to eliminate the need for an additional demonstration. The purpose of the proposed amendment to § 121.291 and the related proposals to revise § 25.803(c) (Proposal 7-40) and to delete paragraph (a) of Appendix D to Part 121 (Proposal 7-84) is to specify conditions for an emergency evacuation demonstration to be conducted during type certification, which meets both airworthiness and operational needs. The FAA does not believe that any further relaxation of the current requirement that a Part 121 operator conduct a demonstration in addition to that conducted during type certification of the airplane, is justified. This commentator also recommended revising the proposal to require a demonstration upon a major change in cabin interior configuration that significantly affects the emergency evacuation duties of crewmembers. The FAA believes that present § 121.291(a)(2) adequately provides for the situation described by the commentator.

One commentator suggested that paragraph (a) of Appendix D to Part 121 be retained since there are certain difference in wording between that paragraph and § 25.803(c) which would be inappropriate. After consideration of this comment, and upon further review, the FAA agrees that paragraph (a) of Appendix D Part 121 contains certain requirements for emergency equipment installation, for seating density and arrangement, and for crewmember qualifications which are appropriate to an emergency evacuation demonstration conducted by an operator and which should be retained. Proposal 7-84 to delete paragraph (a) of Appendix D is withdrawn, and the reference to that paragraph which appears in present § 121.291(a) is retained.

Proposal 7-79. The proposal to add a new § 121.292 is withdrawn. For a discussion of comments related to the proposal, see Proposal 7-39.

Proposal 7-80. For discussion concerning the revision of the proposal for § 121.309(a)(2), see Proposal 7-49. Since provisions for a public address system and its use are currently provided under § 121.318, the FAA believes that substance of the proposed § 121.309(a)(2), as revised, is more appropriately stated in § 121.318, and that section is revised accordingly. The provision for a delayed effective date has been retained but extended to 2 years.

The proposal to add a new § 121.309(a)(3) is withdrawn since the proposed requirements are adequately covered in § 121.309(b)(4).

While no unfavorable comments were received on the proposal to amend § 121.309(b)(3), upon further review the FAA believes that the current requirement adequately covers identification and marking of equipment operation. Accordingly, the proposal is withdrawn.

Proposal 7-81. Several commentators objected to the proposal to amend § 121.310(a), which would require that existing aircraft comply with the emergency evacuation slide requirements in proposed § 25.809(f)(1) within 2 years of the effective date of this amendment. The commentators stated that 2 years would not be enough time to develop and test emergency evacuation slides complying with proposed § 25.809(f)(1) and to retrofit them to existing aircraft. One commentator further objected that the design development and testing needed would con-

stitute an undue burden for the operator, and that there is no assurance

passenger capacity might have its raft requirements satisfied with three rafts

(3) Take into account the effects of environmental conditions, such as

(3) A proper margin of damping exists at V_D; and

analysis based on tests conducted on a landing gear system with identical

equipment, and malfunctioning of protective devices.

(4) Means available for controlling

V 4 3 / 2 1 0 0 C 3 0 7 8 V

stitute an undue burden for the operator, and that there is no assurance that the proposed criteria could be applied retroactively to all airplanes. The FAA agrees, and the proposal to amend § 121.310(a) is withdrawn.

One commentator stated that the requirement in proposed new § 121.310(d)(4), that each emergency light have a cockpit control device with "on", "off," and "armed" positions 1 year after the effective date of the amendment, may be too restrictive, particularly for large fleet operators. Upon further consideration, the FAA believes the retrofit requirement should be extended to two years. Proposed new § 121.310(d)(4) is revised accordingly.

For a discussion of the revision to proposed § 121.310(1), see Proposal 7-44.

Proposal 7-82. One commentator objected to the proposal to revise § 121.319(b)(1) to require two-way communication between the pilot compartment and all the galleys and other flight attendant stations on the ground that the proposed requirement would result in unnecessary redundancy and would not be cost effective. The commentator agreed with a requirement for interphones for only those galleys physically isolated from the passenger compartment. Two other commentators stated that adequate communication could be provided without interphones at each flight attendant station and galley because of the close proximity of some flight attendant stations to galleys. Another commentator suggested that the interphone be required only at required flight attendant stations. The FAA agrees that the intent of the proposal can be accomplished without requiring a means of communication to all galleys and other flight attendant stations. Accordingly, the proposal is revised to require a means of two-way communication between the pilot compartment and each galley which is located on other than the main passenger deck level and each passenger compartment.

One commentator stated that the installation of the proposed two-way communication system would require the modification of aircraft and therefore requested a delayed effective date. The FAA agrees and the proposal is revised to provide 2 years for compliance with the new requirement.

Additionally, §§ 121.313 (b)(3), (b)(4), and (b)(5) are revised for consistency with the proposal for § 121.319(b)(1) by deleting the words "the passenger compartment" and substituting the words "each passenger compartment" in their place.

Proposal 7-83. One commentator stated that under the proposed rule it is conceivable that an aircraft of 300 passenger capacity might have its raft requirements satisfied with three rafts of 100 person capacity each, and considered such compliance to be impractical from the standpoint of passenger flow, urgency of evacuation at the time of ditching, and the number of exits available to those surviving passengers. The commentator recommended that the minimum number of life rafts be equivalent to the number of exits for launching of life rafts and for exiting of passengers of the ditched aircraft. The FAA does not have sufficient information at the present time to justify requiring more life rafts than would be required by proposed § 121.339(a)(2).

One commentator recommended that the proposal to amend § 121.339(a)(2) be revised to use the wording in § 25.1415(b)(1). The FAA agrees. The proposed amendment to § 121.339(a)(2) was intended to update it to agree with the requirements of § 25.1415(b)(1). The proposal is revised accordingly.

Proposal 7-84. The proposal to delete paragraph (a) of Appendix D to Part 121 is withdrawn. For discussion of the withdrawal, see Proposal 7-78.

Adoption of the Amendments

Accordingly, Parts 23, 25, 27, 29, and 121 of the Federal Aviation Regulations (14 CFR Parts 23, 25, 27, 29, and 121), are amended as follows, effective December 1, 1978.

PART 23—AIRWORTHINESS STANDARDS: NORMAL, UTILITY, AND ACROBATIC CATEGORY AIRPLANES

1. By revising § 23.345(c) to read as follows:

§ 23.345 High lift devices.

• • • • • •

(c) In designing the flaps and supporting structures, the following must be accounted for:

(1) A head-on gust having a velocity of 25 feet per second (EAS).

(2) The slipstream effects specified in § 23.457(b).

2. By deleting the word "be" and the dash at the end of the lead-in of § 23.603(a) and inserting in their place a dash; by inserting the word "Be" at the beginning of § 23.603(a)(1) and deleting the word "and" at the end of § 23.603(a)(1); by deleting the period at the end of § 23.603(a)(2) and inserting a semicolon and the word "and" in its place; and by adding a new § 23.603(a)(3) to read as follows:

§ 23.603 Materials and workmanship.

(a) • • •

(3) Take into account the effects of environmental conditions, such as temperature and humidity, expected in service.

• • • • • •

3. By redesignating § 23.605 as § 23.605(a) and adding a new § 23.605(b) to read as follows:

§ 23.605 Fabrication methods.

• • • • • •

(b) Each new aircraft fabrication method must be substantiated by a test program.

4. By revising the lead-in of § 23.613(c) to read as follows:

§ 23.613 Material strength properties and design values.

• • • • • •

(c) Design values must be those contained in the following publications (obtainable from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402) or other values approved by the Administrator:

• • • • • •

5. By revising § 23.629 to read as follows:

§ 23.629 Flutter.

(a) It must be shown by one of the methods specified in paragraph (b), (c), or (d) of this section, or a combination of these methods, that the airplane is free from flutter, control reversal, and divergence for any condition of operation within the limit V-n envelope, and at all speeds up to the speed specified for the selected method. In addition—

(1) Adequate tolerances must be established for quantities which affect flutter, including speed, damping, mass balance, and control system stiffness; and

(2) The natural frequencies of main structural components must be determined by vibration tests or other approved methods.

(b) A rational analysis may be used to show that the airplane is free from flutter, control reversal, and divergence if the analysis shows freedom from flutter for all speeds up to $1.2V_D$.

(c) Flight flutter tests may be used to show that the airplane is free from flutter, control reversal, and divergence if it is shown by these tests that—

(1) Proper and adequate attempts to induce flutter have been made within the speed range up to V_D;

(2) The vibratory response of the structure during the test indicates freedom from flutter;

(3) A proper margin of damping exists at V_D; and

(4) There is no large and rapid reduction in damping as V_D is approached.

(d) Compliance with the rigidity and mass balance criteria (pages 4-12), in Airframe and Equipment Engineering Report No. 45 (as corrected) "Simplified Flutter Prevention Criteria" (published by the Federal Aviation Administration) may be accomplished to show that the airplane is free from flutter, control reversal, or divergence if—

(1) V for the airplane is less than 260 knots (EAS) at altitudes below 14,000 feet and less than Mach 0.6 at altitudes at and above 14,000 feet,

(2) The wing and aileron flutter prevention criteria, as represented by the wing torsional stiffness and aileron balance criteria, are limited in use to airplanes without large mass concentrations (such as engines, floats, or fuel tanks in outer wing panels) along the wing span, and

(3) The airplane—

(i) Does not have a T-tail or boom tail,

(ii) Does not have unusual mass distributions or other unconventional design features that affect the applicability of the criteria, and

(iii) Has fixed-fin and fixed-stabilizer surfaces.

(e) For multiengine turbopropeller powered airplanes, the dynamic evaluation must include—

(1) Whirl mode degree of freedom which takes into account the stability of the plane of rotation of the propeller and significant elastic, inertial, and aerodynamic forces, and

(2) Engine-propeller-nacelle stiffness and damping variations appropriate to the particular configuration.

(f) Freedom from flutter, control reversal, and divergence up to V_D/M_D must be shown as follows:

(1) For airplanes that meet the criteria of paragraphs (d)(1) through (d)(3) of this section, after the failure, malfunction, or disconnection of any single element in any tab control system.

(2) For airplanes other than those described in paragraph (f)(1) of this section, after the failure, malfunction, or disconnection of any single element in the primary flight control system, any tab control system, or any flutter damper.

6. By revising § 23.723(a) to read as follows:

§ 23.723 Shock absorption tests.

(a) It must be shown that the limit load factors selected for design in accordance with § 23.473 for takeoff and landing weights, respectively, will not be exceeded. This must be shown by energy absorption tests except that analysis based on tests conducted on a landing gear system with identical energy absorption characteristics may be used for increases in previously approved takeoff and landing weights.

• • • • •

7. By adding a new § 23.785(1) to read as follows:

§ 23.785 Seats and berths.

• • • • •

(1) Each seat track must be fitted with stops to prevent the seat from sliding off the track.

8. By adding a new § 23.853(e) to read as follows;

§ 23.853 Compartment interiors.

• • • • •

(e) Airplane materials located on the cabin side of the firewall must be self-extinguishing or be located at such a distance from the firewall, or otherwise protected, so that ignition will not occur if the firewall is subjected to a flame temperature of not less than 2,000 degrees F for 15 minutes. For self-extinguishing materials (except electrical wire and cable insulation and small parts that the Administrator finds would not contribute significantly to the propagation of a fire), a vertical self-extinguishing test must be conducted in accordance with Appendix F of this part or an equivalent method approved by the Administrator. The average burn length of the material may not exceed 6 inches and the average flame time after removal of the flame source may not exceed 15 seconds. Drippings from the material test specimen may not continue to flame for more than an average of 3 seconds after falling.

9. By adding a new § 23.863 to read as follows.

§ 23.863 Flammable fluid fire protection.

(a) In each area where flammable fluids or vapors might escape by leakage of a fluid system, there must be means to minimize the probability of ignition of the fluids and vapors, and the resultant hazard if ignition does occur.

(b) Compliance with paragraph (a) of this section must be shown by analysis or tests, and the following factors must be considered:

(1) Possible sources and paths of fluid leakage, and means of detecting leakage.

(2) Flammability characteristics of fluids, including effects of any combustible or absorbing materials.

(3) Possible ignition sources, including electrical faults, overheating of equipment, and malfunctioning of protective devices.

(4) Means available for controlling or extinguishing a fire, such as stopping flow of fluids, shutting down equipment, fireproof containment, or use of extinguishing agents.

(5) Ability of airplane components that are critical to safety of flight to withstand fire and heat.

(c) If action by the flight crew is required to prevent or counteract a fluid fire (e.g. equipment shutdown or actuation of a fire extinguisher), quick acting means must be provided to alert the crew.

(d) Each area where flammable fluids or vapors might escape by leakage of a fluid system must be identified and defined.

10. By revising § 23.1307(a) to read as follows:

§ 23.1307 Miscellaneous equipment.

(a) There must be an approved seat or berth for each occupant.

• • • • • •

11. By adding a new § 23.1329(g) to read as follows:

§ 23.1329 Automatic pilot system.

• • • • • •

(g) If the automatic pilot system can be coupled to airborne navigation equipment, means must be provided to indicate to the flight crew the current mode of operation. Selector switch position is not acceptable as a means of indication.

12. By adding a new § 23.1416 to read as follows:

§ 23.1416 Pneumatic de-icer boot system.

If certification with ice protection provisions is desired and a pneumatic de-icer boot system is installed—

(a) The system must meet the requirements specified in § 23.1419.

(b) The system and its components must be designed to perform their intended function under any normal system operating temperature or pressure, and

(c) Means to indicate to the flight crew that the pneumatic de-icer boot system is receiving adequate pressure and is functioning normally must be provided.

13. By revising §§ 23.1545(a) and 23.1545(b)(5), and by adding a new § 23.1545(b)(6), to read as follows:

§ 23.1545 Airspeed indicator.

(a) Each airspeed indicator must be marked as specified in paragraph (b) of this section, with the marks located at the corresponding indicated airspeeds.

(b) • • •

(5) For the one-engine-inoperative best rate of climb speed, V_y, a blue

(b) *Specimen configuration.* Materials must be tested either as a section cut from a

PART 25—AIRWORTHINESS STANDARDS: TRANSPORT

19. By striking the words "as speed brakes" from the lead-in of § 25.345(c):

23. By deleting the word "and" at the end of § 25.603(a); by deleting the

shown to be satisfactory in the flutter and divergence investigations.

V 43/210 OC 30 78

(5) For the one-engine-inoperative best rate of climb speed, V_y, a blue sector extending from the V_y speed at sea level to the V_y speed at—

(i) An altitude of 5,000 feet, if the one-engine-inoperative best rate of climb at that altitude is less than 100 feet per minute, or

(ii) The highest 1,000-foot altitude (at or above 5,000 feet) at which the one-engine-inoperative best rate of climb is 100 feet per minute or more.

Each side of the sector must be labeled to show the altitude for the corresponding V_y.

(6) For the minimum control speed (one-engine-inoperative), V_{mc}', a red radial line.

* * * * *

14. By adding a new § 23.1557(f) to read as follows:

§ 23.1557 Miscellaneous markings and placards.

* * * * *

(f) *Unusable fuel.* If the unusable fuel supply in any tank exceeds five percent of the tank capacity, or one gallon, whichever is greater, a placard must be installed next to the fuel quantity indicator for that tank, stating that the fuel remaining when the quantity indicator reads "zero" in level flight cannot be used safely in flight.

§ 23.1583 [Amended]

15. By deleting § 23.1583(i) and marking it "[Reserved]".

16. By adding new §§ 23.1585(f) and (g) to read as follows:

§ 23.1585. Operating procedures.

* * * * *

(f) If the unusable fuel supply in any tank exceeds 5 percent of the tank capacity, or 1 gallon, whichever is greater, information must be furnished which indicates that when the fuel quantity indicator reads "zero" in level flight, any fuel remaining in the fuel tank cannot be used safely in flight.

(g) Information on the total quantity of usable fuel for each fuel tank must be furnished.

17. By adding a new Appendix F to Part 23 to read as follows:

APPENDIX F

An acceptable Test Procedure for Self-Extinguishing Materials for showing compliance with § 23.853(e).

(a) *Conditioning.* Specimens must be conditioned to 70 degrees F, plus or minus 5 degrees, and at 50 percent plus or minus 5 percent relative humidity until moisture equilibrium is reached or for 24 hours. Only one specimen at a time may be removed from the conditioning environment immediately before subjecting it to the flame.

(b) *Specimen configuration.* Materials must be tested either as a section cut from a fabricated part as installed in the airplane or as a specimen simulating a cut section, such as a specimen cut from a flat sheet of the material or a model of the fabricated part. The specimen may be cut from any location in a fabricated part; however, fabricated units, such as sandwich panels, may not be separated for test. The specimen thickness must be no thicker than the minimum thickness to be qualified for use in the airplane, except that thick foam parts must be tested in ½-inch thickness. In the case of fabrics, both the warp and fill direction of the weave must be tested to determine the most critical flammability conditions. When performing the test prescribed in paragraph (d) of this appendix, the specimen must be mounted in a metal frame so that: (1) The two long edges and the upper edge are held securely; (2) the exposed area of the specimen is at least 2 inches wide and 12 inches long, unless the actual size used in the airplane is smaller; and (3) the edge to which the burner flame is applied must not consist of the finished or protected edge of the specimen but must be representative of the actual cross section of the material or part installed in the airplane.

(c) *Apparatus.* Except as provided in paragraph (e) of this appendix, tests must be conducted in a draft-free cabinet in accordance with Federal Test Method Standard 191 Method 5903 (revised Method 5902) which is available from the General Services Administration, Business Service Center, Region 3, Seventh and D Streets SW., Washington, D.C. 20407, or with some other approved equivalent method. Specimens which are too large for the cabinet must be tested in similar draft-free conditions.

(d) *Vertical test.* A minimum of three specimens must be tested and the results averaged. For fabrics, the direction of weave corresponding to the most critical flammability conditions must be parallel to the longest dimension. Each specimen must be supported vertically. The specimen must be exposed to a Bunsen or Tirrill burner with a nominal ⅜-inch I.D. tube adjusted to give a flame of 1½ inches in height. The minimum flame temperature measured by a calibrated thermocouple pyrometer in the center of the flame must be 1,550 degrees F. The lower edge of the specimen must be three-fourths inch above the top edge of the burner. The flame must be applied to the center line of the lower edge of the specimen. The flame must be applied for 60 seconds and then removed. Flame time, burn length, and flaming time of drippings, if any, must be recorded. The burn length determined in accordance with paragraph (e) of this appendix must be measured to the nearest one-tenth inch.

(e) *Burn length.* Burn length is the distance from the original edge to the farthest evidence of damage to the test specimen due to flame impingement, including areas of partial or complete consumption, charring, or embrittlement, but not including areas sooted, stained, warped, or discolored, nor areas where material has shrunk or melted away from the heat source.

PART 25—AIRWORTHINESS STANDARDS: TRANSPORT CATEGORY AIRPLANES

18. By deleting § 25.331(c)(3) and marking it "[Reserved]," revising §§ 25.331(c)(1) and (c)(2), and adding a sentence to the end of § 25.331(a)(4) to read as follows.

§ 25.331 General.

(a) * * *

(4) * * *. The in-trim and out-of-trim flight conditions specified in § 25.255 must be considered.

* * * * *

(c) * * *

(1) *Maximum elevator displacement at V_A.* The airplane is assumed to be flying in steady level flight (point A_1, § 25.333(b)) and, except as limited by pilot effort in accordance with § 25.397(b), the pitching control is suddenly moved to obtain extreme positive pitching acceleration (nose up). The dynamic response or, at the option of the applicant, the transient rigid body response of the airplane, must be taken into account in determining the tail load. Airplane loads which occur subsequent to the normal acceleration at the center of gravity exceeding the maximum positive limit maneuvering load factor, n, need not be considered.

(2) *Specified control displacement.* A checked maneuver, based on a rational pitching control motion vs. time profile, must be established in which the design limit load factor specified in § 25.337 will not be exceeded. Unless lesser values cannot be exceeded, the airplane response must result in pitching accelerations not less than the following.

(i) A positive pitching acceleration (nose up) is assumed to be reached concurrently with the airplane load factor of 1.0 (Points A to D, § 25.333(b)). The positive acceleration must be equal to at least

$$39n/V(n-1.5), \text{ (Radians/Sec.}^2\text{)}$$

where—

n is the positive load factor at the speed under consideration, and V is the airplane equivalent speed in knots.

(ii) A negative pitching acceleration (nose down) is assumed to be reached concurrently with the positive maneuvering load factor (points A to D, § 25.333(b)). The negative pitching acceleration must be equal to at least

$$-26n/V(n-1.5), \text{ (Radians/Sec.}^2\text{)}$$

where—

n is the positive load factor at the speed under consideration; and V is the airplane equivalent speed in knots.

* * * * *

19. By striking the words "as speed brakes" from the lead-in of § 25.345(c); and by adding a new § 25.345(d) to read as follows:

§ 25.345 High lift devices.

* * * * *

(d) The airplane must be designed for landing at the maximum takeoff weight with a maneuvering load factor of 1.5g and the flaps and similar high lift devices in the landing configuration.

§ 25.351 [Amended]

20. By striking the symbol "V_A" in the lead-in of § 25.351(a) and replacing it with the symbol "V_D".

21. By striking the words "The limit engine torque" in § 25.361(a)(1) and replacing them with the words "A limit engine torque"; by striking the words "The limit engine torque corresponding to maximum continuous power and propeller speed" in § 25.361(a)(2) and replacing them with the words "A limit engine torque as specified in § 25.361(c)"; by striking the words "the limit engine torque" in § 25.361(a)(3) and replacing them with the words "a limit engine torque"; and by revising § 25.361(b) and the lead-in of § 25.361(c) to read as follows:

§ 25.361 Engine torque.

* * * * *

(b) For turbine engine installations, the engine mounts and supporting structure must be designed to withstand each of the following:

(1) A limit engine torque load imposed by sudden engine stoppage due to malfunction or structural failure (such as compressor jamming).

(2) A limit engine torque load imposed by the maximum acceleration of the engine.

(c) The limit engine torque to be considered under paragraph (a)(2) of this section must be obtained by multiplying the mean torque for maximum continuous power by a factor of—

* * * * *

22. By adding a new § 25.499(e) to read as follows:

§ 25.499 Nose-wheel yaw.

* * * * *

(e) With the airplane at design ramp weight, and the nose gear in any steerable position, the combined application of full normal steering torque and a vertical force equal to the maximum static reaction on the nose gear must be considered in designing the nose gear, its attaching structure, and the forward fuselage structure.

23. By deleting the word "and" at the end of § 25.603(a); by deleting the period at the end of § 25.603(b) and inserting a semicolon and the word "and" in its place; and by adding a new § 25.603(c) to read as follows:

§ 25.603 Materials.

* * * * *

(c) Take into account the effects of environmental conditions, such as temperature and humidity, expected in service.

24. By redesignating § 25.605 as § 25.605(a) and by adding a new § 25.605(b) to read as follows:

§ 25.605 Fabrication methods.

* * * * *

(b) Each new aircraft fabrication method must be substantiated by a test program.

25. By revising the lead-in of § 25.613(e) to read as follows:

§ 25.613 Material strength properties and design values.

* * * * *

(e) Design values must be those contained in the following publications (obtainable from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402) or other values approved by the Administrator:

* * * * *

26. By revising §§ 25.629 (d)(1), (d)(4)(v), and (d)(4)(vi) to read as follows:

§ 25.629 Flutter, deformation, and fail-safe criteria.

* * * * *

(d) * * *

(1) It must be shown, by analysis or tests, that the airplane is free from such flutter or divergence that would preclude safe flight, at any speed up to V_D, after each of the following:

(i) Each of the failures, malfunctions, or adverse conditions listed in subparagraph (4) of this paragraph.

(ii) Any other combination of failures not shown to be extremely improbable.

* * * * *

(4) * * *

(v) Failure of each principal structural element selected for compliance with § 25.571(b). Safety following a failure may be substantiated by showing that losses in rigidity or changes in frequency, mode shape, or damping are within the parameter variations shown to be satisfactory in the flutter and divergence investigations.

(vi) Any single failure or malfunction, or combinations thereof, in the flight control system considered under §§ 25.671, 25.672, and 25.1309, and any single failure in any flutter damper system. Investigation of forced structural vibration other than flutter, resulting from failures, malfunctions, or adverse conditions in the automatic flight control system may be limited to airspeeds up to V_C.

27. By revising § 25.697(b) to read as follows:

§ 25.697 Lift and drag devices, controls.

* * * * *

(b) Each lift and drag device control must be designed and located to make inadvertent operation improbable. Lift and drag devices intended for ground operation only must have means to prevent the inadvertent operation of their controls in flight if that operation could be hazardous.

* * * * *

28. By revising § 25.701(a) to read as follows:

§ 25.701 Flap interconnection.

(a) Unless the airplane has safe flight characteristics with the flaps retracted on one side and extended on the other, the motion of flaps on opposite sides of the plane of symmetry must be synchronized by a mechanical interconnection or approved equivalent means.

* * * * *

29. By revising § 25.723(a) to read as follows:

§ 25.723 Shock absorption tests.

(a) It must be shown that the limit load factors selected for design in accordance with § 25.473 for takeoff and landing weights, respectively, will not be exceeded. This must be shown by energy absorption tests except that analysis based on tests conducted on a landing gear system with identical energy absorption characteristics may be used for increases in previously approved takeoff and landing weights.

* * * * *

30. By adding a new § 25.773(d) to read as follows:

§ 25.773 Pilot compartment view.

* * * * *

(d) Fixed markers or other guides must be installed at each pilot station to enable the pilots to position themselves in their seats for an optimum

combination of outside visibility and instrument scan. If lighted markers or

part of the airplane's emergency evacuation equipment may be used to aid

of the particluar exits to be used in the demonstration.

plane equivalent to that which would be obtained by actual demonstration.

(i) Be self-illuminated with an initial brightness of at least 160 microlamberts; or (ii) Be conspicuously located

§ 25.813 Emergency exit access.

* * * * *

V43/210 0C30 78

combination of outside visibility and instrument scan. If lighted markers or guides are used they must comply with the requirements specified in § 25.1381.

§ 25.777 [Amended]

31. By deleting the measurement "6'0"" from § 25.777(c) and replacing it with the measurement "6'3""; by deleting the word "belt" in § 25.777(c) and replacing it with the words "belt and shoulder harness (if provided)"; and by deleting the word "belts" in § 25.777(f) and replacing it with the words "belt and shoulder harness (if provided)".

32. By amending § 25.789 by inserting the words "or galley" after the words "crew compartment" and redesignating the paragraph as paragraph (a), and by revising the title and adding a new paragraph (b) to read as follows:

§ 25.789 Retention of items of mass in passenger and crew compartments and galleys.

• • • • •

(b) Each interphone restraint system must be designed so that when subjected to the load factors specified in § 25.561(b)(3), the interphone will remain in its stowed position.

33. By revising §§ 25.803(c) and (d) to read as follows:

§ 25.803 Emergency evacuation.

• • • • •

(c) Except as provided in paragraph (d) of this section, for airplanes having a seating capacity or more than 44 passengers, it must be shown by actual demonstration that the maximum seating capacity, including the number of crewmembers required by the operating rules for which certification is requested, can be evacuated from the airplane to the ground within 90 seconds. The demonstration must be conducted under the following conditions:

(1) It must be conducted either during the dark of the night or during daylight with the dark of the night simulated. If the demonstration is conducted indoors during daylight hours, it must be conducted with each window covered and each door closed to minimize the daylight effect. Illumination on the floor or ground may be used, but it must be kept low and shielded against shining into the airplane's windows or doors.

(2) The airplane must be in a normal attitude with landing gear extended.

(3) Stands or ramps may be used for descent from the wing to the ground, and safety equipment such as mats or inverted life rafts may be placed on the floor or ground to protect participants. No other equipment that is not part of the airplane's emergency evacuation equipment may be used to aid the participants in reaching the ground.

(4) Except as provided in paragraph (c)(1) of this section, only the airplane's emergency lighting system may provide illumination.

(5) All emergency equipment required for the planned operation of the airplane must be installed.

(6) Each external door and exit, and each internal door or curtain, must be in the takeoff configuration.

(7) Each crewmember must be seated in the normally assigned seat for takeoff and must remain in that seat until receiving the signal for commencement of the demonstration. Each crewmember must be—

(i) For compliance with this section or § 121.291 of this chapter, a member of a regularly scheduled line crew, or

(ii) For compliance with this section, a person having knowledge of the operation of exits and emergency equipment.

(8) A representative passenger load of persons in normal health must be used as follows:

(i) At least 30 percent must be females.

(ii) At least 5 percent must be over 60 years of age with a proportionate number of females.

(iii) At least 5 percent but not more than 10 percent, must be children under 12 years of age, prorated through that age group.

(iv) Three life-size dolls, not included as part of the total passenger load, must be carried by passengers to simulate live infants 2 years old or younger.

(v) Crewmembers, mechanics, and training personnel, who maintain or operate the airplane in the normal course of their duties, may not be used as passengers.

(9) No passenger may be assigned a specific seat except as the Administrator may require. Except as required by paragraph (c)(12) of this section, no employee of the applicant may be seated next to an emergency exit.

(10) Seat belts and shoulder harnesses (as required) must be fastened.

(11) Before the start of the demonstration approximately one-half of the total average amount of carry-on baggage, blankets, pillows, and other similar articles must be distributed at several locations in the aisles and emergency exits access ways to create minor obstructions.

(12) Each crewmember must be seated in his normally assigned seat for takeoff and must remain in that seat until receiving the signal for commencement of the demonstration.

(13) No prior indication may be given to any crewmember or passenger of the particluar exits to be used in the demonstration.

(14) The applicant may not practice, rehearse, or describe the demonstration for the participants nor may any participant have taken part in this type of demonstration within the preceding 6 months.

(15) The pretakeoff passenger briefing required by § 121.571 of this chapter may be given. The passengers may also be advised to follow directions of crewmembers, but not be instructed on the procedures to be followed in the demonstration.

(16) If safety equipment as allowed by paragraph (c)(3) of this section is provided, either all passenger and cockpit windows must be blacked out or all of the emergency exits must have safety equipment in order to prevent disclosure of the available emergency exits.

(17) Not more than 50 percent of the emergency exits in the sides of the fuselage of an airplane that meet all of the requirements applicable to the required emergency exits for that airplane may be used for the demonstration. Exits that are not to be used in the demonstration must have the exit handle deactivated or must be indicated by red lights, red tape, or other acceptable means, placed outside the exits to indicate fire or other reason why they are unusable. The exits to be used must be representative of all of the emergency exits on the airplane and must be designated by the applicant, subject to approval by the Administrator. At least one floor level exit must be used.

(18) All evacuees, except those using an over-the-wing exit, must leave the airplane by a means provided as part of the airplane's equipment.

(19) The applicant's approved procedures must be fully utilized during the demonstration.

(20) The evacuation time period is completed when the last occupant has evacuated the airplane and is on the ground. Provided that the acceptance rate of the stand or ramp is no greater than the acceptance rate of the means available on the airplane for descent from the wing during an actual crash situation, evacuees using stands or ramps allowed by paragraph (c)(3) of this section are considered to be on the ground when they are on the stand or ramp.

(d) A combination of analysis and tests may be used to show that the airplane is capable of being evacuated within 90 seconds under the conditions specified in § 25.803(c) of this section if the Administrator finds that the combination of analysis and tests will provide data with respect to the emergency evacuation capability of the airplane equivalent to that which would be obtained by actual demonstration.

• • • • •

34. By revising § 25.807(a)(7)(vi) to read as follows:

§ 25.807 Passenger emergency exits.

(a) • • •

(7) • • •

(vi) There must be at least one flight attendant seat, which meets the requirements of §§ 25.785 (h) and (i), adjacent to each such exit.

• • • • •

35. By adding new §§ 25.809 (f)(1)(iv) and (f)(1)(v) to read as follows:

§ 25.809 Emergency exit arrangement.

• • • • •

(f) • • •

(1) • • •

(iv) It must have the capability, in 25-knot winds directed from the most critical angle, to deploy and, with the assistance of only one person, to remain usable after full deployment to evacuate occupants safely to the ground.

(v) For each system installation (mockup or airplane installed), five consecutive deployment and inflation tests must be conducted (per exit) without failure, and at least three tests of each such five-test series must be conducted using a single representative sample of the device. The sample devices must be deployed and inflated by the system's primary means after being subjected to the inertia forces specified in § 25.561(b). If any part of the system fails or does not function properly during the required tests, the cause of the failure or malfunction must be corrected by positive means and after that the full series of five consecutive deployment and inflation tests must be conducted without failure.

• • • • •

36. By revising § 25.811(e) to read as follows:

§ 25.811 Emergency exit marking.

• • • • •

(e) The location of the operating handle and instructions for opening exits from the inside of the airplane must be shown in the following manner.

(1) Each passenger emergency exit must have, on or near the exit, a marking that is readable from a distance of 30 inches.

(2) Each Type I and Type A passenger emergency exit operating handle must—

(i) Be self-illuminated with an initial brightness of at least 160 microlamberts; or (ii) Be conspicuously located and well illuminated by the emergency lighting even in conditions of occupant crowding at the exit.

(3) Each Type III passenger emergency exit operating handle must be self-illuminated with an initial brightness of at least 160 microlamberts. If the operating handle is covered, self-illuminated cover removal instructions having an initial brightness of at least 160 microlamberts must also be provided.

(4) Each Type A, Type I, and Type II passenger emergency exit with a locking mechanism released by rotary motion of the handle must be marked—

(i) With a red arrow, with a shaft at least three-fourths of an inch wide and a head twice the width of the shaft, extending along at least 70 degrees of arc at a radius approximately equal to three-fourths of the handle length.

(ii) So that the centerline of the exit handle is within ±1 inch of the projected point of the arrow when the handle has reached full travel and has released the locking mechanism, and

(iii) With the word "open" in red letters 1 inch high, placed horizontally near the head of the arrow.

• • • • •

37. By deleting the parenthetical expression in § 25.812(e)(1) and by revising §§ 25.812 (e)(2) and (e)(3) to read as follows:

§ 25.812 Emergency lighting.

• • • • •

(e) • • •

(2) There must be a flight crew warning light which illuminates when power is on in the airplane and the emergency lighting control device is not armed.

(3) The cockpit control device must have an "on," "off," and "armed" position so that when armed in the cockpit or turned on at either the cockpit or flight attendant station the lights will either light or remain lighted upon interruption (except an interruption caused by a transverse vertical separation of the fuselage during crash landing) of the airplane's normal electric power. There must be a means to safeguard against inadvertent operation of the control device from the "armed" or "on" positions.

• • • • •

38. By revising § 25.813(c)(1) to read as follows:

§ 25.813 Emergency exit access.

• • • • •

(c) • • •

(1) For airplanes that have a passenger seating configuration, excluding pilot's seats, of 20 or more, the projected opening of the exit provided may not be obstructed and there must be no interference in opening the exit by seats, berths, or other protrusions (including seatbacks in any position) for a distance from that exit not less than the width of the narrowest passenger seat installed on the airplane.

• • • • •

39. By revising § 25.863(a) and adding a new § 25.863(d) to read as follows:

§ 25.863 Flammable fluid fire protection.

(a) In each area where flammable fluids or vapors might escape by leakage of a fluid system, there must be means to minimize the probability of ignition of the fluids and vapors, and the resultant hazards if ignition does occur.

• • • • •

(d) Each area where flammable fluids or vapors might escape by leakage of a fluid system must be identified and defined.

40. By adding a new § 25.901(d) to read as follows:

25.901 Installation.

• • • • •

(d) Each auxiliary power unit installation must meet the applicable provisions of this subpart.

41. By revising the heading of § 25.1103, by revising §§ 25.1103 (a), (b)(2), and (d), and by adding new §§ 25.1103 (e) and (f), to read as follows:

§ 25.1103 Induction system ducts and air duct systems.

(a) Each induction system duct upstream of the first stage of the engine supercharger and of the auxiliary power unit compressor must have a drain to prevent the hazardous accumulation of fuel and moisture in the ground attitude. No drain may discharge where it might cause a fire hazard.

(b) • • •

(2) Fire resistant if it is in any fire zone for which a fire-extinguishing system is required, except that ducts for auxiliary power units must be fireproof within the auxiliary power unit fire zone.

• • • • •

(d) For turbine engine and auxiliary power unit bleed air duct systems, no hazard may result if a duct failure

§§ 25.1181 through 25.1203 must be shown by a full scale fire test or by one or more of the following methods:

(a) The system must meet the requirements specified in § 25.1419,

(b) The system and its components

period at the end of § 27.603(b) and inserting a semicolon and the word "and" in its place; and by adding a new

(2) Flammability characteristics of fluids, including effects of any combustible or absorbing materials.

(6) The horizontal distance required to land and come to a complete stop (or to a speed of approximately three

V 43/210 OCT 30 78

(d) For turbine engine and auxiliary power unit bleed air duct systems, no hazard may result if a duct failure occurs at any point between the air duct source and the airplane unit served by the air.

(e) Each auxiliary power unit induction system duct must be fireproof for a sufficient distance upstream of the auxiliary power unit compartment to prevent hot gas reverse flow from burning through auxiliary power unit ducts and entering any other compartment or area of the airplane in which a hazard would be created resulting from the entry of hot gases. The materials used to form the remainder of the induction system duct and plenum chamber of the auxiliary power unit must be capable of resisting the maximum heat conditions likely to occur.

(f) Each auxiliary power unit induction system duct must be constructed of materials that will not absorb or trap hazardous quantities of flammable fluids that could be ignited in the event of a surge or reverse flow condition.

42. By adding a new § 25.1142 to read as follows:

§ 25.1142 Auxiliary power unit controls.

Means must be provided on the flight deck for starting, stopping, and emergency shutdown of each installed auxiliary power unit.

43. By revising § 25.1195(b) to read as follows:

§ 25.1195 Fire extinguishing systems.

* * * * *

(b) The fire extinguishing system, the quantity of the extinguishing agent, the rate of discharge, and the discharge distribution must be adequate to extinguish fires. It must be shown by either actual or simulated flights tests that under critical airflow conditions in flight the discharge of the extinguishing agent in each designated fire zone specified in paragraph (a) of this section will provide an agent concentration capable of extinguishing fires in that zone and of minimizing the probability of reignition. An individual "one-shot" system may be used for auxiliary power units, fuel burning heaters, and other combustion equipment. For each other designated fire zone, two discharges must be provided each of which produces adequate agent concentration.

* * * * *

44. By revising § 25.1207 to read as follows:

§ 25.1207 Compliance.

Unless otherwise specified, compliance with the requirements of §§ 25.1181 through 25.1203 must be shown by a full scale fire test or by one or more of the following methods:

(a) Tests of similar powerplant configurations;

(b) Tests of components;

(c) Service experience of aircraft with similar powerplant configurations;

(d) Analysis.

§ 25.1307 [Amended]

45. By striking the words "and safety belt," from § 25.1307(a).

46. By adding a new § 25.1329(h) to read as follows:

§ 25.1329 Automatic pilot system.

* * * * *

(h) If the automatic pilot system can be coupled to airborne navigation equipment, means must be provided to indicate to the flight crew the current mode of operation. Selector switch position is not acceptable as a means of indication.

47. By revising §§ 25.1411 (a) and (d) to read as follows:

§ 25.1411 General.

(a) *Accessibility.* (1) Required safety equipment to be used by the crew in an emergency must be readily accessible.

(2) At least one public address system microphone intended for flight attendant use must be positioned at each floor level exit in a passenger compartment and be readily accessible to a flight attendant seated in any seat adjacent to that exit.

* * * * *

(d) *Liferafts.* (1) The stowage provisions for the liferafts described in § 25.1415 must accommodate enough rafts for the maximum number of occupants for which certification for ditching is requested.

(2) Liferafts must be stowed near exits through which the rafts can be launched during an unplanned ditching.

(3) Rafts automatically or remotely released outside the airplane must be attached to the airplane by means of the static line prescribed in § 25.1415.

(4) The stowage provisions for each portable liferaft must allow rapid detachment and removal of the raft for use at other than the intended exits.

* * * * *

48. By adding a new § 25.1416 to read as follows:

§ 25.1416 Pneumatic de-icer boot system.

If certification with ice protection provisions is desired and a pnuematic de-icer boot system is installed—

(a) The system must meet the requirements specified in § 25.1419,

(b) The system and its components must be designed to perform their intended function under any normal system operating temperature or pressure, and

(c) Means to indicate to the flight crew that the pneumatic de-icer boot system is receiving adequate pressure and is functioning normally must be provided.

49. By adding a new § 25.1522 to read as follows:

§ 25.1522 Auxiliary power unit limitations.

If an auxiliary power unit that meets the requirements of TSO-C77 (§ 37.183) is installed in the airplane, the limitations established for that auxiliary power unit under the TSO, including the categories of operation, must be specified as operating limitations for the airplane.

§ 25.1561 [Amended]

50. By inserting the words "the easy" between the words "facilitate" and "removal" in § 25.1561(c).

§ 25.1583 [Amended]

51. By deleting § 25.1583(g) and marking it "[Reserved]".

52. By adding new §§ 25.1585 (d) and (e) to read as follows:

§ 25.1585 Operating procedures.

* * * * *

(d) Information must be furnished which indicates that when the fuel quantity indicator reads "zero" in level flight, any fuel remaining in the fuel tank cannot be used safely in flight.

(e) Information on the total quantity of usable fuel for each fuel tank must be furnished.

PART 27—AIRWORTHINESS STANDARDS. NORMAL CATEGORY ROTORCRAFT

53. By revising § 27.79(b)(2) to read as follows:

§ 27.79 Limiting height-speed envelope.

* * * * *

(b) * * *

(2) For multiengine helicopters, one engine inoperative (where engine isolation features insure continued operation of the remaining engines), and the remaining engines at the greatest power for which certification is requested, and

* * * * *

54. By deleting the word "and" at the end of § 27.603(a); by deleting the period at the end of § 27.603(b) and inserting a semicolon and the word "and" in its place; and by adding a new § 27.603(c) to read as follows.

§ 27.603 Materials.

* * * * *

(c) Take into account the effects of environmental conditions, such as temperature and humidity, expected in service.

55. By redesignating § 27.605 as § 27.605(a) and adding a new § 27.605(b) to read as follows:

§ 27.605 Fabrication methods.

* * * * *

(b) Each new aircraft fabrication method must be substantiated by a test program.

56. By revising the lead-in of § 27.613(d) to read as follows:

§ 27.613 Material strength properties and design values.

* * * * *

(d) Design values must be those contained in the following publications (available from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402) or other values approved by the Administrator:

* * * * *

57. By revising § 27.675(d)(1) to read as follows:

§ 27.675 Stops.

* * * * *

(d) * * *

(1) Stops that are appropriate to the blade design must be provided to limit travel of the blade about its hinge points; and

* * * * *

58. By adding a new § 27.863 to read as follows:

§ 27.863 Flammable fluid fire protection.

(a) In each area where flammable fluids or vapors might escape by leakage of a fluid system, there must be means to minimize the probability of ignition of the fluids and vapors, and the resultant hazards if ignition does occur.

(b) Compliance with paragraph (a) of this section must be shown by analysis or tests, and the following factors must be considered:

(1) Possible sources and paths of fluid leakage, and means of detecting leakage.

(2) Flammability characteristics of fluids, including effects of any combustible or absorbing materials.

(3) Possible ignition sources, including electrical faults, overheating of equipment, and malfunctioning of protective devices.

(4) Means available for controlling or extinguishing a fire, such as stopping flow of fluids, shutting down equipment, fireproof containment, or use of extinguishing agents.

(5) Ability of rotorcraft components that are critical to safety of flight to withstand fire and heat.

(c) If action by the flight crew is required to prevent or counteract a fluid fire (e.g. equipment shutdown or actuation of a fire extinguisher) quick acting means must be provided to alert the crew.

(d) Each area where flammable fluids or vapors might escape by leakage of a fluid system must be identified and defined.

59. By revising § 27.1545(a) to read as follows:

§ 27.1545 Airspeed indicator.

(a) Each airspeed indicator must be marked as specified in paragraph (b) of this section, with the marks located at the corresponding indicated airspeeds.

* * * * *

§ 27.1583 [Amended]

60. By deleting § 27.1583(f) and marking it "[Reserved]".

61. By adding new §§ 27.1585 (e) and (f) to read as follows:

§ 27.1585 Operating procedures

* * * * *

(e) If the unusable fuel supply in any tank exceeds five percent of the tank capacity, or one gallon, whichever is greater, information must be furnished which indicates that when the fuel quantity indicator reads "zero" in level flight, any fuel remaining in the fuel tank cannot be used safely in flight.

(f) Information on the total quantity of usable fuel for each fuel tank must be furnished.

PART 29—AIRWORTHINESS STANDARDS: TRANSPORT CATEGORY ROTORCRAFT

61. By deleting the period at the end of § 29.75(b)(5) and inserting a semicolon and the word "and" in its place; and by adding a new § 29.75(b)(6) and revising §§ 29.75 (c)(2)(i) and (c)(2)(ii) to read as follows:

§ 29.75 Landing.

* * * * *

(b) * * *

(6) The horizontal distance required to land and come to a complete stop (or to a speed of approximately three knots for water landings), from a point 50 feet above the landing surface, must be determined from the approach and landing paths established in accordance with paragraphs (b)(2) through (b)(4) of this section.

(c) * * *

(2) * * *

(i) Paragraph (c)(1) of this section; or

(ii) Paragraphs (b)(2) through (b)(6) of this section.

63. By deleting the word "and" at the end of § 29.603(a); by deleting the period at the end of § 29.603(b) and inserting a semicolon and the word "and" in its place; and by adding a new § 29.603(c) to read as follows:

§ 29.603 Materials.

* * * * *

(c) Take into account the effects of environmental conditions, such as temperature and humidity, expected in service.

64. By redesignating § 29.605 as § 29.605(a) and adding a new § 29.605(b) to read as follows:

§ 29.605 Fabrication methods.

* * * * *

(b) Each new aircraft fabrication method must be substantiated by a test program.

65. By revising the lead-in of § 29.613(d) to read as follows:

§ 29.613 Material strength properties and design values.

* * * * *

(d) Design values must be those contained in the following publications (available from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402) or other values approved by the Administrator:

* * * * *

66. By revising § 29.675(d)(1) to read as follows:

§ 29.675 Stops.

* * * * *

(d) * * *

(1) Stops that are appropriate to the blade design must be provided to limit travel of the blade about its hinge points; and

* * * * *

67. By deleting § 29.853(b) and by marking it "[Reserved]" and by revising § 29.853(a) to read as follows:

§ 29.853 Compartment interiors.

(a) Each compartment must meet the applicable requirements of Part 25 of this chapter, or other approved equivalent methods.

(1) Except for electrical wiring interconnection systems, electrical wire and cable installations in compartments to which crew or passengers have access in flight must comply with the applicable portions of § 25.869(a)(4) and § 25.1359(d) of this chapter.

(2) Each electrical wire interconnection system in any compartment to which crew or passengers have access in flight must comply with § 25.1359(d) of this chapter.

(3) Each material must meet the applicable test criteria prescribed in Part 25 of this chapter.

70. By deleting § 29.923(1) and marking it "[Reserved]", by revising

(c) *Endurance tests, maximum continuous run.* Three hours of continuous operation at the torque corresponding to the maximum continuous power rating of the engine, at the maximum continuous speed recommended for the engine. The clutch must be engaged throughout the test. In each clutch engagement, the shaft on the driven side of the clutch must be accelerated from rest to the maximum speed throughout the test. In each clutch engagement, the shaft on the driven side of the clutch must be accelerated from rest to the maximum torque attainable under probable operating conditions, assuming that torque limiting devices,

V 43 / 210 0 C 30 0 78

67. By deleting § 29.853(b) and by marking it "[Reserved]" and by revising § 29.853(a) to read as follows:

§ 29.853 Compartment interiors.

* * * * *

(a) The materials (including finishes or decorative surfaces applied to the materials) must meet the following test criteria as applicable:

(1) Interior ceiling panels, interior wall panels, partitions, galley structure, large cabinet walls, structural flooring, and materials used in the construction of stowage compartments (other than underseat stowage compartments and compartments for stowing small items such as magazines and maps) must be self-extinguishing when tested vertically in accordance with the applicable portions of Appendix F of Part 25 of this chapter, or other approved equivalent methods. The average burn length may not exceed 6 inches and the average flame time after removal of the flame source may not exceed 15 seconds. Drippings from the test specimen may not continue to flame for more than an average of 3 seconds after falling.

(2) Floor covering, textiles (including draperies and upholstery), seat cushions, padding, decorative and nondecorative coated fabrics, leather, trays and galley furnishings, electrical conduit, thermal and acoustical insulation and insulation covering, air ducting, joint and edge covering, cargo compartment liners, insulation blankets, cargo covers, and transparencies, molded and thermoformed parts, air ducting joints, and trim strips (decorative and chafing) that are constructed of materials not covered in paragraph (a)(3) of this section, must be self extinguishing when tested vertically in accordance with the applicable portion of Appendix F of Part 25 of this chapter, or other approved equivalent methods. The average burn length may not exceed 8 inches and the average flame time after removal of the flame source may not exceed 15 seconds. Drippings from the test specimen may not continue to flame for more than an average of 5 seconds after falling.

(3) Acrylic windows and signs, parts constructed in whole or in part of elastometric materials, edge lighted instrument assemblies consisting of two or more instruments in a common housing, seat belts, shoulder harnesses, and cargo and baggage tiedown equipment, including containers, bins, pallets, etc., used in passenger or crew compartments, may not have an average burn rate greater than 2.5 inches per minute when tested horizontally in accordance with the applicable portions of Appendix F of Part 25 of this chapter, or other approved equivalent methods.

(4) Except for electrical wire and cable insulation, and for small parts (such as knobs, handles, rollers, fasteners, clips, grommets, rub strips, pulleys, and small electrical parts) that the Administrator finds would not contribute significantly to the propagation of a fire, materials in items not specified in paragraphs (a)(1), (a)(2), or (a)(3) of this section may not have a burn rate greater than 4 inches per minute when tested horizontally in accordance with the applicable portions of appendix F of part 25 of this chapter, or other approved equivalent methods.

* * * * *

68. By amending § 29.863 to read as follows:

§ 29.863 Flammable fluid fire protection.

(a) In each area where flammable fluids or vapors might escape by leakage of a fluid system, there must be means to minimize the probability of ignition of the fluids and vapors, and the resultant hazards if ignition does occur.

(b) Compliance with paragraph (a) of this section must be shown by analysis or tests, and the following factors must be considered:

(1) Possible sources and paths of fluid leakage, and means of detecting leakage.

(2) Flammability characteristics of fluids, including effects of any combustible or absorbing materials.

(3) Possible ignition sources, including electrical faults, overheating of equipment, and malfunctioning of protective devices.

(4) Means available for controlling or extinguishing a fire, such as stopping flow of fluids, shutting down equipment, fireproof containment, or use of extinguishing agents.

(5) Ability of rotorcraft components that are critical to safety of flight to withstand fire and heat.

(c) If action by the flight crew is required to prevent or counteract a fluid fire (e.g. equipment shutdown or actuation of a fire extinguisher), quick acting means must be provided to alert the crew.

(d) Each area where flammable fluids or vapors might escape by leakage of a fluid system must be identified and defined.

69. By adding a new § 29.901(d) to read as follows:

§ 29.901 Installation.

* * * * *

(d) Each auxiliary power unit installation must meet the applicable provisions of this subpart.

70. By deleting § 29.923(1) and marking it "[Reserved]", by revising §§ 29.923(a), (b), (c), (d), (e), (f), (h), (j), and (k), and by adding new § 29.923(o) to read as follows:

§ 29.923 Rotor drive system and control mechanism tests.

(a) *Endurance tests, general.* Each rotor drive system and rotor control mechanism must be tested, as prescribed in paragraphs (b) through (n) of this section, for at least 200 hours plus the time required to meet paragraphs (b)(2) and (k) of this section. These tests must be conducted as follows:

(1) Ten-hour test cycles must be used.

(2) The tests must be conducted on the rotorcraft.

(3) The test torque must be—

(i) Determined by the powerplant limitations; and

(ii) Absorbed by the actual rotors to be installed.

(b) *Endurance tests, takeoff torque run.* The takeoff torque run endurance test must be conducted as follows:

(1) Except as prescribed in paragraph (b)(2) of this section, the takeoff torque run must consist of 1 hour of alternate runs of 5 minutes at the torque corresponding to takeoff power and speed, and 5 minutes at as low an engine idle speed as practicable. The engine must be declutched from the rotor drive system, and the rotor brake, if furnished and so intended, must be applied during the first minute of the idle run. During the remaining 4 minutes of the idle run, the clutch must be engaged so that the engine drives the rotors at the minimum practical r.p.m. Acceleration of the engine and the rotor drive system must be done at the maximum rate. When declutching the engine, it must be decelerated rapidly enough to allow the operation of the overrunning clutch.

(2) For helicopters for which the use of 2½-minute power is requested, the takeoff torque run must be conducted as prescribed in paragraph (b)(1) of this section, except for the third and sixth run for which the torque corresponding to takeoff power and speed is prescribed in that paragraph. For these two takeoff torque runs, the following apply.

(i) Each run must consist of at least one period of 2½ minutes with the torque corresponding to takeoff power and speed on all engines.

(ii) Each run must consist of at least one period, for each engine in sequence, during which that engine simulates a power failure and the remaining engines are run at the torque corresponding to 2½-minute power and speed for 2½ minutes.

(c) *Endurance tests, maximum continuous run.* Three hours of continuous operation at the torque corresponding to maximum continuous power and speed must be conducted as follows:

(1) The main rotor controls must be operated at a minimum of 15 times each hour through the main rotor pitch positions of maximum vertical thrust, maximum forward thrust component, maximum aft thrust component, maximum left thrust component, and maximum right thrust component, except that the control movements need not produce loads or blade flapping motion exceeding the maximum loads of motions encountered in flight.

(2) The directional controls must be operated at a minimum of 15 times each hour through the control extremes of maximum right turning torque, neutral torque as required by the power applied to the main rotor, and maximum left turning torque.

(3) Each maximum control position must be held for at least 10 seconds, and the rate of change of control position must be at least as rapid as that for normal operation.

(d) *Endurance tests; 90 percent of maximum continuous run.* One hour of continuous operation at the torque corresponding to 90 percent of maximum continuous power must be conducted at maximum continuous speed.

(e) *Endurance tests; 80 percent of maximum continuous run.* One hour of continuous operation must be conducted at the torque corresponding to 80 percent of maximum continuous power and minimum speed intended for this power.

(f) *Endurance tests; 60 percent of maximum continuous run.* Two hours, or, for helicopters for which the use of 30-minute power is requested, 1 hour of continuous operation at the torque corresponding to 60 percent of maximum continuous power must be conducted at the minimum rotational speed intended for this power.

* * * * *

(h) *Endurance tests; overspeed run.* One hour of continuous operation must be conducted at the torque corresponding to maximum continuous power and at the maximum rotational speed expected in service, assuming that speed and torque limiting devices, if any, function properly.

* * * * *

(j) *Endurance tests, clutch and brake engagements.* A total of at least 400 clutch and brake engagements, including the engagements of paragraph (b) of this section, must be made during the takeoff torque runs and, if necessary, at each change of torque and speed throughout the test. In each clutch engagement, the shaft on the driven side of the clutch must be accelerated from rest. The clutch engagements must be accomplished at the speed and by the method prescribed by the applicant. During deceleration after each clutch engagement, the engines must be stopped rapidly enough to allow the engines to be automatically disengaged from the rotors and rotor drives. If a rotor brake is installed for stopping the rotor, the clutch, during brake engagements, must be disengaged above 40 percent of maximum continuous rotor speed and the rotors allowed to decelerate to 40 percent of maximum continuous rotor speed, at which time the rotor brake must be applied. If the clutch design does not allow stopping the rotors with the engine running, or if no clutch is provided, the engine must be stopped before each application of the rotor brake, and then immediately be started after the rotors stop.

(k) *Endurance tests, 30-minute torque run.* For helicopters for which the use of 30-minute power is requested, a run at the torque corresponding to 30-minute power and speed must be conducted as follows:

(1) For each engine, in sequence, that engine must be inoperative and the remaining engines must be run for a 30-minute period.

(2) The number of periods prescribed in paragraph (k)(1) of this section may not be less than the number of engines, nor may it be less than two.

* * * * *

(o) Each part tested as prescribed in this section must be in a serviceable condition at the end of the tests. No intervening disassembly which might affect test results may be conducted.

71. By revising § 29.927(b), and adding new §§ 29.927 (d) and (e) to read as follows:

§ 29.927 Additional tests.

* * * * *

(b) If turbine engine torque output to the transmission can exceed the highest engine or transmission torque limit, and that output is not directly controlled by the pilot under normal operating conditions (such as where the primary engine power control is accomplished through the flight control), the following test must be made:

(1) Under conditions associated with all engines operating, make 200 applications, for 10 seconds each, of torque that is at least equal to the lesser of—

(i) The maximum torque used in meeting § 29.923 plus 10 percent; or

(ii) The maximum torque attainable under probable operating conditions, assuming that torque limiting devices, if any, function properly.

(2) For multiengine rotorcraft under conditions associated with each engine, in turn, becoming inoperative, apply to the remaining transmission torque inputs the maximum torque attainable under probable operating conditions, assuming that torque limiting devices, if any, function properly. Each transmission input must be tested at this maximum torque for at least fifteen minutes.

* * * * *

(d) *Overspeed test.* The rotor drive system must be subjected to 50 overspeed runs, each 30±3 seconds in duration at a speed of at least 120 percent of maximum continuous speed. These runs must be conducted as follows:

(1) Overspeed runs must be alternated with stabilizing runs of from 1 to 5 minutes duration each at 60 to 80 percent of maximum continuous speed.

(2) Acceleration and deceleration must be accomplished in a period not longer than 10- seconds, and the time for changing speeds may not be deducted from the specified time for the overspeed runs.

(3) Overspeed runs must be made with the rotors in the flattest pitch for smooth operation.

(e) The tests prescribed in paragraphs (b) and (d) of this section must be conducted on the rotorcraft and the torque must be absorbed by the rotors to be installed, except that other ground or flight test facilities with other appropriate methods of torque absorption may be used if the conditions of support and vibration closely simulate the conditions that would exist during a test on the rotorcraft.

72. By revising §§ 29.1091 (a), (b), and (f)(1) to read as follows:

§ 29.1091 Air induction.

(a) The air induction system for each engine and auxiliary power unit must supply the air required by that engine and auxiliary power unit under the operating conditions for which certification is requested.

(b) Each engine and auxiliary power unit air induction system must provide air for proper fuel metering and mixture distribution with the induction system valves in any position.

* * * * *

(f) For turbine engine powered rotorcraft and rotorcraft incorporating auxiliary power units—

(1) There must be means to prevent hazardous quantities of fuel leakage or overflow from drains, vents, or other components of flammable fluid sys-

tems from entering the engine or auxiliary power unit intake system; and

flight the discharge of the extinguishing agent in each designated fire zone will provide an agent concentration ca-

§ 121.291 Demonstration of emergency evacuation procedures.

(ii) Each galley located on other than the main passenger deck level.

V 43/210 OCT 30 78

tems from entering the engine or auxiliary power unit intake system; and

. . . . . .

73. By revising the heading and paragraphs (a) and (d) of § 29.1103, and by adding new § 29.1103(e) and (f), to read as follows:

§ 29.1103 Induction systems ducts and air duct systems.

(a) Each induction system duct upstream of the first stage of the engine supercharger and of the auxiliary power unit compressor must have a drain to prevent the hazardous accumulation of fuel and moisture in the ground attitude. No drain may discharge where it might cause a fire hazard.

. . . . . .

(d) Each duct within any fire zone for which a fire-extinguishing system is required must be at least—

(1) Fireproof, if it passes through any firewall; or

(2) Fire resistant, for other ducts, except that ducts for auxiliary power units must be fireproof within the auxiliary power unit fire zone.

(e) Each auxiliary power unit induction system duct must be fireproof for a sufficient distance upstream of the auxiliary power unit compartment to prevent hot gas reverse flow from burning through auxiliary power unit ducts and entering any other compartment or area of the rotorcraft in which a hazard would be created resulting from the entry of hot gases. The materials used to form the remainder of the induction system duct and plenum chamber of the auxiliary power unit must be capable of resisting the maximum heat conditions likely to occur.

(f) Each auxiliary power unit induction system duct must be constructed of materials that will not absorb or trap hazardous quantities of flammable fluids that could be ignited in the event of a surge or reverse flow condition.

74. By adding a new § 29.1142 to read as follows:

§ 29.1142 Auxiliary power unit controls.

Means must be provided on the flight deck for starting, stopping, and emergency shutdown of each installed auxiliary power unit.

75. By adding a new § 29.1195(d) to read as follows:

§ 29.1195 Fire extinguishing systems.

. . . . . .

(d) It must be shown by either actual or simulated flight tests that under critical airflow conditions in flight the discharge of the extinguishing agent in each designated fire zone will provide an agent concentration capable of extinguishing fires in that zone and of minimizing the probability of reignition.

76. By adding a new § 29.1522 to read as follows:

§ 29.1522 Auxiliary power unit limitations.

If an auxiliary power unit that meets the requirements of TSO-C77 is installed in the rotorcraft, the limitations established for that auxiliary power unit under the TSO including the categories of operation must be specified as operating limitations for the rotorcraft.

77. By revising § 29.1545(a) to read as follows:

§ 29.1545 Airspeed indicator.

(a) Each airspeed indicater must be marked as specified in paragraph (b) of this section, with the marks located at the corresponding indicated airspeeds.

. . . . . .

§ 29.1583 [Amended]

78. By deleting § 29.1583(g) and marking it "[Reserved]".

79. By adding new §§ 29.1585(e) and (f) to read as follows:

§ 29.1585 Operating procedures.

. . . . . .

(e) If the unusable fuel supply in any tank exceeds 5 percent of the tank capacity, or 1 gallon, whichever is greater, information must be furnished which indicates that when the fuel quantity indicator reads "zero" in level flight, any fuel remaining in the fuel tank cannot be used safely in flight.

(f) Information on the total quantity of usable fuel for each fuel tank must be furnished.

PART 121—CERTIFICATION AND OPERATIONS: DOMESTIC, FLAG, AND SUPPLEMENTAL AIR CARRIERS AND COMMERCIAL OPERATORS OF LARGE AIRCRAFT

80. By revising § 121.291(a) by inserting at the beginning a phrase that reads "For airplanes that were not shown to be in compliance with § 25.803(c)(7)(i) of this chapter in effect on December 1, 1978, during type certification," and by adding a new § 121.291(c) to read as follows:

§ 121.291 Demonstration of emergency evacuation procedures.

. . . . . .

(c) For airplanes that were shown to be in compliance with § 25.803(c)(7)(i) of this chapter in effect on December 1, 1978, during type certification, the operator must show that its emergency evacuation procedures and the training provided its crewmembers with respect to those procedures will provide emergency evacuation results equivalent to those obtained under § 25.803(c) of this chapter during airplane type certification.

81. By adding new §§ 121.310(d)(4) and 121.310(l) to read as follows:

§ 121.310 Additional emergency equipment.

. . . . . .

(d) * * *

(4) After December 1, 1980, each light must have a cockpit control device that has an "on", "off", and "armed" position.

. . . . . .

(l) *Portable lights.* After December 1, 1980, no person may operate a passenger-carrying airplane unless it is equipped with flashlight stowage provisions accessible from each flight attendant seat.

82. By revising § 121.318(b)(2) to read as follows:

§ 121.318 Public address system.

. . . . . .

(b) * * *

(2) It must be accesssible for use from at least one normal flight attendant station in the passenger compartment, and, after December 1, 1980, at least one public address system microphone intended for flight attendant use must be positioned at each floor level exit in a passenger compartment and be readily accessible to a flight attendant seated in any seat adjacent to that exit.

. . . . . .

83. By revising §§ 121.319 (b)(1), (b)(3), (b)(4), and (b)(5)(i) to read as follows:

§ 121.319 Crewmember interphone system.

. . . . . .

(b) * * *

(1) After December 1, 1980, it must provide a means of two-way communication between the pilot compartment and—

(i) Each passenger compartment; and

(ii) Each galley located on other than the main passenger deck level.

. . . . . .

(3) It must be accessible for use from at least one normal flight attendant station in each passenger compartment;

(4) It must be capable of operation within 10 seconds by a flight attendant at those stations in each passenger compartment from which its use is accessible; and

(5) * * *

(i) It must be accessible for use at enough flight attendant stations so that all floor level emergency exits in each passenger compartment are observable from one or more of those stations so equipped;

. . . . . .

84. By adding a sentence to § 121.339(a)(2) to read as follows:

§ 121.339 Emergency equipment for extended over-water operations.

(a) * * *

(2) * * * Unless excess rafts of enough capacity are provided, the bouyancy and seating capacity beyond the rated capacity of the rafts must accommodate all occupants of the airplane in the event of a loss of one raft of the largest rated capacity.

. . . . . .

(Secs. 313(a), 601, 603, 604, Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, 1423, 1424), sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Washington, D.C., on October 20, 1978.

LANGHORNE BOND,
Administrator.

SECURITIES AND EXCHANGE COMMISSION

■

COLLECTION, DISSEMINATION, AND DISPLAY OF TRANSACTION REPORTS AND QUOTATION INFORMATION

Proposed Rulemaking

V 43/210 0 C 30 78

[8010-01-M]

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 240]

[Release No. 34-15250; File No. S7-758]

COLLECTION AND DISSEMINATION OF TRANSACTION REPORTS

Proposed Rulemaking

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rule amendments.

SUMMARY: The Commission proposes to amend its rule governing the collection and dissemination of transaction reports and last sale data in listed securities. The proposal, if adopted, would restate that rule in reversed format, would add explicit procedures for amending transaction reporting plans filed with and declared effective by the Commission pursuant to the rule and would provide that no national securities exchange may prohibit retransmission of the entire data stream of transaction reports on a current and continuous basis for the purpose of creating a moving ticker display.

DATES: Comments should be submitted on or before December 15, 1978.

ADDRESSES: Persons wishing to submit written views data and arguments should file ten copies thereof with George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Room 892, 500 North Capitol Street, Washington, D.C. 20549. All submissions should refer to file No. 758 and will be available for public inspection at the Commission's Public Reference Room, Room 6101, 1100 L Street NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Brandon Becker, Division of Market Regulation, Securities and Exchange Commission, Room 303, 500 North Capitol Street, Washington, D.C. 20549, 202-755-8748.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission announced today that it has proposed to amend rule 17a-15 (17 CFR 240.17a-15) under the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq., as amended by Pub. L. No. 94-29 (June 4, 1975)) (the "Act") which currently governs the manner of collection and dissemination of last sale information with respect to securities listed or admitted to unlisted trading privileges on national securities exchanges ("exchanges"). The proposed amendments would restate the rule in a revised format, redesignate the rule 11Aa3-1 under the Act (17 CFR 240.11Aa3-1), add explicit procedures governing the amendment of transaction reporting plans filed with and declared effective by the Commission pursuant to the rule and would provide that no exchange or national securities association ("association") may prohibit retransmission of the entire data stream of transaction reports contained in the consolidated transaction reporting system ("consolidated system") on a current and continuous basis for the purpose of creating a continuous moving ticker display ("moving ticker"). In addition, those provisions of rule 17a-15 which currently govern the display of last sale reports would be relocated in a separate rule (proposed rule 11Ac1-2) being proposed simultaneously with these proposed amendments, which would set forth further requirements specifying the manner in which price and volume information with respect to completed securities transactions ("transaction reports"), data contained in transaction reports ("last sale data") and quotation information are displayed by vendors of market information.[1]

I. Background

The concept of a consolidated transaction reporting system, presenting last sale data from all markets in a single data stream, was first proposed by the Commission in its February 2, 1972, Statement on the Future Structure of the Securities Markets.[2] Soon after the release of that statement, the Commission published rule 17a-15 for comment.[3] Following the initial comment period, the rule was republished for further comment in August, 1972,[4] and adopted in November of that year.[5] The rule as adopted required every exchange and association, and every broker-dealer who was not an exchange or association member and who effected transactions in listed securities which were not reported by an exchange or association pursuant to the rule, to file with the Commission a plan providing for the collection, processing and dissemination of last sale reports in securities registered or admitted to unlisted trading privileges on an exchange. The rule also provided that, after a certain date, no exchange, association or broker-dealer subject to its provisions could make available last sale data on a current and continuing basis except pursuant to such a plan declared effective by the Commission.

After some delay,[6] the New York Stock Exchange, Inc. ("NYSE"), American Stock Exchange, Inc. ("Amex"), Midwest Stock Exchange, ("MSE"), Pacific Stock Exchange, Inc. ("PSE"), PBW Stock Exchange, Inc. (predecessor to the Philadelphia Stock Exchange, Inc.) ("Phlx") and the National Association of Securities Dealers, Inc. ("NASD") filed a joint industry plan (the "Joint Industry Plan" or the "Plan") with the Commission on March 2, 1973.[7] The Commission solicited public comment on the Plan,[8] twice published its own comments [9] and declared the Plan effective in May 1974.[10]

The Plan provided for the creation of an unincorporated association called the Consolidated Tape Association ("CTA") to administer the Plan and the employment of the Securities Industry Automation Corp. ("SIAC") as the initial processor of the consolidated system contemplated by the Plan. A pilot phase of the consolidated system in a limited number of securities began operation on October 18, 1974, and, on July 16, 1975, network A [11] was fully implemented on a

[5] Securities Exchange Act release No. 9850 (Nov. 8, 1972), (the "Adopting Release") 37 FR 24172.

[6] See Securities Exchange Act release Nos. 9924 (Jan. 3, 1973) and 9981 (Feb. 2, 1973), 38 FR 1121 and 3591.

[7] The Boston Stock Exchange, Inc. ("BSE"), Cincinnati Stock Exchange ("CSE"), Detroit Stock Exchange, ("DSE") (which ceased operations on June 30, 1976) and Institutional Networks Corp. ("Instinet") subsequently filed plans with the Commission. These plans were declared effective by the Commission upon the condition that each entity operate under the Plan as "other reporting parties." Securities Exchange Act release No. 11255 (Feb. 18, 1975), 40 FR 8397.

The Intermountain and Spokane Stock Exchanges have been granted exemptions from the reporting requirements of the rule. Securities Exchange Act release Nos. 11385 (Apr. 30, 1975) and 14651 (Apr. 11, 1978), 40 FR 19888 and 43 FR 16582.

[8] Securities Exchange Act release No. 10026 (Mar. 5, 1973), 38 FR 6443.

[9] Securities Exchange Act release Nos. 10218 (June 13, 1973) (the "First Plan Release") and 10671 (Mar. 8, 1974) (the "Second Plan Release"), 38 FR 15999 and 39 FR 10034.

[10] Securities Exchange Act release No. 10787 (May 10, 1974) (the "Approval Release"), 39 FR 17799.

[11] The Plan provides that the consolidated system consist of two discrete data streams, network A and network B. Network A reports transactions in securities listed on the NYSE and network B reports transactions in securities listed or admitted to unlisted trading privileges on the Amex as well as certain securities traded on participating regional exchanges. See note 63 infra for a description of the particular securities included within the system.

low speed basis.[12] After several postponements,[13] the entire system became fully operational on April 30, 1976.

In the interest of assuring that the consolidated system commence operations without undue delay, the Commission approved the Plan and the implementation of the system without having fully resolved certain isssues relating to the Plan. For example, during the comment period following the filing of the Plan, the Commission raised concerns regarding Plan amendment procedures which were not adequately addressed in the Plan.[14] In addition, as a result of its review of the operation of the consolidated system over the past 2 years, the Commission believes that certain adjustments are necessary to conform the operation of the system with the Commission's overall efforts to facilitate the establishment of a national market system.[15]

II. Proposed Rule 11Aa3-1

Proposed rule 11Aa3-1 constitutes a restatement and amendment of those portions of rule 17a-15 which deal with the filing and approval of transaction reporting plans. The proposed amendment retains the basic regulatory approach of rule 17a-15; it would require all exchanges and associations and non-member brokers or dealers trading in reported securities to file plans for collecting, processing and making available transaction reports in reported securities. Since the proposal would amend rule 17a-15, any plans previously filed and declared effective under that rule, any amendments thereto and any Commission action with respect to such plans or amendments would remain in effect without further action by the Commission.[16]

The proposed amendment differs from the existing rule in two respects. First, the proposal sets forth procedures for amending transaction reporting plans filed under the rule. Second, the proposal contains a provision which would preclude any transaction reporting plan from prohibiting retransmission of the entire data stream of transaction reports for purposes of providing a moving ticker display. In addition to these substantive distinctions, proposed rule 11Aa3-1 has been drafted to reflect changes in the Act resulting from the Securities Act Amendments of 1975 (the "1975 amendments").[17]

A. The 1975 Amendments

Rule 17a-15 was proposed and adopted in 1972 under section 17 of the Act pursuant to authority granted in sections 10(b), 15(c), 17(a) and 23(a) of the Act.[18] Prior to the adoption of the 1974 amendments, there existed some controversy as to the Commission's authority under the Act to require the implementation of the consolidated system or to regulate the manner in which vendors of market information disseminated and displayed transaction reports.[19]

The legislative history of the 1975 amendments indicates that the amendments were in part designed to eliminate any uncertainty over the Commission's regulatory power with respect to the dissemination of last sale or quotation information. The Senate Committee on Banking, Housing, and Urban Affairs, in its Report to Accompany S. 249,[20] stated that:

> arguments about the SEC's authority are not in the best interest of investors or the industry, for they can only result in substantial delays in implementing the communications systems necessary for the national market system. S. 249 is designed to make the SEC's authority over such systems and the operations of a national market system clear.[21]

Because the 1975 amendments now place explicit Commission authority to regulate the consolidated system in section 11A of the Act, the Commission has determined, in conjunction with its consideration of ways of improving the operation of the consolidated system, to propose its amendments to rule 17a-15 under section 11A of the Act as well as the other sections of the Act previously cited as authority for that rule, and to renumber the rule under that section.

In addition to consolidating and explicitly stating the Commission's power to regulate the dissemination and use of last sale and quotation information, the 1975 amendments also include certain provisions which render portions of rule 17a-15 either unnecessary or inappropriate. For example, rule 17a-15, as amended in 1974,[22] contains procedures permitting any person who is denied or limited access to last sale reports disseminated pursuant to an effective plan to appeal such action to the Commission.[23] This provision is redundant and in some technical respects inconsistent with the extensive procedures set forth in section 11A(a)(5) of the Act which govern denial or limitation of access by registered securities information processors.[24] Similarly, rule 17a-15 indirectly imposes certain minimal display standards on vendors of market information by requiring that any plan filed pursuant to the Rule impose these display standards on vendors. This indirect procedure was used because, prior to the adoption of the 1975 amendments, the Commission did not directly regulate securities information processors. However, section 11A(c)(1) now provides the Commission with plenary authority to regulate the manner in which vendors display transaction reports.[25] In addition, rule 17a-15 is limited in its application to "securities registered or admitted to unlisted trading privileges on an exchange," [26] whereas section 11A(a)(2) permits the Commission to designate any security (other than an exempted

[12] Prior to Apr. 30, 1976, all last sale data was disseminated over low speed data transmission lines at 900 characters per minute, the rate at which characters are displayed on moving ticker displays. Since Apr. 30, 1976, last sale data with respect to both network A and network B securities has also been disseminated over high speed data transmission lines; interrogation devices which are supplied data over these lines remain current notwithstanding delays in the low speed lines. See note 55.

[13] See Securities Exchange Act release No. 11273 (Mar. 3 1975), 40 FR 11389.

[14] See the First Plan Release, supra note 9, at 2-3, 38 FR 15999 and the Second Plan Release, supra note 9, at 2-3, 39 FR 10034.

[15] On January 26, 1978, the Commission issued a statement setting forth its views as to those initiatives which should be taken over the next year to facilitate the establishment of a national market system. One of the initiatives discussed in that statement was the consideration of certain changes in the consolidated system. See Securities Exchange Act release No. 14416 (Jan. 26, 1978) (the "Market Structure Statement"), 43 FR 4354.

[16] However, those provisions of the Plan prohibiting retransmission of data for purposes of creating a moving ticker display would be modified by paragraph (e) of proposed rule 11Aa3-1.

[17] Pub. L. 94-29 (June 4, 1975).

[18] See the adopting release, supra note 5, at 2, 37 FR 24173.

[19] Certain exchanges, in responding to the proposal of the rule, challenged the Commission's authority to adopt the rule under the provisions of the Act cited by the Commission; they argued that the Commission's sole authority over last sale reports, at that time, rested in section 19(b) of the Act and, therefore, the consolidated system would be required to be implemented pursuant to the procedures set forth in that section of the Act.

[20] S. 249 contained provisions which were the basis for section 11A of the Act.

[21] Senate Committee on Banking, Housing, and Urban Affairs, Report to Accompany S. 249, S. Rep. No. 94-75, 94th Cong., 1st sess. 3 (1975) (the "Senate Report"), at 9.

[22] See Securities Exchange Act release No. 11097 (Nov. 13, 1974), 39 FR 40941.

[23] See rule 17a-15(i).

[24] For example, section 11A(b)(5)(A) of the Act is substantively identical to rule 17a-15(i) (1) and (2) with the exception that the statute requires registered securities information processors to file initially with the Commission a notice of denial and also permits the Commission to grant stays summarily. However, because the provisions of rule 17a-15(i) are somewhat broader in scope than the provisions of section 11A(b)(5), these procedures have been retained in the proposal in modified form.

[25] See section 11A(c)(1) (A) AND (B). These display requirements, currently contained in rule 17A-15, would be relocated in proposed rule 11Ac1-2 which is being proposed simultaneously with these amendments. See proposed rule 11Ac1-2 release, supra note 1.

security) as qualified for trading in the national market system.[27] Proposed rule 11Aa3-1 has been revised to reflect these and other changes in the regulatory structure of the Act.

II. RETRANSMISSION

The term "retransmission" refers to the communications process by which the entire data stream of transaction reports disseminated through the consolidated system would be received by a vendor and retransmitted to its subscribers as a moving ticker display.[28] While rule 17a-15 does not address retransmission, the Joint Industry Plan provides:

Vendors will not be permitted to retransmit on a continuous basis the consolidated last sale prices received by them, except as may be incidental to the operation of approved interrogation devices or display devices.[29]

The Commission believes that the retransmission prohibition may have an anticompetitive impact on vendors of securities information which is not necessary or appropriate in furtherance of the purposes of the Act. Accordingly, the Commission has proposed to include a provision in rule 11Aa3-1 which would eliminate the retransmission prohibition contained in the Plan as of March 1, 1979.[30] However, in order to assure the continued availability of transaction information in accordance with the objectives of the Act, the Commission proposes to permit any exchange, association or person authorized to implement or administer a plan under the rule to condition retransmission upon appropriate undertakings by a vendor to assure that (i) subscriber charges for the receipt of transaction reports on moving ticker displays are collected; (ii) transaction reports which are retransmitted for display in moving tickers are displayed at substantially the same rate and time as reports directly disseminated by the exchange, association or plan processor; and (iii) the vendor maintains procedures and facilities sufficient to ensure the accurate and reliable display of transaction reports.

1. *Background.* Prior to the implementation of the consolidated system, the NYSE and Amex each operated and maintained a nationwide network of telecommunication lines leased from Western Union ("ticker network") supplying, on an exclusive basis, all last sale data displayed on moving tickers. Securities information processors were permitted to use this information to create a data base from which subscribers could, upon separate inquiry, recall market information over the vendor's proprietary communication lines for display in interrogation devices. However, the exchanges required that any moving ticker, whether displayed in an interrogation device or on a separate wall unit, be supplied data directly from the ticker network.

Vendors of securities information were not then required to pay the NYSE or Amex for the receipt of last sale data displayed on moving tickers or through interrogation devices;[31] however, subscribers of the vendors were required to pay a fee directly to the NYSE and Amex in addition to the charges imposed by vendors for particular display units.[32] Prior to 1968, the exchanges' fee were assessed on a geographic basis, according to the distance of the subscriber from New York City. However, in 1968, this practice was altered to provide that exchange fees be imposed on a geographically uniform basis throughout the United States. Fees were assessed for each display device[33] and were based upon the amount of equipment and services provided by the exchanges. The highest fee was for receipt of last sale reports through a ticker tape device furnished by an exchange (with data supplied through the ticker network); a lesser charge was imposed if last sale reports were to be displayed on a moving ticker leased from a vendor either on a separate wall unit or through an interrogation device (with data supplied through the ticker network); the smallest charge was for the receipt of transaction information, upon separate inquiry, through an interrogation device to which data was supplied over the vendor's proprietary transmission lines.[34]

In response to the publication of both proposed versions of rule 17a-15, the Commission received commentary[35] requesting that the exchanges be permitted to maintain their uniform charges and that the rule specifically include a retransmission prohibition in order to assure the collection of these fees and thereby the viability of the ticker network. In the second proposal of the rule and in the version adopted, the Commission included a provision expressly permitting the maintenance of this fee structure. Rule 17a-15(f) provides:

Nothing in this section shall preclude any exchange or association, separately or jointly: (1) From imposing reasonable, uniform charges (irrespective of geographic location) for distribution of last sale reports; nor (2) from requiring any vendor which distributes or displays last sale reports to make the last sale reports it distributes or displays available to all qualified subcribers throughout the continental United States and to impose uniform charges on its subscribers (irrespective of geographic location).

While declining to include a retransmission prohibition in the rule, the Commission did not raise any objection to its inclusion in the Plan:

In not objecting to the Plan's limitations on retransmission, the Commission recognized that the principal effect of this provision would be to maintain in the self-regulatory bodies (through the CTA) the control that the primary exchanges currently exercise over their own ticker distribution networks. Independent vendors would be able to engage in the distribution of last sale data via monitoring or interrogation devices and to market equipment for the display of data via a ticker; however, they would not be permitted to distribute a continuous stream of data for ticker display purposes. This function would remain the sole prerogative of the CTA.[36]

In support of its retransmission position, the Commission identified four potentially harmful effects from eliminating the prohibition. First, it was felt that the loss of geographically uniform charges for ticker information, because vendors would be free to charge rates differing from the CTA's for supplying ticker displays, could impede the dissemination of last sale data to distant locations, thereby having anticompetitive effects on brokers in those areas. Second, because vendors would presumably concentrate their marketing efforts on easily accessible urban areas thereby leaving distribution to remote areas to the

[27] See market structure statement, supra note 15, at 45 46, 43 FR 4360-61.

[28] The term "retransmission" as used in this release should not be confused with the use of that term in the Commission's recent proceedings *In the Matter of Bunker Ramo Corporation, GTE Information Systems Incorporated* and *Options Price Reporting Authority* announced in Securities Exchange Act Release no. 14784 (May 19, 1978), 43 FR 22469. In that proceeding, the term "retransmission" referred to a feature provided by the processor for the Options Price Reporting Authority whereby a vendor can identify and recapture messages which have not been sent properly as a result of a malfunction in the processor's computer or transmission facilities or which, while transmitted by the central processor, have (1) been lost or garbled through interference on the communications circuit, or (2) not been received properly as a result of a breakdown in the vendor's equipment. Id. n. 3.

[29] Section VIII(a) and (b) of the Plan. See section V(c) of the Plan which provides that last sale information made available to vendors by the processor shall be "for the purpose of servicing approved interrogation devices * * * and not for the purposes of furnishing a ticker display."

[30] See proposed rule 11Aa3-1(e).

[31] Currently, vendors are required to pay the CTA for the receipt of data over high speed data transmission lines.

[32] Persons wishing to receive an actual printed ticker tape could, however, lease the printer directly from the NYSE or Amex.

[33] However, charges were reduced for multiple devices at a single location.

[34] If an interrogation device was capable of displaying a moving ticker two fees were assessed: One for the moving ticker and one for the interrogation device itself.

[35] See file No. S7-433.

[36] Second Plan Release, supra note 9, at 8-9.

CTA, the CTA would be forced to increase its general level of charges which might threaten the entire financial viability of the ticker network.[37] Third, concerns were raised that there might be a deterioration of ticker reliability because vendors might not maintain sufficient back-up systems. Finally, retransmission would result in the loss of direct regulatory oversight by the Commission because vendors were not then subject to its express regulation.[38]

The Commission also considered the possible anticompetitive effects on vendors of retaining the retransmission prohibition. While recognizing that competition in the distribution of ticker information might lower subscriber costs, particularly in metropolitan areas, the Commission concluded that the "widespread availability of ticker services is more important to the public interest than selective price cutting." [39] Moreover, the Commission expressed confidence that the prohibition would not impair competition among vendors in the types of ticker services offered:

The vendors would still be free to develop new and better interrogation and monitoring devices and to continue to upgrade the variety of software packages available in conjunction with this type of service. Even in the market for ticker services alone, there is no restriction on the competitive marketing of various kinds of devices which may be used to display the ticker nor on various ways of presenting it, such as selective tickers.[40]

The Plan thus continued the historical control enjoyed by the NYSE and Amex over the distribution of last sale reports by transferring control of the ticker network to the CTA. As a result, although vendors receive transaction reports on a current basis over high speed data transmission lines for use, in response to specific inquiry, on their interrogation devices,[41] every moving ticker in the country [42] is supplied data over the low speed data transmission lines constituting the ticker network. The Plan also retains the geographically uniform fee structure permitted by rule 17a-15 which has provided substantial revenue to the CTA.[43]

[37] See discussion infra.

[38] Id. at 9-10.

[39] Id. at 10.

[40] Id.

[41] Due to the use of high speed data transmission lines implemented as part of the consolidated system, this data remains current even when the ticker network, which uses low speed lines, is late. See note 12 supra.

[42] The CTA indicates that there are presently in service approximately 15,000 network A and 8,000 network B moving tickers, as compared with more than 45,000 interrogation devices (some of which display moving tickers and hence are counted twice).

[43] For the fiscal year ended December 31, 1977, aggregate CTA ticker network revenue was approximately $4,260,000 for network A and $1,725,000 for network B. Operating expenses for the ticker networked (e.g., maintenance of the low speed data transmission lines) were approximately $1,900,000 and $1,130,000, respectively, for the same period.

2. *Reuters' request.* In March 1976, the Commission published for public comment a letter received from Reuters Ltd. ("Reuters") requesting that the Commission modify or eliminate the retransmission prohibition contained in the Joint Industry Plan to enable Reuters to market a new moving ticker display device called the "Monitor." [44] Reuters proposed to service the device solely with information received from the CTA over high speed data transmission lines and transmitted to subscribers over its proprietary communications network.[45] This procedure would permit the creation of a moving ticker in a novel format [46] from information received over high speed data transmission lines rather than linking the device directly to the CTA ticker network and would thereby permit creation of a moving ticker display which is not subject to the same delays as the ticker network.[47] The CTA and certain vendors submitted written comments in response to the Commission's request for comment.[48]

Following expiration of the formal comment period, representatives of Reuters and the CTA held extensive discussions concerning those circumstances under which the CTA might permit Reuters to retransmit. In August 1976, the CTA solicited further comment from vendors,[49] and, on August 18, 1976, the Legal and Policy Committee of the CTA considered and rejected the Reuters request. No further action was taken by the Commission with respect to the retransmission prohibition contained in the Plan prior to the market structure statement, in which the Commission stated that it would reconsider retransmission at this time.

In conjunction with its proposed amendments to rule 17a-15, the Commission believes that it is appropriate to reexamine the retransmission prohibition. In addition to the various policy matters considered at the time of the adoption of rule 17a-15 and the approval of the Plan, the 1975 amendments expressly extended the authority of the Commission to assure that market information is made available by exchanges, associations and persons acting on their behalf in a manner which is consistent with the Act, including the development of a national market system.[50]

The statutory scheme set forth in section 11A of the Act contemplates that exclusive processors such as the CTA may exercise exclusive control over collecting and processing certain securities information. However, the Act further contemplates that exclusive processors will function as neutral suppliers of that information to competing vendors for distribution to subscribers.[51] The continued existence of the CTA's control over the CTA ticker network may thus be inconsistent with the balance sought by the Act between the potential for efficiency derived from centralized data collection and the need for competition in the distribution of securities information.

2. *Summary of comments.* In response to the Reuters Release, the Commission received comment letters from Reuters, the four principal vendors of moving ticker displays and from the CTA. Commentary focused on the anticompetitive effects of the prohibition and its continued validity under the Act, as well as the need to maintain the current financial arrangements and operational integrity of the network. The Commission has carefully considered these comments and, in proposing an end to the retransmission prohibition, has included certain conditions intended to respond to these concerns.

In its initial request that the Commission reexamine the retransmission prohibition, Reuters argued that the prohibition was anticompetitive in nature and inconsistent with the Act:

[44] See Securities Exchange Act Release Nos. 12162 (Mar. 3, 1976) ("Reuter release") and 12138 (Apr. 6, 1976), 41 FR 10499 and 41 FR 15924. See Commission file No. S7-620.

[45] Because the Monitor would only receive information from a single data source, it would not require duplicative computer hardware necessary to read both Reuters' data transmission and the ticker network.

[46] The moving ticker which Reuters proposed to make available on the Monitor was a so-called "cascading" ticker; i.e., each transaction report would be displayed horizontally and would move down the screen, rather than across. Use of this format would permit Reuters to include additional information with each transaction report, such as a more complete description of the security and net price change. Although a similar display might be created from ticker network data, if each display device were programmed to retrieve additional data from the vendor's proprietary data base, this procedure would be significantly more costly than permitting centralized processing at the vendor's data base center with a single communications line to each display device.

[47] See note 55, infra.

[48] See file No. S7-620.

[49] See Id.

[50] See, e.g., sections 11A(b)(5) and 11A(c)(1) of the Act. The CTA and SIAC, the processor for the Plan, are each "exclusive processors" registered with the Commission. The terms "exclusive processor" and "securities information processor," the statutory designation for vendors, are defined in section 3(a)(22) of the Act. In addition, section 23(a)(2) of the Act specifically requires that the Commission balance the anticompetitive impact of its regulatory proposals against the regulatory purposes of the Act.

V 43/210 OC 30 78

Requiring Reuters to utilize (the ticker network) as existing vendors do makes it necessary for Reuters to develop at great cost, and for subscribers to take at a higher price, otherwise completely unnecessary additional equipment to be attached to the Monitor receiver * * *. The effect of the retransmission prohibitions is to protect the few existing vendors which utilize (the ticker network) provided by the CTA against the development of new and more efficient forms of competition—to maintain them in a virtual monopoly position [52]

Reuters pointed out that in the 1975 amendments the Congress had charged the SEC with an explicit and pervasive obligation to eliminate all present and future competitive restraints that could not be justified by the purposes of the Exchange Act. The Commission was directed to remove existing burdens on competition and to refrain from imposing, or permitting to be imposed, any new regulatory burden "not necessary or appropriate in furtherance of the purposes of the Exchange Act [53]

Reuters concluded by noting that all of the concerns previously raised by the Commission as a basis for permitting the retransmission prohibition were addressed and alleviated by its proposed Monitor system.

In response to the Reuters release, certain vendors and the CTA responded to the asserted anticompetitive effects of the prohibition against retransmission. First, these commentators rejected the notion that the retransmission prohibition was anticompetitive. According to these commentators, the ability of all vendors to receive transaction data upon equal terms permitted fair and open competition and sufficiently allowed vendors to compete and innovate in the manner of display of this information. These commentators argued, in effect, that the 1975 amendments do not require competition in the dissemination of market information to vendors and specifically contemplate that an exclusive processor might perform this function. In addition, these commentators argued that removal of the retransmission prohibition may have certain anticompetitive effects. It was asserted that, since Reuters would be the only vendor immediately capable of utilizing high speed data transmission for purposes of creating a moving ticker, it would be at a technological advantage with respect to the other vendors. Furthermore, it was argued that permitting vendors to act as integrated moving ticker processors would put other vendors who only market moving ticker display devices at an economic disadvantage, especially if the ticker network were to be discontinued.[54] Finally, some commentators asserted that making a moving ticker available only in conjunction with other services provided on an interrogation device constituted a tie-in arrangement which was inconsistent with basic antitrust principles and, therefore, with the Act.

Apart from arguments regarding the anticompetitive nature of the retransmission prohibition, most commentary concerned the continued financial integrity of the ticker network if vendors were permitted to retransmit transaction data. Commentators argued that the ticker network would be destroyed if retransmission were allowed because vendors would capture the more lucrative urban ticker business through differential pricing, thereby raising rates for subscribers in remote areas. Additionally, certain vendors questioned the negative impact upon competition among vendors if subscribers who received moving ticker displays consisting of retransmitted data were to pay less than subscribers who received a display of data transmitted over the ticker network.

Commentators also expressed concerns about certain operational aspects concerning retransmission. First, the CTA and certain vendors questioned the reliability of vendor proprietary transmission lines and whether there were in existence sufficient backup facilities (including both computers and data transmission lines) to assure uninterrupted service. Second, vendors expressed concern regarding the uniformity of data presentation. Because of the unitary nature of the ticker network, all moving tickers receive last sale data at the same time in the same format, including the deletion of certain information during periods of active trading. Some commentators noted that retransmission might alter this synchronization by permitting a vendor receiving information over high speed data transmission lines to display that information on a moving ticker prior to the display of that information on a moving ticker fed by the low speed ticker network, and including material which was deleted from the ticker network.[55] Additionally, despite the 1975 amendments, some commentators questioned the ability of the Commission to regulate these matters adequately absent the registration of vendors under section 11A of the Act.

Finally, certain commentators discussed the usefulness of the ticker network in the current environment in which the same information is available, without delay, by means of high speed data transmission lines. The CTA argued that maintenance of the ticker network is necessary, in addition to its utility in providing broad dissemination of market information, to preserve the complete and official record of all transaction data. To the contrary, one vendor argued that the ticker network is redundant and is no longer the official record of trading since transaction reports are logged by SIAC at the time they are received, not at the time they are displayed on moving tickers. This vendor argued that ultimately the ticker network should be entirely replaced by the high speed data transmission system which is not subject to delays and provides information to all display devices at the same time.

4. *Proposal.* After consideration of these comments, the Commission has initially determined that the prohibition against retransmission may have anticompetitive effects which are not necessary or appropriate in furtherance of the purposes of the Act. The prohibition, in effect, requires that vendors providing interrogation devices which also display a moving ticker pay for the maintenance of duplicative and redundant data transmission lines and receptor mechanisms. Additionally, the prohibitions may impede development of innovative moving ticker displays by requiring decentralized processing by vendors to create those displays.[56]

However, the Commission continues to believe that the ticker network is an important mechanism for dissemination of market information and should be retained. It provides a means whereby investors, brokers, and dealers can obtain current last sale data at a reasonable price. Furthermore, through its geographically uniform fee structure, the ticker network assures that this important market information is disseminated to remote areas of the country at costs which are not prohibitive.[57] Therefore, the Commission believes that removal of the retransmission prohibition should be accompanied by measures designed to assure the continued viability of the ticker network.

The Commission proposes to permit a vendor to use its proprietary communications network, through which the vendor presently services subscriber interrogation devices, to transmit ticker information to subscribers. The ticker information would be in any CTA-approved format; [58] however, the CTA would be permitted to charge each subscriber receiving moving ticker information retransmitted by a vendor the same fee paid by subscribers to the CTA ticker network. Accordingly, vendors would be provided with improved competitive opportunities with respect to the provisions of moving ticker displays by permitting increased communications flexibility and more varied ticker formats.[59] However, all subscribers, whatever their source of moving ticker information, could be required by the CTA to pay a uniform access charge for that information. Therefore, the proposed rule would not alter the current CTA revenue stream.[60] In addition, the rule would permit the CTA to assure, by amendment to the joint industry plan, that any vendor providing retransmission services does so accurately and reliably and that the display of the entire data stream of transaction reports is substantially synchronized.[61]

C. DESCRIPTION OF PROPOSED RULE 11Aa3-1

Proposed rule 11Aa3-1 retains the basic regulatory approach of rule 17a-15; however, it is potentially broader in its scope, applying to transaction reports [62] in "reported securities," i.e., any securities or class of securites with respect to which transaction reports are required to be disseminated pursuant to the joint industry plan [63] (or any other transaction reporting plan declared effective by the Commission) as well as any other security or class of securities designated by the Commission as a "qualified security" pursuant to section 11A(a)(2) of the Act and as to which transaction reports are required to be collected, processed, and made available pursuant to the rule. [64] The proposal requires every exchange to file a transaction reporting plan [65] with the Commission with respect to transactions in all reported securities effected through the facilities of such exchange. [66] Similarly, every association whose members effect over-the-counter transactions in reported securites and every nonmember broker or dealer who effects transactions in reported securites which are not otherwise reported and made available in accordance with the Rule must file transaction reporting plans. [67] Since the proposal represents an amendment to rule 17a-15, it will not be necessary for the sponsors of the joint industry plan or any other plan, or amendment thereto, filed with and declared effective by the Commission pursuant to rule 17a-15 to refile plans with the Commission for approval under rule 11Aa3-1. [68]

The proposal retains the requirement contained in rule 17a-15 that any plan filed thereunder include copies of all governing documents relating to any entity (including a transaction reporting association [69] like the CTA) authorized to implement or adminster the plan and specify: (1) The manner of collecting, processing, and disseminating transaction reports, (2) applicable standards and methods assuring promptness of reporting, accuracy, and completeness of transaction

[52] Reuters release, supra note 44, 41 FR at 10500 and 10502.

[53] Committee of Conference, Report to Accompany S. 249, H.R. Rep. No 94-249, 94th Cong., 1st Sess. 94 (1975). See Reuters release, supra note 44, 41 FR at 10501-2.

[54] In this connection, one vendor requested that the Commission, if it were to permit retransmission, require that vendors make this information available to other vendors through a standard computer interface at reasonable charges.

[55] The ticker network provides information to moving tickers at the rate of 900 characters per minute, the maximum speed at which a linear wall display of this information would be legible. As a result of this speed limitation, during periods of active trading complete transaction reports may not be disseminated without considerable delay. Therefore, the CTA has adopted procedures whereby, during periods of active trading, certain information, such as the volume of a transaction, is deleted from the ticker network (but not the high speed data transmission line). Despite these measures, the ticker network often reports transactions several minutes after they are reported on the high speed lines. It has been argued that the flexibility of interrogation device cathode ray tube terminals would permit a vendor creating a moving ticker from the high speed lines to avoid these delays or at least include deleted information without incurring further delays. In addition, the CTA has approved for usage certain types of moving tickers which display only transaction reports with respect to selected securities. Since these "selective" moving tickers are required to be supplied data from the ticker network, they are subject to the same delays and deletions as are moving tickers displaying transaction reports for all securities on that network. If vendors were permitted to retransmit data to create a selective moving ticker, such a display would not be delayed even if data were displayed at 900 characters per minute. See note 12, supra.

[56] For example, a vendor could not create a selective moving ticker at its central data base center but would be required instead to have data selection occur in each of its receptor devices connected to the CTA ticker network. Similarly, a vendor proposing to provide a cascading moving ticker would be required to program each interrogation device to recall data from the vendor's central data base rather than creating a single centralized data stream.

[57] See note 60, infra.

[58] The CTA, through its contracts with vendors, retains the power to approve the display format of any moving ticker or interrogation device. We understand that the CTA has never disapproved a proposed display format.

[59] For example a vendor may provide a "selective" ticker of transaction reports for only certain specified securities which would be less subject to delay than such a display created from the ticker network. Together with the opportunity to provide ticker formats adapted to the particular needs of subscribers, vendors may achieve certain technical economies resulting from not having to accommodate the CTA ticker network feed, thereby possibly reducing the costs to subscribers of leasing retransmitted displays from vendors.

[60] While this may alleviate the concern that competitive pricing would eventually lead to the demise of the CTA network, it may also be criticized because vendor subscribers would be receiving no separate service from the CTA and, accordingly, would be subsidizing all other persons receiving information by means of the ticker network. The Commission wishes to specifically solicit comment on the necessity of this subsidy.

[61] The Commission understands that vendors may program their interrogation devices to display transaction reports at approximately the same rate as the moving ticker. However, due to the use of deletion modes on the ticker network (see note 55, supra), it may not be feasible during periods of active trading for vendors to display retransmitted data at precisely the same time as the ticker network. In addition, a vendor providing a selective moving ticker may provide transaction reports at the same rate as the entire moving ticker while a vendor receiving such data over the ticker network would, in effect, be displaying data at a slower rate.

[62] The term "transaction report" is defined in paragraph (a)(1) of the proposal as a report containing the price and volume associated with a completed transaction involving the purchase or sale of a security ("transaction") and is used in lieu of the term "last sale report" which is employed in Rule 17a-15.

[63] The joint industry plan requires dissemination of transaction reports in "eligible securities" which are defined as all stocks and long-term warants listed or admitted to unlisted trading privileges on the NYSE or Amex on the date of full implementation of the consolidated system (Apr. 30, 1976), all stocks and long-term warrants listed or admitted to unlisted trading privileges on any other exchange which, on Apr. 30, 1976, met either NYSE or Amex listing standards, all stocks and long-term warrants listed or admitted to unlisted trading privileges on any exchange after Apr. 30, 1976, and which substantially meets either NYSE or AMEX listing standards and any right to acquire an eligible security which is traded on the same exhange as the eligible security.

[64] Proposed rule 11Aa3-1(a)(4).

[65] The term "transaction reporting plan" is defined in par. (a)(2) of the proposal as any plan for collecting, processing, and making available transaction reports with respect to transactions in reported securities filed with the Commission and meeting the requirements of the rule. Rule 17a-15 does not specifically define the term "plan;" however, it requires the filing of a plan "for the dissemination of information required to be reported pursuant to this section." See Rule 17a-15(a).

[66] Proposed rule 11Aa3-1(b)(1). This requirement is currently contained in rule 17a-15(a).

[67] Proposed rule 11A-301(b) (1) and (2). This rquirement is currently contained in rule 17a-15 (a) and (b).

[68] Similarly, any exemptions granted pursuant to rule 17a-15(h) or any existing Commission interpretation of rule 17a—15, to the extent relevant, would remain in effect. See Securities Exchange Act Release No. 11317 (Mar. 26, 1975), 40 FR 15461. See also Securities Exchange Act Release Nos. 11385 (Apr. 30, 1975) and 14651 (Apr. 11, 1978), 40 FR 19888 and 43 FR 16582.

[69] The term "transaction reporting association" is defined in par. (a)(5) of the proposal as any person authorized to implement or administer any transaction reporting plan on behalf of persons acting jointly in filing, amending, implementing or administering a transaction reporting plan. See proposed rule 11A-3-1(a)(3) which would specifically permit such joint action.

V

reports, and (3) rules or procedures designed to assure that transaction re-

plan [76] to assure that: (i) Charges imposed upn vendors and their subscrib-

in which market information vendors display transaction reports have been

(1) The term "transaction report" shall mean a report containing the

curities effected through its facilities, and every association shall, with re-

pose of, and the basis under the Act for, such amendment.

V 4 3 / 2 1 0 OCT 30 78

reports, and (3) rules or procedures designed to assure that transaction reports will not be disseminated in a fraudulent or manipulative nammer.[70] In addition, the current rule and the proposal both require a statement regarding the terms of access to information made available pursuant to plan although the proposal would require a more specific statement which should conform to the general standards set forth in section 11A(b) of the Act.[71] The proposal would also require that a transaction reporting plan specify broker-dealer reporting requirements and the manner in which transaction reports will be consolidated to assure that the single data stream contemplated by the rule is achieved.[72]

Proposed rule 11Aa3-1 differs from rule 17a-15 in two principal respects. First, unlike rule 17a-15, proposed rule 11Aa3-1 explicitly sets forth the manner in which any effective transaction reporting plan may be amended. The proposal requires that any proposed amendment to a plan be filed with the Commission, noticed for public comment and approved by the Commission prior to effectiveness.[73] However, if the Commission finds that the proposed amendment is of a technical or ministerial nature, or if such action is necessary or appropriate in the public interest, for the the protection of investors or the maintenance of fair and orderly markets, to facilitate the establishment of a national market system or otherwise in furtherance of the purposes of the Act, the proposal would permit the Commission to declare an amendment effective on a temporary basis not to exceed 120 days, upon publication of notice of such amendment.[74]

The proposal would also differ from rule 17a-15 in specfically adressing retransmission. The rule would provide that, on and after March 1, 1979, no exchange or association may prohibit, condition, or otherwise limit retransmission of the entire data stream of transaction reports on a current and continuous basis for the purpose of creating a moving ticker display.[75] The rule would, however, permit an exchange or association to condition retransmission by provisions included in an effective transaction reporting plan[76] to assure that: (i) Charges imposed upn vendors and their subscribers which are otherwise permitted by the rule[77] are collected, (ii) transaction reports available on a moving ticker via retransmission are displayed at substantially the same rate as transaction reports available through the ticker network,[78] and (iii) any vendor which retransmits transaction reports maintain procedures and facilities to insure the accurate and reliable display of such reports.

In addition, the proposal would amend rule 17a-15 in certain technical respects, including the following:

(1) The proposal would prohibit any broker or dealer from effecting transactions in (or inducing or attempting to induce the purchase or sale of) any reported security without disseminating transaction reports with respect to such transaction.[79] Rule 17a-15 does not explicitly contain any similar prohibition but does require the filing of plans achieving this same result prior to February 26, 1973. Proposed rule 11Aa3-1 is designed to maintain the requirement that all exchanges, associations and nonmember brokers and dealers file plans; therefore, it contains this prohibition which, in effect, would require the filing of a transaction reporting plan as a condition precedent to trading in a reported security.[80]

(2) Paragraph (i) of rule 17a-15, which sets forth procedures governing appeals to the Commission by persons who are denied or limited access to last sale reports, has been amended to apply only in those instances in which section 11A(b) of the Act would not govern appeal procedures.[81]

(3) The provisions of rule 17a-15 which indirectly prescribe the manner in which market information vendors display transaction reports have been incorporated into proposed rule 11Ac1-2 which is being proposed simultaneously with this proposal.[82]

Finally, the Commission notes that the provisions of rule 17a-15(f), which explicitly permit self-regulatory organizations to charge geographically uniform fees[83] for the receipt of transaction reports, have been retained in rule 11Aa3-1. However, we wish to emphasize that the retention of these provisions is only meant to reflect the Commission's current neutrality on this issue.[84]

III. Text of Proposed Amendment

The Securities and Exchange Commission hereby proposes to amend rule 17a-15 under the Act (17 CFR 240.17a-15) and to redesignate it as rule 11Aa3-1 under the Act (17 CFR 240.11Aa3-1) pursuant to its authority under the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq., as amended by Pub. L. No. 94-29 (June 4, 1975)) and particularly sections 2, 3, 6, 9, 10, 11A, 15, 15A, 17, and 23 thereof (15 U.S.C. 78b. 78c, 78f, 78i, 78j, 78k-1, 78o, 78o-3, 78g, and 78w).

§ 240.11Aa3-1 Dissemination of transaction reports with respect to transactions in reported securities.

(a) *Definitions.* For purposes of this section:

(1) The term "transaction report" shall mean a report containing the price and volume associated with a completed transaction involving the purchase or sale of a security ("transaction").

(2) The term "transaction reporting plan" shall mean any plan for collecting, processing, and making available transaction reports with respect to transactions in reported securities filed with the Commission pursuant to, and meeting the requirements of, this section.

(3) The term "effective transaction reporting plan" shall mean any transaction reporting plan approved by the Commission pursuant to this section.

(4) The term "reported security" shall mean (i) any security or class of securities designated as "qualified securities" by the Commission pursuant to section 11A(a)(2) of the Act and for which transaction reports are required to be collected, processed, and made available pursuant to this section; and (ii) any other security or class of securities for which transaction reports are required to be collected, processed, and made available pursuant to any effective transaction reporting plan.

(5) The term "transaction reporting association" shall mean any person authorized to implement or administer any transaction reporting plan on behalf of persons acting jointly under paragraph (b) of this section.

(6) The term "plan processor" shall mean any national securities exchange ("exchange"), national securities association ("association") or securities information processor acting as an exclusive processor with respect to any transaction reporting plan.

(7) The term "interrogation device" shall mean any securities information retrieval system capable of making available transaction reports or last sale data, upon inquiry, on a current basis on a terminal or other display device, or by any other means.

(8) The term "moving ticker" shall mean any continuous real-time moving display of transaction reports whether made available on a discrete display unit or included on an interrogation device.

(9) The term "vendor" shall mean any securities information processor engaged in the business of disseminating transaction reports with respect to transactions in reported securities to brokers or dealers on a real-time or other current and continuing basis, whether through an electronic communications network, moving ticker or interrogation device.

(10) The term "last sale data" shall mean any price or volume data contained in a transaction report.

(b) *Filing of transaction reporting plans.* (1) Every exchange shall, with respect to transactions in reported securities effected through its facilities, and every association shall, with respect to transactions in reported securities effected by its members otherwise than on an exchange, file with the Commission a transaction reporting plan.

(2) Every broker or dealer who is not a member of an exchange or association and who effects transactions in any reported security (a "nonmember broker or dealer") shall file with the Commission a transaction reporting plan with respect to such transactions unless transaction reports with respect to such transactions are collected, processed, and made available by an exchange or association pursuant to an effective transaction reporting plan.

(3) All exchanges, associations, and nonmember brokers and dealers are authorized to act jointly in filing a transaction reporting plan or any amendment thereto, or implementing or administering an effective transaction reporting plan.

(4) Every transaction reporting plan filed pursuant to this section shall include copies of all governing or constituent documents relating to any transaction reporting association or other entity which may be established to implement or administer the plan and shall specify, at a minimum:

(i) Reporting requirements with respect to transactions in reported securities for any broker or dealer subject to the plan;

(ii) The manner of collecting, processing, sequencing, and disseminating transaction reports;

(iii) The manner of consolidating such transaction reports with transaction reports from other exchanges, associations, and nonmember brokers and dealers;

(iv) The applicable standards and methods which will be utilized to insure promptness of reporting, and accuracy and completeness of transaction reports;

(v) Any rules or procedures which may be adopted to insure that transaction reports or last sale data will not be disseminated in a fraudulent or manipulative manner; and

(vi) Specific terms of access to transaction reports disseminated pursuant to the plan.

Each such plan shall also provide that transaction reports made available to any vendor for display on an interrogation device identify the marketplace where each transaction was executed.

(5) Any person or persons who have filed a transaction reporting plan which has been approved by the Commission pursuant to this section may propose an amendment to such plan by filing the form of such proposed amendment with the Commission, together with a statement of the purpose of, and the basis under the Act for, such amendment.

(c) *Effectiveness of transaction reporting plans.* (1) The Commission shall publish notice of the filing of any transaction reporting plan, or any proposed amendment to any effective transaction reporting plan ("proposed amendment"), together with the terms of substance in the filing or a description of the subjects and issues involved, and shall provide interested persons an opportunity to submit written comments.

(2) No transaction reporting plan filed pursuant to this section, or amendment to an effective transaction reporting plan, shall become effective unless the Commission, having due regard for the public interest, the protection of investors, the maintenace of fair and orderly markets, and the need to remove impediments to, and perfect the mechanisms of, a national market system shall, after appropriate notice and opportunity for comment, by order approve such plan or amendment, with such changes or subject to such conditions as the Commission may deem necessary or appropriate.

(3) Notwithstanding the provisions of paragraph (c)(2) of this section, a proposed amendment may be put into effect upon publication of notice of such amendment, on a temporary basis not to exceed 120 days, if the Commission finds that (i) such action is necessary or appropriate in the public interest, for the protection of investors or the maintenance of fair and orderly markets, to facilitate the establishment of a national market system or otherwise in furtherance of the purposes of the Act, or (ii) the proposed amendment involves only technical or ministerial matters.

(d) *Prohibitions and reporting requirements.* (1) No broker or dealer may effect any transaction in, or induce or attempt to induce the purchase or sale of, any reported security;

(i) On or through the facilities of an exchange unless transaction reports with respect to transactions in such reported security effected on or through such exchange facilities are required to be reported pursuant to and effective transaction reporting plan; or

(ii) Otherwise than on an exchange unless transaction reports with respect to transactions in such reported security effected otherwise than on an exchange by such broker or dealer are required to be reported pursuant to an effective transaction reporting plan.

(2) No exchange or member thereof shall make available, on a current and continuing basis, transactions reports with respect to transactions in any reported security effected through the facilities of such exchange except pursuant to an effective transaction reporting plan filed by such exchange

---

[70] Proposed rule 11Aa3-1(b)(4) (ii), (iv), and (v); rule 17a-15(b)(a) (2) and (3).

[71] Proposed rule 11Aa3-1(b)(4)(vi); rule 17a-15(b)(4).

[72] Proposed rule 11Aa3-1(b)(4) (i) and (iii).

[73] Proposed rule 11Aa3-1 (b)(5), and (c)(1), and (2).

[74] Proposed Rule 11Aa3-1(c)(3). Cf. sec. 19(b)(3) of the Act.

[75] Proposed rule 11Aa3-1(e). While the proposal would not require that the participants of the CTA amend the joint industry plan, it would render the retransmission provisions of the plan inoperative.

[76] An "effective transaction reporting plan" is defined in par. (a)(3) of the rule as any transaction reporting plan approved by the Commission pursuant to the rule.

[77] See proposed rule 11Aa3-1(f).

[78] Although such a condition would permit substantial synchronization of moving tickers displaying the entire data stream of transaction reports, "selective" tickers displaying retransmitted transaction reports at 900 characters per minute might display those reports prior to the time they are displayed on moving tickers supplied data via the ticker network.

[79] Proposed rule 11Aa3-1(d)(2).

[80] The proposal also retains those provisions of rule 17a-15 which prohibit an exchange, association, or member thereof from making available transaction reports with respect to transactions in reported securities except pursuant to an effective transaction reporting plan and which require every broker or dealer who is an exchange or association member to promptly transmit to such exchange or association all information required by an effective transaction reporting plan. See proposed rule 11Aa3-1(d) (2), (3), and (4), and rule 17a-15 (a) and (d).

[81] Proposed rule 11Aa3-1(g).

[82] See rule 17a-15(b) and proposed rule 11Ac1-2 release, supra note 1. Proposed rule 11Aa3-1 would, however, still require that any transaction reporting plan filed pursuant to the rule provide that transaction reports made available to any vendor for purposes of display on interrogation devices be accompanied by a market identifier.

[83] This provision of rule 17a-15 requires continuation of the practice of geographically uniform pricing with respect to supplying last sale data through moving ticker displays which was established 1968. See discussion infra. To the extent that commentators believe that, either in connection with the Commission's proposed amendments to rule 17a-15 permitting retransmission, or otherwise, uniform geographic pricing imposes burdens on competition which are not necessary or appropriate in furtherance of the purposes of the Act, such commentators should provide the commission with the basis for that belief including an indication of those cost factors (other than the cost of obtaining current last sale data) which would justify the alteration of such a rate structure. Persons favoring elimination of geographically uniform pricing for either self-regulatory organizations or vendors should also provide estimates of the costs of providing subscribers with last sale information in various parts of the country.

[84] Although a similar provision contained in the initial proposed version of rule 11Ac1-1 under the Act was eliminated from the rule, as adopted, that action also reflected the Commission's neutrality. See Securities Exchange Act Release Nos. 13626 (June 14, 1977), and 14415 (Jan. 26, 1978), 42 FR 32418 and 43 FR 4342.

(either individually or jointly with other persons).

(3) No association or member thereof shall make available, on a current and continuing basis, transaction reports with respect to transactions in any reported security effected by a member of such association otherwise than on an exchange except pursuant to an effective transaction reporting plan filed by such association (either individually or jointly with other persons).

(4) Every broker or dealer who is a member of an exchange or association shall promptly transmit to the exchange or association of which it is a member all information required by any effective transaction reporting plan filed by such exchange or association (either individually or jointly with other exchanges and/or associations).

(e) *Retransmission of transaction reports.* On and after March 1, 1979, notwithstanding any provision of any effective transaction reporting plan, no exchange or association may, either individually or jointly, by rule, stated policy or practice, transaction reporting plan or otherwise, prohibit, condition or otherwise limit, directly or indirectly, the ability of any securities information processor to retransmit, for display in moving tickers, transaction reports made available pursuant to any effective transaction reporting plan: *Providing, however,* That an exchange or association may, by means of an effective transaction reporting plan, condition such retransmission upon appropriate undertakings by securities information processors to assure that (1) any charges for the distribution of transaction reports in moving tickers permitted by paragraph (f)(i) of this section are collected, (2) transaction reports which are retransmitted for display in moving tickers are displayed at substantially the same rate as reports distributed for display in moving tickers directly by a plan processor, and (3) any securities information processor which retransmits transaction reports for display in moving tickers maintains procedures and facilities sufficient to insure that such display is accurate and reliable.

(f) *Availability and charges.* Nothing in this section shall preclude any exchanges or association, separately or jointly, pursuant to the terms of an effective transaction reporting plan: (1) From imposing reasonable, uniform charges (irrespective of geographic location) for distribution of transaction reports; nor (2) from requiring any vendor which distributes or displays transaction reports to make the transaction reports it distributes or displays available to all qualified subscribers throughout the continental United States and to impose uniform charges on its subscribers (irrespective of geographic location).

(g) *Appeals.* The Commission may entertain appeals in connection with the operation of any effective transaction reporting plan as follows:

(1) Any action taken or failure to act by any person in connection with an effective transaction reporting plan (other than a prohibition or limitation of access reviewable by the Commission pursuant to section 11A(b)(5) or section 19(d) of the Act) shall be subject to review by the Commission, on its own motion or upon application by any person aggrieved thereby (including but not limited to exchanges, associations, brokers, dealers, issuers, vendors, and other users of transaction reports), filed within 30 days after such action or failure to act or within such longer period as the Commission may determine.

(2) Application to the Commission for review, or the institution of review by the Commission on its own motion, shall not operate as a stay of any such action unless the Commission determines otherwise, after notice and opportunity for hearing on the question of a stay (which hearing may consist only of affidavits or oral arguments).

(3) In any proceedings for review, if the Commission, after appropriate notice and opportunity for hearing, and upon consideration of any proceedings conducted in connection with such action or failure to act and such other evidence as it deems relevant, determines that the action or failure to act is in accord with the applicable provisions of such plan and is consistent with the public interest, the protection of investors, the maintenance of fair and orderly markets and the removal of impediments to, and perfection of the mechanisms of, a national market system, the Commission shall dismiss the proceeding. Otherwise, the Commission shall require such action with respect to the matter reviewed as the Commission deems appropriate in accordance with the public interest and the protection of investors and consistent with such plan, the maintenance of fair and orderly markets and the removal of impediments to, and perfection of the mechanisms of, a national market system.

(h) *Exemptions.* The Commission may exempt from the provisions of this section, either unconditionally or on specified terms and conditions, any exchange, association, broker, dealer or specified reported security if the Commission determines that such exemption is consistent with the public interest, the protection of investors and the removal of impediments to, and perfection of the mechanisms of, a national market system.

IV. Effects on Competition and Request for Public Comment

Section 23(a)(2) of the Act requires the Commission, in adopting rules under the Act, to consider the anticompetitive effects of such regulation and to balance any anticompetitive impact against the regulatory benefits gained in terms of furthering the purposes of the Act. The Commission has discussed in some detail the competitive impact of the retransmission prohibition and the Commission's proposal to end the prohibition and has, as a preliminary matter, determined that the perceived anticompetitive effects of the proposal is outweighed by the regulatory purposes to be achieved by the proposals. The Commission's mandate under section 11A(a) of the Act to facilitate the establishment of a national market system and its authority granted under section 11A(c) to assure prompt, accurate, reliable and fair collection, processing distribution and publication of last sale information in a fair and useful format would appear to be significantly furthered by the adoption of these proposals. However, in addressing the regulatory proposals discussed in this release, commentators should specifically address the competitive impact of this regulation so that the Commission may further evaluate its proposals in the light of section 23(a)(2).

Interested persons are invited to submit written presentations of views, data and arguments concerning the proposed rule 11Aa3-1 under the Act and the issues discussed above. Persons wishing to make such submissions should file ten copies thereof with George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Room 892, 500 North Capitol Street, Washington, D.C. 20549, not later than December 15, 1978. All submissions should refer to file No. 758, and will be available for public inspection at the Commission's Public Reference Room, Room 6106, 1100 L Street NW., Washington, D.C.

By the Commission.

George A. Fitzsimmons,
Secretary.

[Release No. 34-15251; File No. S7-759]

DISSEMINATION AND DISPLAY OF TRANSACTION REPORTS AND QUOTATION INFORMATION

Proposed Rulemaking

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rulemaking.

SUMMARY: The Commission proposes to adopt a rule which is designed to improve the manner in which transaction reports and quotation information are displayed by vendors of securities information. In connection with this proposal, the Commission has withdrawn a portion of a prior interpretive release which has permitted display of transaction reports in a manner which would be inconsistent with the proposed rule.

DATES: Comments should be submitted on or before December 15, 1978.

ADDRESSES: Persons wishing to submit written views, data and arguments should file ten copies thereof with George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Room 892, 500 North Capitol Street, Washington, D.C. 20549. All submissions should refer to file No. S7-759 and will be available for public inspection at the Commission's Public Reference Room, Room 6101, 1100 L Street NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Andre Weiss, Division of Market Regulation, Securities and Exchange Commission, Room 303, 500 North Capitol Street, Washington, D.C. 20549, 202-755-8970.

SUPPLEMENTARY INFORMATION: The Securities Exchange Commission announced today that it has proposed rule 11Ac1-2 (17 CFR 240.11Ac1-2) under the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq., as amended by Pub. L. No. 94-29 (June 4, 1978)) (the "Act") which is designed to improve the manner in which price and volume data with respect to completed securities transactions ("transaction reports") and bids, offers and quotation sizes ("quotation information") are displayed by vendors of securities information.

Proposed rule 11Ac1-2 would contain those provisions currently governing the display of last sale reports which are contained in rule 17a-15 (17 CFR 240.17a-15) the Commission's rule governing the collection, processing and dissemination of last sale reports in listed securities.[1] In addition, the proposed rule would impose further requirements specifying the manner in which transaction reports, data contained in transaction reports ("last sale data") and quotation information are displayed by vendors of market information. In particular, the rule would require that (i) transaction reports or last sale data made available on a consolidated basis on continuous moving ticker displays ("moving tickers") or by means of securities information retrieval systems ("interrogation devices") be reported without identification as to the market place of execution; (ii) consolidated displays of transaction reports, last sale data and quotation information available on interrogation devices be retrievable in response to an inquiry which is simpler or more prominent[2] than the inquiry used to retrieve individual market last sale or quotation information;[3] (iii) all individual market displays of transaction reports, last sale data and quotation information available on interrogation devices be retrievable in response to equally complex inquiries; (iv) consolidated displays of last sale data available on interrogation devices contain all categories of market information retrievable with respect to any display of last sale data from any individual market; (v) monitoring services available on interrogation devices which dynamically update last sale data with respect to selected securities on an individual market basis also be available on a consolidated basis; (vi) vendors displaying quotation information on interrogation devices with respect to any equity security make available a consolidated best bid and offer derived from quotations from all reporting market centers; and (vii) no vendor may provide any representative bid or offer with respect to any equity security.

[1] Simultaneously with this proposal, the Commission is proposing amendments to rule 17a-15 which, among other things, would redesignate the rule as rule 11Aa3-1 and would delete these display requirements from that rule. See Securities Exchange Act release No. 15250 (Oct. 20, 1978) ("Proposed Rule 11Aa3-1 Release").

[2] See discussion infra.

[3] In connection with this proposal, the Commission has withdrawn a portion of a prior interpretive release (Securities Exchange Act Release No. 11317 (Mar. 28, 1975) (the "Interpretive Release"), 40 FR 15461, which had permitted the display of transaction reports in a manner which would be prohibited by this provision and which the Commission now believes is inconsistent with the development of a national market system.

I. Background

The Securities Acts Amendments of 1975 ("1975 Amendments") granted the Commission broad authority to regulate the manner in which vendors of market information display transaction reports and quotation information. In particular, the 1975 Amendments added section 11A(c)(1) of the Act, which provides:

> No self-regulatory organization, member thereof, securities information processor, broker or dealer shall make use of the mails or any means or instrumentality of interstate commerce to collect, process, distribute, publish, or prepare for distribution or publication any information with respect to quotations for or transactions in any security other than an exempted security, to assist, participate in, or coordinate the distribution or publication of such information, or to effect any transaction in, or to induce or attempt to induce the purchase or sale of, any such security in contravention of such rules or regulations as the Commission shall prescribe as necessary or appropriate in the public interest for the protection of investors, or otherwise in furtherance of the purposes of this title to * * *
>
> (B) assure the prompt, accurate, reliable, and fair collection, processing, distribution, and publication of information with respect to quotations for and transactions in such securities and the fairness and usefulness of the form and content of such information.

Until this time, the Commission has given vendors broad latitude regarding the manner in which they display market information, including transaction and quotation information. The results achieved in this unregulated environment have been mixed; although some progress has been made to assure that market information is made available to brokers, dealers, and investors in a nondiscriminatory manner, the Commission is also aware that some practices have continued or arisen which tend to impede the availability of important market information.[4] Furthermore, the Commission's experience in attempting to rectify certain of these perceived difficulties through informal means has indicated an unwillingness on the part of certain vendors to alter voluntarily the manner in which they currently display market information unless the Commission were to establish mandatory, industrywide minimum display criteria. For these reasons, the Commission is at this time proposing rule 11Ac1-2 under the Act. This rule would set forth comprehensive requirements governing the manner in which vendors display transaction reports in securities with respect to which transaction reports are disseminated pursuant to proposed rule 11Aa3-1 (current rule 17a-15) ("reported securities") and quotation information with respect to certain equity securities.

II. Availability of Consolidated Market Information

In its January 1978 statement concerning those steps which should be taken during 1978 to facilitate the establishment of a national market system, the Commission indicated that it was particularly concerned about

[4] See discussion infra.

the manner in which vendors of market information provide for the recall of consolidated last sale data

The Commission concluded by noting its intention to rescind its prior interpretation at this time

information by the simplest and most prominent form of interrogation re-

the Commission so that the basis for its claims may be evaluated.

ed securities) on an individual market basis.[14] Commentators, especially certain regional exchanges and third

subject of extensive debate. While the New York Stock Exchange ("NYSE") and the American Stock Exchange

V 4 3 / 2 1 0 0 C 3 0 0 7 8

the manner in which vendors of market information provide for the recall of consolidated last sale data with respect to reported securities on interrogation devices.[5] Vendors currently provide primary market transaction information in response to an inquiry consisting of the letter or combination of letters (the "consolidated system symbol") used to identify the particular security involved in the consolidated transaction reporting system ("consolidated system") followed by a single information request key. However, in most cases, additional letters or symbols must be used to recall consolidated transaction information from any market center other than the primary market.[6]

To date, this practice has been permitted by the Commission pursuant to an interpretation of rule 17a-15, issued in March 1975,[7] in which the Commission stated that:

> vendors may use the consolidated tape ticker symbol (the old NYSE symbol in the case of a NYSE listed security) to interrogate for last sale information from the NYSE and some other symbol to interrogate for consolidated data. However, any symbol which differs from the consolidated tape symbol which is used to interrogate for consolidated data must be simple and easy for brokers and dealers to use.[8]

The Commission indicated in the market structure statement that it had reconsidered that interpretation in light of its experience with the consolidated system and no longer believed that vendors should be permitted to provide consolidated last sale data in response to any inquiry which was more complex that the inquiry required to recall the last sale data from the primary market. The Commission stated that this practice:

> discourages use of consolidated information, has anticompetitive consequences for markets as to which last sale data may be recalled only by relatively more difficult and time consuming interrogation routines, and impedes progress toward a national market system. Consequently, the Commission believes vendors would modify their systems promptly to confide use of consolidated system symbols in their interrogation and display devices to the recall of consolidated last sale data.[9]

The Commission concluded by noting its intention to rescind its prior interpretation at this time.

In response to this discussion in the market structure statement, two vendors of market information informally contacted the staff of the Commission indicating their willingness to voluntarily change the manner in which consolidated market information is recalled on their interrogation devices. However, both vendors expressed concern that voluntary compliance by less than all vendors would place those complying at a competitive disadvantage.[10] A third vendor has refused to advise the Commission's staff whether it will change the manner in which consolidated market information is recalled on its interrogation devices. This vendor has indicated that such a change would entail considerable programing and systems changes at a significant expense to it; however, it has not furnished any cost estimates or other data substantiating its assertion or which would permit the Commission to evaluate this claim.

Discussions with these vendors have led the Commission to conclude that an unregulated environment may not provide a sufficient impetus for vendors to change voluntarily the manner in which they display market information. To the contrary, it appears that customer pressure may actually influence vendors to retain and create displays which highlight (both in terms of format and ease of access) primary market transaction and quotation data. Therefore, the Commission is at this time proposing display requirements in rule 11Ac1-2 which are designed to assure that vendors provide consolidated market data in an easily accessible and useful format. The rule would address three distinct aspects of the manner in which consolidated market data is displayed: (i) Ease of access to transaction and quotation information; (ii) comparability of individual market and consolidated transaction data; and (iii) comparability of individual market and consolidated monitoring services.

In response to the Commission's concerns raised in the market structure statement regarding ease of access to consolidated market data, the rule would require that, on and after March 1, 1979, vendors who provide on an interrogation device transaction reports or quotation information with respect to a particular reported security from an individual market center also provide on that device consolidated transaction reports and quotation information by the simplest and most prominent form of interrogation request.[11] The proposal does not explicitly require vendors to program these interrogation devices to access consolidated transaction reports and quotation information with consolidated system symbols for reported securities because we understand that in most cases vendors currently use these symbols. Furthermore, we understand that use of the consolidated system symbol for the remaining small number of securities (primarily preferred stocks) would require significant programing changes. The Commission expects that vendors will continue to use the consolidated system symbol to recall last sale and quotation information with respect to reported securities wherever possible and is interested in receiving comments as to whether a Commission requirement to that effect is necessary.

In addition, the rule would require that all individual market displays of transaction reports or quotation information be available in response, to equally complex inquiries. The Commission believes that the alternative possibilities, in which primary market information will be available in response to a significantly easier request than market information from regional exchanges and the third market, is discriminatory and anticompetitive. The Commission is aware, however, that one vendor has asserted that equalization of the inquiry routines for all individual market displays will entail significant expense. Therefore, the Commission is specifically requesting comment on the feasibility of this portion of its proposal. In particular, if any vendor believes that equalization of the inquiry routines for all individual market displays will impose significant costs which are not justified by the Commission's regulatory concerns, such securities information processor should provide sufficient information (including detailed cost estimates)[12] to

[5] Securities Exchange Act release No. 14416 (Jan. 26, 1978) ("Market Structure Statement") at 41-44, 43 FR 4360.

[6] One type of interrogation device currently in use provides consolidated and primary market transaction information by the same number of key strokes; however, it has been asserted that the location and label of the particular keys used to recall primary market last sale data are significantly more prominent than the keys used to recall consolidated data. See note 11 infra.

[7] Interpretive release, supra note 3, at 5, 40 FR at 15461.

[8] Id. at 5, 40 FR at 15462.

[9] Market structure statement, supra note 5, at 43, 43 FR at 4360.

[10] This argument is apparently based on an assumption that subscribers of market information vendors would prefer to obtain primary market last sale data by the easiest inquiry. Such an assumption reinforces the Commission's belief that this practice should be terminated.

[11] The rule would require that consolidated market data for a particular security be retrievable by a request involving no greater number of key strokes than is required to access individual market center data with respect to that security; however, because the Commission is also concerned that, if consolidated and primary market transaction and quotation information are available in response to equally complex retrieval instruction, the location and prominence of the particular keys used to recall primary market information may discourage recall of consolidated data, the rule would require that in such an event the key to access consolidated data be more prominent. See discussion infra and note 6 supra.

[12] See rule 24-2 under the Act (17 CFR 240.24b-2) which sets forth procedures for requesting confidential treatment of any statement, correspondence, notice or other document filed with the Commission pursuant to the Act. See also rule 80 of the Com-

Footnotes continued on next page

the Commission so that the basis for its claims may be evaluated.

The Commission also remains concerned that, to some extent, brokers do not request consolidated displays on their interrogation devices because there is significantly less information contained on consolidated displays than is contained on individual market displays. For example, the display of primary market information provided on a vendor's interrogation device might include last sale, open, high, low, previous close, bid, offer, volume and net change, whereas the consolidated last sale display available on that interrogation device might only include consolidated last sale, open, high, low, volume and net change thus excluding previous close, bid and offer. In our view, the omission from a consolidated last sale display of market data which is provided on an individual market display may cause the consolidated display to be less useful and informative to investors and market professionals. Therefore, in order to help assure the use of consolidated market data, in conjunction with the rule's requirements concerning the ease of access to such data, rule 11 Ac1-2 would require that the consolidated last sale display available on an interrogation device contain the same market data as is available on any individual market last sale display. Because such a requirement may entail significant systems changes by certain vendors, the Commission is especially interested in receiving commentary on the cost of compliance with such a requirement and the extent to which vendors believe that certain of their existing systems should receive exemptive relief from such a provision, if adopted.

Finally, rule 11Ac1-2 contains provisions designed to assure that consolidated last sale data is used in connection with market monitor services provided by vendors. In 1975, the Commission issued an interpretation of rule 17a-15 which currently permits vendors to provide monitoring services (i.e., dynamically up-dated interrogation device displays of transactions reports in preselected securities) on an individual market basis.[13] However, the Commission at that time also indicated that it would not interpret rule 17a-15 to permit vendors to provide selective moving tickers (i.e., a moving ticker display of transactions in selected securities) on an individual market basis.[14] Commentators, especially certain regional exchanges and third market makers, have maintained that monitoring services available on interrogation devices are similar to selective moving ticker displays, and therefore, these commentators argue, the Commission should only permit interrogation device monitoring services to be offered on a consolidated basis. Although the Commission is unable to conclude, at this time, that interrogation device monitoring services must be provided exclusively on a consolidated basis, we recognize the argument that these services should be provided in a manner which is consistent with requirements for display of other types of transaction data. Therefore, the Commission proposes to require that any vendor who provides a monitoring service with respect to a reported security on an individual market basis also provide such monitoring service for such security on a consolidated basis.

The Commission is not, however, at this time proposing identical display requirements for monitoring services and selective tickers.[15] It has tentatively reached this conclusion because there arguably are differences in the display capabilities (and therefore use by the brokerage industry) of selective tickers and monitoring services which would warrant disparate treatment by the Commission. It would appear that the selective moving ticker is primarily used by brokers to obtain a feel for the market (generally or with respect to a large sampling of securities) and is not used to specifically monitor (or continuously display) transaction reports with respect to a limited number of securities so as to directly affect trading decisions in those securities. Therefore, it may be argued that the differences in design and use of these display devices warrant a limited disparity in the display requirements imposed upon vendors marketing these devices. The Commission is specifically requesting comment on these views and would be especially interested in receiving arguments concerning the advisability of imposing identical display requirements on monitoring services and selective tickers.

III. Market Identification

The issue of whether transactions reported in the consolidated system should be accompanied by an indication of the market of execution ("market identifier") has been the subject of extensive debate. While the New York Stock Exchange ("NYSE") and the American Stock Exchange ("Amex") have consistently supported the concept of market identification, the regional exchanges and certain third market makers have opposed inclusion of identifiers as an anticompetitive device designed to preserve the concept of a primary market.

In response to the initial publication of proposed rule 17a-15, a number of regional exchanges submitted comments which opposed any market identification in the consolidated system, including on interrogation device displays. The Pacific Stock Exchange ("PSE") termed market designation a form of advertising that serves to perpetuate the historical competitive advantages of the NYSE and the Amex without conveying any useful information to the public. The Detroit Stock Exchange (which has since ceased operations) and the National Association of Securities Dealers ("NASD") argued that designation of markets would only serve to continue the concept of a primary market as opposed to other market centers. The Midwest Stock Exchange ("MSE") recommended that the Commission go beyond a ban on market designation and adopt measures to replace the separate NYSE ticker and stock tables with a "true composite tape and tables." Only the NYSE, the Amex and one vendor, Ultronics (now GTE Information Services), supported the market identifier concept.[16]

Prior to republication of the proposed rule, the Commission's Advisory Committee on Market Disclosure[17] issued its "Report on a Composite Transaction Reporting System."[18] In that report, the Committee recommended that both moving ticker displays and interrogation devices include a market identifier. In this regard, the Advisory Committee report stated as follows:

> In determining that identification of market place is desirable we are persuaded that until regulation in all marketplaces is appropriately equal for the protection of the public interest the public is entitled to know where the activity in a particular stock is occurring and under what regulatory conditions a transaction is taking place.[19]

V 43/210 OC 30 78

As a result of the Advisory Committee Report, proposed rule 17a-15 was republished for comment in August 1972 containing an explicit requirement that transactions reported pursuant to the rule's provisions be identified as to market of execution.[20] Comments received from the NASD and the regional exchanges in response to the republished rule reiterated their opposition to market identifiers.

Rule 17a-15, as finally adopted, contained a provision requiring market identification on both moving tickers and interrogation devices. Paragraph (b) of the rule provides that

> [each] composite tape or interrogation system, in displaying last sale reports, shall identify the marketplace where each transaction was executed.[21]

In conformity with this requirement, the joint industry plan filed with and declared effective by the Commission pursuant to Rule 17a-15 (the "Plan" or "Joint Industry Plan") also contains provisions requiring market identification.[22] The Plan currently provides that moving ticker displays, whether provided in conjunction with interrogation devices or on discrete wall-mounted units, are required to identify transaction reports emanating from markets other than the NYSE and Amex by an ampersand followed by a single alphabetic character identifying the market of execution.[23] However, the Plan contemplates that transactions occurring on the NYSE or the Amex are to be "identified" by the absence of any identifier.[24] The Plan also requires interrogation devices marketed by each of the vendors to identify transaction reports from all market centers, including the primary exchanges. Vendors currently achieve this identification by use of a single numeric or alphabetic symbol denoting the market of execution.

Subsequent to the implementation of the consolidated system in June 1975, the regional exchanges and Weeden & Co., Inc. ("Weeden") continued to urge deletion of market identifiers.[25] However, no action was taken to address these concerns until, on March 5, 1978, the NYSE, Amex, PSE, Boston Stock Exchange ("BSE") and Philadelphia Stock Exchange ("Phlx") jointly filed with the Commission a "Plan Submitted to the Securities and Exchange Commission for the Purpose of Creating and Operating an Intermarket Communications linkage pursuant to section 11A(a)(3)(B) of the Securities Exchange Act of 1934" ("ITS Plan").[26] The ITS Plan contemplates implementation of an Intermarket Trading System ("ITS") linking the participating exchanges and providing facilities and procedures for (i) rapid and efficient routing of orders and administrative messages between and among the participants, and (ii) participation, under certain conditions, by all participating exchanges in opening transactions in the primary market.[27] In connection with implementation of the ITS Plan, the participants requested that the Commission either amend Rule 17a-15 under the Act or issue an exemptive order pursuant to paragraph (h) of that Rule to permit the deletion of market identifiers from moving ticker displays for all transactions effected in any market center participating in the ITS (including transactions not effected through, and securities not traded in, the system). The participants also requested relief from Rule 17a-15 to permit vendors discretion to delete market identifiers from all consolidated last sale displays on interrogation devices.

In response to this request, on April 14, 1978, the Commission issued conditional exemptions to the Consolidated Tape Association ("CTA"), which administers the Joint Plan and the consolidated system, and the Securities Industry Automation Corp. ("SIAC"), the processor of the consolidated system, from the market identification requirements of Rule 17a-15 insofar as such requirements apply to moving ticker displays.[28] However, the Commission also noted that, in its view, removal of market identifiers for only those market centers participating in ITS would be discriminatory and anticompetitive as to those market centers whose transactions would continue to be reported with identifiers. Accordingly, the Commission granted a temporary[29] exemption ("temporary exemption") from Rule 17a-15 conditioned upon the removal, as soon as technically feasible, of market identifiers on moving ticker displays for all transactions as to which last sale information is reported in the consolidated system, regardless of the market of execution.[30] The Commission also at that time requested comment with respect to this exemption.

In response to this action, identifiers were removed from moving ticker displays with respect to ITS participants on April 17, 1978, and with respect to all market centers on April 24, 1978. In addition, on April 25, 1978, the participants to the Joint Industry Plan submitted an amendment to the Plan requiring the deletion of market identifiers on moving ticker displays in accordance with the Exemptive Order. Simultaneously with the issuance of this release, the Commission is also providing public notice of this proposed amendment to the Plan and in that notice specifically requesting public comment on this change in the manner of display of transaction reports.[31]

In granting the temporary exemption, the Commission noted that, in its view, although last sale information as to individual market centers is valuable to brokers and investors, the most important sources of this information for such persons are not moving ticker displays but rather vendor interrogation devices, newspapers, and various trade periodicals (*e.g.*, the "Fitch Sheets" [32]):

> Since the proposed deletion of market identifiers would not involve deleting this information from the high speed data transmission line used to provide last sale data for these other sources, the Commission believes that no significant deprivation of market information would occur if moving tickers were permitted to display last sale reports without any market identification.[33]

In addition, the Commission cited two beneficial results which might flow from removal of market identifiers from moving ticker displays. First, deletion of market identifiers would eliminate reporting disparities between the primary exchange markets and other market centers. Such a result is consistent with the underlying purpose of the consolidated system—that the mechanism for disseminating transaction reports in multiply-traded securities not discriminate with respect to, or exclude, transaction reports based upon the market of execution. Second, since tape delays are a function of the number of characters which must be displayed in connection with each transaction, deletion of market identifiers may lessen tape delays (particularly during periods of heavy trading, such as between 10 to 11 a.m. e.s.t.) by reducing the number of characters necessary to report transactions from other than the primary markets. Therefore, the Commission determined that it was not necessary in the public interest or for the protection of investors that, during the limited period the ITS was authorized to operate, last sale reports in securities eligible for reporting in the consolidated system be accompanied by market identifiers when disseminated on moving ticker displays.

In response to the temporary exemption, the Commission has received some limited commentary generally opposing deletion of market identifiers from moving ticker displays because removal no longer permits identification of trades which are "out of sequence." In our view, most of these letters do not directly address the questions presented by removal of market identifiers since the identifiers do not indicate late reports or reports which are necessarily out of sequence. In view of this limited commentary received in response to the temporary exemption and for the reasons stated in the Exemptive Order, the Commission has determined to include in proposed Rule 11Ac1-2 a provision requiring the removal of market identifiers on moving ticker displays. However, the Commission is specifically requesting comment on the effects of removal of market identifiers. The Commission is particularly interested in receiving views as to whether the temporary exemption has achieved the two perceived benefits which the Commission noted in the Exemptive Order or whether, to the contrary, investors and market professionals believe that the loss of market information resulting from removal represents a decrease in the availability of important market information.

Similarly, proposed Rule 11Ac1-2 also contains a provision which would require the elimination of market identifiers from consolidated displays of transaction reports available through interrogation devices. Although the Commission does not believe that progress towards a national market system currently justifies total elimination of market identifiers (such that interrogation devices would be incapable of displaying last sale data from individual market centers),[34] elimination of market identifiers from consolidated displays available on interrogation devices may further the Commission's overall national market system objectives. First, the elimination of the market identifier on interrogation device consolidated displays would be consistent with and designed to achieve certain of the same results as removal of identifiers from the moving ticker displays. Representatives of the regional exchanges and the third market have long argued that market identifiers, whether on moving ticker displays or interrogation devices, contribute to the dominance of the primary market and permit brokers to disregard transaction reports from other than the primary market. Although the Commission has no evidence that this phenomenon in fact occurs, it may be that removal of identifiers from moving ticker displays would not result in a material loss of important information to brokers and investors and may achieve certain national market system objectives by equalizing perceptions as to the "legitimacy" of transactions in different market centers. To the extent removal of market identifiers from the moving ticker achieves this result, elimination of market identifiers on interrogation device consolidated displays would appear to be a necessary corollary action designed to achieve this same end.

Furthermore, with the effectiveness of Rule 11Ac1-1 under the Act and the resultant dissemination of firm quotations from all market centers, the Commission believes that market identification on interrogation device consolidated displays may be of reduced importance. Historically, last sale reports have been the most significant form of market data both to investors and market professionals. Therefore, prior to the adoption of Rule 11Ac1-1, the inclusion of market identifiers on interrogation devices seemed necessary to make such displays valuable to brokers wishing to identify the source of trading activity and, as a corollary matter, useful, as an advertising medium, for markets other than the primary market. However, the Commission believes that the general availability of firm quotations in multiply-traded securities will significantly reduce the value of last sale information to brokers and dealers and eventually assure that quotation information will be a primary tool for order routing decisions. Therefore, the Commission believes that, since all vendor interrogation devices currently, or in the near future, will include consolidated quotation displays with market identifiers, such market identification for last sale reports may no longer be necessary.

Finally, the elimination of market identifiers for transaction reports on consolidated displays may prompt or enable vendors to make these displays more useful and complete. Proposed rule 11Ac1-2 would require that vendors enhance their consolidated displays by including the same information contained on individual market displays. One of the justifications raised by certain vendors for not including more information in their consolidated displays is that the market identifier necessarily requires exclusion of certain other data.[35] Therefore, the Commission believes that elimination of market identifiers on consolidated displays should lead to the improvement and further use of these displays.

Footnotes continued from last page

regional exchanges by exposing their positions and, by maintaining the "primacy" of the NYSE as the Nation's leading marketplace, might also discourage certain investors from trading in the third market and on regional exchanges for fear that they would be criticized simply for not going to the NYSE, even if the price they obtained were competitive. The dissenter also felt that if marketplace were to be disclosed, all dealer trades should be identified, including the names of the individual market makers and block positioners. Id.

There are three types of NASDAQ services, denoted "Level 1," "Level 2,"

istered market makers,[17] displays the same information as Level 2 and also

V 43/210 OCT 30 78

Since, on balance, the Commission believes that market identification may no longer be necessary on interrogation device consolidated displays, proposed rule 11Ac1-2 contains a provision which would require its removal. However, the Commission would be particularly interested in receiving comment as to the necessity of this prohibition. As an alternative, the Commission is considering deletion of any market identification requirement with respect to interrogation device consolidated displays, thereby permitting each vendor to determine whether to include such an identifier. In addition, the Commission is specifically requesting that commentators address whether deletion of market identifiers results in a material loss of important information to broker-dealers and investors with respect to their trading decisions and to self-regulatory organizations in attempting to fulfill their surveillance obligations.[36] The Commission is especially concerned that the omission of market identifiers may significantly impede the ability of these persons to determine the location of trading activity reported on consolidated displays.

IV. Consolidated Quotation Information

On August 1, 1978, rule 11Ac1-1 under the Act became effective. The rule requires every exchange and association to establish [37] and maintain procedures and mechanisms for collecting, processing, and making available to vendors bids, offers, quotation sizes, and aggregate quotation sizes ("quotation information") in reported securities. The rule does not, however, impose any obligations on vendors to display quotation information which is made available in accordance with the rule. In the quotation release, the Commission explained its rationale for not imposing such obligations on vendors at that time:

> [T]he Commission believes that adequate dissemination of quotation information will be achieved without specific vendor requirements formulated by the Commission. For example, it appears that prior to the effective date of the rule, at lease one securities information system will be providing a montage of quotations (including sizes) from all market centers in all multiply traded reported securities. Additionally, the Commission believes that competitive pressures will assure that each of the other vendors will eventually implement similar services or, at least, a best bid and asked display. The Commission will continue to monitor vendor progress in providing quotation information in a comprehensive and nondiscriminatory manner and will reconsider its decision not to impose obligations on vendors if competitive pressures do not assure adequate dissemination and display of this information.[38]

In keeping with these statements, since the adoption of rule 11Ac1-1, the Commission's staff has monitored the progress of vendors in developing quotation displays. Perhaps the most significant step taken to date to enable vendors to display quotations has been the implementation of a plan pursuant to which participating self-regulatory organizations are making available quotation information to vendors in a single data stream. On July 25, 1978, the NYSE and Amex jointly filed a "Plan For the Purpose of Implementing Rule 11Ac1-1 under the Securities Exchange Act of 1934" ("CQ Plan") with the Commission contemplating the formation of the CQ Operating Committee similar in concept to the CTA and (i) establishing joint procedures to govern the collection, processing, and dissemination of quotation information by participating market centers; (ii) providing for selection and evaluation of an exclusive processor to collect quotation information from participating market centers and make that information available to quotation vendors; and (iii) establishing fees relating to the receipt of quotation information. On July 27, 1978, the Commission issued a temporary order, pursuant to section 11A(a)(3)(B) of the Act, approving the CQ Plan for a period of 180 days and noting that "the consolidated quotation data stream contemplated by the [CQ Plan] may provide an appropriate basis for the creation of a composite quotation system—an essential element of a national market system * * *." [39] Since that time the BSE, MSE, and PSE have signed the CQ Plan and the NASD has indicated its intention to join under certain circumstances.

The implementation of the CQ Plan and the effectiveness of rule 11Ac1-1 have also facilitated significant improvements in the quotation displays made available by certain vendors. For example, one vendor who had previously offered a composite best bid and asked quotation display with size from only a limited number of markets, has made necessary programing changes to include in its calculations quotations from all markets disseminating quotations pursuant to the CQ Plan as well as the CSE. Similarly, another vendor which had previously provided a montage display of quotations without size from a limited number of market centers has expanded that display to include quotations and sizes from all market centers making available quotations through the CQ Plan.

Discussions between the Commission's staff and each of the major vendors of market information have indicated that most vendors are in the process of further enhancing their quotation display facilities. However, these discussions have also indicated a hesitancy on the part of at least certain vendors to expend the capital necessary to develop composite quotation displays without some indication from the Commission as to the nature of an acceptable display. These discussions have convinced the Commission that further development in the display of quotation information may, in fact, be impeded because the Commission has not specified minimum display requirements with respect to quotations. Therefore, the Commission is at this time proposing that Rule 11Ac1-2 include minimum quotation display requirements. The rule would require that every vendor making available quotations in reported securities provide, at a minimum, a consolidated quotation display indicating the highest bid and lowest offer, with size, from any market center making available quotations in accordance with Rule 11Ac1-1, and an identifier indicating the market or markets responsible for such bid or offer.[40] The rule would also specify the manner of calculating the best bid and offer in the event that more than one market center were making available bids or offers at the same price. The rule as proposed sets forth two alternative formulas for determining the best bid or offer. One formula would require selection of the best bid or offer first on the basis of price (*i.e.*, the highest bid or lowest offer), then on the basis of time of receipt by the vendor (*i.e.*, the first bid or offer received at such price), then on the basis of the largest size. The other formula would require selection of the best bid or offer first on the basis of price, then on the basis of largest size, then on the basis of time.[41] The Commission is specifically

[36] Although the rule would not prohibit a self-regulatory organization from operating or maintaining a display of consolidated transaction reports with market identifiers, most self-regulatory organizations receive last sale data from vendors who would be precluded from disseminating this information to their other subscribers. It may be that the cost of providing consolidated last sale displays with market identifiers exclusively to self-regulatory organizations would be significant. In that event, the Commission is requesting that commentators discuss whether market identifiers are necessary to assure proper surveillance and provide estimates of the cost of obtaining that data.

[37] *See* Securities Exchange Act Release Nos. 14415 (Jan. 26, 1978) (the "Quotation Release") and 14711 (Apr. 27, 1978) 43 FR 4342 and 43 FR 18556.

[38] Quotation Release, *supra* note 37 at 37-38, 43 FR at 4347. (footnote omitted).

[39] Securities Exchange Act Release No. 15009 (July 28, 1978) at 18, 43 FR 34851, 34856.

[40] Such a display would also have to be available by means of the simplest and most prominent form of inquiry. *See* discussion *supra*.

[41] This formula is currently used by participants in the ITS for display on their floors.

requesting that commentators indicate which of these two formulas would be preferable or whether, as an alternative, the Commission should permit vendors to calculate the best bid and offer in either fashion, provided that the method of calculation is clearly disclosed to subscribers.

The rule would also permit vendors to display a montage of quotations and quotation sizes: *Provided*, That quotation information from every market center is displayed separately other than third market quotations which may be represented by a single bid and offer identified by market maker representing the highest bid and lowest offer of all third market makers. In addressing this aspect of the rule, commentators may wish to address whether the Commission should specify the exact nature of any quotation montage if a vendor also provides a consolidated best bid and offer display and, in particular, whether the rule should continue to preclude vendors from providing hybrid montage and best bid and offer displays other than as specified with respect to third market quotations.[42] Additionally, commentators may wish to comment on the rule's requirement that vendors provide a best bid and offer display notwithstanding the fact that they provide a complete montage.

V. Unlisted Securities and Representative Bid and Offer

In formulating minimum display requirements applicable to vendors who make available quotation information in reported securities, the Commission has also examined the manner of display of real-time quotations for unlisted ("OTC") securities. The only quotation vendor now disseminating such quotations is NASDAQ, Inc., the wholly owned subsidiary of the NASD, which operates the National Association of Securities Dealers Automated Quotation ("NASDAQ") system.[43] Although only a small portion of OTC securities are included in the NASDAQ system,[44] trading in those securities accounts for an overwhelming percentage of both the dollar value and share volume of trading in the OTC market.

There are three types of NASDAQ services, denoted "Level 1," "Level 2," and "Level 3," available to NASDAQ subscribers. Level 1, which is used primarily by registered representatives of broker-dealer firms does not display the actual quotations of specified market makers. It displays, instead, for each security quoted in the NASDAQ system, a single "representative bid and ask" quotation ("RBA") consisting of the median bid price and (approximately) the median offer price of all registered market makers[45] who have entered quotations for that security into the NASDAQ system.[46] Level 2, which is generally used by traders and large institutional investors, displays, in a montage, with respect to each security quoted in the NASDAQ system, the bid and offer prices of each registered market maker who enters quotations for that security into the NASDAQ system. Level 3, which is available only to registered market makers,[47] displays the same information as Level 2 and also permits market makers to enter and update bid and offer quotations.[48]

When the NASDAQ system was being developed in the late 1960's, the NASD advised the Commission that it expected that Level 1 service would be used primarily be retail salesmen. It expected, therefore, that retail customers probably would not be advised of the actual quotation information displayed on Level 2 and 3 terminals, but would be quoted the price information immediately available to the registered representatives with whom they dealt, *i.e.*, the information displayed on Level 1. When informed of the NASD's plan to display "representative" quotations on Level 1,[49] the Commission questioned the usefulness of "median" information to retail customers and suggested that a more meaningful display for Level 1 might be the highest market maker bid price and the lowest market maker offer price ("best bid and offer"). The Commission indicated that, in its view, a quotation consisting of the best bid and offer would be more accurate, as a reflection of the prevailing market for a security, than a median quotation. However, in recognition of the potential of the NASDAQ system to improve the quality of the OTC market, the Commission deferred to the NASD and did not raise any objection at that time to the display of the RBA on Level 1. The Commission did, however, indicate to the NASD that this question could be more fruitfully explored after some experience had been gained with the operation of the NASDAQ system and that it might re-examine this issue after the system became operational. The NASDAQ system has been in operation for 7 years, and the Commission believes that it is now appropriate to re-examine the considerations which initially led it to permit the display of RBA on Level 1.

Information supplied by the NASD and representatives of the securities industry indicates that broker-dealer firms tend to supply their registered representatives who deal with the public with Level 1 service exclusively.[50] Level 2 and 3 services are generally maintained by broker-dealer firms

[42] For example, the rule would prohibit a vendor from providing a display showing the bid, offer and quotation size with respect to a particular security from the NYSE and the PSE while showing only the best bid and offer, with size and market identifier, from all other reporting markets.

[43] The NASD owns NASDAQ, Inc. and rules relating to the operation of the system appear as Schedule D of the NASD's Bylaws. NASDAQ, Inc. is registered with the Commission, pursuant to section 11A(b)(3) of the Act, as an exclusive processor.

[44] For its securities to be eligible for inclusion in the NASDAQ system, an issuer must have at least $1,000,000 in total assets and $500,000 in net assets, a minimum of 100,000 shares outstanding, and a minimum of 300 shareholders of record. NASD Bylaws, Schedule D, Part II. B and C. In addition, the issuer must pay an issuer quotation fee if it wishes to have its securities quoted in the system. *Id.* at Part V.

"Anyone wishing to make a market in a NASDAQ-quoted security and to have his quotations for that security displayed on NASDAQ terminals is required to be an NASD member and to register with the NASD as a market maker. Registered market makers are subject to various obligations and restrictions set forth in the NASD's Bylaws. *See* NASD Bylaws, Schedule D at Part IC3.

[45] The nature of the RBA is described in the design specifications of the NASDAQ system as follows:

> Representative Bid and Ask—The representative bid for a NASDAQ security is the median of all bids entered into the NASDAQ system by registered NASDAQ market makers. The representative ask for a NASDAQ security is the figure determined by adding the median of all spreads to the representative bid (a spread is the difference between the bid and ask of registered NASDAQ market makers).
>
> When there is an even number of quotes for a security, the median values are determined by rounding down both the bid and the spread.

Computation of the RBA may be illustrated as follows:

XYZ Corp. Market Maker	Bid	Ask	Spread
1	16¼	16½	¼
2	15	16½	1½
3	16	16¾	¾
4	16	16¾	¾
5	15¾	16¾	1
6	15¼	16½	1¼

Although there is an even number of bids, it makes no difference whether No. 3 or No. 4 is used as the median; either way the median bid is 16. However, the median spread could be either ½ or ¾. Following the practice of rounding down (set forth in the NASDAQ design specifications quoted above), ¾ is chosen. Therefore, the ask side of the RBA is 16¾. Thus, although the highest bid and lowest asked price displayed on Levels 2 and 3 would be 16¼ to 16½, if market maker No. 1 did not enter a quotation, the RBA would simply be 16 (the median bid) 16½ (the median bid plus the median spreak of ½).

[46] NASD Bylaws, Schedule D, at Part IC2.

[47] The same computer hardware is used for Levels 2 and 3. Certain keys are adjusted to permit the entry of quotations if the subscriber is a registered market maker.

[48] The Level 1 display initially proposed by the NASD was somewhat different from the RBA display now in use. The NASD's intial proposal was to display on Level 1, with respect to each security quoted in the NASDAQ system, the median of all bid prices and the median of all asked prices for that security entered into the system.

[49] The cost of Level 1 service, which is made available via interrogation devices provided by vendors other than NASDAQ, Inc., is significantly lower than the cost of Level 2 or Level 3 service. See NASD By-Laws, Schedule D, Part IV.

in their trading rooms for use in connection with trading and market-

in their trading rooms for use in connection with trading and market-making activities. Because registered representatives of the larger wirehouses cannot for practical reasons communicate orally with the trading rooms of their firms on a continuous basis to obtain real-time quotations, retail customers of these firms generally do not have access to the information provided by Level 2 and 3 services. Moreover, many smaller, nonclearing firms do not subscribe to Level 2 or Level 3 service and thus are only able to supply their customers with information available on Level 1.[51] Therefore, since most retail customers generally cannot obtain real-time quotations for NASDAQ securities other than through the registered representatives with whom they deal, the practical effect of displaying the RBA on Level 1 is that the vast majority of retail customers are informed only of the RBA.

The Commission believes that the behavior of some broker-dealers in executing their customers' orders may be affected by the knowledge that their customers do not have access to the best bid and offer then available. For example, some commentators have noted that certain broker-dealers execute customers' orders at the RBA displayed on Level 1 without first attempting to obtain more favorable executions. Furthermore, at the Commission's hearings in August 1977 considering the amendment of off-board trading rules ("off-board hearings"),[52] one commentator stated that an integrated firm may deal with its own retail customers at the RBA quoted on Level 1 despite the fact that the firm's quotations, as a marketmaker in NASDAQ, were at a better price.[53]

The Commission believes that it is only feasible for a customer to police his broker's efforts to obtain best execution if he receives information as to the best bid or offer available at the time he places an order to buy or sell a NASDAQ-quoted security. A retail customer who is informed only of the RBA at that time cannot properly evaluate the quality of execution and price of services rendered by the broker-dealer handling his order. This is particularly true when a broker-dealer had executed an order as principal and has confirmed the transaction "net" to the customer because there is currently no required disclosure of the amount of retail markup or markdown included within the "net" price.[54] In addition, retail customers who are not knowledgeable about the operation of the over-the-counter markets may believe that the RBA quotation they generally receive for a NASDAQ-quoted security actually is the best bid or offer available for that security.

The Commission is aware that a broker-dealer who has executed a customer's order at a price other than the best bid or offer may have had justifiable reasons for doing so (e.g., the best bid or offer may not have been firm for the size of the customer's order; the cost of execution and clearing with the market-maker responsible for the best bid or offer might off-set the price advantages to the customer; or the broker might have reason to believe it imprudent to deal with the dealer responsible for the best quotation). We are also aware that, in such circumstances, a customer's knowledge of the best bid or offer might necessitate as an explanation by the executing broker-dealer of the facts and circumstances underlying his decision to execute the order at a price inferior to the best bid or offer. However, it would not appear that providing such an explanation would constitute an unduly heavy burden. Moreover, the Commission believes that the benefits to be achieved by dissemination of the best bid or offer would justify the imposition of such a burden. Therefore, the Commission tentatively concluded that there is no valid regulatory purpose for denying this important market information to public investors.

Accordingly, the Commission has included in proposed rule 11Ac1-2 provisions requiring that every interrogation device providing quotation information with respect to OTC equity securities display, a minimum, the highest bid and the lowest offer for each such security. Proposed rule 11Ac1-2 would also prohibit the display of any representative bid or offer for a security—i.e., any price for a security which is the mean, median, mode, or weighted average of two or more bids or offers or is the result of some other mathematical calculation based on the bid or offer of one or more market-makers.[55]

In publishing these proposals, the Commission in particular seeks comment on the perceived effects of this regulation on the over-the-counter market. It has been asserted on various occasions that, possibly because of inherent differences between dealer and auction markets, some innovations which improve the quality and efficiency of the markets for securities which are suitable for auction-type trading would have a deleterious effect on over-the-counter markets for other types of securities. For example, during the off-board hearings, the NASD suggested that last sale reporting of transactions in OTC securities might discourage market-making in those securities, thus decreasing liquidity in the over-the-counter market.[56] It also implied that the display of best bid and ask prices on Level 1 of NASDAQ would have similar effects.[57] In commenting on the provisions of rule 11Ac1-2 which are applicable to securities other than reported securities, persons should specifically address these concerns.

VI. Description of Proposed Rule 11Ac1-2

Proposed Rule 11Ac1-2 would set forth comprehensive requirements with respect to the display of transaction reports and last sale data in reported securities [58] and quotations and

[51] As of Dec. 30, 1977, the combined total of Level 2 and Level 3 subscribers was 499, and the approximate number of Level 1 subscribers was 1,900. NASD, "The NASDAQ/OTC Market Fact Book 1977," at 3.

[52] See Securities Exchange Act Release No. 13662 (June 23, 1977), 42 FR 33510.

[53] Prepared statement of the Midwest Stock Exchange, Inc., Aug. 4, 1977, at 47, in File No. 4-180.

[54] Securities Exchange Act Rule 15c1-4 (17 CFR 240. 15c1-4) requires a broker-dealer executing a customer's order as agent to provide the customer with written notification of the amount of any commission or other remuneration received by the broker-dealer in connection with the transaction. The rule does not, however, currently impose a similar requirement on a broker-dealer executing a customer's order as principal. The Commission has, however, included in its recently adopted amendments to Rule 10b-10 a requirement that broker-dealers disclose their markups or markdowns to customers when engaging in so-called "riskless principal" transactions (i.e., when buying a security, as principal, from a marketmaker and reselling to the customer at a higher price including a markup (or at a lower price including a markdown in the case of an order to sell). Securities Exchange Act Release No. 15219 (Oct. 6, 1978) 43 FR 47485. Broker-dealers would not, however, be required to disclose their markup or markdown when acting as a market-maker or engaging in "risk" principal transactions (a transaction in which a broker-dealer sells securities to a customer out of its bona fide inventory or takes a customer's securities into its bona fide inventory). Presumably, most broker-dealers executing customer orders in this manner would continue to advise their customers only of "net" prices; i.e., including any markup or markdown.

[55] Because the display of representative quotation information for reported securities might possibly produce some of the same ill effects flowing from the RBA with respect to OTC securities—and, indeed, might counteract some of the benefits sought to be achieved through the adoption of rules 11Ac1-1 and 11Ac1-2—the prohibition against dissemination of representative quotations would apply to reported securities as well as to OTC securities.

[56] In the matter of off-board trading rules, Securities and Exchange Commission File No. 4-180, transcript pp. 1044-46, Aug. 16, 1977.

[57] Id. at 1046.

[58] The terms "transaction reports," "last sale data," and "reported securities" are defined in paragraph (a)(1) of the proposal to have the same meaning as provided in Rule 11Ac3-1. See Rule 11Aa3-1 release at note 62, supra.

quotation information [59] in subject securities which are defined to include all reported securities as well as any other equity security as to which transaction reports, last sale data or quotation information is disseminated through an electronic interdealer quotation system owned and operated, either directly or indirectly, by an association.[60]

The rule would apply to any vendor, i.e., any securities information processor or self-regulatory organization engaged in the business of disseminating transaction reports, last sale data or quotation information with respect to any subject security to brokers or dealers on a real-time or other current and continuing basis through an electronic communications network (such as the ticker network), moving ticker or interrogation device.[61] However, the rule specifically excludes from this definition any securities information processor or exchange when disseminating market information on the floor of an exchange,[62] thereby permitting an exchange to make available to its members market information for trading and surveillance purposes which would otherwise be precluded by the rule. The rule would also prohibit any broker or dealer from operating or maintaining any display of market data which a vendor would be precluded from making available.[63]

A. Last Sale Data

With respect to the display of transaction reports and last sale data, the rule would maintain certain display requirements currently contained in rule 17a-15.[64] Specifically, it would require that no moving ticker display exclude transaction reports on the basis of the market of execution.[65] In addition, the rule would continue to require [66] that any vendor making available on an interrogation device last sale data with respect to a particular reported security, also make available on that device, a consolidated last sale display with respect to that security.[67] The consolidated last sale display would be required to include the price of the most recent transaction report for that security reported by any market center pursuant to an effective transaction reporting plan as well as the volume of that transaction report or the cumulative volume of all transaction reports for that security reported pursuant to an effective transaction reporting plan during the trading day.[68]

In addition to the display requirements contained in rule 17a-15, the rule would impose, effective as of March 1, 1979, additional display requirements with respect to last sale data which are designed to assure the availability and comparability of consolidated last sale data. The rule would require that the consolidated last sale display available on an interrogation device be available by means of the simplest and most prominent retrieval instructions.[69] Thus, it would no longer be permissible for a vendor to provide last sale data from an individual market center in response to an inquiry consisting of the consolidated system symbol plus a request or transmit key while providing consolidated last sale data in response to an inquiry consisting of the consolidated system symbol, an additional key plus the request or transmit key. In addition, if a vendor were to provide both the consolidated last sale display and an individual market center display in response to an inquiry consisting of an equal number of key strokes, the request key used to obtain the consolidated display must be more prominent (in terms of its label, location, size, or a combination of these or other factors) than the key used to obtain individual market last sale data.

In addition to assuring that consolidated last sale data is available on an interrogation device by means of easiest access, the rule would also require that vendors provide consolidated market data and monitoring services on their interrogation devices which are comparable to the data and services available on an individual market basis. The rule would require vendors to provide, on the consolidated last sale display for a particular reported security, all of the same market data that is available on any individual market display.[70] Thus, for example, if a vendor made available an individual market display for a particular reported security which included last sale, bid, offer, open, high, low, close, volume, price earnings ratio, dividend rate, and time of last news, the consolidated last sale display for that security would be required to contain all of the same data on a consolidated basis, where applicable. In addition, the rule would require that any vendor providing a market minder [71] with respect to any reported security based upon transaction reports from an individual market also provide that same market minder service for that security on a consolidated basis.[72]

The rule would also contain provisions which are designed to assure that transaction reports and last sale data from individual market centers are available on a nondiscriminatory basis. First, on and after March 1, 1979, vendors would be precluded from identifying the market of execution of transactions reports or last sale data displayed on either moving tickers or the consolidated last sale display available on an interrogation device.[73] Second, vendors would be required to equalize access to last sale data from individual market centers available on their interrogation devices. The rule would require that any vendor providing last sale displays from more than one individual market center, make all such displays available in response to an equal number of key strokes.[74] Therefore, after March 1, 1979, it would no longer be permissible for a vendor to provide "primary" market last sale data in response to an inquiry consisting of the consolidated system symbol and a request key while providing last sale data, for example, from a regional exchange in response to an inquiry consisting of the consolidated system symbol, a market designation and a request key.

B. Quotation Information

With respect to the display of quotation information, the rule would set forth certain minimum display requirements, effective as of March 1, 1979, which are designed to assure the availability of bids; offers, quotation sizes and aggregate quotation sizes made available pursuant to rule

[59] The terms "quotations" and "quotation information" are defined in paragraph (a)(3) of the rule. With respect to reported securities, these terms mean bids, offers, quotation sizes and aggregate quotation sizes as defined in Rule 11Ac1-1. With respect to any other subject security, these terms are defined as the most recent bid price or offer price of an over-the-counter market maker disseminated through an electronic interdealer quotation system owned and operated, directly or indirectly, by an association. An "over-the-counter market maker" is defined in paragraph (a)(13) of the rule as any broker or dealer who is authorized by an association which owns and operates, directly or indirectly, an electronic interdealer quotation system to disseminate quotations through that system in a particular security and who makes such quotations available through that system on a regular and continuous basis.

[60] Proposed Rule 11Ac1-2(a)(2). At present the only such inter-dealer quotation system is NASDAQ. See note —— supra.

[61] Proposed Rule 11Ac1-2(a)(12).

[62] Id.

[63] Proposed Rule 11Ac1-2(e).

[64] Proposed rule 11Ac1-2(b)(2)(iv).

[65] The Commission's current interpretation of rule 17a-15 requires vendors to provide such a display. See the Interpretative Release, supra note 3 at 6, 40 FR at 15463.

[66] Proposed rule 11Ac1-2(b)(2)(i).

[67] Id. See proposed rule 11Ac1-2(a)(7) which defines the term "consolidated price."

[68] Id. See proposed rule 11Ac1-2(a)(8) which defines the term "consolidated volume."

V 43/210 0C 30 78

11Ac1-1 and quotation information displayed in an interdealer quotation system (such as NASDAQ) which is owned and operated by an association. The rule would require that any vendor which displays quotation information with respect to a particular subject security on an interrogation device also make available on that device a consolidated quotation display with respect to that security.[75] The consolidated display would be required to be available by means of an access inquiry involving a lesser number of key strokes than is used to obtain quotation information from any individual market center and would be required to display (i) the highest bid and lowest offer from any market center making available quotation information for that security,[76] (ii) an identifier indicating the market center responsible for that best bid and best offer, and (iii) in the case of a reported security, the quotation size or aggregate quotation size associated with that bid and offer.[77]

The rule would also set forth the manner of calculating the best bid and offer.[78] As published, the rule sets forth two alternative formulas for determining the best bid or offer. Both formulas require the use of price as the first factor for determining the best bid or offer, i.e., the best bid would be the bid which is highest in price and the best offer would be the offer which is lowest in price. However, the formulas would differ in terms of the manner of selecting between two or more bids or offers at identical prices. One formula would require selection of the best bid or offer first on the basis of time, i.e., the bid or offer received earliest in time by the vendor would be the best.[79] The other formula would first rank bids or offers at identical prices by size (i.e., The bid or offer with the largest quotation size or aggregate quotation size would be the best) and then, as between bids or offers at identical prices with identical sizes, on the basis of time. The Commission currently contemplates selecting one of these formulas for inclusion in the rule rather than permitting each vendor to select from alternative formulas set forth in the rule.[80]

The rule would also permit vendors to make available quotation information (including size)[81] with respect to individual market centers on their interrogation devices either upon separate inquiry (provided that inquiry access routines for all market centers contain an equal number of key strokes) or in a montage.[82] The quotation montage would be required to state separately the quotation of every market center, except, in the case of a montage of quotations with respect to a reported security, all third market maker quotations could be consolidated into a best third market bid with size and best third market offer with size,[83] each identified by the particular third market maker responsible for the bid or offer.[84]

Finally, the rule would preclude any vendor from displaying a representative bid or offer with respect to a subject security; that is, the rule would prohibit any vendor from displaying any bid or offer which is, or is derived from, the mean, median, mode, or weighted average of two or more bids or offers, or which is calculated by adding to or subtracting from an actual bid or offer a commission, commission equivalent, markup, or differential.

C. JOINT DISPLAY OF LAST SALE AND QUOTATION INFORMATION

Although the rule specifies separate minimum display requirements for last sale data and quotation information, it would permit (and in certain cases require) a vendor to combine the consolidated last sale display and consolidated quotation display available on an interrogation device. The rule explicitly permits such a joint display in paragraph (d). However, if a vendor provides both the most recent transaction report and quotation for a security from a particular market center on a single interrogation device display, paragraph (b)(2)(v) of the rule would require that vendor to combine the consolidated last sale and consolidated quotation display with respect to that security. The rule does not expressly prohibit a vendor from combining, on a single display, consolidated and individual market center market information; however, such a combination would be precluded by the access provisions of the rule which do not prmit access to individual market center information by means of the same number of key strokes (or prominence of request key) as are used to access consolidated information. In particular, we are interested in receiving data from the self-regulatory organizations, CTA, the participants in the CQ Plan and SIAC as to the cost of collecting, processing, and making available this type of market information. We are also interested in receiving an explanation of the rationale behind the computer use charges and the CQ Plan charges and a reconciliation of those charges with the purposes of the Act. Finally, the Commission would appreciate comments regarding the advisability of retaining display charges levied directly on vendor subscribers and whether these charges would be more appropriately assessed on vendors either as a single charge or on a per display basis.

VII. TEXT OF PROPOSED RULES

The Securities and Exchange Commission hereby proposes Rule 11Ac1-2 (17 CFR 240.11Ac1-2) pursuant to its authority under the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq., as amended by Pub. L. No. 94-29 (June 4, 1975)) and particularly sections, 2, 3, 6, 9, 10, 11A, 15, 15A, 17, and 23 thereof (15 U.S.C. 78b, 78c, 78f, 78i, 78j, 78k-1, 78o, 78o-3, 78q, and 78w).

§ 240.11Ac1-2 Display of transaction reports and quotation information.

(a) *Definitions.* For purposes of this section—

(1) The terms "reported security," "transaction report," "effective transaction reporting plan," "nonmember broker or dealer," "moving ticker," and "last sale data" shall have the meaning provided in § 240.11Aa3-1 (Rule 11Aa3-1 under the Act).

[75] Proposed rule 11Ac1-2(c)(2)(i).

[76] This requirement is identical to the rule's access requirement with respect to last sale data.

[77] With respect to reported securities, a vendor would be required to include quotations from all market centers making available quotations in accordance with rule 11Ac1-1. With respect to all other subject securities, a vendor would be required to include quotations from all over-the-counter market makers, i.e., all broker-dealers making available quotations in subject securities in an electronic interdealer quotation system such as NASDAQ. Proposed rule 11Ac1-2 (a)(6)(ii), (a)(13) and (a)(14).

[78] Proposed rule 11Ac1-2(c)(2)(i).

[79] The rule would not specify the manner of determining when a bid or offer is received. The Commission is aware that SIAC currently calculates the best bid and offer of ITS participants for use in ITS by use of an algorithm which deems any change of price or size data as an entirely new bid and offer. Thus, if a market center had made available a quotation consisting of a bid of 20 with a size of 400 and an offer of 20¼ and a size of 200 and the market center changed its bid size to 500 shares, SIAC, upon receiving this change, would assume that the market center had entered an entirely new bid and offer. The market center would thus lose whatever time priority it had established. One vendor proposing to provide its subscribers with a best bid and offer composite quotation display has indicated that it is considering an algorithm which would change time priority for a particular bid (or offer) only when the price of that bid (or offer) has changed. The Commission solicits comments on these alternative methods of determining time priority of quotations. In particular, commentators should address whether the rule should specify the method of calculating time priority and if so, what method should be used.

[80] See discussion, supra.

[81] The rule would require that every quotation with respect to a reported security include a quotation size or aggregate quotation size. Proposed rule 11Ac1-2(c)(2)(iv).

[82] Proposed rule 11Ac1-2(c)(2)(ii).

[83] The rule would require that the calculation of the best third market bid and offer be based upon the same formula as is used to calculate the best bid and offer from all reporting markets.

[84] Proposed rule 11Ac1-2(c)(2)(iii).

(2) The term "subject security" shall mean—

(i) Any reported security; and

(ii) Any other equity security as to which transaction reports, last sale data or quotation information is disseminated through an electronic interdealer quotation system owned and operated, directly or indirectly, by a national securities association ("association").

(3) The terms "quotations" and "quotation information" shall mean bids, offers and, where applicable, quotation sizes and aggregate quotation sizes.

(4) The terms "bid" and "offer" shall—

(i) In the case of a reported security, have the meaning provided in § 240.11Ac1-1 (Rule 11Ac1-1 under the Act); and

(ii) In the case of any subject security other than a reported security, mean the most recent bid price or offer price of an over-the-counter market maker disseminated through an electronic interdealer quotation system owned and operated, directly or indirectly, by an association.

(5) The terms "quotation size," "aggregate quotation size," "third market maker" and "make available" shall have the meaning provided in § 240.11Ac1-1 (Rule 11Ac1-1 under the Act).

(6) The term "consolidated display" shall mean, with respect to a particular reported security—

(i) Any display of last sale data for such security, or information derived therefrom, based on transaction reports from all market centers effecting transactions in such security; and

(ii) Any display of quotation information for that security based on quotations from all market centers making available such information for that security.

(7) The term "consolidated price," when used with respect to a particular reported security, shall mean the price of the most recent transaction report for that security reported pursuant to an effective transaction reporting plan.

(8) The term "consolidated volume," when used with respect to a particular reported security, shall mean—

(i) The volume of the most recent transaction report for that security reported pursuant to an effective transaction reporting plan, or

(ii) The cumulative volume of all transaction reports for that security reported pursuant to an effective transaction reporting plan during the trading day.

(9) The term "individual market center last sale display" shall mean, with respect to a particular reported security, any display of last sale data for such security, or information derived therefrom, based on transaction reports from a single market center effecting transactions in such security, but shall not include any moving ticker or market minder.

(10) The term "individual market center quotation display" shall mean, with respect to a particular subject security, any display of quotation information for that security based on quotations from a particular market center disseminating such information for that security.

(11) The term "interrogation device" shall mean any securities information retrieval system capable of making available transaction reports, last sale data or quotation information, upon inquiry, on a current basis on a terminal or other display device or by any other means.

(12) The term "vendor" shall mean any securities information processor or self-regulatory organization engaged in the business of disseminating transaction reports, last sale data or quotation information with respect to subject securities to brokers or dealers on a real-time or other current and continuing basis, whether through an electronic communications network, moving ticker or interrogation device: *Provided, however,* That no securities information processor or national securities exchange ("exchange") shall be deemed to be a vendor with respect to the dissemination of transaction reports, last sale data, or quotation information on the trading floor of an exchange.

(13) The term "over-the-counter market maker" shall mean, with respect to any subject security other than a reported security, any broker or dealer who is authorized by any association which owns and operates, directly or indirectly, an electronic interdealer quotation system to disseminate through that system quotations in such security, and who makes those quotations available through the system on a regular and continuous basis.

(14) The term "market center" shall mean—

(i) With respect to a reported security, any exchange or third market maker which effects transactions in such security and which collects, processes, and makes available transaction reports with respect to transactions in such security on a current basis pursuant to § 240.11Aa3-1 (Rule 11Aa3-1 under the Act); and

(ii) With respect to a subject security other than a reported security, any person acting in the capacity of an over-the-counter market maker.

(15) The terms "best bid" and "best offer" shall mean—

(i) With respect to quotations for a reported security, the highest bid or lowest offer for that security made available by any market center pursuant to § 240.11Ac1-1 (Rule 11Ac1-1 under the Act): *Provided, however,* That in the event two or more market centers make available identical bids or offers for a reported security, the best bid or best offer (as the case may be) shall be computed by ranking all such identical bids or offers (as the case may be) (first by time (giving the highest ranking to the bid or offer received first in time), then by size (giving the highest ranking to the bid or offer associated with the largest size), (first by size (giving the highest ranking to the bid or offer associated with the largest size), then by time (giving the highest ranking to the bid or offer received first in time)); and

(ii) With respect to quotations for a subject security other than a reported security, the highest bid or lowest offer (as the case may be) disseminated by an over-the-counter market maker in an electronic inter-dealer quotation system owned and operated, directly or indirectly, by an association.

(16) The term "moving ticker" shall mean any continuous real-time moving display of transaction reports, whether made available on a discrete display unit or otherwise, or included on an interrogation device.

(17) The term "quotation montage" shall mean, with respect to a particular subject security, a display on an interrogation device which disseminates simultaneously quotations from all market centers disseminating quotation information with respect to that security.

(18) The term "market minder" shall mean any service provided by a vendor on an interrogation device (other than a moving ticker) which permits monitoring, on a dynamic basis in a single display, of transaction reports or last sale data with respect to two or more reported securities.

(19) The term "representative bid or offer" shall mean any number representing a bid price or an offer price (as the case may be) for a particular subject security which is (i) the mean, median, mode or weighted average of two or more bids or offers of market centers disseminating quotation information with respect to such security, (ii) calculated with reference to or derived from any such mean, median, mode or weighted average, or (iii) calculated by adding to or subtracting from the bid or offer of any market center disseminating quotations with respect to such security any number representing a commission, commission equivalent, mark-up or differential.

(b) *Display requirements for transaction reports and last sale data.* (1) No vendor shall distribute, publish, display or otherwise make available to

brokers and dealers on a real-time or other current and continuing basis, whether through an electronic communications network, moving ticker or interrogation device, any quotation information with respect to a subject security unless such vendor makes available to brokers and dealers on a real-time or other current and continuing basis, whether through an electronic communications network, moving ticker or interrogation device, the consolidated last sale display for that security.

(ii) No vendor may provide any particular subject security for any market center making available quotation information for such security;

dealer, or specified subject security if the Commission determines that such action is necessary or appropriate in the public interest, for the protection of investors, or to maintain fair and orderly markets, after considering the competitive impact against the regulatory benefits gained in terms of furthering the purtation information and to assure the broad dissemination of accurate and

V 43 / 210 OCT 30 78

brokers and dealers on a real-time or other current and continuing basis, whether through an electronic communications network, moving ticker or interrogation device, transaction reports or last sale data in contravention of the provisions of this section.

(2) On and after March 1, 1979, the following requirements shall be applicable to the display of transaction reports or last sale data with respect to reported securities:

(i) If last sale data with respect to a particular reported security is made available by a vendor on an interrogation device, such vendor shall make available on that device a consolidated display of last sale data for such security which shall include, at a minimum, the consolidated price and the consolidated volume for such security (the "consolidated last sale display"). Such consolidated last sale display shall be accessed by means of retrieval instructions involving a number of key strokes which is fewer than the number of strokes required to access any individual market center last sale display made available on that device for such security: *Provided, however,* That notwithstanding the above requirement, a vendor may make available on that device both the consolidated last sale display and any individual market center last sale displays made available for such security by means of retrieval instructions involving an equal number of key strokes if the information request or transmit key for the consolidated last sale display is the most prominent.

(ii) Subject to the provisions of paragraph (b)(2)(i) of this section, a vendor may make available on an interrogation device an individual market center last sale display for a particular reported security for any market center effecting transactions in such security: *Provided, however,* That all individual market center last sale displays for that security which are made available on that device shall be accessed by means of retrieval instructions involving an equal number of key strokes.

(iii) No moving ticker or consolidated last sale display shall identify the market center in which a particular transaction in a reported security has been executed.

(iv) No moving ticker or consolidated last sale display shall exclude any transaction report or last sale data based upon the market center in which a transaction has been executed.

(v) No vendor may provide any category of market information (including quotation information) in an individual market center last sale display for a particular subject security unless that category of information is also provided, on a consolidated basis, in the consolidated last sale display for that security.

(vi) No vendor may provide any market minder with respect to any reported security based on transaction reports from a single market center unless such vendor also provides a market minder for such security based on transaction reports from all market centers reporting transactions in that security pursuant to an effective transaction reporting plan.

(c) *Display requirements for quotation information.* (1) No vendor shall distribute, publish, display, or otherwise make available to brokers and dealers on a real-time or other current and continuing basis, whether through an electronic communications network, moving ticker, or interrogation device, quotation information with respect to subject securities in contravention of the provisions of this section.

(2) On and after march 1, 1979, the following requirements shall be applicable to the display of quotation information with respect to subject securities:

(i) If quotation information with respect to a particular subject security is made available by a vendor on an interrogation device, such vendor shall make available on that device a consolidated display of quotation information for such security which shall include, at a minimum, the best bid and best offer for such security and, in the case of a reported security, (A) an identifier indicating the market center making available such best bid and the market center making available such best offer, and (B) the quotation size or aggregate quotation size associated with such best bid and the quotation size or aggregate quotation size associated with such best offer (the "consolidated quotation display"). Such consolidated quotation display shall be accessed by means of retrieval instructions involving a number of key strokes which is fewer than the number of strokes required to access any individual market center quotation display made available on that device by such vendors for such security: *Provided, however.* That, notwithstanding the above requirement, a vendor may make available on that device both the consolidated quotation display and any individual market center quotation display made available for such security by means of retrieval instructions involving an equal number of key strokes if the information request or transmit key for the consolidated quotation display is the most prominent.

(ii) Subject to the provisions of subparagraph (c)(2)(i) of this section, a vendor may make available on an interrogation device, (A) an individual market center quotation display for a particular subject security for any market center making available quotation information for such security: *Provided, however,* That all individual market center quotation displays for that security which are made available on that device shall be accessed by means of retrieval instructions involving an equal number of key strokes, or (B) either separately or as part of the consolidated quotation display, a quotation montage for that security.

(iii) No consolidated quotation display or quotation montage made available on an interrogation device shall exclude any quotation information based upon the market center making available such information: *Provided, however,* That for purposes of making available the consolidated quotation display or a quotation montage for any reported security, quotation information from all market centers which are third market makers may be consolidated to derive a best bid and offer for all such market centers if such interrogation device is capable of displaying, either separately or as part of the consolidated quotation display or quotation montage, (A) an identifier indicating the market center making available such best bid and the market center making available such best offer, and (B) the quotation size associated with such best bid and the quotation size associated with such best offer.

(iv) Each individual market center quotation display or quotation montage for a particular reported security shall include the quotation size or aggregate quotation size associated with each bid or offer disseminated as part of such display or montage.

(v) No vendor may provide on any interrogation device a representative bid or offer with respect to any subject security.

(d) *Joint display of transaction reports and quotation information.* Subject to the provisions of paragraphs (b)(2)(i) and (c)(2)(i) of this section regarding the means of access to consolidated last sale displays and consolidated quotation displays, a vendor may combine the consolidated last sale display and the consolidated quotation display for a particular subject security.

(e) *Applicability to brokers and dealers.* No broker or dealer may operate or maintain any display of transaction reports, last sale data or quotation information which would not be permitted to be made available by a vendor under paragraph (b) or (c) of this section.

(f) *Exemptions.* The Commission may exempt from the provisions of this section, either unconditionally or on specified terms and conditions, an securities information processor, self regulatory organization, broker dealer, or specified subject security if the Commission determines that such exemption is consistent with the public interest, the protection of investors and the removal of impediments to, and perfection of the mechanisms of, a national market system.

(Secs. 2, 3, 6, 9, 15, 17, 23, Pub. L. 78-291, 48 Stat. 881, 882, 885, 889, 891, 895, 897, 901, as amended by secs. 2, 3, 4, 11, 14, 18, Pub. L. 94-29, 89 Stat. 97, 104, 121, 137, 155 (15 U.S.C. 78b, 78c, 78f, 78i, 78j, 78o, 78q, 78w, as amended by Pub. L. 94-29 (June 4, 1975)); Sec. 1, Pub. L. 75-719, 52 Stat. 1070, as amended by sec. 12, Pub. L. 94-29, 89 Stat. 127-131 (15 U.S.C. 78o-3, as amended by Pub. L. 94-29 (June 4, 1974)); sec. 7, Pub. L. 94-29, 89 Stat. 111 (15 U.S.C. 78k-1).)

VIII. Withdrawal of Prior Interpretation

The Securities and Exchange Commission hereby withdraws its Interpretive Response to Question 9 set forth in Securities Exchange Act Release No. 11317, 40 FR 15461, 15462.

IX. Effects on Competition and Request for Public Comment

Section 23(a)(2) of the Act requires the Commission, in adopting rules under the Act, to consider the anti-competitive effects of such regulation and to balance any anti-competitive impact against the regulatory benefits gained in terms of furthering the purposes of the Act. The Commission has, as an initial matter, examined the proposals announced in this Release in light of the standards cited in section 23(a)(2) and is aware that certain of these proposals might be deemed to affect the ability of vendors to compete. The minimum display requirements set forth in rule 11Ac1-2 prohibit a vendor from presenting certain types of displays and require (under certain circumstances) other types of displays thereby precluding vendors from competing in terms of making available these prescribed displays. Moreover, we understand that the cost of compliance with rule 11Ac1-2 may, in some instances, be considered to have an impact on competition between existing vendors as well as on persons seeking to enter into that field. However, as a preliminary matter, we believe that these and the other perceived anti-competitive effects of these proposals are far outweighed by the regulatory purposes to be achieved by the proposals. The Commission's mandate under section 11A(a) of the Act to facilitate the establishment of a national market system and its authority granted under section 11A(c) to prevent the dissemination of fraudulent, deceptive or manipulative transaction and quotation information and to assure the broad dissemination of accurate and reliable last sale and quotation data in a fair and useful format would appear to be significantly furthered by the adoption of these proposals. However, in addressing the regulatory proposals discussion in this Release, commentators should specifically address the competitive impact of this regulation so that the Commission may further evaluate its proposals in the light of section 23(a)(2).

Interested persons are invited to submit written presentations of views, data and arguments concerning the proposed rule 11Ac1-2 under the Act and the issues discussed above. Persons wishing to make such submissions should file ten copies thereof with George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Room 892, 500 North Capitol Street, Washington, D.C. 20549, not later than December 15, 1978. All submissions should refer to File No. SF-759, and will be available for public inspection at the Commission's Public Reference Room, Room 6101, 1100 L Street NW., Washington, D.C.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

ENVIRONMENTAL PROTECTION AGENCY

TOXIC SUBSTANCES CONTROL ACT

Third Report of the Interagency Testing Committee; Receipt of Report and Request for Comments

V 43/210 OC 30 78

[6560-01-M]

ENVIRONMENTAL PROTECTION AGENCY

[FRL 995-1]

THIRD REPORT OF THE INTERAGENCY TESTING COMMITTEE

Receipt of the Report and Request for Comments

AGENCY: Environmental Protection Agency.

ACTION: This Notice requests comments on recent additions to the Interagency Testing Committee's Priority List of chemical substances recommended for testing under the Toxic Substances Control Act.

SUMMARY: The Interagency Testing Committee established under section 4(e) of the Toxic Substances Control Act (TSCA) has transmitted its Third Report to the Administrator of the Environmental Protection Agency (EPA). This Report revises and updates the Committee's Priority List of chemicals. The Report identifies those additional chemical substances the Committee is recommending to EPA for priority consideration for promulgation of test rules under section 4 of the act.

The Third Report is being published with this Notice. The Agency invites interested persons to submit comments on the Report.

SUPPLEMENTARY INFORMATION:

BACKGROUND

Section 4 of TSCA authorizes the Administrator of EPA to promulgate regulations requiring testing of chemical substances in order to develop data relevant to determining the risks that such chemical substances may present to health and the environment.

Section 4(e) of TSCA establishes an Interagency Testing Committee to make recommendations of chemical substances to the Administrator of EPA to be given priority consideration for test rules under section 4. The Committee's recommendations are set forth in the form of a Priority List. Up to 50 of the chemical substances on the Priority List may be designated by the Committee for which EPA must within 12 months of designation initiate rulemaking to require testing or publish in the FEDERAL REGISTER its reasons for not doing so.

The Committee's initial recommendations to the Priority List, of four substances and six categories of substances, were published in the FEDERAL REGISTER on October 12, 1977 (42 FR 55026). Revisions to that list appeared in the Committee's Second Report and were published in the FEDERAL REGISTER on April 19, 1978 (43 FR 16684). Those revisions were the addition of four substances and four categories of substances to the Priority List.

In its Third Report, the Committee is recommending the addition of one chemical substance and two categories of chemical substances to the Priority List.

These three additions have also been designated by the Committee for EPA to initiate rulemaking within 12 months or publish its reasons for not doing so.

AVAILABILITY

The Committee's Third Report appears in the FEDERAL REGISTER following this notice.

The information dossiers used by the Committee in developing the recommendations presented in the Third Report will be transmitted by the Committee to EPA in the next few weeks.

Copies of the Third Report and/or dossiers are available from: John B. Ritch, Jr., Director, Industry Assistance Office, Office of Toxic Substances (TS-799), EPA, 401 M Street SW., Washington, D.C. 20460. Call toll free 800-424-9065; in Washington, D.C., call 554-1404.

REQUEST FOR COMMENTS

EPA invites interested persons to submit comments on the Committee's new recommendations. In view of the October 1979 statutory deadline for initiating rulemaking (or publishing reasons for not doing so), the Agency requests that comments be submitted no later than March 30, 1979.

Comments should bear the identifying notation OTS-040005 and should be submitted to Joyce Barbour, Document Control Officer, Chemical Information Division, Office of Toxic Substances (TS-793), Room 711-A, EPA, 401 M Street SW., Washington, D.C. 20460. All written comments will be available for public inspection in Room 711, East Tower, at the same address, between 8:30 a.m. and 4:30 p.m., weekdays.

Dated: October 23, 1978.

STEVEN D. JELLINEK,
Assistant Administrator for Toxic Substances.

THIRD REPORT OF THE TSCA INTERAGENCY TESTING COMMITTEE TO THE ADMINISTRATOR, ENVIRONMENTAL PROTECTION AGENCY

OCTOBER 1978.

TSCA INTERAGENCY TESTING COMMITTEE

STATUTORY MEMBER AGENCIES

Council on Environmental Quality: Carroll Leslie Bastian; Nathan J. Kareh, Alternate.

Department of Commerce: Orville E. Paynter; Bernard Greifer, Alternate.

Environmental Protection Agency: Warren R. Muir; Joseph J. Merenda, Alternate.

National Cancer Institute: James M. Sontag.

National Institute of Environmental Health Sciences: Hans L. Falk; Warren T. Piver, Alternate.

National Institute for Occupational Safety and Health: Jean G. French, Vice Chairperson; Vera W. Hudson, Alternate.

National Science Foundation: Marvin E. Stephenson, Chairperson; Carter Schuth, Alternate.

Occupational Safety and Health Administration: Joseph K. Wagoner; Fred W. Clayton, Alternate.

LIAISON AGENCIES

Consumer Product Safety Commission: Joseph McLaughlin.

Department of Defense: Seymour L. Friess.

Department of the Interior: Charles R. Walker.

Food and Drug Administration: Allen H. Heim; Winston deMonsabert.

COMMITTEE STAFF

Executive Secretary: Carol A. Mapes.
Secretary: Madye B. Cole.

ACKNOWLEDGMENTS

The Committee members acknowledge the support and invaluable contributions of the many individuals and groups who have significantly aided us in our work. These include:

The Federal agencies who have cooperated by providing support through the liaison members;

Clement Associates, Inc., technical support contractor;

The U.S. Environmental Protection Agency (EPA) for funding the technical support contract and the National Institute for Occupational Safety and Health, the Council on Environmental Quality, and the National Cancer Institute for assisting in the funding;

Former liaison member Robert Hehir, Consumer Product Safety Commission;

Former EPA staff member Donald G. Barnes, Office of Toxic Substances;

EPA staff members who assisted the Committee in a variety of activities, in particular: John W. Lyon, Office of the General Counsel; Ralph C. Northrop, Jr., Office of Toxic Substances; and Amy Rispin, Office of Toxic Substances;

The numerous experts who prepared presentations and material for the Committee;

The industries that responded to the Contractor's request for information on specific chemical substances and categories; and

The many individuals and organizations who responded to the Committee's previous reports.

SUMMARY

A major section (Sec. 4) of the Toxic Substances Control Act of 1976 (TSCA, Pub. L. 94-469) provides for the testing of chemicals in commerce which may pose an unreasonable risk to human health or the environment. This section of the Act also provides for establishment of a Committee, composed of representatives from eight designated Federal agencies, to recommend chemical substances or mixtures to which the Administrator of the U.S. Environmental Protection Agency (EPA) should give priority consideration for the promulgation of testing rules. The Committee makes such revisions in the Section 4(e) Priority List as it determines to be necessary and transmits them to the Administrator, at least every 6 months.

As a result of its deliberations during the past six months, the Committee is revising the TSCA Section 4(e) Priority List by the addition of one individual substance and two categories of substances. Each of these new recommendations is being designated by the Committee for action by EPA within 12 months. The Committee considers these additions to be of the same priority as the previous entries. The chemical substance and categories being added to the Priority List are presented alphabetically, together with the types of studies recommended, as follows:

Substance or category	Recommended studies
Chlorinated Benzenes, Tri-, Tetra- and Penta-	Carcinogenicity, mutagenicity, teratogenicity, other toxic effects, environmental effects, and epidemiology
1,2-Dichloropropane	Carcinogenicity, mutagenicity, teratogenicity, other toxic effects, environmental effects, and epidemiology
Glycidol and its derivatives	Carcinogenicity, mutagenicity, teratogenicity, other toxic effects, and epidemiology

Information dossiers on these new entries will be forwarded to the EPA Administrator at the earliest practicable date.

THIRD REPORT OF THE TSCA INTERAGENCY TESTING COMMITTEE TO THE ADMINISTRATOR, ENVIRONMENTAL PROTECTION AGENCY

OCTOBER 1978.

CHAPTER 1. INTRODUCTION

1.1 Background

The Interagency Testing Committee (Committee) was established under Section 4(e) of the Toxic Substances Control Act of 1976 (TSCA, Pub. L. 94-469). The specific mandate of the Committee is to identify and recommend to the Administrator of the U.S. Environmental Protection Agency (EPA) chemical substances or mixtures in commerce which should be tested to determine their potential hazard to human health and/or the environment. The Act specifies that the Committee's recommendations to the Administrator will be in the form of a list (sec. 4(e) Priority List) to be published in the FEDERAL REGISTER. The Committee also is directed to make such revisions in the list as it determines to be necessary and transmit them to the Administrator, at least every 6 months after submission of its initial list.

The Committee has eight statutory members appointed by the Federal agencies identified for membership in Section 4(e)(2)(A) of the Act as well as a number of alternate members as permitted by Section 4(e)(2)(B)(i). In addition, the Committee has invited several other Federal agencies with programs related to the control of toxic substances to designate liaison representatives to participate in its meetings. The current Committee members, alternates, and liaison representatives are identified in the front of this report.

1.2 Previous reports

In July 1977, the Committee published a Preliminary List of 330 chemical substances and categories which it had identified for further consideration (Reference No. 1). Using previously described techniques (Reference No. 2), the Committee ultimately identified approximately 80 chemical substances and categories for detailed review and requested its technical contractor to prepare dossiers on selected chemicals and categories. The review of these dossiers, combined with the knowledge and professional judgment of the Committee members, formed the basis for the Committee's initial recommendations to the EPA Administrator (Reference No. 2) and subsequent additions to the Section 4(e) Priority List (Reference No. 3).

1.3 Committee activities during this reporting period

During the past six months, the Committee completed a detailed review of all chemicals and categories selected for dossier preparation as well as the review of a number of additional chemicals, with the following exceptions: (a) Those chemical substances and categories for which dossiers are being prepared and will be reviewed prior to the Committee's April, 1979, report; and (b) those chemicals whose further consideration has been deferred pending receipt of additional information.

1.4 Future committee activities

The Committee is currently updating its Master File of chemicals. This effort will be followed by a selection of chemicals and scoring procedures similar to those described in previous Committee reports (Reference Nos. 2 and 3). These procedures will provide one method for identifying additional chemicals for detailed review and, simultaneously, will enable a periodic re-evaluation of those chemicals which have been reviewed, but not selected for inclusion in the section 4(e) Priority List.

CHAPTER 2. AVAILABILITY OF TESTING FACILITIES AND PERSONNEL

The Committee again emphasizes its concerns about the National capability for conducting long-term tests of biological effects, as expressed in its second report to the EPA Administrator (Reference No. 3). As previously stated, the Committee's paramount concern is for the availability of adequately trained personnel. The Committee, therefore, reiterates its belief that the Civil Service Commission could do much to stimulate interest in professions such as toxicology, pathology, epidemiology, and related environmental and occupational health specialties by creating series and registers for these professions.

- The Committee supports current efforts by the Environmental Protection Agency to initiate the establishment of a Civil Service Commission series for toxicologists.
- The Committee again recommends a National survey to assess the future availability of personnel and testing facilities.
- The Committee again recommends that this survey also determine the adequacy of the supply of test organisms for assessing specific health and environmental effects.

To determine whether the number of personnel and facilities are adequate to meet the predicted needs of TSCA/EPA, there also must be some assessment of the TSCA testing requirements in relation to those of other Federal agencies and the private sector.

- The predicted competition for these facilities by users from the Federal and private sectors might be partially alleviated if some short-term, national-testing-priority scheme were developed to enable the most crucial needs to be met as additional personnel and facilities are developed.

CHAPTER 3—RECOMMENDATIONS OF THE COMMITTEE

3.1 Chemical substances and categories recommended for testing

The Interagency Testing Committee is revising the TSCA section 4(e) priority list by the addition of one individual substance and two categories of substances for which testing is recommended. These chemicals were selected after consideration of the factors identified in TSCA section 4(e)(1)(A), other relevant factors identified by the Committee, and the knowledge and professional judgment of Committee members. The recommended studies deemed appropriate for determining the potential hazard(s) of each new entry and the reasons for such recommendations are described in section 3.3 of this report. As in the case of the Committee's previous recommendations, each chemical substance and category is being designated by the Committee for action by EPA within 12 months.

Table 1 presents the complete section 4(e) priority list including the date by which the EPA Administrator must take action on each entry. As in previous Committee reports (Reference Nos. 2 and 3), the entries are listed alphabetically. The Committee considers each of its new entries to the list to be of equal importance. Therefore, each of these new entries should be given the same priority for purposes of initiating action as required under TSCA section 4(e). Unless stated otherwise, the chemical substance recommended for testing is the product to which the population is exposed.

3.2 Designated substances on which studies are planned or ongoing

TABLE 1—THE TSCA SECTION 4(e) PRIORITY LIST, ARRANGED ALPHABETICALLY

Substance or category	Recommended studies	Date
Chlorinated Benzenes, Tri-, Tetra- and Penta-	Carcinogenicity, mutagenicity, teratogenicity, other toxic effects, environmental effects, and epidemiology	10/30/79
1,2-Dichloropropane	Carcinogenicity, mutagenicity, teratogenicity, other toxic effects, environmental effects, and epidemiology	10/30/79
Glycidol and its derivatives	Carcinogenicity, mutagenicity, teratogenicity, other toxic effects, and epidemiology	10/30/79

or ongoing studies. If the details of a study are know and its conclusions imminent, the Committee may delay con-

3.2 Designated substances on which studies are planned or ongoing

The Committee is aware that it has added to the section 4(e) priority list certain chemical substances which are either currently under study or have been selected for study by other groups. Such studies may concern one or more of the effects for which the Committee has recommended testing. Set forth below is the Committee's reasoning for its past and future designation of such substances.

The Committee generally does not regard knowledge that studies are planned or ongoing as a sufficient basis to defer consideration of a substance for designation for the effect under investigation or for any other effect. The Committee's judgment as to whether a substance has been adequately tested for health and environmental effects must rest with the data that are presently available. Such data do not exist for planned studies and may be in various stages of generation for ongoing studies. In addition, the Committee is unable to predict if an ongoing study would be successfully concluded (i.e., disease, toxicity, or other unforeseen events may cause a study to be aborted). Whenever they have been identified, planned and ongoing studies are noted in the dossiers on designated substances.

TABLE 1—THE TSCA SECTION 4(e) PRIORITY LIST, ARRANGED ALPHABETICALLY

Chemical substance or category	Designated for action by
Acrylamide	April 1979.
Alkyl epoxides	October 1978.
Alkyl phthalates	October 1978.
Aryl phosphates	April 1979.
Chlorinated benzenes, mono- and di-	October 1978.
Chlorinated benzenes, tri-, tetra- and penta-	October 1979.
Chlorinated naphthalenes	April 1979.
Chlorinated paraffins	October 1978.
Chloromethane	October 1978.
Cresols	October 1978.
Dichloromethane	April 1979.
1,2-Dichloropropane	October 1979.
Glycidol and its derivatives	October 1979.
Halogenated alkyl epoxides	April 1979.
Hexachloro-1,3-butadiene	October 1978.
Nitrobenzene	October 1978.
Polychlorinated terphenyls	April 1979.
Pyridine	April 1979.
Toluene	October 1978.
1,1,1-Trichloroethane	April 1979.
Xylenes	October 1978.

The above statement does not mean that the Committee's consideration of substances will never include planned or ongoing studies. If the details of a study are know and its conclusions imminent, the Committee may delay considering the substance until the results become available. When the Committee considers that a chemical substance is under sufficient assessment by other groups, it may defer consideration of the substance. Because the Committee recognizes that each case must be judged individually, it has not establish formal criteria regarding the impact that planned or ongoing studies may have on its recommendations.

3.3 Reasons for Recommending Testing of the Additional Substances and Categories

Table 2 summarizes the studies recommended for each additional entry on the section 4(e) priority list. As directed by TSCA section 4(e)(1)(B) the Committee also is presenting its reasons for recommending specific types of studies. In addition to the rationales presented herein, supporting dossiers of information are being finalized and will be transmitted to the Administrator, EPA, at the earliest practicable date.

Table 2. Summary of Recommended Studies

Substance or Category	Carcinogenicity	Mutagenicity	Teratogenicity	Other* Toxic Effects	Environmental Effects	Epidemiology
1. Chlorinated Benzenes, Tri-, Tetra- and Penta-	X	X	X	X[a]	X	X
2. 1,2-Dichloropropane	X	X	X	X[b]	X	X
3. Glycidol and Its Derivatives	X	X	X	X[c]		X

*The systems of particular concern are as follows: a) neurological and hematopoietic; b) reproductive and neurological; and c) reproductive.

3.3.A Chlorinated benzenes, tri-, tetra- and penta-

Recommended studies: Carcinogenicity,

on wild and domestic birds and mammals, fish, amphibians, reptiles, invertebrates, plants and algae. Since residues have been

production and behavior; and effects on soil invertebrates and terrestrial insects.

Epidemiology: There is no information

1. *Preliminary List of Chemical Substances for Further Evaluation.* Toxic sub-

V 4 3 / 2 1 0 0 C 3 0 0 7 8

3.3.A Chlorinated benzenes, tri-, tetra- and penta-

Recommended studies: Carcinogenicity, mutagenicity, teratogenicity, other toxic effects, environmental effects, and epidemiology.

Category identification: This category consists of: 1,2,3-trichlorobenzene (CAS No. 87-61-6); 1,2,4-trichlorobenzene (CAS No. 120-82-1); 1,3,5-trichlorobenzene (CAS No. 108-70-3); 1,2,3,4-tetrachlorobenzene (CAS No. 634-66-2); 1,2,3,5-tetrachlorobenzene (CAS No. 634-90-2); 1,2,4,5-tetrachlorobenzene (CAS No. 95-94-3); and pentachlorobenzene (CAS No. 608-93-5).

Reasons for Recommendations. *Production, release, and exposure*—Although the Committee was not able to obtain accurate production, environmental release, and worker exposure figures, one source suggests that over 1 million workers are exposed to trichlorobenzenes. The Committee also judges that a variety of sources are responsible for the observed contamination of air, water, soil and food chains by chlorinated benzenes. Possible sources of contamination include the use of chlorobenzenes as chemical intermediates and solvents in the manufacture of dyes, lubricants and pesticides as well as other uses such as transformer oils. Recent decreases in the use of polychlorinated biphenyls may result in an increase usage of trichlorobenzenes as transformer oils. Chlorinated benzenes are also present as contaminants in and degradation products of pesticides and occur in chlorinated municipal, agricultural and industrial effluents. The predicted partition coefficients of chlorobenzenes suggest that they may accumulate in biological systems. The high probability for exposure to the human population and environment of these relatively persistent and toxic substances in emphasized in the following recommendations.

Carcinogenicity: No carcinogenicity studies on tri-, tetra- and pentachlorobenzenes were found in the searched literature, although hexachlorobenzene is a demonstrated animal carcinogen. The Committee, therefore, recommends that tests be conducted to assess the carcinogenic potential of these chemicals.

Mutagenicity: Although a single mutagenicity study for 1,2,4-trichlorobenzene was negative, additional testing is needed to assess the mutagenix potential of the chlorobenzenes.

Teratogenicity: Pentachlorobenzene administered to pregnant rats reduced the mean number of live fetuses per litter and increased the incidence of sternal defects and extra ribs. Studies are recommended to assess the teratogenic potential of the chlorobenzenes.

Other toxic effects: Degeneration of liver cells and hepatic porphyria have been observed in rodents exposed to chlorobenzenes. Dose-related increases in liver to body weight ratios in highly porphyric rats were accompanied by the induction of hepatic microsomal enzymes. Monkeys given high doses of 1,2,4-trichlorobenzene showed severe weight loss and fine tremors. Guinea pigs given high doses of chlorobenzenes have been reported to convulse and die. The Committee recommends testing, with emphasis on the neurological and hematopoietic systems, to further assess the toxic effects of the chlorobenzenes.

Environmental effects: There is a paucity of information on the acute and chronic effects of tri-, tetra- and pentachlorobenzenes on wild and domestic birds and mammals, fish, amphibians, reptiles, invertebrates, plants and algae. Since residues have been detected in aquatic situations, particular emphasis should be placed on long-term environmental studies in freshwater and marine environments with concern for the biological significance of residues and effects on reproduction, behavior and survival of fish, fish-eating birds and mammals, and food chain organisms.

Epidemiology: Since the nature of human exposure to chlorobenzenes is extremely broad, the Committee believes that epidemiological studies may be important in assessing the effects of long-term exposure to chlorobenzenes.

3.3.B 1,2-dichloropropane

Recommended studies: Carcinogenicity, mutagenicity, teratogenicity, other toxic effects, environmental effects, and epidemiology.

Substance identification: CAS No. 78-87-5.

Reasons for recommendations. *Production, release, and exposure*—1,2-dichloropropane is produced in large quantities with a production rate in 1976 of 71 million pounds. Because of its widespread use as a solvent, as well as a multiplicity of other uses, 1,2-dichloropropane has a potentially high occupational exposure (over 1 million workers). Its potential use in many consumer products also may lead to wide general exposure. Little is known about the release rate of 1,2-dichloropropane into the environment.

Carcinogenicity: The testing carried out thus far on the carcinogenicity of 1,2-dichloropropane is insufficient to allow an appropriate appraisal of its carcinogenicity. The Committee, therefore, recommends that additional carcinogenicity studies be conducted.

Mutagenicity: Although positive mutagenicity tests have been reported in *Salmonella typhimurium* and in *Aspergillus nedulans* for dichloropropane, the isomer was not specified. The Committee recommends that mutagenicity testing be done specifically on 1,2-dichloropropane.

Teratogenicity: Because no information on the teratogenicity of 1,2-dichloropropane was found in the searched literature, the Committee recommends that teratogenicity tests be conducted.

Other toxic effects: Fatty degeneration of the liver and kidney and necrosis of the adrenals have been observed in experimental animals following acute, high-level exposures to 1,2-dichloropropane. Although one low-level exposure study has been reported, it is considered to be inadequate to assess the chronic effects of 1,2-dichloropropane. Since this compound is structurally similar to 1,2-dibromo-3-chloropropane, the Committee recommends that particular emphasis be placed on the reproductive and neurological effects of this chemical.

Environmental effects: In view of its volatility and high specific gravity, the ecological impact of 1,2-dichloropropane may be localized to those environments receiving continuous exposure associated with this chemical's use and disposal. The potential for bioaccumulation suggests the need for further testing to determine the biological significance of exposure to wild and domestic birds, mammals, fish, and invertebrates. Specific areas of environmental concern include: Chronic toxicity to fish and invertebrates; effects on avian and mammalian reproduction and behavior; and effects on soil invertebrates and terrestrial insects.

Epidemiology: There is no information available on chronic effects in humans exposed to 1,2-dichloropropane over an extended period of time. Because of the potentially widespread exposure, epidemiological studies may be particularly important in assessing the human health effects of 1,2-dichloropropane.

3.3.C Glycidol and Its Derivatives

Recommended studies: Carcinogenicity, mutagenicity, teratogenicity, other toxic effects, and epidemiology.

Category identification: This category consists of glycidol (CAS No. 556-52-5) and its derivatives. Example chemicals in this category are glycidyl acrylate (CAS No. 106-90-1), glycidyl methacrylate (CAS No. 106-91-2), allyl glycidyl ether (CAS No. 106-92-3), n-butyl glycidyl ether (CAS No. 2426-08-6), para-cresyl glycidyl ether (CAS No. 2186-24-5), phenyl glycidyl ether (CAS No. 122-60-1), and the diglycidyl ether of bisphenol A (CAS No. 1675-54-3).

Reasons for recommendations.

Production, release, and exposure—Most of these commercially significant chemicals have annual production volumes in excess of 1,000 pounds (1976). Although exposure estimates are not available for all the chemicals in this category; NIOSH estimates that 105,000, 118,000, and 105,000 workers are exposed to glycidol, glycidyl ethers, and glycidyl methacrylate, respectively.

Carcinogenicity: Although glycidol and glycidyl methacrylate have been tested for carcinogenicity, neither meets current testing standards. In view of the potential alkylating properties of glycidol and its derivatives and the demonstrated carcinogenicity of certain members of this category (e.g., diglycidyl resorcinol ether and glycidyl oleate), the Committee recommends carcinogenicity studies.

Mutagenicity: Since glycidol, allyl glycidyl ether, n-butyl glycidyl ether, and phenyl glycidyl ether have been reported to be mutagenic in several assay systems, the mutagenic potential of other category members should be determined.

Teratogenicity: With the exception of negative test results on phenyl glycidyl ether, the teratogenic potentials of these compounds have not been evaluated. The Committee, therefore, recommends studies to evaluate the teratogenic potential of other Compounds in this category.

Other toxic effects: Most of these chemicals are skin and eye irritants, while some induce sensitization and cross-sensitization reactions in exposed workers. A diversity of toxic effects also has been observed in experimental animals following administration of these compounds. The most frequently observed effects are CNS depression, incoordination and ataxia, although some of these compounds reportedly induce testicular atrophy and temporary sterility in rats. Adverse effects on the kidneys, liver, pancreas, and adrenals also have been observed in experimental animals. The Committee, therefore, recommends studies to evaluate the toxicity of these chemicals. The reproductive system is of particular interest.

Epidemiology: Epidemiology studies should be conducted to assess the extent of human health effects.

Title 24—Housing and Urban Development

CHAPTER VIII—LOW INCOME HOUSING, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-78-529]

PART 891—REVIEW OF APPLICATIONS FOR HOUSING ASSISTANCE AND ALLOCATION OF HOUSING ASSISTANCE FUNDS

Final Rule

AGENCY: Department of Housing and Urban Development (HUD).

ACTION: Final rule.

SUMMARY: HUD is adopting for immediate effect revised regulations on reviewing applications for assisted housing and allocating housing assistance.

EFFECTIVE DATE: October 30, 1978.

FOR FURTHER INFORMATION CONTACT:

Anthony Freedman, Office of Policy Development and Evaluation, Department of Housing and Urban Development, Room 9158, 451 Seventh Street SW., Washington, D.C. 20410. Telephone 202-755-7330. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: On April 24, 1978, the Department of Housing and Urban Development (HUD) published proposed amendments (43 FR 17448) to subparts A through D of Part 891, Chapter VIII, 24 CFR. Interested parties were given until May 24, 1978, to submit written comments. All comments received with respect to the proposed rules were given due consideration. As a result of the comments received, a number of changes have been made to the proposed regulations. The revisions and comment disposition are discussed below. Subparts E and F will be revised at a later date for consistency.

Definitions

In response to a comment from a nonprofit organization, the definition of applications for section 202 projects has been revised to refer to "elderly and handicapped." This is consistent with the community development block grant (CDBG) regulations (43 FR 8434) and gives recognition to the fact that handicapped needs are separate and distinct from those of the elderly.

One problem which has appeared in connection with approving applications for housing for the handicapped is that communities have met their elderly housing goals under the HAP's without having adequately served handicapped persons. In preparing HAP's, communities have been advised that the needs of the nonelderly handicapped should not necessarily be considered to be met or addressed even though the category covering both elderly and handicapped may have been served disproportionately when compared to family and large family housing goals. In preparing their HAP's, communities are encouraged to develop a separate narrative section on the housing needs of the nonelderly handicapped and to note goals which are set for the handicapped separately from those set for the elderly. A definition for Federal fiscal year has been added.

Other minor changes have been made in the definitions to reflect recent programmatical and organizational changes within the Department.

General Applicability

Some comments questioned the exclusion from consideration of small projects involving 12 or fewer units and housing in new communities where the Secretary determines they are necessary. Both of these exclusions are statutory and are, therefore, not subject to change. In addition, one comment suggested that language be provided to allow for local government review if the size of a project decreased by more than 12 units, since provision is made for reviews when the project increases in the same fashion. Since the primary purpose of the review is to ascertain housing assistance plan (HAP) consistency, it is considered that the outcome of the review would not be changed if the project only decreased in size. Therefore, this comment was not adopted. One commenter requested that the preamble include clarification for the field offices and local governing bodies concerning which HAP is applicable for fiscal year 1979 allocations. Therefore, we have added the following:

For the purpose of allocation of fiscal year 1979 housing funds and the review and comment for consistency of housing proposals generated by that allocation, all fiscal year 1978 community development block grant housing assistance plans are subject to this part including where appropriate: (1) Annual housing action plans for transition year housing assistance plans (§ 570.306(a)(4)); and (2) housing assistance plans for small cities CDBG recipients (24 CFR 570, Subpart F) approved under fiscal year 1978 community development block grant funding.

In response to a comment the local government is required to submit comments to the clearinghouse. A comment suggesting new or amended HAP's be sent to the A-95 clearinghouse for review was not adopted since it is beyond the scope of these regulations.

Local Review and Comment

One comment suggested that opportunity for local reviews be required after the formal submission of an application to HUD even if previous comments were submitted. This comment has been followed. It is considered that the best interests of the Department and the local government will be served if the formal 30-day comment period is observed. However, local government comments may still be submitted at the beginning of the comment period to save processing time.

Two commenters requested a clarification of policy with respect to changes in HAP's during processing. The determination of whether the new or amended HAP will be used has been left to the discretion of the field office, taking into consideration local government comments. See § 891.203(b).

Local Government Response

Comments were received from a variety of municipal and regional organizations raising questions regarding the limits established for local government objections, Specific areas for objections have been purposely limited by the Department in order to insure that the comments will be constructive and contribute to expeditious processing of the applications. However, the local government may object if the housing is "inconsistent with any other limiting factors set forth in the HAP." See § 891.204(b)(3).

Two commenters indicated that specific sites within the general locations may be inappropriate for various reasons (e.g., inconsistent with the locality's adopted general plan relating to zoning). Issues beyond those related to HAP consistency are addressed in detail during the project review by the Field Office. One commenter objected that the limitation to sites within the general locations was unduly restrictive for applications for housing for the handicapped. Although the comment was fully considered, it was not adopted. General locations for housing in the approved HAP's must include a sufficient number of sites to insure competitive proposals within the locality. It is considered that through the normal requirements for general locations approved in a HAP that these areas would not be restrictive to any type of housing, including housing for the handicapped.

One commenter suggested that these provisions be clarified to incorporate the 15 percent minimum housing goal requirement of § 570.306. This suggestion was not adopted since the 15 percent minimum housing goal only

applies to the establishment of the 3-year goals and not to each specific application. Another commenter suggested that an objection be included relating to applications which exceed the 1-year goal. This suggestion was also not adopted since it is contrary to the intention of the revised regulations which do not restrict variations from one year goals.

A few commenters requested clarification of the "expressly excluded" phrase, including one who recommended that the provision be clarified to indicate that arbitrary program exclusions would not be allowed. In recognition of the noted confusion, this factor has been eliminated as a basis for objection. It is covered in concept since an express exclusion in the HAP would be a limiting factor under § 891.204(b)(3).

HAP Variations

One commenter suggested that local government should have complete discretion as to when HAP goals should be amended. HAP amendments are necessary before applications which exceed the 3-year goals by more than 20 percent may be approved. This is considered reasonable and should not place an unnecessary burden on the local government. See § 891.206.

One commenter suggested that the Chief Executive should be informed by official notification when an application or applications would exceed the 3-year HAP goals. Provision for this procedure was already made in § 891.202(b)(2).

One commenter indicated that the references to housing type and household type were confusing and suggested that the basis of comparison should only be by housing type. Proportionality of goals by household type is a specific requirement for the preparation of the HAP. Proportionality by housing type, on the other hand, is not required in the HAP preparation, but rather a directive by the Department to utilize the assisted housing funds in a manner consistent with the resulting proportions by housing types in prepared HAPs.

One commenter inquired whether a field office manager may approve applications exceeding goals by 20 percent or less if the locality does not object. As detailed in § 891.206(a), field office managers may not approve such applications unless the local government provides a written statement in accordance with § 891.204(a) and the application meets the appropriate criteria.

One commenter indicated that some plans allow for a goal adjustment process short of a formal HAP amendment and suggested that the 20 percent provision should not override such local provisions. The present regulations are intended to minimize the number and frequency of need for HAP amendments in any local government. To the extent they are applicable, they should be adhered to in every locality with an approved HAP.

Two commenters noted that the language in § 891.206(b) might be construed as precluding the necessity to follow the formal HAP amendment procedures. In consideration of this comment, the language of this section has been clarified.

Notifications of HUD Determination

One commenter suggested that inclusion of a provision for notifying an applicant when HAP problems arise, and the designation of an appropriate appeal mechanism. All decisions of the field offices may be appealed through appropriate channels to headquarters, if necessary.

Need for Housing Assistance

One commenter suggested that the determination regarding the availability of adequate public facilities and services under subpart C should be a requirement in areas with HAP's as well as those without. The requirement is statutorily imposed for areas without HAP's in recognition of the likelihood that the application for housing assistance was not anticipated by the local government. On the other hand, in areas with HAP's it is presumed that the adequacy of public facilities and services is taken into consideration during the normal course of planning and goal establishment.

Lower Income Housing Needs Determination

Several commenters representing a cross section of public and private interest groups wrote with suggestions and/or requested clarification of the procedures relative to the determination of housing needs under § 891.402. One commenter suggested that the age of housing should be included in the criteria. The Department has explored this option in the past and has determined that its inclusion would provide an undesirable distortion to the results. The age of the house does not conclusively indicate a housing need. Therefore, this comment has not been adopted. One commenter suggested that the language in the regulations be modified to read, "and other, objectively measurable conditions." As worded the language is as stated in the statute. However, it is not considered to preclude the use of other factors. In fact the present formula includes the factors listed, in addition to a factor for a rent/income ratio. To the extent that the factors are based on data available for the entire nation and have a direct correlation to housing need, they may be considered for inclusion. Two commenters questioned the validity of the Census data utilized in the allocation process. Althouth the age of the data is subject to question, these are the only data that are available on a national basis. Population data becomes available more frequently and is updated accordingly.

Two commenters requested clarification of the high cost adjustment relative to the provision of housing among field office jurisdictions. Data for this survey is derived from a uniform survey of construction costs conducted by each field office on an annual basis.

One commenter suggested that the determination of the lower-income housing needs and the initial allocation to areas and localities is contradictory to the purpose and intent of AHOP's. It is essential that the initial determination and allocation be based on a comparative assessment using nationally available data. Only a few areas actually have an approved AHOP. Thus after the initial determination of need is made in allocating contract authority, field office managers may, pursuant to § 891.404(a)(2), make an adjustment of not more than 15 percent to reflect differing needs and goals in HAP's, State housing plans and approved AHOP's.

Allocation to HUD Offices

The regulations have been modified to resolve the issue which arises each year regarding how much of the available funds will be allocated on a "fair share" basis. The additional wording in § 891.403 specifies that contract authority assigned for a specific purpose from the headquarters reserve is not available for "fair share" allocation when carried over into the next fiscal year. The two most notable programs subject to this provision are the neighborhood strategy area (NSA) and AHOP programs.

Two commenters requested clarification of the basis for allocating funds directly to the field office. This provision was made to give headquarters the means to expedite the allocation process when the time to accomplish specific objectives is shorter than desirable, and reflects the recent HUD field reorganization.

One commenter suggested that some provision should be made for a locality to update goals using local data such as waiting lists for assisted housing. Goals in a HAP are based on the housing needs of the community. The needs of the community may be based on data derived on a national basis such as the decennial census, or locally generated data, subject to the review and approval of the local field office. However, in general, data based on waiting lists for assisted housing would not be acceptable since they fre-

quently include persons who are ineligible for the program, deceased, live in another jurisdiction, already reside in

throughout the country, it is not possible to assure that each locality will receive housing assistance in amounts

not be spread over other counties. A third commenter suggested that careful reviews be required to insure suffi-

gestion has been adopted in all appropriate sections of the final rule.

One commenter suggested a revision

Need for Immediate Effect

The Department has determined that these regulations must be pub-

891.302 Finding of need of housing assistance.
891.303 Notification of local government.
891.304 Review and comment period.

V 4 3 / 2 1 0 0 C 3 0 7 8

quently include persons who are ineligible for the program, deceased, live in another jurisdiction, already reside in assisted housing, etc.

ALLOCATION TO AREAS AND LOCALITIES

Two significant revisions have been made to § 891.404(a)(4). These modifications were made after considering all comments received, previous departmental performance and an assessment of new requirements based on new programs and recent restructuring of the organization. (1) Approved AHOP's must be designated as separate allocation areas. (2) Formula entitlement block grant recipients may be established as separate allocation areas where the amount of the allocation is sufficient to achieve proportionality over a 3-year period and to provide feasible projects.

Several commenters requested further clarification of the role of the various regional, State, and areawide (AHOP) plans in establishing relative needs. It is essential that national data derived from the same source be utilized in determining the needs for lower income housing assistance under this part. Census data, albeit several years old, are the only source that fulfills the requirement. Regional and State plans even in the aggregate only cover a small geographic area and therefore are used on an adjustment basis only and at the discretion of the field office manager. Clarifying language has been added to § 891.404(a)(4) to require that approved AHOP's be used as the basis for the distribution of all contract authority within allocation areas with approved AHOP's and the allocation of contract authority by housing type and household type in those areas.

One commenter requested an exception for the section 202 program from the requirement that allocation areas be identical for all housing programs. This comment also reflects congressional concern that section 202 invitations be broad enough to support economically feasible projects. In view of the concerns expressed, appropriate language has been included to permit aggregation of allocation areas for the section 202 program.

One commenter suggested a revision in the regulations to require the Department to deliver housing in proportion to HAP goals and of a type specific in the HAP. The Department's allocation process reflects the implementation of legislation, requiring certain aspects of the process to be initiated at headquarters. After provisions are made for the set-asides established by Congress, every attempt is made at the field office level to distribute contract authority for programs that will be in concert with local HAP's. Because of the wide variance of needs and goals throughout the country, it is not possible to assure that each locality will receive housing assistance in amounts and types specified in the HAP.

One commenter suggested a requirement to use State housing plans to adjust the county housing needs percentage. Although not a requirement, there is a provision in § 891.404(a)(4) for this type of adjustment at the discretion of the field office. In view of the number of plans which exist, their varying quality, and the fact that some have overlapping jurisdictions, the current provision is considered appropriate.

One commenter suggested that the allocation of housing resources should be based on the community's needs rather than the goals. The present allocation system is already based on the needs of the community. See § 891.404(a).

One commenter suggested the elimination of the limitation on the size of the adjustment in the housing needs percentage on the grounds that it is an unnecessarily restrictive requirement which would result in an unfair distribution of contract authority. This adjustment provides the field office some flexibility to allow for variations to reflect local HAP plans, State and regional plans and the need to promote spatial deconcentration. The adjustment reflects HUD's commitment to support as much as possible the plans prepared by local and State governments, and regional planning organizations. The 15 percent limitation has been eliminated in the case of approved AHOP's. Field office managers may request waivers of this section where it is felt that the 15 percent limitation is too restrictive.

One commenter requested clarification of the term "other relevant considerations" in § 891.404(a)(3). This phrase would include such considerations as the management capability of the housing authority as well as the status of previously approved programs. Since the considerations will vary with the individual circumstances, it is considered appropriate to be left to the discretion of the field office manager.

One commenter suggested a revision in the allocation procedure to recognize programs that are unworkable in an area. This comment received careful consideration but was not adopted in the final rule. The determination that a program is unworkable in a given area is considered a rare exception, can be taken care of under current procedures, and need not be included in the regulations.

One commenter suggested that a designated portion of the allocation area be set-aside for each county in a SMSA. Another commenter suggested that the needs of one county should not be spread over other counties. A third commenter suggested that careful reviews be required to insure sufficient funds in allocation areas for economically feasible projects. Although a housing needs percentage is developed for each county in the county under the allocation system, it is often necessary to combine two or more localities into one allocation area in order to assure an economically feasible project. The needs of the localities are not combined; rather the contract authority is combined. Each application submitted in response to a HUD invitation must be in accordance with the approved HAP of the locality in which the project will be located. The necessity to have sufficient authority to support economically feasible projects is adequately addressed in § 891.404(d).

Numerous comments were received from representatives of regional, state and local government offices as well as profit and nonprofit organizations addressing the allocation procedures at the field office level. The transition to an allocation system based on 3-year HAP goals is expected to provide more flexibility for local governments in meeting their HAP goals on a proportional basis. In response to some of the specific concerns raised in the comments, clarifying language has been provided. The most significant clarification addresses certain limitations that may arise in some allocation areas regarding goal performance because of the necessity to insure economically feasible proposals. Allocated units are required to be proportional by housing type and by household type within each tenure type (a recent modification to provide consistency with § 570.306(c)(1) of the block grant regulation (43 FR 8434)), except that adjustments are made to reflect the remaining unsatisfied goals identified in individual HAPs during the second and third year of the 3-year period.

In response to a suggestion for Housing Finance Development Agency (HFDA) input into the actual allocation of units, the Department considers it important for the housing industry to be prepared to respond to goals identified in approved HAP's. However, in view of the time constraints on the allocation process and the divergent capacities of the HFDA's, no requirement is made for such input into preparation of the plan; however, the field office manager must discuss the plan and coordinate with the HFDA (§ 891.4.4(e)).

A one word revision recommended by a comment involved the substitution of the word "underserved" for the word "unserved" in reference to household types for which 3-year goals have not been satisfied. This suggestion has been adopted in all appropriate sections of the final rule.

One commenter suggested a revision to show an additional purpose of establishing allocation areas as providing a broader geographical choice of housing opportunities for low-income families and minorities. Although the Department acknowledges that there are additional objectives to be met through the provision of housing assistance, it is considered unnecessary to include them in this section of the regulation. The provision of a broader geographical choice is a review responsibility of the field office when considering local HAP's for approval.

One commenter suggested that a provision be made for consultation with localities prior to field office allocations and that the time period to complete the field office actions be extended to 45 days. The Department recognizes the advantage of consulting with localities in preparation of allocation plans; therefore, language has been added to § 891.4 to provide for consultation with central cities that are separate allocation areas in the preparation of the plan for those areas. However, the time period for field office actions has not been extended.

In response to a commenter who questioned the need for state set-asides, it should be noted that set-asides are established by the Department in order to meet national objectives. Compensating allowances are made by the Department for areas without the agencies (e.g., HFDA's) or the programs (e.g. FmHA, Indian Housing, etc.) designated for set-asides.

Several commenters indicated that any reallocation from the targeted field office should be done only as a last resort. Although this was the intention of the reallocation procedures, additional language was added in § 891.405 to permit the provision of housing assistance to localities within the allocation area that have already met their housing goals, as a last step prior to reallocation. Once commenter suggested more field office flexibility to transfer funds from one allocation area to another. A second commenter recommended local input prior to fund reallocation. Within the guidelines established in the regulations the field office already has the flexibility to transfer funds. It is also considered that the field office carefully evaluated the fund assignment prior to the initial allocation and the decision to reallocate should not be arbitrary. When it is anticipated that the field office will maintain contact with the local government regarding the utilization of funds, no requirement will be made, rather it will be at the discretion of the field office manager.

NEED FOR IMMEDIATE EFFECT

The Department has determined that these regulations must be published for immediate effect in order to assure that housing assistance for fiscal year 1979 is provided in a manner consistent with new Department policies and regulations concerning housing assistance plans, consultation and cooperation with local governments, the provision of block grant assistance, the needs of the nonelderly handicapped and the expansion of housing opportunities. In order to meet the fiscal year 1979 goals and deadlines, HUD must immediately commence the allocation process in accordance with the provisions of this rule. Therefore, any delay in the effective date of the regulations will seriously hamper the Department's ability to operate its assisted housing programs efficiently in fiscal year 1979, and lead to increased project costs.

A finding of inapplicability respecting the National Environmental Policy Act of 1969 has been made in accordance with HUD procedures. A copy of this finding of inapplicability will be available for public inspection during regular business hours in the office of the rules docket clerk, Office of the General Counsel, Room 5218, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410.

Issued at Washington, D.C., October 25, 1978.

LAWRENCE B. SIMONS,
Assistant Secretary for Housing.
Federal Housing Commissioner.

Accordingly, 24 CFR, Part 891 is revised to read as follows:

PART 891—REVIEW OF APPLICATIONS FOR HOUSING ASSISTANCE AND ALLOCATIONS OF HOUSING ASSISTANCE FUNDS

Subpart A—General Provisions

Sec.
891.101 Applicability and scope.
891.102 Definitions.

Subpart B—Applications for Housing Assistance in Areas with Housing Assistance Plans

891.201 General.
891.202 Notification of local government.
891.203 Review and comment period.
891.204 Local government response.
891.205 HUD review of applications for housing assistance.
891.206 Variation from HAP goals.
891.207 Notifications of HUD determination.

Subpart C—Applications for Housing Assistance in Areas Without Housing Assistance Plans

891.301 General.
891.302 Finding of need of housing assistance.
891.303 Notification of local government.
891.304 Review and comment period.
891.305 HUD review of applications for housing assistance.

Subpart D—Allocation of Contract and Budget Authority for Housing Assistance

891.401 General.
891.402 Determinations of lower-income housing needs.
891.403 Allocation to HUD offices.
891.404 Allocation to areas and localities.
891.405 Reallocation of uncommitted contract authority.

AUTHORITY: Sec. 7(d), Department of Housing and Urban Development Act (45 U.S.C. 3535(d)).

Subpart A—General Provisions

§ 891.101 Applicability and scope.

(a) These policies and procedures apply to the allocation of loan and contract authority and the review and approval of applications for housing assistance under the United States Housing Act of 1937 (42 U.S.C. 1437 et seq.), sections 235 and 236 of the National Housing Act (12 U.S.C. 1715z, 1715z-1), section 101 of the Housing and Urban Development Act of 1965 (12 U.S.C. 1701s), and section 202 of the Housing Act of 1959 (12 U.S.C. 1701q). These provisions do not apply to applications for public housing modernization or operating subsidy assistance, or to applications for converting section 23 leased housing projects either to the section 8 housing assistance payments program or to the public housing program.

(b) This part covers the policies and procedures relating to the role and responsibilities of HUD and local governments, under section 213 of the Housing and Community Development Act of 1974 (42 U.S.C. 5301), in reviewing and making determinations with respect to applications for housing assistance made available under the housing programs specified in paragraph (a) of this section.

(c) The determinations to be made by the local government and HUD, with respect to applications for housing assistance, and HUD allocations of contract authority in proportion to the HAP goals for housing type and by household type within each tenure type shall be based on the applicable 3-year HAP period. The applicable HAP period will begin on the first day of the Federal fiscal year succeeding the approval of the HAP by HUD. Where no 3-year HAP is available, the current annual goal (e.g., small cities, single purpose HAP) will be used.

§ 891.102 Definitions.

Act. The Housing and Community Development Act of 1974.

AHOP. See areawide housing opportunity plan.

(e) *Section 8 housing assistance payments program—special allocations.* (1) An application containing the ele-

Areawide housing opportunity plan (AHOP). A plan to implement activi-

capped, (2) family, and (3) large family.

Housing assistance plan (HAP). (a)

thereof; a combination of such political subdivisions recognized by the Secretary; the District of Columbia; the

household type of more than 12 units, and (3) does not change the proposed location.

V 4 3 / 2 1 0 0 C 3 0 7 8 V

AHOP. See areawide housing opportunity plan.

Allocation area. A municipality, county, or group of contiguous municipalities or counties or Indian areas identified by the field office or in an approved AHOP for the purpose of allocating housing assistance to support economically feasible housing projects.

Application for housing assistance. For the purpose of this part, the following definitions establish the documentation which constitutes an application for housing assistance within the meaning of section 213 of the Act.

(a) *Section 8 new construction and substantial rehabilitation.* A preliminary proposal containing the elements listed in § 880.205 of the regulations governing the section 8 housing assistance payments program—new construction (24 CFR Part 880) or the elements listed in § 881.205 of the regulations governing the section 8 housing assistance payments program—substantial rehabilitation (24 CFR Part 881).

(b) *Section 8 existing housing.* An application containing the elements listed in § 882.204 of the regulations governing the section 8 housing assistance payments program—existing housing (24 CFR Part 882) submitted by a public housing agency (PHA), including a State housing finance and development agency (HFDA). In cases where no PHA has been organized or where the PHA is unable or unwilling to implement the program, HUD's determination to administer a section 8 existing housing program shall be considered an application for purposes of this part.

(c) *Section 8 housing finance and development agencies—new construction and substantial rehabilitation projects from set-aside.* A housing finance and development agency's application for assignment of a portion of its set-aside to a specific project (form HUD 52516), if a specific site is designated. If the site is not designated, the new construction or substantial rehabilitation proposal designating the site that is submitted by the HFDA. See the regulations governing the section 8 housing assistance payments program—State housing finance and development agencies (24 CFR Part 883 Subparts A-D).

(d) *Section 8/Farmers Home Administration—new construction set-aside.* A proposal submitted by the Farmers Home Administration (FmHA), Department of Agriculture, pursuant to the regulations governing the section 8 housing assistance payments program, new construction set-aside for section 515 rural rental housing projects (24 CFR Part 883, Subparts G-H).

(e) *Section 8 housing assistance payments program—special allocations.* (1) An application containing the elements listed in § 886.105 of the regulations governing the section 8 housing assistance payments program—additional assistance program for projects with HUD-insured and HUD-held mortgages (24 CFR Part 886, Subpart A).

(2) A preliminary proposal containing the elements listed in § 886.207 of the regulations governing the section 8 housing assistance payments program—additional assistance program for the disposition of HUD-owned projects (24 CFR Part 886, Subpart B).

(3) The identification of projects meeting the eligibility criteria described in § 886.304 of the regulations governing the section 8 housing assistance payments program—section 8 existing housing assistance program for the disposition of HUD-owned projects (24 CFR Part 886, Subpart C).

(f) *Public housing (including Indian public housing).* If a specific site is designated, an application for a public housing program reservation, for the construction or acquisition of housing, submitted by a PHA (24 CFR Part 841) or Indian housing authority (24 CFR Part 805) or, if the site is not designated, either the preliminary site report submitted by the PHA or the development program identifying the proposed neighborhoods for property acquisition as specified in the applicable program regulations.

(g) *Section 235 mortgage insurance and assistance payments for homeownership and project rehabilitation.* A request for preliminary reservation of contract authority submitted by a builder or seller.

(h) *Section 236 mortgage insurance and interest reduction payments for rental projects.* The first application for project mortgage insurance either for site appraisal and market analysis (SAMA), conditional commitment, or firm commitment.

(i) *Section 101 rent supplement payments.* The first application for project mortgage insurance, either for SAMA, conditional commitment, or firm commitment which will utilize rent supplement payments.

(j) *Section 202 housing for the elderly and handicapped.* An application containing the elements listed in § 885.210 of the regulations governing loans for housing for the elderly or handicapped (24 CFR Part 885).

Approved areawide housing opportunity plan (approved AHOP). An areawide housing opportunity plan approved by HUD in accordance with subpart E to serve, to the extent practicable, as the basis for the distribution of all contract authority allocated by HUD within the plan area pursuant to subpart D.

Areawide housing opportunity plan (AHOP). A plan to implement activities developed by an APO and participating jurisdictions pursuant to subpart E, and approved by HUD, which specifically addresses areawide housing assistance needs and goals in accordance with program objective.

AHOP area. The entire jurisdiction of an APO which has prepared and received approval of an AHOP.

AHOP program objective (program objective). To encourage, facilitate, and provide a broader geographical choice of housing opportunities for lower-income households (with particular attention to families and large families) outside areas and jurisdictions containing undue concentrations of low income or minority households.

Areawide planning organization (APO). An organization authorized by law or local agreement to undertake planning under section 701 of the Housing Act of 1954 (40 U.S.C. 461) and/or OMB Circular A-95 either for a multi-county area (including county-municipality combinations) or for a single county whose boundaries are coterminous with a designated SMSA.

Budget authority. The amount authorized by Congress to obligate the Federal Government by contract under the various assisted housing programs, with the result that the budget authority limits the maximum amount payable over the maximum term of the contracts.

Chief executive officer of a unit of general local government (chief executive officer). The elected official or the legally designated official who has the primary legal responsibility for the conduct of a unit of general local government's affairs. Examples of the "Chief Executive Officer" of a unit of local government are the elected mayor of a municipality; the elected county executive of a county; the chairman of a county commission or board in a county that has no elected county executive; the official designated as the executive pursuant to law by the governing body of the unit of local government; and the chairman, governor, chief, or president of an Indian tribe or Alaskan native village.

Contract authority. The maximum amount authorized for annual payments under the assistance contracts.

Federal fiscal year (fiscal year). The official operating period of the Federal Government, beginning on October 1 and ending on September 30, as established by the Congress of the United States.

Field office manager. (a) Area office managers, and (b) those service office supervisors who have been delegated the responsibility of managers under the assisted housing programs.

Household type. The three household types are (1) elderly and handicapped, (2) family, and (3) large family.

Housing assistance plan (HAP). (a) A local housing assistance plan approved by HUD meeting the requirements of § 570.306 of the community development block grant regulations (24 CFR Part 570).

(b) A local housing assistance plan approved by HUD meeting the requirements of § 570.306 submitted by a local government not participating in the block grant program.

Housing program. One or more of the assisted housing programs listed in § 891.101(a).

Housing type. The three housing types are new construction, rehabilitation, and existing housing.

HUD. The Department of Housing and Urban Development.

Loan authority. The loans authorized for payment for all eligible costs relating to planning and development of a public housing or section 202 project.

Metropolitan area. A standard metropolitan statistical area (SMSA) as established by the Department of Commerce.

New communities. HUD approved new community developments under title IV of the Housing and Urban Development Act of 1968 (42 U.S.C. 3901) or title VII of the Housing and Urban Development Act of 1970 (42 U.S.C. 4501).

Participating jurisdiction. A jurisdiction (including a county or other unit of local government) within an AHOP area, with which the APO (or a county, in accordance with § 891.504(a)) has reached agreement on numerical or percentage goals for the distribution of contract authority and on activities for the implementation of the AHOP.

Program objective. See areawide housing opportunity plan program objective.

Recipient jurisdiction. Any jurisdiction (whether or not it is a participating jurisdiction) recommended by the APO in accordance with § 891.605(h) and designated by the field office to receive contract authority made available by a special allocation pursuant to subpart F.

SMSA. See metropolitan area.

Special allocation. An allocation of contract and budget authority for housing assistance made available pursuant to subpart F.

Tenure type. The two tenure types are owners and renters.

Unit of general local government (local government). Any city, county, town, township, parish, village, or other general purpose political subdivision of a State, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, and American Samoa or a general purpose political subdivision thereof; a combination of such political subdivisions recognized by the Secretary; the District of Columbia; the Trust Territory of the Pacific Islands; Commonwealth of the Northern Marianas, and Indian tribes, bands, groups, and nations, including Alaska Indians, Aleuts, Eskimos and any Alaskan native village of the United States. Such terms also include a State or local public body or agency (as defined in section 711 of the Housing and Urban Development Act of 1970), a community association or other entity, which is approved by the Secretary for the purpose of providing public facilities or services to a new community as part of a program meeting the eligibility standards of section 712 of the Housing and Urban Development Act of 1970 (42 U.S.C. 4501) or title IV of the Housing and Urban Development Act of 1968 (942 U.S.C. 3901).

Subpart B—Applications for Housing Assistance in Areas With Housing Assistance Plans

§ 891.201 General.

This subpart establishes the policies and procedures governing reviews and determinations pursuant to section 213 (a) and (b) of the Act with respect to applications for housing assistance, under the programs identified in § 891.101(a), to be provided in areas for which a HAP is applicable. This subpart does not apply to the following applications for housing assistance, and the field office is not required to submit these applications for local government review and comment:

(a) Applications for assistance involving 12 or fewer units in a single project or development.

(b) Applications for assistance with respect to housing in new community developments which the Secretary determines is necessary to meet the housing requirements in the developments.

(c) Applications for assistance with respect to housing financed by loans or loan guarantees from a State or agency thereof (including loans which also have Federal mortgage insurance or co-insurance), unless the local government in which the assistance is to be provided objects in its HAP to the exemption. Where the local government does not object in its HAP to the exemption under this paragraph, the policies and procedures governing reviews, determinations and local government comments shall be in accordance with subpart C.

(d) Applications amending previously approved applications, which initially were submitted for local government review and comments, if the amended application (1) does not increase the number of units by more than 12, (2) does not cause a change in household type of more than 12 units, and (3) does not change the proposed location.

§ 891.202 Notification of local government.

(a) The field office shall notify the chief executive officer of the local government having a HAP, no later than 10 working days after receipt (or completion of any preliminary review and determination that the application is acceptable for further processing), that an application for housing assistance to be provided in that jurisdiction has been received and is under consideration. Simultaneous with the notification of the chief executive officer the field office shall also notify the A-95 clearinghouse and initiate the A-95 review process for determining consistency with state areawide and local comprehensive planning and other coordination matters.

(1) When the application is for housing assistance in an area which is covered by more than one HAP (e.g., a municipality which has a HAP located in a county which also has a HAP covering the municipality), the field office shall notify each chief executive officer.

(2) When the application is for housing assistance in several non-overlapping political jurisdictions (e.g., a scattered site project), the field office shall notify the chief executive officer of each local government having a HAP. If such application is also for housing assistance in a jurisdiction for which a HAP is not applicable, the notification shall also be in accordance with subpart C.

(3) For a section 8 existing housing application, submitted pursuant to 24 CFR part 882, the field office shall notify the chief executive officers of the localities identified in the application for existing housing as primary areas from which households to be assisted will be drawn.

(b) The notification to the chief executive officer shall:

(1) Indicate that the field office has received and is considering an application for housing assistance, identify the housing program, the housing type, the number of units by bedroom size and household type, and the proposed location(s).

(2) Indicate whether the number of units by housing type or household type exceeds the number of units in the 3-year HAP goals. In such instances, the notification letter shall indicate that the field office cannot consider the application for approval unless the requirements of § 891.206 are satisfied by the chief executive officer.

(3) Indicate that any objection to the approval of the application, based on inconsistency with the approved

HAP, must be received within 30 calendar days from the date of the field office letter.

sistent with the applicable HAP, the field office may be notified in writing of this determination by the chief executive officer on behalf of the local government and

ment, including comments submitted by the chief executive officer on

plications previously approved or to be approved simultaneously, exceeds the

exceed the 3-year HAP goals by more than 20 percent, must receive and ap-

overcrowding, housing vacancies, amount of substandard housing, or

V 4 3 / 2 1 0 C 3 0 7 8

HAP, must be received within 30 calendar days from the date of the field office letter.

(4) Invite the submission of any other comments, which are relevant to a determination by the field office, concerning approval of the proposed housing assistance (e.g., comments on the site; whether the project is approvable under local codes and zoning ordinances).

(5) Indicate that any objections or comments should be sent by the chief executive officer to the appropriate A-95 clearinghouse simultaneously with, or prior to, the submission to the field office.

§ 891.204 Review and comment period.

(a) The chief executive officer shall have a 30 calendar day comment period, beginning on the date of the notification letter described in § 891.202, to submit a written objection to the field office's approval of the application on the ground that it is inconsistent with the local government's HAP, and the reasons for the objection. The field office manager shall consider the comment period closed for that local government when the written objection or other comments pursuant to this subpart are received. In no case shall the field office be obligated to consider subsequent or revised objections unless the initial response indicated that additional comments would be provided and such comments are received prior to the expiration of the 30-day comment period.

(b) Section 202, section 8 and public housing applications submitted in response to an invitation, notification of fund availability (NOFA) or notification of housing assistance availability (NOHAA) shall be reviewed for consistency with the HAP on which the invitation or notification was based. If a HAP was not in effect at the time that the invitation or notification was issued, the field office shall not be required to review the applications for consistency with any subsequently approved HAP. However, where a new or amended HAP is approved prior to approval the chief executive officer may indicate that special circumstances require its consideration in the review of application(s) received. These special circumstances shall be specified in the written local government determination, and the field office shall make an independent determination as to whether or not consideration of the new or amended HAP is in the best public interest.

§ 891.204 Local government response.

(a) *No objection.* If the local government determines that it does not want to object to the application on the ground that the application is inconsistent with the applicable HAP, the field office may be notified in writing of this determination by the chief executive officer at any time within the 30-day comment period.

(1) In addition, the chief executive officer may submit, on behalf of the local government, in writing and within the 30-day period, other comments on the application which are relevant to a determination by the Field Office concerning the proposed housing assistance.

(2) If an application for housing assistance exceeds the total number of units for the specified housing type or household type by no more than twenty percent and there is no objection to the approval of such application, the chief executive officer should submit, on behalf of the local government, the written statement required by § 891.206(a).

(b) *Objection.* The chief executive officer, on behalf of the local government, may submit within the 30-day comment period a written objection to the approval of an application for housing assistance on the ground that the application is inconsistent with the applicable HAP, and the reasons for the objection. The objections may be based on one or more of the following:

(1) The proposed number of dwelling units exceeds the 3-year HAP goal by housing type or by household type within either tenure type.

(2) The proposed location of newly constructed or substantially rehabilitated units is not within the general locations specified in the applicable HAP, and is objectionable to the local government for specified reasons.

(3) The proposed housing assistance is inconsistent with any other limiting factors set forth in the HAP.

(c) *No response.* The local government may choose not to comment with respect to an application for housing assistance.

§ 891.205 HUD review of applications for housing assistance.

(a) *Review period.* The field office shall review each application for housing assistance to determine if it is consistent or inconsistent with the applicable HAP for the area in which the proposed housing is to be located. The field office determination shall be completed within 30 calendar days after the close of the comment period specified in § 891.203(a) or within 30 calendar days after the receipt of the comments of the local government, whichever is earlier.

(b) *Review process.* 1The field office finding of consistency or inconsistency shall be based on the information provided in the HAP, the application for housing assistance, and an analysis of the comments of the local government, including comments submitted by the chief executive officer on behalf of the local government and the A-95 clearinghouse on planning consistency and coordination.

(1) HUD review when response indicates no objection. The field office may approve the application unless it makes an independent determination that it is inconsistent with the applicable HAP. The field office shall give consideration to other comments provided by the local government, if any, which are relevant to a determination concerning approval of the application for housing assistance.

(2) HUD review when objections are received. The field office shall concur in an objection by the local government unless it makes an independent determination of consistency, based on substantial evidence, that the application is consistent with the applicable HAP.

(3) HUD review when no response is received. The field office may approve the application unless it makes an independent determination that it is inconsistent with the applicable HAP.

(c) *Review factors.* The field office determination shall be based on the factors set forth in § 891.204(b) and any comments submitted by the chief executive officer on behalf of the local government. In addition, the determination shall be considered in accordance with the following requirements and procedures:

(1) The field office shall not approve an application which exceeds the total number of units by housing type or household type in the 3-year HAP goals by–20 percent or less unless the local government provides a written statement in accordance with § 891.206(a) except as provided in § 891.206(c). Accordingly, if no response has been received during the 3 day comment period and the field office has determined that the application is otherwise approvable, the chief executive officer shall be advised of this determination and shall also be advised that unless the required written statement is received within 10 calendar days, the application will not be approved.

(2) The field office shall not approve an application which exceeds the total number of units by housing type or by household type within either tenure type in the 3-year HAP goal by more than 20 percent unless the local government submits and the field office approves an amended HAP as required by § 891.206(b) except as provided in § 891.206(c).

(3) Although a specific application may be determined consistent on the basis of the review factors, the field office shall not approve the application: (i) If the application, taken into consideration together with other applications previously approved or to be approved simultaneously, exceeds the total number of units in the 3-year HAP goal for the number of units by housing type or by household type within either tenure type unless the local government has submitted a written statement or HAP amendment as required by § 891.206, or except as provided in § 891.206(c). (ii) If the application, together with previously approved applications, would make it unlikely that the housing assistance applications approved during the 3-year period would be proportionate to the 3-year HAP goal by household type. In making this determination, the field office shall give consideration to the anticipated allocation of housing assistance during the balance of the applicable 3-year HAP period.

(4) Notwithstanding the other provisions of this subpart, in the case of a local government required to emphasize a particular household type pursuant to § 570.306(c)(1)(B), the field office shall not approve an application which exceeds the HAP goals for other household types until that requirement is met.

§ 891.206 Variation from HAP goals.

The field office shall not approve an application for housing assistance which, together with previously approved applications, would exceed the total number of units in the applicable 3-year HAP goals by housing type or household type unless the following conditions are satisfied:

(a) *Applications which exceed the 3-year HAP goals by no more than 20 percent.* The field office, prior to approving an application which would exceed the 3-year HAP goals by no more than 20 percent, must receive a written statement from the chief executive officer, on behalf of the local government, indicating that: (1) There is a need for the housing assistance proposed, (2) there are or will be available in the area sufficient public facilities and services to serve the units proposed (this finding is not required with respect to an application for section 8 existing housing), and (3) there is no objection to the approval of such application for housing assistance. The field office manager shall not approve any such application unless approval is necessary: (i) To obtain a project of feasible size and type, (ii) to meet urgent unforeseen needs (e.g., displacement due to natural disasters), or (iii) to utilize residual contract authority after applications have been selected for funding, and unless approval will not create a disproportionate distribution by household type.

(b) *Applications which exceed the 3-year HAP goals by more than 20 percent.* The field office manager, prior to approving an application which would exceed the 3-year HAP goals by more than 20 percent, must receive and approve a HAP amendment submitted in accordance with § 570.312(b).

(c) *Applications under 24 CFR Part 886.* Applications for section 8 assistance pursuant to 24 CFR, Subparts A, B, and C, may be approved without regard to variations from 3-year HAP goals. However, all other requirements and restrictions in the HAP shall apply (e.g., general location).

§ 891.207 Notifications of HUD determination.

The field office shall notify the chief executive officer and the applicant in writing of the finding made with respect to the consistency or inconsistency of the application with the HAP. The notification shall be made within 30 calendar days after the close of the comment period indicating the reasons for the determination and, as appropriate, state that the field office will, or will not, continue to process the application for housing assistance. In the event an objection is received during the comment period, this notification shall be made within 30 calendar days of receipt of the objection.

Subpart C—Applications for Housing Assistance in Areas Without Housing Assistance Plans

§ 891.301 General.

This subpart establishes the policies and procedures governing reviews and determinations, pursuant to section 213(c) of the Act, with respect to applications for housing assistance, under the programs identified in § 891.101(a), to be provided in areas for which a HAP is not applicable and to HFDA applications where the local government does not object in its HAP to exemption for these applications (see § 891.201(c)).

§ 891.302 Finding of need for housing assistance.

With respect to each application for housing assistance to be provided in an area which does not have a HAP, the field office is required to make a determination as to whether there is a need for such housing and whether there is or will be available in the area public facilities and services adequate to serve the proposed housing.

(a) The initial determination of need for housing assistance within an allocation area is made as part of the allocation process pursuant to § 891.404. In making this determination, the field office shall give consideration to the contents of any applicable State housing plan or AHOP proposing housing assistance in the area as well as generally available data with respect to population, poverty, housing overcrowding, housing vacancies, amount of substandard housing, or other objectively measurable conditions pertaining to lower income housing needs.

(b) Prior to making a determination with regard to a specific application, the field office shall give the local government in which the proposed assistance is to be provided an opportunity to provide comments, during a 30 calendar day period, concerning the need for housing assistance and the adequacy of public facilities and services. If the local government finding is negative, it must be accompanied by supporting evidence.

§ 891.303 Notification of local government.

(a) The field office shall notify the chief executive officer no later than 10 working days after receipt (or completion of any preliminary review and determination that the application is acceptable for further processing) that an application for housing assistance to be provided in that jurisdiction has been received and is under consideration. Simultaneous with the notification to the chief executive officer, the field office shall notify the A-95 clearinghouse and initiate the A-95 review process for determining consistency with State, areawide, and local comprehensive planning and other coordination matters.

(1) When the application is for housing assistance in newly constructed or rehabilitated housing within the overlapping jurisdictions of more than one local government (e.g., a municipality which is also within a county), the field office shall notify the chief executive officer of each local government.

(2) When the application is for housing assistance in newly constructed or rehabilitated housing within several nonoverlapping political jurisdictions (e.g., a scattered site project), the field office shall notify the chief executive officer of each local government where housing assistance is proposed. If such application is also for housing assistance in a jurisdiction for which a HAP is applicable, notification shall also be given in accordance with subpart B.

(3) For section 8 existing housing applications, submitted pursuant to 24 CFR Part 882, Subparts A and B, the field office shall notify the chief executive officers of the localities identified in the application for existing housing as primary areas from which households to be assisted will be drawn.

(b) The notification to the chief executive officer shall:

(1) Indicate that the field office has received and is considering an application for housing assistance, identify

the housing program, the housing type, the number of units by bedroom size and household type, and the pro-

tions in an AHOP, shall be established as separate allocation areas if the amount of contract authority would

type within the 3-year goals. The determination, however, of the number of units for a specific allocation area

V 4 3 / 2 1 0 0 C 3 0 7 8

the housing program, the housing type, the number of units by bedroom size and household type, and the proposed location(s).

(2) Invite the submission, within a period of 30 calendar days from the date of the field office letter, of a statement on behalf of the local government concerning the need for housing assistance and the adequacy of public facilities and services and any other comments which are relevant to a determination by the field office concerning the proposed housing assistance (e.g., comments on the site; whether the project is approvable under local codes and zoning ordinances).

(3) Request that any comments be sent by the chief executive officer to the appropriate A-95 clearinghouse simultaneously with, or prior to, the submission to the field office.

§ 891.304 Review and comment period.

The chief executive officer shall have a 30 calendar day comment period, beginning on the date of the notification letter described in § 891.303, to submit written comments relevant to a determination by the field office concerning the approval of an application for housing assistance. The field office shall consider the comment period closed when the written comments are received. In no case shall the field office manager be obligated to consider subsequent or revised comments unless the initial response indicated that additional comments would be provided and comments are received prior to the expiration of the 30-day comment period.

§ 891.305 HUD review of applications for housing assistance.

(a) The field office shall not approve an application for housing assistance prior to either: (1) Receipt of comments pursuant to § 891.304, or (2) expiration of the 30-day comment period, whichever occurs earlier.

(b) In determining whether an application will be approved, the field office shall consider the comments provided by the local government including comments submitted by the chief executive officer on behalf of the local government and the A-95 clearinghouse on planning consistency and coordination. The field office shall make an independent determination as to whether there is a need for housing assistance and whether the facilities and services are adequate before approving the application.

(c) The field office shall promptly notify both the chief executive officer, the applicant of the HUD determination with respect to the approval or disapproval of the application for housing assistance.

Subpart D—Allocation of Contract and Budget Authority for Housing Assistance

§ 891.401 General.

This subpart establishes the policies and procedures governing the allocation of contract authority, pursuant to section 213(d) of the Act, for housing assistance under the programs identified in § 891.101(a). It describes, in sequence, the actions to be taken in allocating contract authority by the Assistant Secretary for Housing to the regional administrators or directly to the field office managers, by the regional administrators to the field office managers, and by the field office managers to allocation areas within their jurisdiction. The references to allocations of contract authority in this subpart are also applicable to loan authority for the section 202 program.

§ 891.402 Determinations of lower-income housing needs.

(a) Prior to allocating contract and budget authority for the housing assistance programs identified in § 891.101(a), the Assistant Secretary for Policy Development and Research shall determine the relative need by program type for lower-income housing assistance in each HUD field office jurisdiction. The determination of housing needs shall be based, so far as practicable, on the most recent national census data available relating to population, poverty, housing overcrowding, housing vacancies, amount of substandard housing, or other objectively measurable conditions pertaining to lower-income housing needs. The actual statistical data elements used in determining housing needs for a specific housing program may be modified to meet the objectives of that program by taking into consideration the age, income, or other relevant characteristics of the prospective program participants.

(b) The Assistant Secretary for Policy, Development, and Research on the basis of paragraph (a) of this section shall develop a separate housing needs percentage for each field office jurisdiction. This housing needs percentage shall be adjusted to reflect the relative cost of providing housing among field office jurisdictions.

§ 891.403 Allocation to HUD offices.

(a) The Assistant Secretary for Housing shall determine the amount of contract and budget authority to be allocated by considering as available any unreserved contract and budget authority from prior fiscal years, as well as any newly appropriated contract and budget authority, for each housing program. The Assistant Secretary for Housing shall consider contract and budget authority to be reserved for the purpose of this subpart when the field office manager has reserved the authority under the appropriate program regulations. Contract authority assigned by the Assistant Secretary for Housing from the reserve under paragraph (b) of this section for a particular purpose (e.g., AHOP's) but not reserved as of the end of the fiscal year may be reassigned to field offices without regard to the fair share formula.

(b) A portion of the contract and related budget authority available during any fiscal year for the housing programs listed in § 891.101(a), not to exceed 20 percent of the available contract authority on an aggregate basis, may be retained by the Assistant Secretary for Housing for subequent allocations to specific areas and communities. Such contract authority and the applicable budget authority may be used for:

(1) Housing needs which were unforeseeable or could not practicably be measured by the formula described in § 891.402, such as natural disaster and relocation needs.

(2) Activities designed to meet lower-income housing needs as described in HAP's submitted by local governments or combinations of such units of local government, including but not limited to, activities carried out under AHOP's pursuant to subparts E and F.

(3) Applications for assistance with respect to housing in new communities.

(4) Alternative methods for meeting lower-income housing needs or implementing innovative housing programs.

(5) Housing needs of community development block grant recipients whose application approval has been conditioned or otherwise sanctioned on improved HAP performance.

(c) Contract authority, excluding that set-aside pursuant to § 891.403(b), shall be allocated, so far as practicable, for each housing program in accordance with § 891.402. Of these amounts at least 20 percent, but not more than 25 percent, shall be allocated on a nationwide basis for use in nonmetropolitan areas. However, the allocation of the field office will be based upon the proportion of nonmetropolitan housing needs within the field office jurisdiction, rather than the nationwide ratio.

(d) The Assistant Secretary for Housing may allocate contract authority to the regional administrators, or directly to the field managers. If the contract authority is allocated to the regional administrator, the regional administrator shall suballocate all the authority to the field office managers within 15 working days from receipt of the allocations from the Assistant Secretary for Housing.

(e) The total amount of contract authority to be suballocated to each field office manager shall reflect: (1) The housing needs percentages developed in accordance with § 891.402, (2) the amount of budget authority required for each housing program, and (3) the proportions by housing type reflected in the annual housing action program.

§ 891.404 Allocation to areas and localities.

(a) In establishing the amount of contract authority to be allocated to allocation areas within their jurisdiction the Field Office shall:

(1) Develop for each county, a separate housing needs percentage based on the criteria set forth in § 891.402.

(2) Multiply the amount of contract authority allocated to the field office for a specific housing program by the housing needs percentage developed pursuant to paragraph (a)(1), of this section. In the case of a county in a SMSA, the percentage shall be applied to the contract authority allocated for use in metropolitan areas, and for a county not in an SMSA, the percentage shall be applied to the contract authority allocated for use in nonmetropolitan areas. The field office may, for the section 8 and public housing programs (excluding Indian public housing), apply the housing needs percentage to the combined contract authority (metropolitan or nonmetropolitan, whichever is applicable) for both housing programs. In such instances, the ultimate use of contract authority for either section 8 or public housing in each county shall be determined by the field office on the basis of HAP's, community needs and housing strategy, and other relevant considerations.

(3) Establish regional or other allocation areas, such as SMSA's or groups of rural counties, broad enough to support economically feasible housing programs. Allocation area boundaries shall be identical for all housing programs except that where "fair share" of section 202 loan authority to an allocation area is insufficient for a feasible project size, two or more entire allocation areas may be combined into a separate section 202 allocation area for the sole purpose of advertising for applications for section 202 fund reservations. In establishing allocation areas, consideration should be given to State, county and other planning district boundaries, topographical barriers, and established community patterns as well as housing plans developed by an HFDA, and approved AHOP's developed by an APO. Each approved AHOP area shall be established as a separate allocation area. In addition, SMSA central cities, except those which are participating jurisdictions in an AHOP, shall be established as separate allocation areas if the amount of contract authority would be sufficient to achieve feasible projects and meet housing type and household type goals over a 3-year period. The field office may also establish any formula entitlement block grant recipient, including an urban county, as a separate allocation area where the above feasiblity test can be met.

(4) Adjust if necessary the housing needs percentage developed for each county within the allocation area to reflect housing needs and goals set forth in HAP's, and State housing plans. The housing needs percentage shall be adjusted by not more than 15 percent. However, in areas with an approved AHOP, the AHOP shall serve as the basis for the distribution of all contract authority allocated within the AHOP area, and the 15 percent limitation shall not apply.

(b) After the effective date of this subpart, priority shall be given to the extent practicable to targeting, within allocation areas, the allocation of contract authority to localities which have previously been underfunded relative to their needs and the funding of the needs of other localities in that allocation area.

(c)(1) When the amount of contract authority for each allocation area has been established, the field office shall develop a matrix indicating a distribution of units by housing type and household type within tenure type. This allocation plan shall be prepared for each allocation area using housing assistance plans, approved areawide housing opportunity plans, and data developed in the field for units of general local government not having a housing opportunity plan. For those central cities and other entitlement recipients which are established as separate allocation areas under paragraph (a)(4) of this section, the field office shall consult with the chief executive officer or his representative in the preparation of the allocation plan. To the maximum extent practicable, the number of units in the allocation plan shall be proportionate by housing type and household type within each tenure type to the 3-year goals in the annual housing action program identified in HAP's and goals in AHOP's prepared pursuant to subpart E and approved by HUD. For those allocation areas with an approved AHOP under the provisions of subpart E, the approved AHOP shall serve, to the extent practicable, as the basis for allocation of contract authority by housing type and household type.

(2) In some allocation areas, project feasibility and the amount of the allocation may limit the utilization of the annual allocation to only one housing type within the 3-year goals. The determination, however, of the number of units for a specific allocation area must take into consideration the proportion of units previously approved by household type. If as a result of this consideration, the field office finds that the proposed allocation would make it unlikely that the housing assistance provided in the 3-year period would be proportionate to the 3-year HAP goal, contract authority shall be made available in such allocation areas only for those household types that have been underserved during the applicable period. Consideration must also be given to the amount of budget authority available to ensure the feasibility of approving applications for housing assistance.

(d) Where contract authority allocated to an allocation area pursuant to paragraph (a) of this section is not adequate for a feasible project, the field office may either: (1) Divert the contract authority from such allocation area and use it in another, (2) allocate additional contract authority from another allocation area so sufficient authority is available for a feasible project or (3) combine allocation areas. Future allocations shall be adjusted to reflect these actions.

(e) The Assistant Secretary for Housing may direct that contract authority be set aside for use by an HFDA or in conjunction with the FmHA program. In such instances, the field office shall meet with the officials from HFDA or FmHA to reach agreement on their participation in the allocation plan which has been developed in compliance with paragraphs (a) and (d) of this section. The field office shall assure that the total contract authority planned for an allocation area by the HFDA, FmHA, and HUD will provide for units by housing type and household type as reflected in applicable HAP's or AHOP's and be consistent with allocation plans. If agreement cannot be reached, the field office manager shall notify the Regional Administrator, who shall resolve the differences in a manner consistent with the requirements of this paragraph. The Regional Administrator shall coordinate the use of any HFDA or FmHA set-aside when more than one field office jurisdiction is involved.

(f) The field office manager shall determine the number of units by housing program, housing type and household type for which HUD will invite applications, after considering to what extent the goals for an allocation area will be met by the HFDA or FmHA.

(g) The field office managers shall complete the actions set forth in paragraphs (a) through (f) of this section within 30 days from receipt of their suballocations.

(h) The field office manager shall make public as soon as possible:

ing changes in housing type) for those household types that have been un-

MONDAY, OCTOBER 30, 1978
PART VI

V 43/210 OC 30 0 78

(h) The field office manager shall make public as soon as possible:

(1) The total contract authority allocated to the field office for SMSA's and non-SMSA's for each housing program;

(2) The initial distribution of authority to each allocation area;

(3) The approximate number of newly constructed, rehabilitated and existing units such authority could support;

(4) The amount of any HFDA or FmHA set-aside; and

(5) A tentative schedule for inviting the submission of applications in each allocation area.

(i) If application for housing assistance are not received in proportion to the housing types identified in the field office allocation plan, the field office shall make every effort to encourage the submission of applications for those housing types that have not been used. If applications for existing units would not use the contract authority designated for the existing housing program, such contract authority shall be used for inviting new construction or substantial rehabilitation applications within the same allocation area to meet underserved household type goals. If applications for new construction or substantial rehabilitation would not use the available contract authority, such contract authority shall be moved between those two housing types and, if sufficient applications are still not forthcoming, shall be reallocated to another allocation area pursuant to § 891.405.

(j) If applications for housing assistance are not received in proportion to household types identified in the field office allocation plan, the field office shall make every effort to encourage the submission of applications (including changes in housing type) for those household types that have been underserved. If approvable applications are still not forthcoming, housing assistance may be provided to localities within the allocation area that have already met their goals in a proportionate manner. Any contract authority remaining after pursuing these alternatives shall be reallocated to another allocation area pursuant to § 891.405. Reallocations shall be consistent with the objectives of this § 891.404.

§ 891.405 Reallocation of uncommitted contract authority.

(a) If the field office manager determines that the allocation of contract or budget authority for a particular allocation area is not likely to be used during the fiscal year, the authority may be reallocated in the same fiscal year to another area where it is likely to be used.

(b) If the Regional Administrator or Assistant Secretary for Housing determines that the allocation of contract or budget authority suballocated to a field office is not likely to be used during the fiscal year, the authority may be reallocated in the same fiscal year to another field office where it is likely to be used.

(c) Only the Assistant Secretary for Housing may reallocate contract authority among Regional Administrators.

(d) In addition to meeting the requirements of § 891.403(c) any reallocations made pursuant to this paragraph must be consistent with the allocation of contract authority for a specific housing program, any established set-asides and HAP requirements and conditions as well as any additional requirements established by the Assistant Secretary for Housing.

CHAPTER VIII—ADVISORY COUNCIL ON HISTORIC PRESERVATION

PART 800—PROTECTION OF HISTORIC AND CULTURAL PROPERTIES

Amendments to existing regulations

AGENCY: Advisory Council on Historic Preservation.

ACTION: Amendments to regulations and supplementary information.

SUMMARY: The Advisory Council on Historic Preservation is amending its current regulations to reflect changes and additions to its authorities and its experience in working with these regulations since 1974. These regulations implement the National Historic Preservation Act of 1966, as amended (16 U.S.C. 470), Executive Order 11593, May 13, 1971, "Protection and Enhancement of the Cultural Environment" (36 FR 8921, 16 U.S.C. 470), and the President's Memorandum on Environmental Quality and Water Resources Management, July 12, 1978.

The 1976 amendments (Pub. L. 94-422) to the National Preservation Historic Act established the Council as an independent agency of the United States; extended the Council's protective responsibilities under Section 106 of the Act to properties "eligible for inclusion" in the National Register of Historic Places; enlarged membership on the Council to include the Secretary of State; the Secretary of Defense; the Secretary of Health, Education, and Welfare; the President of the National Conference of State Historic Preservation Officers; the Chairman of the Federal Council on the Arts and Humanities; the Chairman of the Council on Environmental Quality; and the Architect of the Capitol; and gave the Council rulemaking authority.

These regulations set forth certain steps for Federal agencies to follow to fulfill their responsibilities under Section 106 of the National Historic Preservation Act, Sections 1(3) and 2(b) of Executive Order 11593, and the President's Memorandum on Environmental Quality. The regulations are also intended as a guide for the development of agencies' internal procedures that, under Section 1(3) of Executive Order 11593, are required to be developed in consultation with the Council.

DATE: Comments must be received on or before November 29, 1978.

ADDRESS: Comments should be addressed to Executive Director, Advisory Council on Historic Preservation, 1522 K Street NW., Washington, D.C. 20005.

FOR FURTHER INFORMATION CONTACT:

John Fowler, Director, Office of Intergovernmental Programs and Planning, Advisory Council on Historic Preservation, 1522 K Street NW., Washington, D.C. 20005, 202-254-3495.

SUPPLEMENTARY INFORMATION: The Council is publishing these proposed amendments to its regulations for public review and comment. The amendments refine and clarify the way Federal agencies can get the Council's comments on proposed Federal, federally assisted and licensed undertakings that affect historic properties which the Secretary of the Interior lists in or determines to be eligible for listing in the National Register of Historic Places. These amendments reflect the methods to simplify the Council's commenting process that have been developed in the last 4 years.

While the major procedural steps in the Council's process are basically the same, there are several substantive amendments that will make the process for getting the Council's comments easier and faster. In addition, the existing regulations have been reorganized. Sections 800.4-7 deal with "Site-Specific Undertakings" and § 800.8-9 deal with "Non Site-Specific Undertakings." Other major changes are:

1. Section 800.4(a), *Identification of Historic and Cultural Properties.* This section has been reorganized to clarify existing provisions related to agency responsibilities for identifying and evaluating historic and cultural properties that may be affected by a Federal, federally assisted or licensed undertaking.

2. Section 800.4(b), *Determinations of No Effect.* This section has been modified to stipulate the manner in which the Council may question an agency's finding that an undertaking will not affect any historic or cultural properties. Previously, this provision was contained in section 800.7.

3. Section 800.5, *State Historic Preservation Officer Responsibilities.* This section is new. It provides that State Historic Preservation Officers should respond within 15 working days to requests for opinions concerning the significance of identified properties and the effect of a proposed action on such properties. If the State Historic Preservation Officer does not respond within 30 working days, concurrence with the agency's views will be presumed. In addition, this Section provides that the State Historic Preservation Officer will normally be a part of the consultation process described in section 800.6 and that in those instances where a State Historic Preservation Officer fails to sign a Memorandum of Agreement detailing measures to avoid or mitigate adverse effects on National Register or eligible properties, the Council and the agency will not be precluded from concluding such an Agreement. We believe that this section will expedite the commenting process by setting definite time limits for important parts of the process and by reducing the possibility for any continuing uncertainty about the views of a State Historic Preservation Officer.

4. Section 800.6(a), *Response to Determinations of No Adverse Effect.* The time period for Council review of agency determinations that an undertaking will not adversely affect a National Register or eligible property has been reduced. The Executive Director would have 30 days to object after receipt of an adequately documentated determination. Current regulations allow for a 45-day review period.

5. Section 800.6(a)(2) is new. This provision allows the Executive Director to condition acceptance of a no adverse effect determination. If the agency accepts the conditions, the Executive Director will not object to the determination. The Council believes that this provision will simplify and significantly speed up the process of getting the Council's comments.

6. Section 800.6(d), *Memorandum of Agreement.* This provision allows the Agency Official to prepare a proposal specifying the measures to avoid or mitigate adverse impacts that were agreed upon by the agency, the State Historic Preservation Officer, and the Council in a consultation. The proposal, with the written concurrence of the State Historic Preservation Officer, would be sent to the Executive Director for inclusion in a Memorandum of Agreement that would then be sent directly to the Chairman for approval. The current regulations require the Executive Director to prepare a Memorandum of Agreement, to circulate it to the agency and the State Historic Preservation Officer for signature, and then send it to the Chairman. This revision will speed up the Council's commenting process.

7. Section 800.6(e), *Council Meetings.* Subsection (e)(2) is new and would allow the Chairman to appoint a panel of 5 Council members to consider an undertaking instead of having the full Council meet to consider it. A panel meeting will generally be held within 30 days of its appointment by the Chairman. This provision will allow the Council membership to respond more quickly when the agency, the State Historic Preservation Officer, and the Executive Director fail to agree on alternatives to avoid or mitigate adverse effects. Comments are particularly requested on this subsection.

8. Section 800.7, *Resources Discovered During Construction.* This is a new section. It sets up an expedited process for obtaining the Council's comments when a previously unidentified historic or cultural property is discovered after construction has actually started. This section deals with a problem that was not previously considered in the regulations and it will greatly expedite the compliance process in such instances. Comments are particularly invited on this Section.

9. Sections 800.8 and 800.9 are new and concern non-site-specific undertakings. These Sections allow the Council to execute Programmatic Memoranda of Agreement with agencies when there is a class, a program, or a series of undertakings which would otherwise require the Council to review many similar individual actions. In instances where a Programmatic Memorandum of Agreement can be reached, there will be a substantial reduction in paper work and processing time for the Council, other Federal agencies, and State Historic Preservation Officers.

10. Section 800.10, *Coordination with the National Environmental Policy Act.* This section specifies how agencies should coordinate their separate responsibilities under the National Historic Preservation Act and the National Environmental Policy Act. The Section describes how the Council's comments should be included in draft and final environmental impact statements. Currently, a discussion of these responsibilities is contained in section 800.2 of the existing regulations.

11. Sections 800.11 and 800.12 concern the responsibility of Federal agencies to develop procedures to protect historic and cultural resources under the authorities of Executive Order 11593 and the Presidential Memorandum on Environmental Quality.

12. Section 800.14, *Investigation of Threats to Historic Properties.* This section is new. It provides that the Executive Director may investigate threats to historic properties resulting from an undertaking that may have a Federal involvement but for which the Council has not been provided an opportunity to comment.

13. The Supplementary Guidelines published with these proposed amendments are designed to help Federal agencies and State Historic Preservation Officers in meeting their responsibilities under the regulations. The various guidelines set forth decisions of the Executive Director and may be modified from time to time. They are published with the proposed amendments for informational purposes only and will not be codified in the *Code of Federal Regulations.* Changes or additions to this section will be published in the FEDERAL REGISTER. The Council welcomes comments on all of its Supplementary Guidelines. The National Register Criteria (Supplementary Guideline I) were codified by the Secretary of the Interior in 36 CFR Part 60 and are only included for informational purposes.

The Council has determined that an economic impact statement pursuant to Executive Orders 11821 and 11949 is not required since these are amendments to existing regulations and do not constitute a major regulatory proposal.

The Council has determined that these amendments are not significant regulations within the meaning of Executive Order 12044 and consequently do not require a regulatory analysis. The purpose of these amendments is to simplify existing procedures and to clarify language in conformance with the goals enunciated by Executive Order 12044.

The Council has determined that an Environmental Impact Statement under the National Environmental Policy Act is not required.

ROBERT R. GARVEY, JR.,
Executive Director.

OCTOBER 25, 1978.

AUTHORITY: Pub. L. 89-665, 80 Stat. 915 (16 U.S.C. 470); Pub. L. 94-422, 90 Stat. 1320 (16 U.S.C. 470l); E.O. 11593, 3 CFR 1971 Comp., p. 154; Presidential Memorandum on Environmental Quality and Water Resources.

§ 800.1 Purpose and authorities.

(a) The National Historic Preservation Act of 1966, as amended, established the Advisory Council on Historic Preservation as an independent agency of the United States to advise the President and the Congress on matters involving historic preservation, to coordinate Federal historic preservation activities, and to protect designated historic properties threatened by Federal action. Its members are the Secretary of the Interior, the Secretary of Housing and Urban Development, the Secretary of Commerce, the Administrator of General Services, the Secretary of the Treasury, the Attorney General, the Secretary of Agriculture, the Secretary of Transportation, the Secretary of State, the Secretary of Defense, the Secretary of Health, Education, and Welfare, the Chairman of the Council on Environmental Quality, the Chairman of the Federal Council on the Arts and Humanities, the Architect of the Capitol, the Secretary of the Smithsonian Institution, the Chairman of the National Trust for Historic Preservation, the President of the National Conference of State Historic Preservation Officers, and 12 citizen members appointed for 5-year terms by the President on the basis of their interest and experience in the matters to be considered by the Council.

(b) The Council protects properties of historical, architectural, archeological, and cultural significance at the national, State, and local levels by reviewing and commenting on Federal, federally assisted, and federally licensed undertakings affecting properties included in or determined by the Secretary of the Interior to be eligible for inclusion in the National Register of Historic Places in accordance with the following authorities:

(1) *Section 106 of the National Historic Preservation Act.* Section 106 requires that Federal, federally assisted, and federally licensed undertakings affecting properties included in or eligible for inclusion in the National Register of Historic Places be submitted by a Federal agency to the Council for review and comment prior to the agency's approval of any such undertaking.

(2) *Section 1(3) of Executive Order 11593, May 13, 1971, "Protection and*

(1) Recommendations or favorable reports relating to legislation, including requests for appropriations. The

(i) "Agency Official" means the head of the Federal agency having responsibility for the undertaking, or a desig-

(3) Introduction of visual, audible, or atomspheric elements that are out of character with the property or alter-

tified, and evaluated, the agency official shall follow the provisions of 36 CFR 63 to determine if any, in fact,

(2) Submit a preliminary case report,
(3) Notify the State historic preservation officer of this request, and

V 43/210 OCT 30 78

(2) *Section 1(3) of Executive Order 11593, May 13, 1971, "Protection and Enhancement of the Cultural Environment."* Section 1(3) requires that Federal agencies, in consultation with the Council, establish procedures for their plans and programs to further the preservation and enhancement of nonfederally owned historic and cultural properties.

(3) *Section 2(b) of Executive Order 11593, May 13, 1971, "Protection and Enhancement of the Cultural Environment."* Federal agencies are required by section 2(a) of the Executive order to locate, inventory, and nominate properties under their jurisdiction or control to the National Register. Until such processes are complete, Federal agencies must submit proposals for the transfer, sale, demolition, or substantial alteration of federally owned properties eligible for inclusion in the National Register to the Council for review and comment. Federal agencies must continue to comply with section 2(b) review requirements, even after the initial inventory is complete, when they obtain jurisdiction or control over additional properties that may be eligible for inclusion in the National Register.

(4) *The President's memorandum on environmental quality and water resources management.* The Memorandum directs the Council to issue final regulations under the National Historic Preservation Act by March 1, 1979, and further directs Federal agencies with water resource responsibilities and programs to publish procedures implementing the Act not later than 3 months after promulgation of final regulations by the Council. Federal agencies procedures are to be reviewed and, if they are consistent with the Council's regulations, approved by the Council within 60 days and published in final form.

§ 800.2. Definitions.

As used in these regulations:

(a) "National Historic Preservation Act" means Pub. L. 89-665, approved October 15, 1966, an "Act to establish a program for the preservation of additional historic properties throughout the Nation and for other purposes" (80 Stat. 915, 16 U.S.C. 470; as amended, 84 Stat. 204 (1970), 87 Stat. 139 (1973), 90 Stat. 1320 (1976)), hereinafter referred to as "the Act."

(b) "Executive Order" means Executive Order 11593, May 13, 1971, "Protection and Enhancement of the Cultural Environment" (36 FR 8921, 16 U.S.C. 470).

(c) "Undertaking" means any Federal action, activity, or program, or the approval, sanction, assistance, or support of any other action, activity or program, including but not limited to:

(1) Recommendations or favorable reports relating to legislation, including requests for appropriations. The requirement for following these procedures applies to both agency recommendations on their own proposals for legislation and agency reports on legislation initiated elsewhere. In the latter case, only the agency that has primary responsibility for the subject matter involved will comply with these procedures.

(2) New and continuing projects and program activities (or elements of such activities not previously considered under these regulations) directly undertaken by Federal agencies; or supported in whole or in part through Federal contracts, grants, subsidies, loans, loan guarantees, or other forms of funding assistance; or involving a Federal lease, permit, license, certificate, approval, letter of permission, or other form of entitlement; or approval of State plans pursuant to Federal legislation.

(3) The making, modification, or establishment of regulations, rules, procedures, planning guidelines, and program policy guidelines.

(d) "National Register" means the National Register of Historic Places. It is a register of districts, sites, buildings, structures, and objects of national, State, or local significance in American history, architecture, archeology, and culture that is expanded and maintained by the Secretary of the Interior under authority of section 2(b) of the Historic Sites Act of 1935 (49 Stat. 666, 16 U.S.C. 461) and section 101(a)(1) of the National Historic Preservation Act. The National Register is published in its entirety in the FEDERAL REGISTER each year in February. Addenda are usually published on the first Tuesday of each month.

(e) "National Register property" means a district, site, building, structure, or object included in the National Register.

(f) "Eligible property" means any district, site, building, structure, or object which the Secretary of the Interior determines is likely to meet the National Register criteria (36 CFR 63). As these determinations are made, a listing is published in the FEDERAL REGISTER as a supplement to the National Register.

(g) "National Register Criteria" means the criteria established by the Secretary of the Interior to evaluate properties to determine whether they are eligible for inclusion in the National Register (36 CFR Part 60).

(h) "Decision" means the exercise of or the opportunity to exercise discretionary authority by a Federal agency at any stage of an undertaking where alterations might be made in the undertaking to modify its impact upon historic and cultural properties.

(i) "Agency Official" means the head of the Federal agency having responsibility for the undertaking, or a designee legally authorized to act for the Agency Official.

(j) "Council" means the Advisory Council on Historic Preservation as established by title II of the Act.

(k) "Chairman" means the Chairman of the Advisory Council on Historic Preservation or a member designated to act in his place.

(l) "Executive Director" means the Executive Director of the Advisory Council on Historic Preservation as established by section 205 of the Act, or a designee legally authorized to act for the Executive Director.

(m) "State Historic Preservation Officer" means the official or his designated representative who is responsible for administering the Act within their jurisdictions. These officers are appointed pursuant to 36 CFR 60.5 by the Governors of the 50 States, Guam, American Samoa, the Commonwealth of Puerto Rico, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Mayor of the District of Columbia.

(n) "Secretary" means the Secretary of the Interior, or his designee authorized to carry out the responsibilities of the Secretary of the Interior under the Act or Executive Order 11593.

(o) "Area of the undertaking's potential environmental impact" means that area within which direct, indirect, and secondary impacts on historic and cultural properties could reasonably be expected to occur.

§ 800.3 Criteria of effect and adverse effect.

The following criteria shall be used to determine whether an undertaking has an effect or an adverse effect in accordance with these regulations. The Executive Director may issue further guidance to interpret and apply these criteria.

(a) *Criteria of effect.* A Federal, federally assisted, or federally licensed undertaking shall be considered to have an effect on a National Register or eligible property (districts, sites, buildings, structures, and objects) whenever any condition of the undertaking causes or may cause any change, beneficial or adverse, in the quality of the historical, architectural, archeological, or cultural characteristics that qualify the property for inclusion in the National Register or its setting.

(b) *Criteria of adverse effect.* Generally, adverse effects occur under conditions which include but are not limited to:

(1) Destruction or alteration of all or part of a property;

(2) Isolation from or alteration of its surrounding environment;

(3) Introduction of visual, audible, or atomspheric elements that are out of character with the property or alter its setting;

(4) Transfer or sale of a federally owned property without adequate conditions or rectrictions regarding preservation, maintenance, or use; and

(5) Neglect of a property resulting in its deterioration or destruction.

SITE-SPECIFIC UNDERTAKINGS

§ 800.4 Federal agency responsibilities.

As early as possible before an agency makes a final decision concerning an undertaking and in any event prior to taking any action that would foreclose alternatives or the Council's ability to comment, the agency official shall take the following sequential steps to comply with the requirements of section 106 of the National Historic Preservation Act and section 2(b) of Executive Order 11593.

(a) *Identification of historic and cultural properties.* At the earliest stage of planning or consideration of an undertaking, including comprehensive or areawide planning in which a site-specific undertaking may be proposed, the agency official shall identify or cause to be identified properties located within the area of the undertaking's potential environmental impact that are included in, have been determined eligible for inclusion in, or may be eligible for inclusion in the National Register.

(1) The Agency Offical should consult the National Register, including monthly supplements, to identify properties already included in or determined by the Secretary to be eligible for inclusion in the National Register.

(2) The Agency Offical shall consult with the appropriate State historic preservation officer and the Secretary to determine what actions are necessary to identify properties that may be eligible for inclusion in the National Register. A professional survey of the environmental impact area or parts of the area may be required if the area has not previously been adequately surveyed. The agency official shall apply the National Register criteria to all properties that may possess any historical, architectural, archeological, or cultural value located within the area of the undertaking's potential environmental impact. If there is any question about whether a property possesses such values, the agency official shall refer the matter to the Secretary for a determination of eligibility in accordance with 36 CFR 63. Whenever a State historic preservation officer finds that a property may meet National Register criteria, the agency official shall request a determination of eligibility from the Secretary. Once properties are found, identified, and evaluated, the agency official shall follow the provisions of 36 CFR 63 to determine if any, in fact, are eligible for inclusion in the National Register. This step should be completed prior to requesting the Council's comments pursuant to these regulations. The Secretary's opinion respecting the eligibility of a property for inclusion in the National Register shall be conclusive for the purposes of these regulations.

(b) *Determination of effect.* For each National Register or National Register eligible property that is located within the area of the undertaking's potential environmental impact, the agency official, in consultation with the State historic preservation officer, shall apply the criteria of effect, set forth in § 800.3(a), to determing whether the undertaking will have an effect upon the historic, architectural, archeological, or cultural characteristics of the property that qualified it to meet National Register criteria.

(1) *No effect.* If the agency official and the State historic preservation officer agree that the undertaking will not affect these characteristics, the undertaking may proceed. The agency official shall keep adequate documentation of each determination of no effect, which shall be available for public inspection. If an objection is made to a no effect determination, the Executive Director may review the determination and make a final decision on whether there is an effect or not.

(2) *Effect determined.* If the agency official, the State historic preservation officer, or the Executive Director find that the undertaking will have an effect upon these characteristics, the agency official, in consultation with the State historic preservation officer, shall apply the criteria of adverse effect, set forth in § 800.3(b), to determine whether the effect of the undertaking may be adverse.

(c) *Determinations of no adverse effect.* If the agency official finds the effect on the historical, architectural, archeological, or cultural characteristics of the property not to be adverse, the agency official shall forward adequate documentation of the determination, including written evidence of the views of the State historic preservation officer, to the Executive Director for review in accordance with § 800.6.

(d) *Adverse effect determination.* If the agency official finds the effect on the historical, architectural, archeological, or cultural characteristics of the property to be adverse, or if the Executive Director does not accept an agency official's determination of no adverse effect pursuant to review under § 800.6, the agency official shall:

(1) Request, in writing, the comments of the Council,

(2) Submit a preliminary case report,

(3) Notify the State historic preservation officer of this request, and

(4) Proceed with the consultation process set forth in § 800.6.

Until the Council issues its comments under these regulations, the agency official shall take no action on the proposed undertaking that could result in an adverse effect with respect to a National Register or National Register eligible property or that could foreclose the Council's consideration of alternatives to avoid, mitigate, or minimize the adverse effect.

§ 800.5 State historic preservation officer responsibilities.

(a) Unless a longer time is established by the agency official, State historic preservation officers should respond in writing within 15 working days to adequately documented agency requests pursuant to § 800.4.

(b) Should a State historic preservation officer fail to respond to an agency official's request under § 800.4 within 30 days, such action shall evidence the State historic preservation officer's concurrence with the views of the agency official.

(c) The State historic preservation officer should participate in the consultation process under § 800.6 whenever it concerns an undertaking located within his jurisdiction. The State historic preservation officer, with the agency official and the Executive Director, should be a signatory to any Memorandum of Agreement executed under § 800.6(d) of these regulations.

(d) Failure of a State historic preservation officer to execute a Memorandum of Agreement within 30 days without notifying the Executive Director and the agency official that the State historic preservation officer disagrees with the terms of the agreement shall not preclude the Executive Director and the agency official from concluding the agreement and having it ratified by the Chairman in accordance with § 800.6(d)(2).

§ 800.6 Council comments.

The following subsections specify how the Council will respond to Federal agency requests for the Council's comments required to satisfy an agency's responsibilities under section 106 of the Act and section 2(b) of the Executive Order.

(a) *Response to determinations of no adverse effect.* (1) Upon receipt of a determination of no adverse effect from an agency official, the Executive Director will review the determination and supporting documentation. Unless the Executive Director objects to the determination within 30 days after receipt of an adequately documented determination, the agency official will be considered to have satisfied the agen-

cy's responsibilities under section 106 of the Act, section 2(b) of Executive Order 11593, and these regulations, the agency official shall conduct an on-site inspection.

(3) *Public information meeting.* At take no action with respect to the undertaking that could result in an adverse effect on the National Register

(4) *Amendment of a memorandum of agreement.* If a Federal agency cannot carry out the terms of a Memorandum full Council will consider an undertaking at the next regularly scheduled meeting and no less than 60 days from make a written appeal to the Chairman to have the matter considered by the full Council at its next regularly

V 4 3 / 2 1 0 OCT 30 78

cy's responsibilities under section 106 of the Act, section 2(b) of Executive Order 11593, and these regulations, and may proceed with the undertaking.

(2) If the Executive Director objects to the determination, the Executive Director may specify conditions which will eliminate the objection. If the agency official accepts the conditions in writing, the conditions will be incorporated into the agency's determination and the Executive Director's objection will be withdrawn. The agency official then will be considered to have satisfied the agency's responsibilities under section 106 of the Act, section 2(b) of the Executive Order, and these regulations, and may proceed with the undertaking.

(3) If the agency official does not accept the Executive Director's conditions or if the Executive Director objects without specifying conditions, the agency official shall request the Executive Director to initiate the consultation process pursuant to § 800.6. Until the agency official has received the Council's comments, the agency official shall take no action with respect to the undertaking that could result in an adverse effect on the National Register or eligible property or that would foreclose the Council's consideration of alternatives that could avoid, mitigate, or minimize any adverse effect.

(b) *Response to determination of adverse effect.* Upon receipt of a request for Council comments pursuant to § 800.4(d), or if the Executive Director's objections to a determination of no adverse effect have not been eliminated pursuant to § 800.6(a), the Executive Director shall acknowledge the request and initiate the consultation process.

(c) *Consultation process.* The agency official, the State Historic Preservation Officer, and the Executive Director shall be the consulting parties to consider feasible and prudent alternatives to the undertaking that could avoid, mitigate, or minimize adverse effects on a National Register or National Register eligible property. Grantees, permittees, licensees, or other parties in interest, and representatives of National, State, or local units of government and public and private organizations, may be invited by the consulting parties to participate in the consultation process.

(1) *Preliminary case report.* The Executive Director shall specify the contents of the report that shall be submitted by the agency official to the Council. The agency official also shall provide a copy of the report to the State historic preservation officer and make it available for public inspection.

(2) *On-site inspection.* At the request of any of the consulting parties, the agency official shall conduct an on-site inspection.

(3) *Public information meeting.* At the request of any of the consulting parties, the Executive Director shall conduct a meeting open to the public. The consulting parties and representatives of National, State, or local units of government, representatives of public or private organizations, and interested citizens may receive information and express their views on the undertaking, its effects on historic and cultural properties, and alternate courses of action that could avoid, mitigate, or minimize any adverse effects on such properties. The agency official shall provide adequate facilities for the meeting and shall afford appropriate notice to the public, generally at least 2 weeks in advance of the meeting.

(4) *Consideration of alternatives.* Upon review of the proposed undertaking the consulting parties shall determine whether there are feasible and prudent alternatives to avoid the adverse effects on the National Register or eligible property. If the consulting parties cannot agree on such an alternative, they shall determine if there are alternatives that could satisfactorily mitigate the adverse effects.

(5) *Avoidance or satisfactory mitigation of adverse effect.* If the consulting parties agree upon a feasible and prudent alternative to avoid or satisfactorily mitigate the adverse effects of the undertaking on the National Register or eligible property, they shall execute a Memorandum of Agreement in accordance with § 800.6(d) specifying how the undertaking will proceed to avoid or mitigate the adverse effect.

(6) *Acceptance of adverse effect.* If the consulting parties determine that there are no feasible and prudent alternatives that could avoid or satisfactorily mitigate the adverse effects and agree that it is in the public interest to proceed with the proposed undertaking, they shall execute a Memorandum of Agreement in accordance with § 800.6(d) acknowledging this determination and specifying any measures to minimize the adverse effects that shall be taken before the undertaking proceeds.

(7) *Failure to agree.* Upon the failure of consulting parties to find an unanimously agree upon the terms for a Memorandum of Agreement, the Executive Director shall notify the Chairman of the failure of the consulting parties to reach agreement and shall recommend whether or not the matter should be scheduled for consideration at a Council meeting. The agency official and the State historic preservation officer shall be notified of the Executive Director's recommendation. Upon notification of the recommendation, the agency official shall take no action with respect to the undertaking that could result in an adverse effect on the National Register or eligible property, or that would foreclose the Council's consideration of alternatives that could avoid, mitigate, or minimize the adverse effects until the Council has transmitted its comments to the agency official or the Chairman has given written notice to the agency official that the undertaking will not be considered at a Council meeting.

(d) *Memorandum of Agreement.* (1) *Preparation of Memorandum of Agreement.* It shall be the responsibility of the Executive Director to prepare each Memorandum of Agreement required under these regulations. Unless otherwise requested by the Executive Director, the agency official shall prepare a proposal for inclusion in the agreement that details the actions agreed upon by the consulting parties to be taken to avoid, satisfactorily mitigate, or minimize the adverse effects on the property. The State historic preservation officer's written concurrence shall be included in this proposal by the agency official. The Executive Director shall prepare the required agreement and send it to the Chairman for ratification pursuant to § 800.6(d)(2). The Executive Director may return the proposal to the agency official or submit to the agency official and the State historic preservation officer an agreement revising the proposal if it does not satisfactorily represent the consensus of the consulting parties.

(2) *Review of memorandum of agreement.* Upon receipt of an executed Memorandum of Agreement, the Chairman shall institute a 30-day review period. Unless the Chairman notifies the agency official that the matter has been placed on the agenda for consideration at a Council meeting, the agreement shall become final when signed by the Chairman or upon the expiration of the 30-day review period with no action taken. Notice of executed Memoranda of Agreement shall be published in the FEDERAL REGISTER monthly.

(3) *Effect of memorandum of agreement.* Agreements duly executed in accordance with these regulations shall constitute the comments of the council and shall evidence satisfaction of the Federal agency's responsibilities for the proposed undertaking under section 106 of the Act, section 2(b) of the Executive Order, and these regulations. Failure to carry out the terms of a Memorandum of Agreement is a violation of section 106 and section 2(b) requirements and requires that the Federal agency again request the Council's comments in accordance with these regulations.

(4) *Amendment of a memorandum of agreement.* If a Federal agency cannot carry out the terms of a Memorandum of Agreement or believes that changes are necessary, the agency official shall immediately request an amendment of the agreement. Amendments will be executed in the same manner as the original agreement.

(e) *Council meetings.* The Council does not hold formal administrative hearings to consider comments under these regulations. Reports and statements will be presented to the Council in open session in accordance with a prearranged agenda. Regular meetings of the Council generally occur quarterly.

(1) *Response to recommendation for consideration at Council meeting.* Upon receipt of a notice and recommendation from the Executive Director concerning consideration of the proposed undertaking at a Council meeting, the Chairman shall determine within 10 working days whether or not the undertaking will be considered and shall notify the Executive Director, the agency official, and the State historic preservation officer of his decision. The agency official and the State historic preservation officer shall provide such reports and information as may be required to assist the Chairman in this determination.

If the Chairman decides against consideration of the undertaking at a Council meeting, he will submit a written summary of the undertaking, any recommendations for action by the Federal agency, and his decision to each member of the Council. If a majority of the Council objects to this action within 10 working days of the Chairman's decision, the undertaking will be scheduled for consideration at a Council meeting. If a majority of the Council has no objection, the Chairman shall notify the agency official in writing at the end of the 10-day period that the undertaking may proceed. Such notice will evidence satisfaction of the Federal agency's responsibilities under section 106 of the Act, section 2(b) of the Executive Order, and these regulations.

(2) *Decision to consider the undertaking.* When the Council will consider an undertaking at a meeting, the Chairman shall either designate five members as a panel to hear the matter on behalf of the full Council, or schedule the matter for consideration by the full Council. The panel shall consist of three members appointed by the President, one as Chairman; and two Federal members, neither of whom shall represent the Federal agency involved in the undertaking. The panel will meet to consider the undertaking within 30 days of the Chairman's decision unless the agency official agrees to a longer time. The full Council will consider an undertaking at the next regularly scheduled meeting and no less than 60 days from the date of the Chairman's decision. In exceptional cases the Chairman may schedule the matter for consideration at a special meeting of the full Council to be held less than 60 days from the date of the Decision. Prior to any panel or full Council consideration of a matter, the Chairman will notify the agency official and the State historic preservation officer of the date on which the undertaking will be considered and direct the Executive Director to prepare a case report including reports from the agency official and the State historic preservation officer. (See § 800.15.) Reports required from the agency official and the State historic preservation officer must be received by the Executive Director at least 2 weeks before any meeting. Failure to submit such reports may result in postponement of the meeting.

(3) *Meeting notice.* Two weeks notice of all meetings involving Council consideration of Federal undertakings in accordance with these regulations shall be given by publication in the FEDERAL REGISTER.

(4) *Statements to the Council.* An agenda shall provide for oral statements from the Executive Director; the referring agency official; the applicant or potential recipient, when appropriate; the State historic preservation officer; representatives of national, State, or local units of government, and public and private organizations and individuals. Parties wishing to make oral statements should submit written statements of position to the Executive Director at least 2 weeks before the meeting.

(5) *Comments of the Council.* The written comments of the Council will be issued within 2 weeks after a meeting. Comments shall be made to the head of the Federal agency requesting comment or having responsibility for the undertaking and shall be evidence that the agency has satisfied its responsibilities for the proposed undertaking under section 106 of the Act, section 2(b) of the Executive Order, and these regulations. Immediately after the comments are made to the Federal agency, the comments of the Council will be forwarded to the President and Congress as a special report under authority of section 202(b) of the Act and published in the FEDERAL REGISTER. Comments shall be available to the public upon receipt of the comments by the head of the Federal agency.

(6) *Review of panel decision.* (i) Within 10 working days after issuance of comments by a panel the agency official, the State historic preservation officer, or the Executive Director may make a written appeal to the Chairman to have the matter considered by the full Council at its next regularly scheduled meeting or, in exceptional circumstances, at a special meeting. The Chairman will notify the requesting party of his decision within 10 working days.

(ii) If the proposed undertaking was considered by a panel and the agency is not going to follow the panel's comments, the agency official shall provide written notice of the decision to the Council at least 45 days before taking action. The Chairman may then schedule consideration of the matter before the full Council within 30 days of receipt of such notice. In the interim period the agency official shall take no action with respect to the proposed undertaking that would result in an adverse effect on the National Register or eligible property or foreclose the Council's consideration of alternatives that could avoid, mitigate, or minimize the adverse effect.

(7) *Report of agency action in response to Council comments.* When the Council's commenting process is complete and a final decision regarding the proposed undertaking is reached by the Federal agency, the agency official shall submit a written report to the Council describing the actions taken by the Federal agency subsequent to the Council's comments; the actions taken by other parties pursuant to the actions of the Federal agency; and the ultimate effect that such actions will have on the National Register or eligible property. If necessary, the Council may request supplementary reports.

(8) *Continuing review jurisdiction.* When the Council has commented upon an undertaking such as a comprehensive or area-wide plan that will require subsequent site-specific undertakings by the Federal agency, the Council's comment or approval extends only to the undertaking as reviewed. The Agency Official shall ensure that subsequent actions related to the undertaking that have not been considered by the Council will be submitted to the Council for review in accordance with these regulations.

§ 800.7 Resources discovered during construction.

(a) *Federal agency responsibilities.* If a Federal agency has previously met its responsibilities under section 106 of the Act, section 2 of the Executive Order, these regulations, and the National Environmental Policy Act, including the completion of a professionally adequate survey within the undertaking's area of potential environmental impact, and an agency official finds or is notified after construction has started that an undertaking will have an effect on a previously un-

identified property that may be eligible for inclusion in the National Register, or a National Register or eligible

ing. Federal agencies should respond to these inquiries within 30 days.

§ 800.15 Reports to the Council

V 4 3 / 2 1 0
OCT 30 1978

identified property that may be eligible for inclusion in the National Register, or a National Register or eligible property, the agency official shall take the following steps:

(1) Cease those work activities that may adversely affect the property;

(2) In accordance with the Historic and Archeological Data Preservation Act (16 U.S.C. 469(a)), immediately notify the Secretary and provide such information as is available on the property;

(3) If the Secretary advises the agency official that the adverse effects on the property and the significance of the property require consultation with the Council to determine an appropriate course of action, or if the agency official and the Secretary cannot agree on whether or how the adverse effects should be mitigated, the agency official shall request the comments of the Council in accordance with these regulations.

(b) *Council comments.* Within 30 days of receipt of a request for comments from an agency official under this section, the Executive Director, with the concurrence of the Chairman, shall transmit comments on behalf of the Council to the agency official or the Chairman shall schedule a meeting of the Council, in accordance with § 800.6(e), within 45 days of receipt of the request for comments.

NONSITE SPECIFIC UNDERTAKINGS

§ 800.8 Application.

At the request of an agency official, the Council will consider execution of a Programmatic Memorandum of Agreement to fulfill an agency's responsibilities under section 106 of the Act and sections 1(3) and 2(b) of the Executive Order for a particular program or class of undertakings that would otherwise require numerous individual requests for comments under these regulations. The Executive Director shall make a determination as to whether a Programmatic Memorandum of Agreement may be used in the following situations:

(a) Programs or undertakings, including legislative proposals, policies, and rules and regulations, that will have an effect on undefined or unspecified National Register or eligible properties.

(b) Undertakings that are repetitive in nature and have essentially the same effect on National Register or eligible properties.

(c) Comprehensive or area-wide planning undertakings that do not provide for site-specific undertakings at the time of their development.

(d) Programs that are designed to further the preservation and enhancement of National Register or eligible properties.

(e) Emergency programs that would not permit compliance with these regulations in the normal time period at the time of the undertaking.

(f) Federal or federally approved plans that provide a basis for non-Federal undertakings that may have an effect on National Register or eligible properties.

(g) Other programs, classes, or series of undertakings that the Executive Director determines are appropriate for consideration under this section.

§ 800.9 Council comments.

(a) *Consultation process.* Upon determination by the Executive Director that a Programmatic Memorandum of Agreement is appropriate, the agency official and the Executive Director shall consult to develop a Programmatic Memorandum of Agreement. The Executive Director may invite other parties to participate in the consultation and may hold a public information meeting on the proposed Agreement.

(b) *Programmatic Memorandum of Agreement.* (1) *Preparation of the agreement.* It shall be the responsibility of the Executive Director to prepare each agreement. At least 30 days prior to execution of an agreement the Council shall publish the proposed agreement in the FEDERAL REGISTER and invite comments from Federal, State, and local agencies and the public.

(2) *Execution of the agreement.* After consideration of comments received and completion of any necessary revisions, the consulting parties shall sign the agreement and the Executive Director shall send it to the Chairman for ratification.

(3) *Chairman's approval.* Upon receipt of an executed agreement, the Chairman shall institute a 30-day review period. At the end of 30 days, the Chairman shall take one of the following actions:

(i) Ratify the agreement, at which time it will take effect.

(ii) Return the agreement to the Executive Director with instructions for modifications of the agreement before resubmission.

(iii) Place the agreement on the agenda of the next regularly scheduled Council meeting for approval by the full Council.

(iv) Submit the agreement by mail for approval by the full Council.

(v) Disapprove the agreement.

(4) *Effect of the agreement.* The execution and approval of a Programmatic Memorandum of Agreement shall constitute the comments of the Council on all individual undertakings carried out pursuant to the terms of the agreement and, unless otherwise provided by the agreement, shall satisfy the agency's responsibilities under section 106 of the Act, section 1(3) and 2(b) of the Executive Order, and these regulations for all undertakings carried out in accordance with the agreement.

(5) *Notice.* Notice of an executed agreement shall be published in the FEDERAL REGISTER and copies shall be available for public inspection from the consulting parties.

FEDERAL PROGRAM COORDINATION

§ 800.10 Coordination with the National Environmental Policy Act (42 U.S.C. 4321 et seq.).

Section 101(b)(4) of the National Environmental Policy Act (NEPA) declares that one objective of the national environmental policy is to "preserve important historic, cultural, and natural aspects of our national heritage and maintain, wherever possible, an environment which supports diversity and variety of individual choice." In order to meet this objective, Federal agencies should coordinate NEPA compliance with the separate responsibilities of the National Historic Preservation Act and Executive Order 11593 to insure that historic and cultural properties are given proper consideration in the preparation of environmental assessments and environmental impact statements. Agency obligations pursuant to the National Historic Preservation Act and Executive Order 11593 are independent from NEPA requirements and must be complied with even when an environmental impact statement is not required. Where both NEPA and the National Historic Preservation Act or Executive Order 11593 are applicable, the Council on Environmental Quality, in its proposed National Environmental Policy Act-Regulations (43 FR 25230), directs that compliance with 102(2)(C) of NEPA shall, to the maximum extent possible, be combined with other statutory obligations—such as the National Historic Preservation Act and Executive Order 11593—to yield a single document which meets all applicable requirements. Circulation of a draft environmental impact statement for comment pursuant to section 102(2)(C) of NEPA is not a request for Council comments under these regulations and is not in and of itself sufficient to fulfill a Federal agency's responsibilities under Section 106 of the Act or section 2(b) of the Executive Order. To coordinate the independent responsibilities of the Act and NEPA, Federal agencies should undertake, to the fullest extent possible, compliance with these regulations whenever National Register or eligible properties may be affected by an undertaking.

(a) Federal agencies should initiate compliance with Section 106 of the Act and the Executive Order in accordance with these regulations during initial environmental assessments that are undertaken to meet the requirements of NEPA and agency environmental procedures. Identification of National Register properties, eligible properties, or properties that may be eligible for the National Register should be carried out in accordance with § 800.4 of these regulations. Potential effects should then be evaluated in accordance with the Criteria of Effect and Adverse Effect in § 800.3 of these regulations so that the environmental assessment or draft environmental impact statement will fully describe any National Register or eligible properties within the area of the undertaking's potential environmental impact and the nature of the undertaking's effect on them.

(b) If evaluation of the effect resulted in a determination of no effect or no adverse effect under § 800.4, that finding, along with any Council's comments, should be included in the environmental assessment or the draft environmental impact statement.

(c) If evaluation of the effect resulted in a determination of adverse effect, that finding and a copy of the agency's request for the Council's comments in accordance with § 800.4(d)(1) of these regulations should be included in the environmental assessment or the draft environmental impact statement. If available, a copy of the Council's comments shall be incorporated into the environmental assessment or the draft environmental impact statement.

(d) Environmental impact statements for undertakings that affect National Register or eligible properties must evidence compliance with section 106 of the Act and the Executive Order, as set forth in these regulations, in order for the statement to be considered adequate by the Council. Comments of the Council obtained pursuant to these regulations shall be incorporated into the final environmental impact statement.

§ 800.11 Coordination with section 1(3) of Executive Order 11593.

Agencies shall consult with the Council and establish procedures to assure that Federal plans and programs contribute to the preservation and enhancement of non-federally owned sites, structures, and objects of historical, architectural, or archeological significance.

§ 800.12 Coordination with the Presidential Memorandum on Environmental Quality and Water Resources Management.

Agencies with water resources responsibilities shall, not later than 3 months after publication of these regulations as finally adopted in the FEDERAL REGISTER, publish procedures to implement these regulations as required by the Presidential Memorandum on Environmental Quality and Water Resources Management. Each agency shall consult with the Council while developing its procedures and shall provide an opportunity for public review and comment on their proposed regulations. Agency procedures shall be effective when the Chairman approves them as conforming to the Presidential Memorandum and these regulations. Agency procedures must at a minimum include acceptable measures to prevent or mitigate losses of historic or cultural resources and provisions to insure that all projects not yet constructed will comply with these regulations. Additionally, such procedures shall prescribe a clear way to identify funding for environmental mitigation in an agency's appropriation requests. The procedures shall be approved by the Chairman of the Council within 60 days if they are consistent with these regulations. Once in effect they shall be filed with the Council and made readily available to the public. Agencies are also encouraged to publish explanatory guidance for the procedures.

OTHER PROVISIONS

§ 800.13 Other powers of the Council.

(a) *Comment or report upon non-Federal undertaking.* The Council will exercise the broader advisory powers, vested by section 202(a)(1) of the Act, to recommend measures concerning a non-Federal undertaking that will adversely affect a National Register or eligible property:

(1) Upon request from the President of the United States, the President of the U.S. Senate, or the Speaker of the House of Representatives, or

(2) When agreed upon by a majority vote of the members of the Council.

(b) *Comment or report upon Federal undertakings in special circumstances.* The Council will exercise its authority to comment to Federal agencies under these regulations in certain special situations even though written notice that an undertaking will have an adverse effect has not been received.

§ 800.14 Investigation of threats to historic properties.

The Council is frequently advised by State historic preservation officers and others of undertakings that threaten National Register or eligible properties, or properties that may be eligible for the National Register, that may or may not involve a Federal agency. In order to protect historic properties the Executive Director investigates these matters, generally by writing to the Federal agency that appears to be involved in the undertaking. Federal agencies should respond to these inquiries within 30 days.

§ 800.15 Reports to the Council.

(a) In order to meet responsibilities under these regulations, the Council prescribes that certain reports be made available to it and accepts reports and statement from other interested parties. The content of required reports is set forth below. Generally, the requirements elaborate the principles contained in the Criteria of Effect and in the Criteria of Adverse Effect. The Council recognizes that the Act requires that historic and cultural properties should be preserved "as a living part of our community life and development." Consequently, in arriving at final comments, the Council considers those elements in an undertaking that have relevance beyond historical and cultural concerns. To assist it in weighing the public interest, the Council welcomes information not only bearing upon physical, sensory, or esthetic effects but also information concerning economic, social, and other benefits or detriments that will result from the undertaking.

(b) *Reports for Council meeting.* Consideration of an undertaking by either the full Council or a panel pursuant to section 800.6 is based on reports from the Executive Director, the agency official, the State historic preservation officer, and others. These reports consist of the following:

(1) *Executive Director's report.* The report from the Executive Director will include a verification of the legal and historical status of the property; an assessment of the historical, architectural, archeological, or cultural significance of the property; a statement indicating the special value of features to be most affected by the undertaking; an evaluation of the total effect of the undertaking upon the property; a critcal review of any known feasible and prudent alternatives and recommendations to remove or mitigate the adverse effect.

(2) *Agency official's report.* (i) The report from the agency official requesting comments will include a general discussion and chronology of the proposed undertaking; when appropriate, an account of the steps taken to comply with section 102(2)(A) of National Environmental Policy Act (NEPA); an evaluation of the effect of the undertaking upon the property, with particular reference to the impact on the historic, architectural, archeological, and cultural values; steps taken or proposed by the agency to take into account, avoid, or mitigate adverse effects of the undertaking; a thorough discussion of alternate courses of action; and, if applicable and available, a copy of the draft environmental statement prepared in com-

pliance with section 102(2)(C) of NEPA.

SUPPLEMENTARY GUIDELINES I

CRITERIA FOR THE NATIONAL REGISTER OF

tures, or from association with historic events:

ties are eligible for the National Register because they have "yielded, or may be likely to yield, information impor-

place for public understanding and enjoyment;

(b) Above and beyond its scientific

Subpart B: *Professional standards for data recovery programs.* (1) Data recovery should be conducted in ac-

V 4 3 / 2 1 0 C 3 0 7 8 C

pliance with section 102(2)(C) of NEPA.

(ii) A report by any applicant or potential recipient when the Council considers comments upon an application for a contract, grant, subsidy, loan, or other form of funding assistance, or an application for a Federal lease, permit, license, certificate, or other entitlement for use. Arrangements for the submission and presentation of reports by applicants or potential recipients shall be made through the agency official having jurisdiction in the matter.

(3) *Other Federal agency reports.* A report from any other Federal agency having under consideration an undertaking that will concurrently or ultimately affect the property, including a general description and chronology of that undertaking and discussion of the relation between that undertaking and the undertaking being considered by the Council.

(4) *State historic preservation officer's report.* A report from the State historic preservation officer will include an assessment of the significance of the property; an identification of features of special value; an evaluation of the effect of the undertaking upon the property and its specific components; an evaluation of known alternate courses of action; a discussion of present or proposed participation of State and local agencies or organizations in preserving or assisting in preserving the property; an indication of the support or opposition of units of government and public and private agencies and organizations within the State; and the recommendation of his office.

(5) *Other reports.* Other pertinent reports, statements, correspondence, transcripts, minutes, and documents received by the Council from any and all parties, public or private. Reports submitted pursuant to this section should be received by the Council at least 2 weeks prior to a Council meeting.

(c) *Coordination of case reports and statements.* In considerations involving more than one Federal department, either directly or indirectly, the agency official requesting comment shall act as a coordinator in arranging for a full assessment and discussion of all interdepartmental facets of the problem and prepare a record of such coordination to be made available to the Council. At the request of the Council, the State historic preservation officer shall notify appropriate governmental units and public and private organizations within the State of the pending consideration of the undertaking by the Council, and coordinate the presentation of written statements to the Council.

SUPPLEMENTARY GUIDELINES I

CRITERIA FOR THE NATIONAL REGISTER OF HISTORIC PLACES

The following are the criteria established by the Secretary of the Interior for use in evaluating and determining the eligibility of properties for listing in the National Register. They are included in this publication for informational purposes.

National Register Criteria for Evaluation (36 CFR Part 60.6). "The quality of significance in American history, architecture, archeology, and culture is present in districts, sites, buildings, structures, and objects of State and local importance that possess integrity of location, design, setting, materials, workmanship, feeling, and association and:

"(a) That are associated with events that have made a significant contribution to the broad patterns of our history; or

"(b) That are associated with the lives of persons significant in our past; or

"(c) That embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or

"(d) That have yielded, or may be likely to yield, information important in prehistory or history.

"*Criteria considerations.* Ordinarily cemeteries, birthplaces, or graves of historical figures, properties owned by religious institutions or used for religious purposes, structures that have been moved from their original locations, reconstructed historic buildings, properties primarily commemorative in nature, and properties that have achieved significance within the past 50 years shall not be considered eligible for the National Register. However, such properties will qualify if they are integral parts of districts that do meet the criteria or if they fall within the following categories:

"(a) A religious property deriving primary significance from architectural or artistic distinction or, historical importance;

"(b) A building or structure removed from its original location but which is the surviving structure most importantly associated with a historic person or event;

"(c) A birthplace or grave of a historical figure of outstanding importance if there is no appropriate site or building directly associated with his productive life;

"(d) A cemetery which derives its primary significance from graves of persons of transcendent importance, from age, from distinctive design features, or from association with historic events;

"(e) A reconstructed building when accurately executed in a suitable environment and presented in a dignified manner as part of a restoration master plan, and when no other building or structure with the same association has survived;

"(f) A property primarily commemorative in intent if design, age, tradition, or symbolic value has invested it with its own historical significance;

"(g) A property achieving significance within the past 50 years if it is of exceptional importance."

SUPPLEMENTARY GUIDELINES II

DOCUMENTATION FOR DETERMINATION OF NO ADVERSE EFFECT

Adequate documentation of a Federal agency's Determination of No Adverse Effect pursuant to § 800.4 should include the following information:

(1) A description of the agency's involvement with the proposed undertaking with legal citations of the agency's program authority and applicable implementing regulations, procedures, and guidelines;

(2) A description of the proposed undertaking including, as appropriate, photographs, maps, drawings, and specifications, etc. (In the case of restoration and rehabilitation proposals, the best available drawings and specifications should be provided);

(3) A list of National Register properties, eligible properties, or properties that may be eligible for inclusion in the National Register that will be affected by the undertaking, including a description of the property's physical appearance and significance;

(4) A brief statement explaining why each of the Criteria of Adverse Effect (36 CFR Part 800.3(b)) was found inapplicable;

(5) Written views of the State Historic Preservation Officer concerning the determination of no adverse effect;

(6) An estimate of the cost of the undertaking, identifying Federal and non-Federal shares.

SUPPLEMENTARY GUIDELINES III

DETERMINATIONS OF ADVERSE EFFECT AND NO ADVERSE EFFECT FOR ARCHEOLOGICAL RESOURCES

The following provides supplementary guidance to assist Federal agencies in making Determinations of Adverse Effect and No Adverse Effect for National Register and eligible properties that are significant primarily as archeological resources in accordance with the Council's regulations for the "Protection of Historic and Cultural Properties" (36 CFR Part 800).

In accordance with the National Register criteria, archeological properties are eligible for the National Register because they have "yielded, or may be likely to yield, information important in prehistory or history" (36 CFR Part 60).

Part I: *Policy.* Disturbance of resources eligible under this criterion should be avoided.

(1) Data recovery may be appropriate, however, when properties are primarily significant for the data they contain and when this data can be retrieved in accordance with professional standards.

(2) The goal of archeological data recovery must be to obtain the greatest amount of archeological data for the least amount of archeological resource destruction.

In-place preservation of archeological resources should be examined as a cost-effective alternative to data recovery.

(4) Methods destructive of data or injurious to the natural features of the property should not be employed if nondestructive methods are feasible.

Where a Federal undertaking (as defined in § 800.2) may involve the recovery of data from an archeological property on or eligible for inclusion in the National Register, the Agency Official should take the following steps to decide whether a Determination of No Adverse Effect can be made:

The Agency Official, in consultation with the State Historic Preservation Officer (SHPO), should apply the criteria set forth in Part II below. If the criteria are met, the Agency Official May make a Determination of No Adverse Effect for any data recovery program conducted in accordance with the requirements set forth in Part III below. Documentation that the criteria and requirements set forth in Parts II and III below have been met, along with the written comments of the SHPO, shall be forwarded to the Council for review in accordance with § 800.6.

If the criteria are not met, the Agency Official should request the comments of the Council in accordance with § 800.4.

Part II: *Criteria.* (1) The property is not a National Historic Landmark, a National Historic Site in non-Federal ownership, or a property of national historical significance so designated within the National Park System.

(2) The SHPO has determined that in-place preservation of the property is not necessary to fulfill purposes set forth in the State Historic Preservation Plan.

(3) The SHPO and the Agency Official agree that:

(a) The property (including properties that are subsidiary elements in a larger property defined in Criterion 1) has minimal value as an exhibit in place for public understanding and enjoyment;

(b) Above and beyond its scientific value, the property is not known to have historic or cultural significance to a community, ethnic, or social group that would be impaired by the retrieval of data;

(c) Currently available technology is such that the significant information contained in the property can be retrieved.

(4) Adequate funds and time have been committed to adequately retrieve the data.

Part III: *Data recovery requirements.* (1) Data recovery will be conducted under the supervision of an archeologist who meets the qualifications under Subpart A.

(2) Data recovery will be conducted in accordance with the standards set forth in Subpart B.

(3) A date has been set for the submission of a final report to the Agency Official.

(4) Plans have been made for disposition of the material recovered after it has been analyzed in accordance with Subpart C.

(5) Documentation of the condition and significance of the property after data recovery will be provided by the Agency Official to the SHPO and the National Register for appropriate action, including nomination, boundary change, or removal of National Register or eligibility status in accordance with the National Register's procedures (36 CFR 60.16).

Subpart A: *Qualifications for supervisory archeologist.* Minimum professional qualifications for a Supervisory Archeologist are graduate degrees in archeology, anthropology, or a closely related field, or equivalent training accepted for accreditation purposes by the Society of Professional Archeologists and the following:

(1) At least 16 months of professional experience or specialized training in archeology field, laboratory, or library research, including at least 4 months of experience in general North American archeology and at least 6 months of field experience in a supervisory role.

(2) A demonstrated ability to carry research to completion, usually evidenced by timely completion of a thesis, research reports, or similar documents.

For work involving prehistoric archeology, a Supervisory Archeologist should have at least one year's experience in research concerning archeological resources of the prehistoric period.

For work involving historic archeology, a Supervisory Archeologist should have at least 1 year's experience in research concerning archeological resources of the historic period.

Subpart B: *Professional standards for data recovery programs.* (1) Data recovery should be conducted in accordance with a recovery plan that includes a professionally acceptable research design:

(a) The plan should reflect a familiarity with previous relevant research and be prepared or approved by the Supervisory Archeologist.

(b) The plan should include a definite set of research questions, taking into account relevant previous research, to be answered in analysis of the data to be recovered;

(c) The plan should provide for recovery of a usable sample of data on those significant research topics that can reasonably be addressed.

(d) The plan should specify and justify the methods and techniques to be used for recovery of the data contained in the property.

(2) The plan should provide for adequate personnel, facilities, and equipment.

(3) The plan should insure that full, accurate and intelligible records are made and maintained of all field observations and operations.

(4) The plan should include adequate provisions for modification of the plan to cope with unforeseen discoveries or other unexpected circumstances.

(5) The plan should provide for distributing program results to at least the following: the SHPO, the State archivist, the State archeologist, the Departmental Consulting Archeologist of the Department of the Interior, and the Chairman, Department of Anthropology, Smithsonian Instituion.

Subpart C: *Treatment of recovered materials.* The recommended professional treatment of recovered materials is curation and storage of the artifacts at an institution that can properly insure their preservation and that will make them available for research and public view. If such materials are not in Federal ownership, the consent of the owner must be obtained, in accordance with applicable law, concerning the disposition of the materials after completion of the report.

SUPPLEMENTARY GUIDELINES IV

PRELIMINARY CASE REPORTS

Preliminary case reports should be submitted with a request for comments pursuant to § 800.4 and should include the following information:

(1) A description of the agency's involvement with the proposed undertaking with legal citations of the agency's program authority and applicable implementing regulations, procedures and guidelines.

(2) The status of this project in the agency's approval process.

(3) The status of this project in the agency's National Environmental

Policy Act compliance process and the target date for completion of all environmental responsibilities.

Policy Act compliance process and the target date for completion of all environmental responsibilities.

(4) A description of the proposed undertaking including, as appropriate, photographs, maps, drawings, and specifications, etc. (In the case of restoration and rehabilitation proposals, the best available drawings and specifications should be provided),

(5) A description of the properties included or eligible for inclusion in the National Register affected by the undertaking, identifying the significant features of the properties,

(6) A statement of which Criteria of Adverse Effect apply (36 CFR 800.3),

(7) Written views of the State Historic Preservation Officer concerning the effect on the property,

(8) The views of other Federal agencies, State and local governments, and other groups or individuals, when known,

(9) A description and analysis of alternatives that would avoid the adverse effects,

(10) A description and analysis of alternatives that would mitigate the adverse effects,

(11) An estimate of the cost of the undertaking, identifying Federal and non-federal shares.

CHAPTER II—FEDERAL ENERGY ADMINISTRATION [1]

(Docket No. ERA-R-77-15)

PART 212—MANDATORY PETROLEUM PRICE REGULATIONS

Amendment to Permit the Passthrough by Service Station Operators of Costs for Vapor Recovery Systems and Increased Service Station Rents

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Final rule.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby adopts amendments to the Mandatory Petroleum Price Regulations that will permit retailers to pass through in the prices of motor gasoline the costs of vapor recovery systems and increased service station rents, without continuing to be subject to the current 3-cent-per-gallon limitation on the recovery of nonproduct costs. These amendments are being issued as an interim measure, pending decontrol of gasoline, to reform certain aspects of the current regulatory framework which limit the ability of service station operators to price gasoline in accordance with actual increased costs and to facilitate the transition of the gasoline market from a controlled to a decontrolled environment. In addition to issuing these amendments, ERA is requesting comments on whether the present regulations with respect to resellers and retailers of gasoline permit an adequate recovery of increased nonproduct costs.

DATES: Effective December 1, 1978. Comments by February 15, 1979, 4:30 p.m.

ADDRESS: All comments to the Office of Public Hearings Management, Economic Regulatory Administration, Room 2313, Docket No. ERA-R-77-15, 2000 M Street NW., Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

William L. Webb (Office of Public Information), Economic Regulatory Administration, 2000 M Street NW., Room B110, Washington, D.C. 20461, 202-634-2170.

Chuck Boehl (Office of Regulations and Emergency Planning) Economic Regulatory Administration, 2000 M Street NW., Room 2304, Washington, D.C. 20461, 202-254-7200.

Ben McRae (Office of General Counsel), Department of Energy, 12th and Pennsylvania Avenue NW., Room 5134, Washington, D.C. 20461, 202-566-9565.

SUPPLEMENTARY INFORMATION:

I. Background.
II. Amendments adopted: A. Increased rents, and B. Vapor recovery system costs.
III. Additional comments requested.
IV. Additional matters.

I. Background

Under the price rules applicable to resellers and retailers of motor gasoline, such firms are, in general, allowed to charge for each grade of gasoline an amount equal to the price charged by the firm on May 15, 1973, to the same class of purchaser plus increased product costs. In addition, in January and February of 1974, the Federal Energy Administration (FEA), a predecessor agency to DOE, issued regulations that allow retailers to increase their prices by up to 3 additional cents per gallon to cover actual nonproduct cost increases subsequent to May 15, 1973. A similar 3-cent-per-gallon increased marketing cost figure was allowed for refiners' retail sales.

The 3-cent-per-gallon increased nonprofit cost passthrough limitation was intended to allow dealers to recover nonproduct cost increases incurred by them, and was FEA's then-current estimate of the amount of nonproduct cost increases incurred by retail dealers (plus an indeterminate amount designed to offset at least a portion of dealers' reductions in revenue as a result of their reduction in volumes of gasoline sold during the 1973-74 embargo). While vapor recovery system costs are nonproduct costs of the type that are allowed under the rule, such systems were not generally required of retail dealers until 1975. At this time, the ERA believes that there is a need to allow a cost passthrough for this factor without regard to the 3-cent-per-gallon nonproduct cost ceiling established by FEA in 1974. Also, we perceive the same need with regard to a factor for increased service station rents. This is because, prior to November 11, 1975, FEA and its predecessor agencies regulated, in conjunction with the regulation of gasoline prices, the rents that supplier/lessors could charge their dealers. Applicable regulations generally provided that gasoline service station rents were frozen at the "base rent" level (the rent charged under contract terms prevailing on May 15, 1973). Often those contract terms stated a base rent in terms of a cent-per-gallon rate (for example, 2 cents per gallon of gasoline sold), and in such cases it was this rate which was frozen under applicable regulations rather than an absolute dollar rental amount.

This system of rent control was begun by the Cost of Living Council on August 19, 1973, and, pursuant to the Council's broad authority under the Economic Stabilization Act of 1971 (Pub. L. 92-210), applied initially to all leased real property used in the retailing of gasoline. When the Economic Stabilization Act expired on April 30, 1974, the Federal Energy Office (FEO), as successor to the Council, narrowed the scope of these regulations to conform with the price control authority under the Emergency Petroleum Allocation Act of 1973 (Pub. L. 93-159, EPAA), so that, beginning May 1, 1974, rent controls applied only in those cases in which both the lessor and lessee of the real property in question were subject to the petroleum price regulations as refiners, resellers, reseller-retailers, or retailers of covered products. Although the EPAA did not provide express authority to regulate service station rents, FEO and FEA took the position that, due to the direct and inextricable relationship between the prices charged to dealers for gasoline and their service station rents, it was necessary to continue to regulate rents charged by suppliers in order to carry out effectively the EPAA mandate to allocate refined petroleum products at equitable prices.

On September 30, 1975, FEA issued proposed amendments to the rent regulations (40 FR 47147, October 8, 1975) which, if adopted, would have, among other things, provided for limited rent increases by (1) permitting the base rent to be increased in those cases in which a temporary rent modification agreement was in effect on May 15, 1973, and the circumstances which gave rise to that modification no longer exist, and (2) permitting the lessor to recover increased costs relating to the rental of real property by increasing the rent above the base rent, while permitting the lessee to pass through rent increases above the base rent as a nonproduct cost increase not subject to the cent-per-gallon maximum otherwise applicable to nonproduct cost increases under 10 CFR 212.93(b). In addition, FEA at that time requested comment on how costs related to installation of environmentally mandated vapor recovery equipment were being handled as between lessors and lessees, with a view toward possible modification of the rent increase proposal to take into account these special costs.

On November 11, 1975, the Temporary Emergency Court of Appeals, in the case of *Shell Oil Co.* v. *FEA*, 527 F. 2d 1243, enjoined FEA from enforcing its rent regulations against Shell on the ground that those regulations, as applied to rentals charged by Shell, were beyond the scope of FEA's statutory authority. In reaching this decision, the court commented that FEA possessed regulatory authority outside its rent regulations to deal effectively with the possibility of gasoline price increases "hidden" in rent increases. The court stated that, "in any instance in which FEA believes a lessor who supplies gasoline to its lessee has raised its rents as a means of obtaining a higher price for its gasoline than would otherwise be allowed * * *," FEA could take action under 10 CFR 210.62(c), a general provision which prohibits "[a]ny practice which constitutes a means to obtain a price higher than is permitted by the regulations in this chapter * * *."

FEA subsequently revoked its rent regulations, effective November 11, 1975, the date of the *Shell* decision (40 FR 60036, December 31, 1975), in view of the decision in the *Shell* case and in order to assure the equal application of that decision to all firms. At the same time, FEA withdrew the rulemaking then pending concerning rent increases under the rent regulations, except for that portion of the rulemaking which related to the possible amendment of the regulations to permit the passthrough of those costs associated with vapor recovery equipment. FEA also at that time called for public participation in the development of "rent guidelines" to aid FEA in determining what rent increases and rental practices might be construed by FEA as constituting a means to obtain prices higher than those permitted under the regulations in violation of 10 CFR 210.62(c).

On April 26, 1977, FEA withdrew its proposal for the development of "rent guidelines" (42 FR 22374, May 3, 1977). Within the same notice, FEA proposed to permit retail gasoline dealers to pass through increased rental charges without regard to the 3-cent-per-gallon maximum authorized under § 212.93(b)(1). This proposal was intended to help ease the burden on retail dealers subject to Subpart F of the price regulations, who had incurred substantially increased rental rates over the past year or more with no corresponding increase in the maximum amount permitted to be charged to reflect non-product cost increases. FEA also proposed to extend this relief to refiners with company-owned retail outlets by a parallel amendment to the 3-cent-per-gallon maximum increased marketing costs authorized for refiner-retailers under § 212.83(c)(2)(iii)(E). At the same time, FEA announced the continued consideration of the possible amendment of the regulations relating to the passthrough of the costs associated with the purchase and installation of vapor recovery equipment.

A public hearing was held in Washington, D.C., on June 21, 1977. Witnesses and written comments on the proposal supported permitting a passthrough of the increased costs under consideration. Prior to its expiration on September 30, 1977, FEA took no action on the proposals to allow the separate passthrough of vapor recovery system costs and increased rental charges. DOE (which effective October 1, 1977, assumed the functions of FEA) has continued consideration of the proposals under section 705 of the Department of Energy Organization Act (Pub. L. 95-91).

II. Amendments Adopted

Gasoline decontrol is still a primary objective of ERA that will be accomplished as soon as possible. However, because of the inequity resulting from the present regulatory constraint upon retail dealers' passing through additional costs of complying with recently imposed environmental controls and rent increases that may be imposed upon them by their suppliers, we are hereby adopting amendments to permit retail gasoline dealers and refiners which operate service stations to pass through in their gasoline prices the nonproduct costs incurred since May 15, 1973, with respect to vapor recovery systems and increased service station rental costs since May 1973, without regard to the 3-cent-per-gallon limitations on the passthrough of retailer's other nonproduct marketing cost increases set forth in §§ 212.93(b) and 212.83(c)(2)(iii)(E). Any costs recovered under these amendments for increased rents and vapor recovery systems will not also be recoverable as part of the 3-cent-per-gallon allowance for actual other nonproduct and marketing cost increases.

A. Increased Rents

Under these amendments, the increased rental costs that will be permitted to be passed through separately will be only the increased rental costs incurred on or after November 1, 1978. These increased rental costs will be expressed as the difference between the rent for a particular service station property, expressed on a cent-per-gallon basis, paid in the month preceding the current month and the month of May 1973. Therefore, in December 1978, the first month that these costs may be separately reflected in gasoline sales, refiners' or resellers' maximum permissible prices may include a factor for increased rental costs incurred in November 1978.

If any portion of the increased rental payments for a particular property is not expressed on a cent-per-gallon basis, it must be converted to a cent-per-gallon basis for purposes of computing the increase. Thus, for example, if a service station operator paid rent of $1,500 and sold 100,000 gallons of gasoline in May 1973 and paid $2,500 rent and sold 125,000 gallons of gasoline in November 1978, the operator's rental cost for May 1973 would be converted to 1.5 cents per gallon, and its rent for November 1978 would be converted to 2 cents per gallon. The rental cost increase of 0.5 cent per gallon would be added to the operator's December 1978 maximum permissible gasoline prices.

To be eligible for passthrough under the amendments adopted today, the increased rent must be paid in an arm's length transaction to a lessor that is not directly controlled by the lessee or by any firm which directly or indirectly controls the lessee.

B. Vapor Recovery System Costs

Also, the amendments will permit service station operators to pass through unrecovered costs incurred since May 15, 1973, with respect to the purchase and installation of gasoline vapor recovery systems. To be eligible for such separate recovery, the costs must be incurred with respect to a system owned by the service station operator and required by a Federal, State, or local governmental authority.

The amendment provides that the cost incurred with respect to a vapor recovery system may be recovered in 1 month or may be prorated over a period of months. Each seller will be required to establish an accounting method by which vapor recovery costs shall be recovered. Once the method is established, the seller will apply the method consistently over the chosen period for the recovery of costs. However, a seller will not be permitted to recover in sales of gasoline a total amount attributable to such costs which exceeds the seller's actual vapor recovery system cost. In any one month, the portion of vapor recovery system costs that are available for recovery in that month shall be applied equally to, and will be deemed to have been recovered on, each gallon of gasoline sold. Thus, no amount of the portion of vapor recovery costs prorated by the seller to a specific month may be used to justify prices in a subsequent month.

For example, if a service station operator purchased and installed in 1976 a vapor recovery system for $10,000, the cost of which has not been recovered to date as a nonproduct or marketing cost, the service station operator may pass through in its sales of gasoline $10,000 attributable to such unrecovered costs. The seller may pass

[1] Editorial Note: Chapter II will be renamed at a future date to reflect that it contains regulations administered by the Economic Regulatory Administration of the Department of Energy.

through the $10,000 in gasoline sales in 1 month as a current expense or may prorate the recovery over a

rather than rented, by resellers or retailers, should be included. In addition, we request that commenters

Issued in Washington, D.C., October 22, 1978.

David J. Bardin,

charged for gasoline pursuant to this part (including paragraphs (I) and (II) (aa) of this definition) by an amount

took title to the product it distributes and were a seller subject to § 212.93(b).

N_i = the total increased non-prod-

shall be applied equally to, and shall be deemed to have been recovered on, each gallon of gasoline sold and for purposes of § 212.83(f) shall be deemed

V 4 3 / 2 1 0 0 C 3 0 0 7 8

through the $10,000 in gasoline sales in 1 month as a current expense or may prorate the recovery over a longer period, for instance, 20 months. If the operator chooses to pass through $500 in a particular month and in that month expects to sell 100,000 gallons of gasoline, it may increase its maximum permissible price by 0.5 cent for each gallon of gasoline sold. In such a situation the operator will be deemed to recover the 0.5 cent per gallon for vapor recovery system costs on every gallon of gasoline that it sells.

Section 212.83(f) provides for refiners a sequence of recovery for crude oil costs, purchased product costs, and nonproduct costs. It does not specify a sequence of recovery for specific nonproduct cost items. Such a sequence is necessary with respect to vapor recovery costs which are deemed to be recovered in the month in which they are made available for recovery. To the extent that these costs are deemed recovered, they will not be bankable for future recovery as refiners' other nonproduct costs are. If these costs are required to be recovered before refiners' other nonproduct costs, the costs which are deemed to be recovered will more likely correspond to those costs actually recovered. Therefore, the amendments specify that refiners' vapor recovery costs will be deemed to have been recovered before any other nonproduct costs.

III. Additional Comments Requested

Although we believe the amendments issued today will more equitably allow for recovery of service station operators' increased nonproduct costs, this rulemaking will be continued for the purpose of receiving additional comments on the amendments adopted today and the need, if any, for further increases in the allowance for nonproduct costs permitted resellers and retailers of gasoline.

In particular, we specifically request comments on whether, in lieu of allowing retailers to pass through the actual amount of rent increases and vapor recovery system costs, we should allow a specific cent-per-gallon increase limitation for all retailers that is higher than the present 3 cents per gallon to permit the passthrough of costs for vapor recovery systems and increased rents. Those favoring such an approach are urged to provide data to be used in the determination of such a maximum.

Comments, supported by factual information to the extent possible, are also requested on the adequacy of current nonproduct marketing cost ceilings for retailers, resellers, and refiners. Reference to property taxes and other cost increases applicable to reseller or retail properties owned, rather than rented, by resellers or retailers, should be included. In addition, we request that commenters identify for us any other inequities or other problems that may be created by the present price rules applicable to resellers and retailers and the marketing costs of refiners.

Comments will be received until February 15, 1979. You should submit 15 copies of your comments to Office of Public Hearings Management, Economic Regulatory Administration, Room 2313, Docket No. ERA-R-77-15, 2000 M Street NW., Washington, D.C. All comments received by DOE will be available for public inspection in the DOE Reading Room, Room GA-152, James Forrestal Building, 1000 Independence Avenue SW., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday.

Any information or data considered by you to be confidental must be so identified and submitted in writing, one copy only, in accordance with the procedures set forth in 10 CFR 204.9(f). Any material not accompanied by a statement of confidentiality will be considered to be nonconfidential. We reserve the right to determine the confidential status of the information or data and to treat it according to our determination. While the issues addressed in the comments would not be immediately applicable if motor gasoline is decontrolled, the comments received will nevertheless be considered in the context of our pending proposal on standby product allocation and price regulations (43 FR 29565, July 10, 1978) which would be implemented in the event of a major refined product or crude oil supply interruption.

IV. Additional Matters

In adopting this rule, ERA has considered in accordance with Executive Order 12044, the economic impact of its action. We have prepared a regulatory analysis of these amendments. Copies may be obtained from the ERA, Office of Public Information, 2000 M Street NW., Room B-110, Washington, D.C. 20461, 202-632-2170.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-385; Energy Policy and Conservation Act, Pub. L. 94-163, as amended, Pub. L. 94-385; E.O. 11790, 39 FR 23185; Department of Energy Organization Act, Pub. L. 95-91; E.O. 12009, 42 FR 46267.)

In consideration of the foregoing, Part 212 of Chapter II of Title 10 of the Code of Federal Regulations is amended as set forth below, effective December 1, 1978.

Issued in Washington, D.C., October 22, 1978.

David J. Bardin,
Administrator, Economic Regulatory Administration.

1. Section 212.83(c)(2)(iii)(E) is amended by adding a definition of "F_i^t" at the end of the "N" factor to read as follows:

§ 212.83 Price rule.

* * * * * * *

(c) *Allocation of increased costs.* * * *

(2) *Formulae.* * * *

(iii) *Definitions.* * * *

(E) *The "N" factor.* * * *

F_i^t = the marketing cost increase and is the difference between the cost of marketing covered products in the month of measurement and the cost of marketing covered products in the month of May 1973. "Cost of marketing covered products" means the costs attributable to marketing operations with respect to covered products provided that such costs are included only to the extent that they are so attributable under the customary accounting procedures generally accepted and historically and consistently applied by the firm concerned and are not included in computing May 15, 1973 prices, in computing increased product costs, or in computing other increased non-product costs. A refiner must prepare a schedule itemizing the principal costs included in this category and describing the accounting procedures by which they are calculated. The amount of marketing cost increase which may be applied to compute maximum allowable prices for covered products is, however, limited to the extent that such marketing cost increases may:

(I) Allow an increase in the prices of No. 2 heating oil and No. 2-D diesel fuel above the prices otherwise permitted to be charged for such products pursuant to the provisions of this part by an amount not in excess of one cent per gallon with respect to retail sales and one-half cent per gallon with respect to all other sales; and

(II) (aa) Allow an increase in the price of gasoline above the prices otherwise permitted to be charged for gasoline pursuant to this part by an amount equal to increased rental cost (as defined in § 212.92), plus vapor recovery system cost (as set forth in § 212.92) plus, an amount not in excess of three cents per gallon (for marketing costs not otherwise recoverable under this subpart) with respect to all retail sales; and

(bb) Allow an increase in the price of gasoline, during the 360-day period commencing November 19, 1975, above the prices otherwise permitted to be charged for gasoline pursuant to this part (including paragraphs (I) and (II) (aa) of this definition) by an amount not in excess of two cents per gallon in retail sales in Alaska; and

(III) Allow an increase in the prices of gasoline above the prices otherwise permitted to be charged for gasoline pursuant to the provisions of this part by an amount not in excess of three-quarter cent per gallon with respect to all sales other than retail sales; and

(IV) Allow an increase in the prices of middle distillates above the prices otherwise permitted to be charged for middle distillates pursuant to the provisions of this part (including the foregoing paragraph (I) of this definition) by an amount not in excess of one cent per gallon with respect to retail sales and not in excess of one-quarter cent per gallon with respect to all other sales, except that, with respect to retail sales of aviation fuels by fixed base operators after November 30, 1975, allow an increase in the amount otherwise permitted to be charged for that item pursuant to the provisions of this part by an amount not to exceed 4 cents per gallon; and

(V) Allow an increase in the prices of residual fuel oil above the prices otherwise permitted to be charged for residual fuel oil pursuant to the provisions of this part by an amount not in excess of three-fourths cent per gallon with respect to retail sales and one-fourth cent per gallon with respect to all other sales; and

(VI) Allow an increase in the price of propane, in sales after September 30, 1975, above the prices otherwise permitted to be charged for propane pursuant to the provisions of this part by an amount not in excess of three cents per gallon with respect to all retail sales except those to the petrochemicals industry, to public utilities, and to synthetic natural gas plants; 1 cent per gallon with respect to retail sales to the petrochemicals industry, to public utilities, and to natural gas plants and one-half cent per gallon with respect to all other sales; and

(VII) Reflect the total dollar amount of non-product costs attributable to includable amounts of commissions incurred during the period "t" beginning with January 1, 1976 with respect to sales through consignee-agents of the covered product or products of the type "i". The includable amount of commission incurred with respect to each item sold through each consignee-agent is the dollar amount per unit of volume by which the commission in the period "t" exceeds the commission in effect on May 15, 1973: *Provided*, That the includable amount shall be an amount reasonably intended to cover increased non-product costs of the consignee-agent, and that it shall not exceed the amount of the non-product cost price increase that would be permitted if the consignee-agent took title to the product it distributes and were a seller subject to § 212.93(b).

N_i^t = the total increased non-product costs attributable to the specific covered product or products of the type "i" computed under "N_i" for the month preceding the month of measurement ("s") beginning on or after January 1, 1976 but not recovered in sales of that product during the period "t".

N_i^r = the total increased non-product costs attributable to the specific covered product or products of the type "i" computed under "N_i" for all months through the month two months before the month of measurement ("r") beginning on or after January 1, 1976 but not recovered in sales of that product through the period "t".

* * * * * *

2. Section 212.92 is amended by adding, in appropriate alphabetical order, definitions of "increased rental cost" and "vapor recovery system cost" to read as follows:

§ 212.92 Definitions.

* * * * * *

"Increased rental cost "means the rent, in terms of cents per gallon, with respect to that portion of real property leased for purposes of retail gasoline sales, paid to an independent lessor for the calendar month preceding the calendar month in which gasoline is sold minus the rent, stated in terms of cents per gallon, with respect to the same real property leased for purposes of retail gasoline sales, paid to an independent lessor for the month of May 1973. For purposes of this paragraph, "independent lessor" means a lessor which is not directly or indirectly controlled by the lessee concerned or by any firm which directly or indirectly controls that lessee.

* * * * * *

"Vapor recovery system cost" means the unrecovered installation and purchase cost incurred by the seller since May 15, 1973 with respect to a gasoline vapor recovery system required by a Federal, State, or local governmental authority. For purposes of this paragraph, the cost incurred with respect to a vapor recovery system may be recovered in one month or may be prorated over a period of months. Each seller will be required to establish an accounting method by which vapor recovery costs shall be recovered. Once the method is established, the seller will apply the method consistently over the period for the recovery of costs. A seller may not recover in sales of gasoline a total amount attributable to such costs which exceeds the seller's actual vapor recovery system cost. In any one month, the portion of vapor recovery system costs that are available for recovery in that month shall be applied equally to, and shall be deemed to have been recovered on, each gallon of gasoline sold and for purposes of § 212.83(f) shall be deemed to have been recovered before all other non-product costs.

3. Section 212.93 is amended by revising paragraphs (b)(1)(i) and (b)(1)(ii)(A) and by adding new paragraphs (b)(1)(ii)(C) and (b)(1)(ii)(D) to read as follows:

§ 212.93 Price rule.

* * * * * *

(b) * * *

(1) With respect to No. 2 oils and gasoline: (i) In retail sales, a seller may charge 1 cent per gallon in excess of the amount otherwise permitted to be charged for that item pursuant to the provisions of this section, and, with respect to all other sales a seller may charge one-half cent per gallon in excess of the amount otherwise permitted to be charged for that item pursuant to the provisions of this section to reflect non-product cost increases that the seller incurred after May 15, 1973. *Provided*, That, subsequent to December 1, 1978, such non-product cost increases shall not include those costs that are or could have been recovered under either subparagraph (1)(ii)(C) or subparagraph (1)(ii)(D) of this paragraph (b).

(ii)(A) Beginning with March 1974, in all retail sales of gasoline, a seller may charge two cents per gallon of gasoline in excess of the amount otherwise permitted to be charged for that item pursuant to this section, including paragraph (b)(1)(i) of this section, to reflect increases in non-product costs incurred by the seller concerned since May 15, 1973. *Provided*, That, subsequent to December 1, 1978, such non-product cost increases shall not include those non-product costs that are or could have been recovered under either subparagraph (1)(ii)(C) or subparagraph (1)(ii)(D) of this paragraph (b).

* * * * * *

(C) Beginning December 1, 1978, in retail sales of gasoline, a seller may charge an amount in excess of the price otherwise permitted to be charged for that item pursuant to this section (including subparagraphs (1)(i) and (1)(ii)(A) of this paragraph (b)), which reflects increased rental costs not otherwise recovered.

(D) Beginning December 1, 1978, in retail sales of gasoline, a seller may charge an amount in excess of the price otherwise permitted to be charged for that item pursuant to this section (including subparagraphs (1)(i) and (1)(ii)(A) and (C) of this paragraph (b)), which reflects a portion of vapor recovery system cost as set forth in § 212.92 not otherwise recovered.

Title 24—Department of Housing and Urban Development

CHAPTER V—OFFICE OF ASSISTANT SECRETARY FOR COMMUNITY PLANNING AND DEVELOPMENT, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-78-578]

PART 570—COMMUNITY DEVELOPMENT BLOCK GRANTS

Subpart G—Urban Development Action Grants

INTERIM RULE

AGENCY: Department of Housing and Urban Development.

ACTION: Interim rule.

SUMMARY: This rule provides for a change in the method used by the Department for establishing the minimal standards of physical and economic distress for Action Grant applications and explains HUD policy respecting cities which become ineligible for participation in the Action Grant program by virtue of the use of updated data to determine physical and economic distress.

EFFECTIVE DATE: October 30, 1978.

COMMENTS DUE: November 29, 1978.

ADDRESSES: Send comments to: Rules Docket Clerk, Office of General Counsel, Room 5218, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410. Each person submitting a comment should include his/her name and address, refer to the document by the docket number indicated by the headings, and give the reasons for any recommendation. Copies of all written comments received will be available for examination by interested persons in the Office of the Rules Docket Clerk, at the address listed above. The proposal may be changed in light of the comments received.

FOR FURTHER INFORMATION CONTACT:

Sarah Underwood, Office of Action Grant, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-6540.

SUPPLEMENTAL INFORMATION: On January 10, 1978 (43 FR 1602) the Department published final regulations governing the Urban Development Action Grant program.

MINIMUM STANDARDS OF PHYSICAL AND ECONOMIC DISTRESS

Section 570.452, which contains the eligibility requirements for the program, included specific reference to minimum standards of physical and economic distress for fiscal year 1978. In order to avoid constant changes in the regulations, the Department will in the future publish the exact standards which cities must meet in notice form as new data becomes available. Section 570.452 is being changed to delete the minimum standards for fiscal year 1978.

INELIGIBILITY RESULTING FROM DATA CHANGE

In addition, new language is added as § 570.452(c) to describe procedures for handling cities which will become ineligible because of changes in data used to determine the minimum standards of physical and economic distress. The reason for this change is that HUD recognizes the long lead time required for preparation of applications and wishes to protect those cities which are proceeding in good faith. The section formerly numbered § 570.452(c), Results in Providing Housing, has been renumbered as § 570.452(d).

WAIVER OF ELIGIBILITY SUBMISSION DATES

Finally, § 570.455(a) adopts a more flexible approach by the Department in making determinations of eligibility in compelling cases subsequent to 60 days prior to the beginning of the month in which the applicant's first application is to be submitted. The general rule already contained in the regulations, and one based on fairness and administrative convenience, adheres to fixed application submission deadlines and also requires submission of requests for determinations of eligibility at least 60 days prior to the beginning of such month. The present change clarifies the availability of the Secretary's waiver authority under § 570.4 in cases in which the objectives of Subpart G to promote a responsive action program would be frustrated by rigid adherence to this eligibility submission deadline. The present rule addresses only minimum distress standards for fiscal year 1978. This interim regulation provides for necessary standards with respect to fiscal year 1979. In addition the rule would add urgently needed criteria for unemployment data as part of the eligibility requirements under the application. The administration of the program for this fiscal year depends upon the immediate effect of this rule. Accordingly, the Assistant Secretary for CPD has determined that it is impracticable to follow notice of proposed rulemaking procedures and that good cause exists for making these rules effective upon publication. However, interested persons are invited to participate in the making of the final rule by providing written comments. All comments received by November 29, 1978, will be considered in the development of the final rule. Such comments should be filed with the Rules Docket Clerk, Office of General Counsel, Room 5218, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410. Copies of comments received will be available for inspection and copying at that address. The Department has determined that an environmental impact statement is not required with respect to this rule. A copy of the Finding of Inapplicability is available for inspection in the Office of the Rules Docket Clerk, Room 5218, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410. Accordingly, §§ 570.452 and 570.455, 24 CFR Part 570, Subpart G are amended to read as follows:

Section 570.452 (b) (1)(ii) and (c) are amended to read as follows:

§ 570.452 Eligible applicants.

(a) • • •

(b) *Minimum standards of physical and economic distress*—(1) *Metropolitan cities and urban counties* • • •

(ii) Applicants which are metropolitan cities and urban counties must meet three of the six minimum standards of physical and economic distress, based on data for the community as a whole, which HUD will, from time to time, issue in notice form. The HUD notice will establish minimum levels which applicant must meet in the following areas:

(A) Age of housing.
(B) Per capita income.
(C) Population lag/decline.
(D) Unemployment.
(E) Job lag/decline.
(F) Poverty.

If the applicant's percentage of poverty is less than one-half of the HUD established standard, the applicant must meet four of the six factors.

• • • • •

(c) Cities which cease to meet the minimum standards of physical and economic distress by virtue of a change in the data used by HUD, will be permitted to submit an application during the two quarters following the change in the data. HUD will continue to consider those applications which have been submitted and are under review prior to a change in the minimum standards which otherwise make them ineligible.

(d) *Results in providing housing.* • • •

Section 570.455 is amended to read as follows:

§ 570.455 Actions which must be taken prior to submission for an application.

(a) *Determination of eligibility.* In order to provide applicants with a full competitive opportunity to qualify for assistance under this subpart, applicants shall request a determination from the HUD area office on their eligibility to apply for assistance prior to submitting an application. The request for determination shall be submitted on Standard Form 424 as modified by HUD. Small cities (excluding towns and townships) which intend to apply during May 1978, must request a determination of eligibility from the appropriate HUD area office no later than April 14, 1978. Towns and townships will be advised of submission deadlines at a later date in conjunction with notifications of potential eligibility. All potential applicants (except those which have previously been notified of their eligibility) which intend to apply during July 1978, or thereafter, must request a determination of eligibility at least 60 days (or at such later time as authorized by the Secretary pursuant to § 570.4) prior to the beginning of the month in which the applicant's first application is expected to be submitted.

• • • • • •

Issued at Washington, D.C., October 25, 1978.

(Title I, Housing and Community Development Act of 1974 (42 USC 5601 et seq.); Title I, Housing and Community Development Act of 1977 (Pub. L. 95-128); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).)

ROBERT C. EMBRY, Jr.,

Assistant Secretary for Community Planning and Development.

[Docket No. R-78-579]

PART 570—COMMUNITY DEVELOPMENT BLOCK GRANTS

Subpart G—Urban Development Action Grants

INTERIM RULE

AGENCY: Department of Housing and Urban Development.

ACTION: Interim rule.

SUMMARY: The purpose of this rule is to provide the reporting requirements which were reserved in § 570.459(d) for cities which have been awarded an urban development action grant.

EFFECTIVE DATE: October 30, 1978. Comments due: November 29, 1978.

ADDRESSES: Send comments to: Rules Docket Clerk, Office of General Counsel, room 5218, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410. Each person submitting a comment should include his/her name and address, refer to the document by docket number indicated by the headings, and give the reasons for any recommendation. Copies of all written comments received will be available for examination by interested persons in the Office of the Rules Docket Clerk, at the address listed above. The proposal may be changed in light of the comments received.

FOR FURTHER INFORMATION CONTACT:

Sarah Underwood, Office of Action Grants, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-6540.

SUPPLEMENTAL INFORMATION: On January 10, 1978 (43 FR 1602) the Department published final regulations governing the urban development action grant program. Section 570.459(d), which contains the reporting requirements for cities having been awarded an urban development action grant, was reserved. Because the Department has no method for monitoring the implementation of a city's project, it is necessary to make provisions for those cities having been awarded an urban development action grant, was reserved. Because the Department has no method for monitoring the implementation of a city's project, it is necessary to make provisions for those cities having been awarded grants to inform HUD of the project's status.

This interim rule provides urgently needed data for accurately determining the status of projects and is required in order to fulfill congressional reporting requirements. This rule therefore must be published for immediate effect. Accordingly, the Assistant Secretary for Community Planning and Development has determined that it is impracticable to follow notice of proposed rulemaking procedures and that good cause exists for making these rules effective upon publication. However, interested persons are invited to participate in the making of the final rule by providing written comments. All comments received by November 29, 1978, will be considered in the development of the final rule. Such comments should be filed with the Rules Docket Clerk, Office of General Counsel, room 5218, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410. Copies of comments received will be available for inspection and copying at that address.

The Department has determined that an environmental impact statement is not required with respect to this rule. A copy of the finding of inapplicability is available for inspection in the office of the Rules Docket Clerk, room 5218, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410.

Accordingly, § 570.459(d) 24 CFR Part 570, Subpart G, is amended to read as follows:

§ 570.459 Post-approval requirements.

(d) *Reporting requirements.* Commencing upon the date the applicant's grant award is announced by HUD, applicants shall submit quarterly progress reports as specified by the Secretary to HUD. Copies of the reports shall be submitted to the HUD area office and simultaneously to the office of action grants in headquarters no more than 10 days following the end of each calendar quarter. Effective immediately, and until such time as further detailed reporting requirements are specified, the following information is to be provided:

(1) Prior to removal of contract conditions. Describe in detail each step the applicant has taken to secure the documentation needed to satisfy the conditions contained in the grant contract. Also, describe those steps which remain to be taken and provide a schedule for their accomplishment. If problems have been encountered and the project is falling behind the schedules included in the application and the grant contract, describe the nature of the problems, the steps being taken to resolve them, and estimate the time which will be required to overcome the problems.

(2) If the contract conditions have been removed. Describe in detail the status of implementation of the project including the status of construction contracts, plans and specifications and actual construction. Also, include the amount of funding which has been obligated and the amount drawn down. If problems have been encountered and the project is falling behind the schedules included in the application and in the grant contract, describe the nature of the problems, the steps being taken to resolve them, and estimate the time which will be required to overcome the problems.

(Sec. 7(d), of the HUD Act (U.S.C. 3535(d).)

Issued at Washington, D.C., October 25, 1978.

ROBERT C. EMBRY, Jr.
Assistant Secretary for Community Planning and Development.

Directory of Federal Regional Structure

[Revised as of May 1, 1978]

The Directory serves as a guide to the regional administrative structure of the departments and agencies of the Federal Government.

Designed to provide the public with practical information about regional offices, the Directory is particularly useful to citizens residing outside the Nation's Capital.

Included in the Directory is a map showing the 10 standard Federal regions followed by tables listing the key personnel, addresses, and telephone numbers for agencies with offices in those regions. In addition, maps and tables are provided for those agencies with regional structures other than that of the standard regional system.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR notice 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
CSA	CSC		CSA	CSC
	LABOR			LABOR
	HEW/FDA			HEW/FDA

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

NOTE: As of August 14, 1978, Community Services Administration (CSA) documents are being assigned to the Monday/Thursday schedule.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Adminstrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 890—FEDERAL EMPLOYEES HEALTH BENEFITS PROGRAM

Opportunities To Register To Enroll and Change Enrollment; Open Season

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This amendment provides for a Federal employees health benefits (FEHB) program open season from November 13 through December 8, 1978, and in all future years from Monday of the second full workweek in November through Friday of the first full workweek in December.

EFFECTIVE DATE: October 31, 1978.

FOR FURTHER INFORMATION CONTACT:

Edward G. Borchers, Office of Policy Development and Technical Services, Bureau of Retirement, Insurance, and Occupational Health, Room 4334, 1900 E Street NW., Washington, D.C. 20415, 202-632-4684.

SUPPLEMENTAL INFORMATION: On Tuesday, August 8, 1978, there was published in the FEDERAL REGISTER (43 FR 35046) proposed rulemaking explaining the proposed amendment regarding the 1978 and all future open seasons and giving all interested parties an opportunity to submit comments.

Of 15 comments received, all favored the proposed 1978 open season dates and all but one favored having future open seasons as proposed. The opposing commenter suggested that future open seasons should be held for the entire month of November, in lieu of the 4-workweek period proposed by the Commission. The commenter believes that since many Postal Service employees are required to work overtime on weekends after the Thanksgiving holiday, these employees may not have sufficient time to study the health plan brochures during the last part of open season (the first week in December). We believe, however, that our proposal allows all employees sufficient time to study materials and make a decision. As a result, we have not adopted this suggestion.

Accordingly, § 890.301(d)(1) of Part 890, Title 5, Code of Federal Regulations is revised, as set out in the following:

§ 890.301 Opportunities to register to enroll and change enrollments.

* * * * *

(d) *Open season.* (1) An open season will be held from November 13, 1978, through December 8, 1978, and in all future years from the Monday of the second full workweek in November through the Friday of the first full workweek in December, as announced by the Civil Service Commission. During this open season:

(i) An unenrolled employee may register to be enrolled;

(ii) An enrolled employee or annuitant may change to another plan, another option, from self only to self and family, or any combination of these changes.

Title 7—Agriculture

CHAPTER III—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

PART 354—OVERTIME SERVICES RELATING TO IMPORTS AND EXPORTS

Overtime Work at Border Ports, Seaports, and Airports

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: This document amends the regulation which establishes charges for overtime work at border ports, seaports, and airports. Agricultural quarantine inspectors of the U.S. Department of Agriculture are charged with performing inspection duties relating to imports and exports at border ports, seaports, and airports. Such services may be performed outside the regular tour of duty of the inspector when requested by a person, firm, or corporation and the charge for such overtime is recoverable from those requesting the services. The following document amends the regulation entitled, "Overtime Work at Border Ports, Seaports, and Airports," by increasing the hourly rates for such services performed on a Sunday or holiday, or at any other time outside the regular tour of duty. These increases are commensurate with salary increases provided Federal employees in accordance with the Federal Pay Comparability Act of 1970 (Pub. L. 91-656), and Executive Order 12087 dated October 7, 1978.

EFFECTIVE DATE: October 31, 1978.

FOR FURTHER INFORMATION CONTACT:

E. E. Crooks, 301-436-8249.

Pursuant to the authority conferred by the Act of August 28, 1950 (64 Stat. 561; 7 U.S.C. 2260), and the Airport and Airways Development Act Amendments of July 12, 1976 (90 Stat. 882; 49 U.S.C. 1741), § 354.1 of part 354, title 7, Code of Federal Regulations, the first sentence of § 354.1(a) is amended as set forth below:

§ 354.1 Overtime work at border ports, seaports, and airports.

(a) Any person, firm, or corporation having ownership, custody, or control of plants, plant products, animals, animal products, or other commodities or articles subject to inspection, laboratory testing, certification, or quarantine under this chapter and subchapter D of chapter I, title 9 CFR, who requires the services of an employee of the plant protection and quarantine programs, on a Sunday or holiday, or at any other time outside the regular tour of duty of such employee, shall sufficiently in advance of the period of Sunday or holiday or

overtime service request the plant protection and quarantine program in-

Done at Washington, D.C. this 27th day of October 1978.

§ 97.2 Administrative instructions prescribing commuted traveltime.

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

Interpretation § 226.904 of regulation Z, published by the Board together with the amendment, provides,

creditors may but need not use, the Board finds that publication of the

V 43/211 OCT 31 78

overtime service request the plant protection and quarantine program inspector in charge to furnish inspection, laboratory testing, certification, or quarantine service during such overtime, or Sunday or holiday period, and shall pay the Government therefor at the rate of $22.28 per man-hour per employee on a Sunday and at the rate of $14.76 per man-hour per employee for holiday or any other period; except that for any services performed on a Sunday or holiday, or at any time after 5 p.m. or before 8 a.m. on a weekday, in connection with the arrival in or departure from the United States of a private aircraft or vessel, the total amount payable shall not exceed $25 for all inspectional services performed by the Customs Service, Immigration and Naturalization Service, Public Health Service, and the Department of Agriculture; and except that owners and operators of aircraft will be provided service without reimbursement during regularly established hours of service on a Sunday or holiday; and except that the overtime rate to be charged owners and operators of aircraft at airports of entry or other places of inspection as a consequence of the operation of aircraft, for work performed outside of the regularly established hours of service on a Sunday will be $19.44 and for work performed outside of the regularly established hours of service for holiday or any other period will be $11.96 per hour, which charges exclude administrative overhead costs.

* * * * *

(64 Stat. 561 (7 U.S.C. 2260); (Sec. 15 of Pub. L. 94-353, 90 Stat. 882) (49 U.S.C. 1741).)

Determination of the hourly rate for overtime services and of the commuted traveltime allowances depends entirely upon facts within the knowledge of the Department of Agriculture. It is to the benefit of the public that this amendment be made effective at the earliest practicable date. Accordingly, pursuant to the administrative provisions of 5 U.S.C. 553, it is found upon good cause that notice and public procedure on this amendment are impracticable, unnecessary, and contrary to the public interest and good cause is found for making this amendment effective less than 30 days after publication in the FEDERAL REGISTER.

NOTE: The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821, as amended, and OMB Circular A-107.

Done at Washington, D.C. this 27th day of October 1978.

T. D. DARLING,
Acting Deputy Administrator, Plant Protection and Quarantine Programs, Animal and Plant Health Inspection Service.

[FR Doc. 78-30907 Filed 10-30-78; 8:45 am]

[3410-34-M]

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER D—EXPORTATION AND IMPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PROUCTS

PART 97—OVERTIME SERVICES RELATING TO IMPORTS AND EXPORTS

Commuted Traveltime Allowances

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: This document amends administrative instructions prescribing commuted traveltime. This amendment establishes commuted traveltime periods as nearly as may be practicable to cover the time necessarily spent in reporting to and returning from the place at which an employee of Veterinary Services performs overtime or holiday duty when such travel is performed solely on account of overtime or holiday duty. Such establishment depends upon facts within the knowledge of the Animal and Plant Health Inspection Service.

EFFECTIVE DATE: October 31, 1978.

FOR FURTHER INFORMATION CONTACT:

Dr. H. L. Arnold, USDA, APHIS, VS, Federal Building, Room 867, Hyattsville, Md. 20782, 301-436-8684.

Therefore, pursuant to the authority conferred upon the Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service by § 97.1 of the regulations concerning overtime services relating to imports and exports (9 CFR 97.1), administrative instructions 9 CFR 97.2 (1978 ed.), as amended May 5, 1978 (43 FR 19350), prescribing the commuted traveltime that shall be included in each period of overtime or holiday duty, are hereby amended by adding to the respective list therein as follows:

§ 97.2 Administrative instructions prescribing commuted traveltime.

* * * * *

(64 Stat. 561 (7 U.S.C. 2260).)

It is to the benefit of the public that these instructions be made effective at the earliest practicable date. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, pursuant to 5 U.S.C. 553, it is found upon good cause that notice and public procedure on these instructions are impracticable, unnecessary, and contrary to the public interest and good cause is found for making them effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 26th day of October 1978.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A-107.

E. A. SCHILF,
Acting Deputy Administrator, Veterinary Services.

[FR Doc. 78-30756 Filed 10-30-78; 8:45 am]

[6210-01-M]

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Reg. Z]

PART 226—TRUTH IN LENDING

Right of Rescission

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final interpretation.

SUMMARY: The Board hereby adopts an amendment to interpretation § 226.904 of regulation Z concerning disclosures which creditors may use to satisfy certain requirements of the regulation in connection with open end credit plans secured by consumer's residences. Specifically, the amendment modifies the sample disclosure which creditors may use to advise consumers of their rights when a change in the underlying terms of such a credit plan is proposed by a creditor. The amended disclosure is intended to emphasize these rights of the consumer. However, use by a creditor of the disclosure as originally promulgated by the Board shall not constitute a violation of the regulation.

EFFECTIVE DATE: October 31, 1978.

FOR FURTHER INFORMATION CONTACT:

Glenn E. Loney, Section Chief, Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, 202-452-3867.

SUPPLEMENTARY INFORMATION: On August 3, 1978, the Board published (43 FR 34111) an amendment to regulation Z, § 226.9(g)(6) of the regulation, creating an exception to the rescission provisions of the regulation for individual transactions under certain open end credit accounts secured by consumers' residences. Under the terms of that amendment, consumers would not have the right to cancel each individual transaction on such accounts, provided that the specific requirements of the amendment are met.

The amendment provides, among other things, that a creditor may not change the underlying terms of an open end account secured by a customer's home without affording the customer an opportunity to refuse the change in terms. If the customer refuses the proposed change in terms, the creditor need not extend any further credit on the account; however, the customer retains the right to continue to repay any existing obligation on the account under the then existing terms of the account. The amendment requires that a creditor that proposes to change the terms of a customer's account disclose these rights to the customer.

Interpretation § 226.904 of regulation Z, published by the Board together with the amendment, provides, among other things, a sample disclosure which creditors may use to satisfy, as to form and content, the amendment's disclosure requirements in connection with a proposed change in terms. For convenient reference, that sample disclosure is reproduced below:

Section 226.9(g)(6)(iii) (Change in Terms)

NOTICE TO CUSTOMER REQUIRED BY FEDERAL LAW:

(Name of creditor) ————————————

Intends to change the terms of your open end credit account which is secured by your home. You have a right to refuse to accept this change in terms. If you refuse this change in terms, we have the right to refuse to extend any further credit on your open end account and may require you to repay any existing obligation on your account under the present terms of the account. You may exercise your right to refuse the change in terms within three business days of (date disclosure delivered to customer) ———————— by notifying us at (address of creditor's place of business) ———————— by mail or telegram sent not later than midnight of (date) ————————. You may also use any other form of written notice to refuse the change in terms if it is delivered to the above address not later than that time. This notice may be used for that purpose by dating and signing below.

I hereby refuse the change in the terms of my account.

(date) ————————————————————

————————————————————
(customer's signature)

It has been suggested to the Board that the foregoing disclosure, specifically the third sentence thereof, may not sufficiently inform consumers of the rights which they have in the event of a proposed change in terms of open end credit accounts secured by their homes and, further, that the impression may be created that the right to pay any existing obligation without the change in terms is, in fact, a penalty to consumers who refuse such a change.

The Board believes that it may benefit consumers to modify the disclosure set forth above to further emphasize consumers' rights in connection with changes in the terms of open end accounts secured by their homes and to avoid any implication that these rights constitute a penalty. However, by amending the disclosure, the Board does not intend that use of the disclosure as originally published shall constitute a violation of regulation Z.

Inasmuch as the following amendment to interpretation § 226.904 constitutes an interpretive rule within the meaning of 5 U.S.C. § 553 (1976), and, further, because the amendment provides only a sample disclosure which creditors may but need not use, the Board finds that publication of the amendment for public comment prior to final adoption and a delay in the effective date of the amendment are unnecessary.

Accordingly, pursuant to the authority granted in 15 U.S.C. 1604 (1976), the Board hereby amends official Board interpretation of regulation Z, 12 CFR 226.904, effective immediately, by deleting the third sentence of the disclosure captioned "Section 226.9(g)(6)(iii) (Change in terms)" which reads, "If you refuse this change in terms, we have the right to refuse to extend any further credit on your account and may require you to repay any existing obligation on your account under the present terms of the account" and substituting therefor "If you refuse this change in terms, you have the right to continue to repay your existing obligation under the present terms of the account. However, we would then have the right to refuse to extend any further credit, except pursuant to these new terms", so that the disclosure reads as follows:

Section 226.9(g)(6)(iii) (Change in Terms)

NOTICE TO CUSTOMER REQUIRED BY FEDERAL LAW:

(Name of Creditor) ————————————

Intends to change the terms of your open end credit account which is secured by your home. You have a right to refuse to accept this change in terms. If you refuse this change in terms, you have the right to continue to repay your existing obligation under the present terms of the account. However, we would then have the right to refuse to extend any further credit, except pursuant to these new terms. You may exercise your right to refuse the change in terms within three business days of (date disclosure delivered to customer) ———————— by notifying us at (address of creditor's place of business) ———————— by mail or telegram sent not later than midnight of (date) ————————. You may also use any other form of written notice to refuse the change in terms if it is delivered to the above address not later than that time. This notice may be used for that purpose by dating and signing below.

I hereby refuse the change in the terms of my account.

Title 14—Aeronautics and Space

CHAPTER V—NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

PART 1209—BOARDS AND COMMITTEES

Subpart 3—Contract Adjustment Board

AGENCY: National Aeronautics and Space Administration.

ACTION: Final rule.

SUMMARY: The National Aeronautics and Space Administration, is amending its regulation to reflect a change in the cite to the NASA Management Instruction which sets forth the standards and procedures governing requests for extraordinary contractual adjustments, the expansion of the Board from three to five members, and deletion of an obsolete title, "Director of Business Administration."

EFFECTIVE DATE: October 31, 1978.

ADDRESS: Contract Adjustment Board, National Aeronautics and Space Administration, Washington, D.C. 20546.

FOR FURTHER INFORMATION CONTACT:

Helen S. Kupperman, Contract Adjustment Board, 202-755-3927.

SUPPLEMENTARY INFORMATION: The proposed changes will conform the regulation with the way the Board is actually organized and understood by the general public. Since this regulation involves administrative procedural matters it has been determined that no public comment period is required.

Subpart 1209.3 is revised as follows:

Subpart 1209.3—Contract Adjustment Board

Sec.
1209.300 Scope.
1209.301 Authority.
1209.302 Establishment of Board.
1209.303 Function of Board.
1209.304 Membership.
1209.305 Legal advice and assistance.

AUTHORITY: Pub. L. 85-804 and 42 U.S.C. 2473(c)(1).

Subpart 1209.3—Contract Adjustment Board

§ 1209.300 Scope.

This subpart continues in effect the Contract Adjustment Board (hereinafter referred to as "the Board") to consider and dispose of requests for extraordinary contractual adjustments by contractors of the National Aeronautics and Space Administration (hereinafter referred to as NASA).

§ 1209.301 Authority.

(a) The Act of August 28, 1958 (50 U.S.C. 1431-35), (hereinafter referred to as "the Act") empowers the President to authorize departments and agencies exercising functions in connection with the national defense to enter into contracts or into amendments or modifications of contracts and to make advance payments, without regard to other provisions of law relating to the making, performance, amendment, or modification of contracts, whenever the President deems that such action would facilitate the national defense.

(b) Executive Order No. 10789, dated November 14, 1958 (23 FR 8897), authorizes the Administrator, NASA, to exercise the authority conferred by the Act and to prescribe regulations for the carrying out of such authority.

(c) NASA Procurement Regulation, Part 17 (41 CFR Chapter 18), establishes standards and procedures for the disposition of requests for extraordinary contractual adjustments by NASA contractors.

§ 1209.302 Establishment of Board.

The Board was established on May 15, 1961, was continued in effect by NASA Management Issuances (NMI) 1152.5, dated October 25, 1963, NMI 1152.5A, dated October 8, 1971, and NMI 1152.5B, dated February 20, 1976, and is further continued in effect by this regulation.

(a) The Board is authorized to act for an exercise the authority of the Administrator in cases involving request by NASA contractors for extraordinary contractual adjustments under the Act. Such authority will be exercised in accordance with the standards and procedures established by the Administrator, subject to such limitations as the Administrator may prescribe.

(b) The Board shall have the power to approve, authorize or direct any action, including the modification or release of any obligations, and to make all determinations and findings, which are necessary or appropriate for the conduct of its functions, and may adopt such rules of procedure as it considers desirable.

(c) The concurring vote of a majority of the total Board membership shall constitute an action of the Board. Decisions of the Board shall be final but the Board may reconsider and modify, correct or reverse any Board decision previously made.

§ 1209.304 Membership.

The Board will consist of a chairperson and four other members, all of whom shall be appointed by the Administrator.

§ 1209.305 Legal advice and assistance.

The General Counsel of NASA shall provide the Board with all necessary legal advice and assistance.

ROBERT A. FROSCH,
Administrator.

Title 15—Commerce and Foreign Trade

CHAPTER I—BUREAU OF THE CENSUS, DEPARTMENT OF COMMERCE

PART 30—FOREIGN TRADE STATISTICS

Exports of Used Vehicles

AGENCY: Bureau of the Census, Commerce.

ACTION: Final rule.

SUMMARY: This rule amends the Foreign Trade Statistics Regulations to provide that for a period of 6 months, for exports of used vehicles from the United States (including vehicles shipped to Puerto Rico), the exporter or his agent must present the Shipper's Export Declaration bearing that vehicle's identification number to Customs at least 48 hours in advance of exportation; and that carriers may not depart with used vehicles unless and until a copy of the Shipper's Export Declaration approved by Customs has been delivered to the carrier.

EFFECTIVE DATE: November 30, 1978.

FOR FURTHER INFORMATION CONTACT:

Emanuel A. Lipscomb, Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233, 301-763-5342.

SUPPLEMENTARY INFORMATION: On February 24, 1978, a notice of proposed rulemaking was published (43 FR 3510-07) to amend the Foreign Trade Statistics Regulations to provide that for a period of 6 months, for exports of used vehicles from the United States to all destinations, the required Shipper's Export Declaration must show that vehicle's identification number and be presented to Customs by the exporter or his agent at least 48 hours in advance of exportation. The summary information in the notice further provided that carriers must submit such declarations to Customs prior to the departure of such carriers. The sole purpose of this proposed amendment was to assist law enforcement agencies in the deterrence of vehicle theft.

A total of 12 letters of comment was received in response to the proposed changes. Five letters of comment were received from law enforcement agencies, and all were in favor of the proposal. The remaining letters of comments were from carriers, carrier associations, and agents, and expressed objections to the proposals.

DISCUSSION OF MAJOR COMMENTS: Objection was expressed to the wording of proposed § 30.42(c) that "Failure of the exporter (or his agent, including the carrier) to provide Customs at least 48 hours prior • • •," since in those cases where the carrier acts as agent of the exporter, the phrase "exporter or his agent" would render "including the carrier" superfluous. This wording has been changed to eliminate any inference that it is the carrier's responsibility (as carrier) to present the Shipper's Export Declaration to Customs 48 hours in advance of exportation.

In addition, objection was expressed to the proposed requirement, indicated in the summary but not addressed in the amended regulations, that in addition to the exporter's (or his agent's) having to present the Shipper's Export Declaration to Customs for approval at least 48 hours in advance of exportation, the carrier would have to present the Shipper's Export Declaration to Customs prior to exportation of the used vehicle, instead of with the vessel's complete manifest as is normally done. It was argued that no useful purpose would be served by this requirement. The Bureau of the Census agrees. Since in accordance with proposed § 30.42(b) "• • • carriers may not export used vehicles from the United States until *the required Shipper's Export Declaration bearing the notation of its prior receipt by Customs has been received by the carrier*" (italics added), there appears to be no reason to require the carrier to resubmit the declaration in advance of shipment. Since the proposed regulations never carried the stipulation that the carrier file the approved copy of the Shipper's Export Declaration with Customs prior to exportation, no change in the wording of the proposed regulations is required.

Carriers in the United States to Puerto Rico trade objected to the proposal in its entirety. Shipments of used autos to Puerto Rico are handled primarily by only three or four carriers and, in many cases, Shipper's Export Declarations are prepared by the carriers on behalf of their clients. If advance presentation of the Shipper's Export Declaration should be required, it was argued that serious problems would be encountered in storage facilities, scheduling shipments, extra costs, and delays. Moreover, the largest of such carriers described in detail the degree of surveillance already being exercised by that company to avoid exportation of stolen vehicles; e.g., it already furnishes the Federal Bureau of Investigation a list of the vehicle identification numbers prior to exportation; it compares reported vehicle identification numbers with actual vehicle identification numbers and notifies Customs of any discrepancies; etc.

In view of the nature of the objections submitted by the carriers in the United States to Puerto Rico trade, and the limited number of carriers involved, and since Puerto Rico is subject to U.S. jurisdiction, the Bureau of the Census has concluded that where carriers of merchandise from the United States to Puerto Rico make satisfactory arrangements to inform Customs of the vehicle identification numbers of used vehicles scheduled for exportation sufficiently in advance of actual exportation to permit Customs to query its stolen vehicle list and detain any vehicles determined to be stolen, the proposed new rules would be unduly onerous with respect to shipments from the United States to Puerto Rico and may, therefore, be waived by the Foreign Trade Division of the Bureau of the Census. Accordingly, a new sentence is being added to § 30.42 to provide for the granting of exemptions from the new requirements for shipments from the United States to Puerto Rico.

To effect these changes in reporting requirements, the Foreign Trade Statistics Regulations (15 CFR Part 30) are amended as set forth below.

These regulations are to be issued under the authority of Title 13, United States Code, section 302; and 5 U.S.C. 301; Reorganization Plan No. 5 of 1950, Department of Commerce Organization Order No. 35-2A, August 4, 1975, 40 FR 42765.

1. Section 30.7 is amended by the addition of the following sentence, immediately after the first sentence, and preceding the present parenthetical sentence.

§ 30.7 Information required on Shipper's Export Declarations.

• • • (See § 30.42 for additional information required for a limited time on Shipper's Export Declarations covering the exportation of used vehicles to foreign countries.) • • •

2. A new § 30.42 is added to read as follows:

§ 30.42 Special temporary requirements for the exportation of used motor vehicles.

Shipper's Export Declarations covering exports of used motor vehicles, including automobiles, trucks, tractors, buses, motorcycles, special purpose vehicles, self-propelled farm machinery, self-propelled construction equipment, self-propelled special use equipment, and other similar vehicles are subject to the following special provisions:

(a) When a used motor vehicle as defined above is to be exported from the United States to a foreign country, or shipped from the United States to Puerto Rico, exporters (or their agents) shall show on the Shipper's Export Declaration required under these regulations, under the description of commodities, that vehicle's identification number.

(b) Shipper's Export Declarations covering the exportation of used vehicles shall be presented to Customs at the port of exportation at least 48 hours prior to exportation by the exporter (or his agent). One copy of the Shipper's Export Declaration, presented to Customs by the exporter (or his agent), bearing a notation of its prior receipt by Customs, must be delivered to the exporting carrier prior to exportation; and, notwithstanding the provisions of § 30.24 of these regulations relating to the delayed filing of Shipper's Export Declarations and manifests, carriers may not transport used vehicles from the United States until the required Shipper's Export Declaration bearing the notation of its prior receipt by Customs has been received by the carrier.

(c) Failure of the exporter (or his agent) to provide Customs, at least 48 hours prior to exportation, a copy of the required Shipper's Export Declaration containing the vehicle identification number of the used vehicle to be exported shall result in the detention of such vehicle by Customs until there is compliance with the above requirements.

(d) Where carriers of merchandise from the United States to Puerto Rico make satisfactory arrangements to inform Customs of the vehicle identification numbers of used vehicles scheduled for exportation sufficiently in advance of actual exportation to permit Customs to query its stolen vehicle list and detain any vehicles determined to be stolen, such carriers may inform the Foreign Trade Division of the Bureau of the Census of the details of such arrangements and may request waiver of the provisions of § 30.42(a)-(c).

(e) The provisions of § 30.42 shall be effective for a period of six (6) months

only from the effective date of these regulations.

ment. Interested parties were given sixty (60) days in which to submit

sion in the Customs Regulations was inadvertently omitted. The following

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

[Docket No. C-2930]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

John Hancock Mutual Life Insurance Co., et al.

AGENCY: Federal Trade Commission.

ACTION: Final order.

SUMMARY: In settlement of alleged violations of Federal law prohibiting unfair acts and practices and unfair methods of competition, these four (4) consent orders, among other things, require four (4) Boston, Mass., insurance companies to cease interlocking directors by allowing any individual to sit on their boards who is simultaneously sitting on the board of any of the other boards or of any other competitive firms. The consent orders additionally require the companies to initiate prescribed procedures designed to eliminate interlocking directorates, and to submit detailed compliance reports to the Commission annually for a 5-year period.

DATES: Complaint and order issued September 19, 1978.[1]

FOR FURTHER INFORMATION CONTACT:

FTC/C, Alfred F. Dougherty, Jr., Washington, D.C. 20580, 202-523-3601.

SUPPLEMENTARY INFORMATION: On Tuesday, July 11, 1978, there was published in the FEDERAL REGISTER, 43 FR 29797, a proposed consent agreement with analysis in the matter of John Hancock Mutual Life Insurance Co., a corporation; Liberty Mutual Insurance Co., a corporation; New England Mutual Life Insurance Co., a corporation; and State Mutual Life Assurance Co. of America, a corporation, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions, or objections regarding the proposed form of order.

No comments having been received, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart—Interlocking Directorates Unlawfully: § 13.1106 Interlocking directorates unlawfully.

(Sec. 6, 38 Stat. 721 (15 U.S.C. 46). Interprets or applies sec. 5, 38 Stat. 719, as amended (15 U.S.C. 45); sec. 8, 38 Stat. 732; 49 Stat. 717 (15 U.S.C. 19).)

CAROL M. THOMAS,
Secretary.

Title 19—Customs Duties

CHAPTER I—UNITED STATES CUSTOMS SERVICE, DEPARTMENT OF THE TREASURY

[T.D. 78-181]

PART 159—LIQUIDATION OF DUTIES

Certain Fish From Canada; Correction of Notice of Final Countervailing Duty Determination

AGENCY: U.S. Customs Service, Treasury Department.

ACTION: Correction of notice of final countervailing duty determination.

SUMMARY: This notice is to inform the public that a technical correction is being made in the notice of final countervailing duty determination regarding certain fish from Canada.

EFFECTIVE DATE: October 31, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles F. Goldsmith, Economist, Office of Tariff Affairs, Department of the Treasury, 15th Street and Pennsylvania Avenue NW., Washington, D.C. 20220, telephone 202-566-2323.

SUPPLEMENTARY INFORMATION: On June 16, 1978, a notice of "Final Countervailing Duty Determination" concerning fish from Canada, T.D. 78-181, was published in the FEDERAL REGISTER (43 FR 25996). A waiver was concurrently granted.

In that final determination, a statement directing publication of the decision in the Customs Regulations was inadvertently omitted. The following paragraph should have appeared in that notice:

The table in § 159.47(f) of the Customs Regulations (19 CFR 159.47(f)) is amended by inserting after the last entry from Canada under the commodity heading "Fish," the number "78-181" in the column headed "Treasury Decision"; and in the column headed "Action," the words "Bounty declared-rate." (R.S. 251, sections 303, as amended, 624; 46 Stat. 687, 759, 88 Stat. 2049; 19 U.S.C. 66, 1303, as amended, 1624).

Consequently, this entry will immediately precede the entry for certain fish from Canada which was added as a result of T.D. 78-182.

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

OCTOBER 25, 1978.

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER D—DRUGS FOR HUMAN USE

[Docket No. 78N-0123]

PART 446—TETRACYCLINE ANTIBIOTIC DRUGS

Concentrated Liquid Dosage Forms of Tetracycline; Revocation of Provisions for Certification

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) amends the antibiotic drug regulations by revoking provisions for certification of concentrated liquid dosage forms of tetracycline which are labeled and formulated specifically for pediatric use. Less concentrated syrups and suspensions of tetracyclines, 25 milligrams per milliliter (mg/ml) or less, will continue to be certified because of the need for these products in certain geriatric patients, in patients who cannot swallow solid dosage forms, and in children for whom other antibiotics are not likely to be effective or are contraindicated.

EFFECTIVE DATE: January 2, 1979.

FOR FURTHER INFORMATION CONTACT:

Merle L. Gibson, Bureau of Drugs (HFD-140), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4310.

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of May 19, 1978 (43 FR 21694), the Commissioner of Food and Drugs proposed to amend the antibiotic drug regulations by revoking provisions for certification of concentrated liquid dosage forms of tetracyclines which are labeled and formulated specifically for pediatric use. This action was taken because new evidence revealed continued extensive prescribing of concentrated liquid dosage forms specifically formulated for children, from infancy to the age of 8 years, despite known adverse reactions in this age group. Interested persons were invited to submit comments by July 18, 1978. Comments were received from consumers, pharmacists, dentists, physicians, nurses, and professional associations.

The agency received comments objecting to the proposal from persons who interpreted the proposal as intending to remove all liquid dosage forms of tetracycline from the market. These comments stressed that there is a demonstrated need for liquid dosage forms of tetracycline in certain patients who are unable to ingest solid dosage forms and in those few children for whom other antibiotics are not likely to be effective or are contraindicated.

The Commissioner believes the objecting comments misunderstood the proposal, which acknowledged the need for less concentrated syrups and suspensions (25 mg/ml or less) and proposed to revoke only the provisions for certification of the concentrated liquid dosage forms that are labeled and formulated specifically for children. The Commissioner considers the final rule, which is adopted as proposed, as responsive to the objecting comments, because the less concentrated liquid dosage forms will continue to be available.

The remainder of the comments were in agreement with the proposal.

All outstanding certificates of certification or release of batches of tetracycline concentrated syrups and suspensions formulated specifically for pediatric use are revoked on the effective date of this final rule. Recall will be requested to the retail level for all products covered by these certificates. Holders of the certificates will be notified by letter of the revocations of the certificates and of the details of the recall request.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463, as amended (21 U.S.C. 357)) and under authority delegated to the Commissioner (21 CFR 5.1), Part 446 is amended as follows:

1. In § 446.115a, the second sentence of paragraph (a)(1) is revised to read as follows:

§ 446.115a Demeclocycline oral suspension.

(a) * * *

(1) * * * Each milliliter contains demeclocycline equivalent to 15 milligrams of demeclocycline hydrochloride. * * *

* * * * *

2. In § 446.166, the third sentence of paragraph (a)(1) is revised to read as follows:

§ 446.166 Oxytetracycline calcium oral suspension.

(a) * * *

(1) * * * Each milliliter contains a quantity of oxytetracycline calcium equivalent to 25 milligrams of oxytetracycline. * * *

* * * * *

Effective date. This regulation is effective January 2, 1979.

(Sec. 507, 59 Stat. 463, as amended (21 U.S.C. 357))

Dated: October 24, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

Title 28—Judicial Administration

CHAPTER I—DEPARTMENT OF JUSTICE

[Criminal Division Directive No. 2]

PART 0—ORGANIZATION OF THE DEPARTMENT OF JUSTICE

Subpart Y—Authority To Compromise and Close Civil Claims and Responsibility for Judgments, Fines, Penalties, and Forfeitures.

APPENDIX TO SUBPART Y—REDELEGATIONS OF AUTHORITY TO U.S. ATTORNEYS, DEPUTY ASSISTANT ATTORNEYS GENERAL, AND SECTION CHIEFS IN CRIMINAL DIVISION CASES

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: This Criminal Division Directive supersedes Criminal Division Directive No. 1, regarding redelegation of the Assistant Attorney General's authority with respect to compromise of civil penalties and forfeitures and closing of civil claims. This directive lodges settlement authority in U.S. attorneys in cases falling within certain monetary limitations and redelegates the remainder of the Assistant Attorney General's authority to Deputy Assistant Attorneys General and to Section Chiefs.

EFFECTIVE DATE: October 31, 1978.

FOR FURTHER INFORMATION CONTACT:

Donald B. Nicholson, attorney, Government Regulations and Labor Section, Criminal Division, Department of Justice, Washington, D.C. 20530, 202-739-2694.

By virtue of the authority vested in me by part 0 of title 28 of the Code of Federal Regulations as amended, particularly §§ 0.160, 0.162, 0.164, and 0.168, it is hereby ordered that Criminal Division Directive No. 1 (29 FR 7383, June 6, 1964) is deleted and is superseded by the following:

(a) Each U.S. attorney is authorized to accept or reject offers in compromise of claims in behalf of the United States in all cases in which the difference between the gross amount of the original claim (or the forfeiture value of the merchandise claimed) and the proposed settlement does not exceed $60,000, and of claims against the United States in all cases, or in administrative actions to settle, in which the amount of the proposed settlement does not exceed $60,000, and to close (other than by compromise or by entry of judgment) civil claims asserted by the United States in all cases in which the gross amount of the original claim or the forfeiture value of the merchandise claimed does not exceed $60,000 except:

(1) when, for any reason, the compromise or closing of a particular claim, as a practical matter, will control or adversely influence the disposition of other claims which, when added to the claim in question, total more than the respective amounts designated above, or

(2) when the U.S. attorney is of the opinion that because of a question of law or policy presented, or for any other reason, the matter should receive the personnel attention of the Assistant Attorney General.

(b) Notwithstanding the provisions of this Directive, the Assistant Attorney General of the Criminal Division may delegate to U.S. attorneys authority to compromise or close other cases, including those involving amounts greater than as set forth in paragraph (a) above, and up to the maximum limit of his authority, where the circumstances warrant such delegation.

(c) All other authority delegated to me by §§ 0.160, 0.162, and 0.164 of title 28 of the Code of Federal Regulations not falling within the limitations of

paragraph (a) above is hereby redele-

[4510-43-M]

ments governing the correction of errors in applications for recordation

ing the comments received in response to the advance notice, on October 11,

cate; and overpayment of an $8 fee where only a $4 fee is required. The

4. By adding a new paragraph (4) to § 201.16(c) to read as follows:

V 4 3 / 2 1 1 0 C 3 1 7 8 V

paragraph (a) above is hereby redelegated to Section Chiefs in the Criminal Division, except that when a Section Chief is of the opinion that because of a question of law or policy presented, or for any other reason, the matter should receive the personal attention of a Deputy Assistant Attorney General or the Assistant Attorney General, he shall refer the matter to the appropriate Deputy Assistant Attorney General or to the Assistant Attorney General.

(d) Notwithstanding any of the above redelegations, when the agency or agencies involved have objected in writing to the proposed closing or dismissal of a case, or to the acceptance or rejection of an offer in compromise, and the matter cannot be resolved below the Assistant Attorney General level, it must be decided by the Assistant Attorney General.

Dated: October 16, 197[redacted]

PHILIP B. HEYMANN,
Assistant Attorney General, Criminal Division.

Approved:

MICHAEL J. EGAN,
Associate Attorney General.

Title 37—Patents, Trademarks, and Copyrights

CHAPTER II—COPYRIGHT OFFICE, LIBRARY OF CONGRESS

[Docket RM 77-4A]

PART 201—GENERAL PROVISIONS

Recordation and Certification of Coin-Operated Phonorecord Players

AGENCY: Library of Congress, Copyright Office.

ACTION: Final regulations.

SUMMARY: This notice is issued to inform the public that the Copyright Office of the Library of Congress is adopting final amendments to § 201.16 of our regulations. The effects of the amendments are: To establish requirements governing the correction of errors in applications for recordation of coin-operated phonorecord players and in related certificates; to clarify our examination of applications and our treatment of certain time limits imposed by the Copyright Act in connection with the recordation of coin-operated phonorecord players; to modify the requirement for the "full address" of an operator of coin-operated phonorecord players to include post office boxes in certain cases; and to make other technical amendments.

DATE: The final regulations are effective on October 31, 1978.

FOR FURTHER INFORMATION CONTACT:

Susan Aramayo, Chief, Licensing Division, U.S. Copyright Office, Library of Congress, Washington, D.C. 20557, 703-557-1397.

SUPPLEMENTARY INFORMATION: 17 U.S.C. 116 establishes conditions under which operators of coin-operated phonorecord players—commonly referred to as "jukeboxes"—may obtain a compulsory license for the performance of nondramatic musical works.

A compulsory license permits the use of a copyrighted work without the consent of the copyright owner, if certain conditions are met and royalties paid. Section 116 establishes general rules governing the conditions of the compulsory license for coin-operated phonorecord players, and requires the Register of Copyrights to prescribe regulations governing compulsory license applications and the certificates to be affixed to licensed phonorecord players.

Section 116 also sets forth certain time limitations in connection with applications for recordation of jukeboxes: For jukeboxes already in use on January 1, 1978, the application was to be submitted between January 1, 1978, and January 31, 1978; for jukeboxes put into use after January 1, 1978, the application must be submitted before or within 1 month after the date performances are first made available on that player; and for jukeboxes previously recorded in the Copyright Office the application must be submitted between January 1 and January 31 of each succeeding year that the machine is in use. In addition, as an exception to the requirement that applications are to be accompanied by a royalty fee of $8 per player, the statute provides that, if performances "are made available on a particular phonorecord player for the first time after July 1 of any year, the royalty fee to be deposited for the remainder of that year" is $4.

On March 30, 1977, we published in the FEDERAL REGISTER (42 FR 16838) an advance notice of proposed rulemaking in this matter. After considering the comments received in response to the advance notice, on October 11, 1977, we published a proposed regulation (42 FR 54840) and, on October 25, 1977, we held a public hearing on the proposal. After considering the comments made at the hearing and in supplemental filings, on December 20, 1977, we published (42 FR 63779) final regulations implementing section 116. In the light of our experience since January of this year, on August 23, 1978, we adopted interim amendments to the regulations (43 FR 37451). The amendments are fully discussed in the preamble to our notice of August 23, 1978; in summary:

1. We amended § 201.16(b)(1)(ii) to provide that, after consultation with postal officials, we will accept a post office box or similar designation as a jukebox operator's "address" in special cases where no better address for the operator's place of business is possible.

2. We amended § 201.16(c) to state our general operating principle in examining applications for recordation of jukeboxes: We will require the correction of errors appearing on the face of the application, but will generally not go beyond the information in the document itself. This amendment also makes clear that the issuance of a jukebox certificate by the Copyright Office shall not be considered "a determination that the application was properly prepared or that all of the requirements to qualify for a compulsory license have been satisfied."

3. We added a new paragraph (f) to § 201.16 to explain our handling of the time limitations established in the statute for the filing of applications for recordation of jukeboxes and the payment of royalty fees. This amendment: (a) States the general rule that the Copyright Office will not inquire into the timeliness of applications and will accept late filings where a proper fee is paid, for whatever effect a court may accord to such filings; (b) requires that applications filed before June 1 of a particular year and accompanied by $4 fees for listed players be supplemented by a statement that the players will not be put into use until after July 1 of that year; and (c) makes clear that applications filed after July 1 of a particular year and accompanied by $8 fees will be considered by the Copyright Office to cover players first put into use before that date.

4. We added a new paragraph (g) to § 201.16 to deal with situations where jukebox operators discover errors in their applications or certificates. This amendment specifies that corrections (and consequent refunds) will be made after the issuance of certificates in four cases: The duplicate listing of players; the entry of certain erroneous information in the application; Copyright Office error in issuing a certificate; and overpayment of an $8 fee where only a $4 fee is required. The amendment also establishes specific conditions under which corrections and refunds will be made in these cases.

5. We amended § 201.16(b)(2)(i) to require that applications for players that lack serial numbers must give the model number of the player only where that number is known to the operator.

6. We made a technical amendment to § 201.16(d) to correct a typographical error.

Members of the public were given until October 11, 1978, to comment on the interim amendments. One comment, from the American Society of Composers, Authors and Publishers (ASCAP), was received. That comment "fully support[ed]" the interim amendments.

The interim amendments as published on August 23, 1978, are adopted as final and are set forth below.

Dated: October 24, 1978.

BARBARA RINGER,
Register of Copyrights.

DANIEL J. BOORSTIN,
The Librarian of Congress.

FINAL AMENDMENTS

Part 201 of 37 CFR Chapter II is amended:

§ 201.16 [Amended]

1. By revising § 201.16(b)(1)(ii) (as adopted on Jan. 1, 1978) to read as follows:

• • • • • •

(b) • • •
(1) • • •

(ii) The full address of the operator's place of business, including a specific number and street name or rural route. A post office box number or similar designation will not generally be accepted. The Copyright Office will accept a post office box number or similar designation in special cases if, after consulting with officials of the U.S. Postal Service, the Office concludes that no better address for the operator's place of business is possible.

• • • • • •

2. By adding the words "if known;" following the phrase "Its model number" in § 201.16(b)(2)(i).

3. By correcting the phrase "a statement in accordance with section 1746 or title 28 of the United States Code, and signed • • •" in § 201.16(d) to read "a statement in accordance with section 1746 of title 28 of the United States Code, made and signed • • •."

4. By adding a new paragraph (4) to § 201.16(c) to read as follows:

• • • • • •

(c) *Certificate.* • • •

• • • • • •

(4) The Copyright Office will advise jukebox operators of errors or omissions appearing on the face of forms submitted to it, and will require that any such obvious errors or omissions (including errors in the calculation of fees) be corrected before certificates will be issued. However, the issuance of a certificate by the Copyright Office shall establish only the fact, date of issuance, and date of expiration of the certificate; it shall in no case be considered a determination that the application form was properly prepared or that all of the requirements to qualify for a compulsory license have been satisfied.

• • • • • •

5. By adding new paragraphs (f) and (g) to § 201.16 to read as follows:

• • • • • •

(f) *Time limitations.* (1) The Copyright Office may, when it considers it reasonable and appropriate, advise applicants of the time limitations governing the filing of applications and amount of royalty fees as set forth in 17 U.S.C. 116. However, except as set forth in paragraph (f)(2) of this section, the Office will normally not inquire into the date on which performances were actually made available on particular phonorecord players identified in the application or whether such players were previously recorded in the Copyright Office. In the following cases, the Office's acceptance of the application and issuance of a certificate is not to be considered as relieving the operator from any legal consequences arising from the late filing, and shall have only such effect as may be attributed to it by a court of competent jurisdiction: (i) Where, on the date the application covering a particular phonorecord player was received in the Copyright Office, performances had been first made available on that player more than 1 month earlier; and (ii) where, in 1979 and thereafter, a particular phonorecord player had been recorded in the Copyright Office during the previous calendar year, but the application is received after January 31 of the year in question.

(2) In the case of an application that is received in the Copyright Office before June 1 of a particular year, and that is accompanied by a fee of $4 for each player identified in the application, the Copyright Office will not

issue certificates unless the application is accompanied or supplemented

graph (b)(2) of this section. In any such case the Copyright Office will

quest, if it is received in the Copyright Office within the required 30-day

fied check, cashier's check, or money order in the following amount: (A) In

Plan (SIP). Scott Paper Co.'s compli-

ance with the order will preclude suits

the Act for violations of the SIP regulations covered by the order. Citizen suits under section 304 of the Act to

V 43/211 OCT 31 1978

issue certificates unless the application is accompanied or supplemented by a statement that performances will not be made available on such players until after July 1 of that year. The statement shall be in the form of a letter addressed to the Licensing Division of the Copyright Office, and shall be signed by the operator named in the application or the duly authorized agent of that operator. If a business entity is the operator, the signature or name shall be that of an officer if the entity is a corporation, or a partner if the entity is a partnership, and shall be accompanied by the organizational title of that person. The statement shall, for all purposes including section 116(b)(1)(B) of title 17 of the United States Code, be considered a part of the application. The statement described in this paragraph shall not be required in the case of applications covering a particular year received in the Copyright Office after June 1 of that year. In any case, if performances are actually made available for the first time on any players covered by $4 fees on or before July 1 of that year, the Office's acceptance of the application and issuance of a certificate is not to be considered as relieving the operator from any legal consequences arising from the failure to pay the correct fee, and shall have only such effect as may be attributed to it by a court of competent jurisdiction.

(3) If an application received in the Copyright Office after July 1 of any year is accompanied by a royalty fee of $8 for each player identified, the Copyright Office will assume without further inquiry that the application pertains to players on which performances were made available for the first time on or before July 1 of that year.

(g) *Corrections and refunds.* (1) Upon compliance with the procedures and within the time limits set forth in paragraph (g)(3) of this section, corrections to applications for recordation of coin-operated phonorecord players will be made, and corrected certificates and refunds will be issued, in the following cases:

(i) Where the same player, identified by the same serial number or other identifying information, is listed more than once in the same application, or in two or more applications filed during the same year by or on behalf of the same operator. In these cases the operator named in the application shall be entitled to a refund of any duplicate fee paid;

(ii) Where any of the following information was incorrect at the time the application was signed: (A) The operator's name or address; (B) the serial number or name of the manufacturer of a player; or (C) the identifying information required by paragraph (b)(2) of this section. In any such case the Copyright Office will issue a new certificate containing the correct information. Each corrected certificate will be identified by a double asterisk following the name of the manufacturer.

(iii) Where an application contains information that was correct at the time the application was signed but, as the result of Copyright Office error, the certificate contains incorrect information. In this case the Copyright Office will issue a new certificate containing the correct information; and

(iv) Where an application was accompanied by payment of an $8 fee for each phonorecord player listed but, with respect to one or more such players, performances were actually made available for the first time after July 1 of the year in which the application was filed. In this case the operator named in the application shall be entitled to a refund of any excess fee paid and the Copyright Office will issue a new certificate for each player subject to the $4 fee.

(2) Corrected certificates or refunds will not be issued after the issuance of original certificates in the following cases:

(i) Where the application was correct on the date on which the application was signed, but changes (for example, a change in the operator's name or address, or the sale or destruction of a player) took place later;

(ii) Where the application identified one or more players that the operator named in the application never owned or operated, or did not own or operate at the time the application was signed, or where, before the application was signed, an identified player had been destroyed or otherwise rendered permanently incapable of being repaired; or

(iii) In any other case not specifically mentioned in paragraph (g)(1) of this section.

(3) Requests for corrections and refunds in the cases mentioned in paragraph (g)(1) of this section shall be made to the Licensing Division of the Copyright Office, and shall meet the following conditions:

(i) The request must be in writing, must be clearly identifiable as a request for a correction or refund, and, except in the cases described in paragraph (g)(1)(iii) of this section, must be received in the Copyright Office with the appropriate fee, certificate or certificates, and affidavit (where required) before the expiration of 30 days from the date on which the original certificate was issued by the Copyright Office. A request made by telephone or by telegraphic or similar unsigned communication, will be considered to meet this requirement, if it clearly identifies the basis of the request, if it is received in the Copyright Office within the required 30-day period, and if a written request meeting all the conditions of this paragraph (g)(3) of this section is also received in the Copyright Office within 14 days after the end of such 30-day period.

(ii) The original application pertaining to each correction must be sufficiently identified in the request so that it can be readily located in the records of the Copyright Office.

(iii) The original certificate pertaining to each correction or refund must be returned to the Copyright Office within the time period prescribed by paragraph (g)(3)(i) of this section. No request will be processed until the applicable certificate is returned; and

(iv) The request must contain a clear statement of the facts on which it is based, in accordance with the following requirements:

(A) In the case of duplicate listings (paragraph (g)(1)(i)) a precise and accurate identification of the particular player or players must be given.

(B) In the case of incorrect information given in the application (paragraph (g)(1)(ii) of this section) the request must clearly identify the erroneous information and provide the correct information.

(C) In the case of a certificate that contains erroneous information resulting from Copyright Office error (paragraph (g)(1)(iii) of this section) the error must be clearly indicated.

(D) In the case of overpayment within the meaning of paragraph (g)(1)(iv) of this section, the request must be accompanied by an affidavit under the official seal of any officer authorized to administer oaths within the United States, or a statement in accordance with section 1746 of title 28 of the United States Code, made and signed by the operator named in the application of the duly authorized agent of that operator in accordance with paragraph (b)(1)(vi) of this section. The affidavit or statement shall: aver that performances of nondramatic musical works were actually made available on the particular phonorecord player(s) for the first time after July 1 of the year covered by the application; Give the exact date, including month, day, and year on which such performances were first made available and the location where that event took place; specifically identify the particular phonorecord player(s) involved by the same identifying information as given in the application; and include a brief explanation of the reason for the original submission of a $8 fee for those players.

(v) In those cases where corrections or refunds are to be made under paragraph (g)(1) of this section, the request must be accompanied by a certified check, cashier's check, or money order in the following amount: (A) In the case of a duplicate listing (paragraph (g)(1)(i) of this section): $4 for each application involved; (B) in the case of an error in the operator's name or address (paragraph (g)(1)(ii)(A)) or overpayment within the meaning of paragraph (g)(1)(iv) of this section: $4 for each separate original application pertaining to the certificates to be corrected; and (C) in the case of an error in the serial number or name of the manufacturer of the player, or other identifying information (paragraph (g)(1)(ii) (B) and (C) of this section): $4 for each separate certificate to be corrected. No request will be processed until the appropriate fee is received; and

(vi) The request must be signed by the operator named in the application, or the duly authorized agent of the operator, in accordance with paragraph (b)(1)(vi) of this section.

(4) Each request for correction or refund will be made part of the original application in the records of the Copyright Office. Nothing contained in this paragraph (g) shall be considered to relieve the operator from its full obligations under title 17 of the United States Code, including penalties for affixing a certificate to a player other than the one it covers.

(17 U.S.C. 116, 702, 708.)

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FRL 960-2]

PART 65—DELAYED COMPLIANCE ORDERS

Delayed Compliance Order for Scott Paper Co., Everett, Wash.

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: By this rule, the Administrator of EPA issues a delayed compliance order to the Scott Paper Co. The order requires the company to bring air emissions from its sulfite pulp mill at Everett, Wash., into compliance with certain regulations contained in the federally-approved Washington State Implementation Plan (SIP). Scott Paper Co.'s compliance with the order will preclude suits under the Federal enforcement and citizen suit provisions of the Clean Air Act for violation(s) of the SIP regulations covered by the order.

DATE: This rule takes effect on October 31, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr Kenneth Brooks, EPA Region 10, 1200 Sixth Avenue M/S 513, Seattle, Wash. 98101 or telephone 206-399-1387.

SUPPLEMENTARY INFORMATION: On June 9, 1978 the Regional Administrator of EPA's region 10 office published in the FEDERAL REGISTER (43 FR 25147) a notice setting out the provisions of a proposed delayed compliance order for Scott Paper Co. The notice asked for public comments and offered the opportunity to request a public hearing on the proposed order. No public comments or requests for a public hearing were received in response to the proposed notice.

Therefore, a delayed compliance order effective this date is issued to Scott Paper Co. by the Administrator of EPA pursuant to the authority of section 113(d)(2) of the Clean Air Act, 42 U.S.C. 7413(d)(2). The order places Scott Paper Co. on a schedule to bring its sulfite pulp mill at Everett, Wash., into compliance as expeditiously as practicable with Washington Administrative Code (WAC) 18-04-070 and PSAPCA Regulation I, a part of the federally-approved Washington State Implementation Plan. Scott Paper Co. is unable to immediately comply with these regulations. The order also imposes interim requirements which meet sections 113(d)(1)(C) and 113(d)(7) of the Act, and emission monitoring and reporting requirements. If conditions of the order are met, it will permit Scott Paper Co. to delay compliance with the SIP regulations covered by the order until July 1, 1979.

Compliance with the order by Scott Paper Co. will preclude Federal enforcement action under section 113 of the Act for violations of the SIP regulations covered by the order. Citizen suits under section 304 of the Act to enforce against the source are similarly precluded. Enforcement may be initiated, however, for violations of the terms of the order and for violations of the regulations covered by the order which occurred before the order was issued by EPA or after the order is terminated. If the Administrator determined that Scott Paper Co. is in violation of a requirement contained in the order, one or more of the actions required by section 113(d)(a) of the Act will be initiated. Publication of this notice of final rulemaking constitutes final Agency action for the purposes of judicial review under section 307(b) of the Act.

EPA has determined that the order shall be effective upon publication of this notice because of the need to immediately place Scott Paper Co. on a schedule for compliance with the Washington State Implementation Plan.

AUTHORITY: 42 U.S.C. 7413(d), 7601.

Dated: October 24, 1978.

BARBARA BLUM,
Acting Administrator.

In consideration of the foregoing, Chapter 1 of Title 40 of the Code of Federal Regulations is amended as follows:

1. By adding § 65.521 to read as follows:

Subpart WW—Washington

§ 65.521 EPA Approval of State delayed compliance orders issued to major stationary sources.

The State orders identified below have been approved by the Administrator in accordance with section 113(d)(2) of the Act and with this part. With regard to each order, the Administrator has made all the determinations and findings which are necessary for approval of the order under section 113(d) of the Act.

PART 65—DELAYED COMPLIANCE ORDERS

Delayed Compliance Order for Georgia-Pacific Corp., Bellingham, Wash.

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: By this rule, the Administrator of EPA issues a delayed compliance order to the Georgia-Pacific Corp. The order requires the company to bring air emissions from its sulfite pulp mill at Bellingham, Wash. into compliance with certain regulations contained in the federally approved Washington State implementation plan (SIP). Georgia-Pacific Corp.'s compliance with the order will preclude suits under the Federal enforcement and citizen suit provisions of the Clean Air Act for violation of the SIP regulations covered by the order.

DATE: This rule takes effect on October 31, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Kenneth Brooks, EPA Region X, 1200 Sixth Avenue, M/S 513, Seattle, Wash. 98101 or telephone 206-399-1387.

SUPPLEMENTARY INFORMATION: On May 31, 1978, the Regional Administrator of EPA's region X office published in the FEDERAL REGISTER (43 FR 23615) a notice setting out the provisions of a proposed delayed compliance order for Georgia-Pacific Corp. The notice asked for public comments and offered the opportunity to request a public hearing on the proposed order. No public comments or requests for a public hearing were received in response to the proposal notice.

Therefore, a delayed compliance order effective this date is issued to Georgia-Pacific Corp. by the Administrator of EPA pursuant to the authority of section 113(d)(2) of the Clean Air Act, 42 U.S.C. 7413(d)(2). The order places Georgia-Pacific Corp. on a schedule to bring its sulfite pulp mill at Bellingham, Wash. into compliance as expeditiously as practicable with Washington Administrative Code 18-04-070(3) and NWAPA Regulation: Section 451—Emission of Air Contaminants; Visual Standard and Section 455—Emission of Particulate Matter, a part of the federally approved Washington State implementation plan. Georgia-Pacific Corp. is unable to immediately comply with these regulations. The order also imposes interim requirements which meet sections 113(d)(1)(C) and 113(d)(7) of the Act, and emission monitoring and reporting requirements. If the conditions of the order are met, it will permit Georgia-Pacific Corp. to delay compliance with the SIP regulations covered by the order until June 30, 1979.

Compliance with the order by Georgia-Pacific Corp. will preclude Federal enforcement action under section 113 of the Act for violations of the SIP regulations covered by the order. Citizen suits under section 304 of the Act to enforce against the source are similarly precluded. Enforcement may be initiated, however, for violations of the terms of the order, and for violations of the regulation covered by the order which occurred before the order was issued by EPA or after the order is terminated. If the Administrator determined that Georgia-Pacific Corp. is in violation of a requirement contained in the order, one or more of the actions required by section 113(d)(a) of the Act will be initiated. Publication of this notice of final rulemaking constitutes final Agency action for the purposes of judicial review under section 307(b) of the Act.

EPA has determined that the order shall be effective upon publication of this notice because of the need to immediately place Georgia-Pacific Corp. on a schedule for compliance with the Washington State implementation plan. (Authority: 42 U.S.C. 7413(d), 7601).

Dated: October 24, 1978.

BARBARA BLUM,
Acting Administrator.

In consideration of the foregoing, chapter 1 of title 40 of the Code of Federal Regulations is amended as follows:

1. By adding § 65.521 to read as follows:

Subpart WW—Washington

§ 65.521 EPA approval of State delayed compliance orders issued to major stationary sources.

The State orders identified below have been approved by the Administrator in accordance with section 113(d)(2) of the Act and with this part. With regard to each order, the Administrator has made all the determinations and findings which are necessary for approval of the order under section 113(d) of the Act..

Title 41—Public Contracts and Property Management

CHAPTER 6—DEPARTMENT OF STATE

[Dept. Reg. 108.757]

PART 6-1—GENERAL

PART 6-4—SPECIAL TYPES AND METHODS OF PROCUREMENT

International Narcotics Control Program Procurement

AGENCY: Department of State.

ACTION: Final rule.

SUMMARY: This amendment to the Department of State procurement regulations incorporates regulations and procedures for procurement under the International Narcotics Control Program as authorized by section 481 of the Foreign Assistance Act of 1961, as amended (22 U.S.C. 2291), and delegates authority for such procurement.

EFFECTIVE DATE: October 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Harry M. Hite, 703-235-9529.

SUPPLEMENTARY INFORMATION: Effective October 1, 1978, procurement support for the International Narcotics Control Program, formerly administered by the Agency for International development, is transferred to the Department of State. Since procurement under this program is authorized by the Foreign Assistance Act, this amendment will permit utilization of Agency for International Development Regulations (chapter 7 of this title) which prescribe procedures for procurement under the act.

Accordingly, subpart 6-1.1 is amended, and a new part 6-4 is added in chapter 6 of title 41 of the Code of Federal Regulations as follows:

1. In subpart 6-1.1, § 6-1.104 is amended by revising paragraph (a) to read as follows:

§ 6-1.104 Applicability.

(a) The DOSPR and the FPR apply to all procurement of personal property and nonpersonal services (including construction) by the Department of State both within and outside the United States except procurement which is exempt from the Federal Property and Administrative Services Act of 1949, as amended (see 40 U.S.C. 474). Procurement under the International Narcotics Control Program is specifically governed by part 6-4 of this chapter.

• • • • •

2. A new part 6-4 is added to read as follows:

PART 6-4—SPECIAL TYPES AND METHODS OF PROCUREMENT

Subpart 6-4.50—International Narcotics Control Program Procurement

Sec.
6-4.5000 Scope.
6-4.5001 Applicability.
6-4.5002 Procurement authority.
6-4.5003 Interim regulations.
6-4.5004 Procedures.

AUTHORITY: Sec. 621(a), 75 Stat. 445, 22 U.S.C. 2381(a); Sec. 205(c), 63 Stat. 390, as amended, 40 U.S.C. 486(c); Sec. 4, 63 Stat. 111, 22 U.S.C. 2658, as amended.

Subpart 6-4.50—International Narcotics Control Program Procurement

§ 6-4.5000 Scope.

This subpart incorporates by reference regulations and procedures for procurement under the International Narcotics Control Program authorized by section 481 of the Foreign Assistance Act of 1961, as amended (22 U.S.C. 2291), and delegates authority for such procurement.

§ 6-4.5001 Applicability.

The provisions of this subpart apply to procurement under the International Narcotics Control Program both within and outside the United States.

§ 6-4.5002 Procurement authority.

The Chief, Supply and Transportation Division, is designated the chief officer responsible for procurement for the International Narcotics Control Program. In this capacity, this officer has the specific authority to enter into and administer contracts. Unless otherwise directed by the Secretary of State or provided for in the regulations of the Department, this officer shall also provide policy direction and prescribe or approve standards, procedures, and internal instructions for the award and administration of contracts both within and outside the United States, including contracts with individuals for personal services abroad. To accomplish the purposes of the International Narcotics Control Program, implementing authorities contained in the Foreign Assistance Act of 1961, as amended, and in sections 1, 2, and 3 of Executive Order No. 11223 of May 12, 1965 may be utilized to the extent this officer deems necessary or appropriate in the performance of the procurement function. Authority to perform functions under this chapter may be redelegated to subordinate personnel and, on a case-by-case basis, to technically qualified personnel of the Foreign Service located at posts overseas.

§ 6-4.5003 Interim regulations.

The Chief, Supply and Transportation Division, is authorized and empowered to utilize those provisions of chapter 7 of this title (included herein by reference), Agency for International Development Procurement Regulations, including any amendments thereto, which this officer deems necessary and appropriate to accomplish the purposes of procurement under the International Narcotics Control Program.

§ 6-4.5004 Procedures.

Internal instructions will be issued to redesignate counterpart Department of State functions, offices, and positions in lieu of those designated in the Agency for International Development procurement regulations (chapter 7 of this title). Any further implementation material may also be included in such instructions.

(Sec. 621(a), 75 Stat. 445, 22 U.S.C. 2381(a); Sec. 205(c), 63 Stat. 390, as amended, 40 U.S.C. 486(c); Sec. 4, 63 Stat. 111, 22 U.S.C. 2658, as amended.)

Dated: October 12, 1978..

CYRUS R. VANCE,
Secretary of State.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Ch. IX]

[Docket No. AO-382]

MELONS GROWN IN SOUTH TEXAS

Hearing on Proposed Marketing Agreement and Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule and notice of hearing.

SUMMARY: A public hearing will be held beginning 9 a.m. on November 28, 1978, at the Hidalgo County Courthouse, 100 North Closner Street, Edinburg, Tex. 78539, regarding a proposed marketing agreement and order for melons grown in south Texas.

The public hearing is for the purpose of:

(a) Receiving evidence with respect to the economic and marketing conditions which relate to the proposed marketing agreement and order, hereinafter set forth;

(b) Determining whether the handling of melons grown in the proposed production area is in the current of interstate or foreign commerce or directly burdens, obstructs or affects interstate or foreign commerce;

(c) Determining whether there is a need for a marketing agreement or order regulating the handling of such melons; and

(d) Determining whether the proposed marketing agreement and order or appropriate modification thereof will tend to effectuate the declared policy of the act.

DATES: Hearing begins November 28, 1978.

ADDRESS: Hearing will be held at: Auditorium of the Hidalgo County Courthouse, 100 North Closner Street, Edinburg, Tex. 78539.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, AMS, U.S. Department of Agriculture, Washington, D.C. 20250, phone 202-447-6393.

SUPPLEMENTARY INFORMATION: The proposed marketing agreement and order, the provisions of which are as follows, were submitted with a request for a hearing thereon by the South Texas Melon Steering Committee. The hearing is called pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900). The proposed marketing agreement and order have not received the approval of the Secretary of Agriculture.

DEFINITIONS

§ .1 *Secretary.*

"Secretary" means the Secretary of Agriculture of the United States, or any other officer or employee of the Department of Agriculture to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in his stead.

§ .2 *Act.*

"Act" means Public Act No. 10, 73d Congress (May 12, 1933), as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674).

§ .3 *Person.*

"Person" means an individual, partnership, corporation, association, or any other business unit.

§ .4 *Production area.*

"Production area" means the counties of Bee, Brooks, Cameron, Duval, Hidalgo, Jim Hogg, Jim Wells, Kenedy, Kleberg, La Salle, Live Oak, McMullen, Nueces, Refugio, San Patricio, Starr, Webb, Willacy, and Zapata in the State of Texas.

§ .5 *Melons.*

"Melons" means all varieties of *Cucumis melo*, commonly called muskmelons and including but not limited to varieties *reticulatus* and *inodorus*, grown in the production area. Such varieties include cantaloupes, honeydew and honey ball melons. Watermelons (*Citrullus* vulgaris) are not included in the foregoing definition.

§ .6 *Handler.*

"Handler" is synonymous with "shipper" and means any person (except a common or contract carrier of melons owned by another person) who handles melons or causes melons to be handled.

§ .7 *Handle.*

"Handle" or "ship" means to harvest, grade, package, sell, transport, or in any other way to place melons grown in the production area, or cause such melons to be placed, in the current of commerce within the production area or between the production area and any point outside thereof. Such term shall not include the transportation, sale, or delivery within the production area of field-run melons to a person for the purpose of having such melons prepared for market.

§ .8 *Grower.*

"Grower" is synonymous with "producer" and means any person engaged in a proprietary capacity in the production of melons for market.

§ .9 *Committee.*

"Committee" means the South Texas Melon Committee established pursuant to § .22.

§ .10 *Fiscal period.*

"Fiscal period" means the annual period beginning and ending on such dates as may be approved by the Secretary pursuant to recommendations of the committee.

§ .11 *Grade, size, and maturity.*

"Grade," "size," and "maturity" mean, respectively, any of the officially established grade, size, or maturity definitions as set forth in the U.S. Standards for Grades of Cantaloupes (§§ 2851.475-2851.494(c) of this title) or U.S. Standards for Grades of Honey Dew and Honey Ball Type Mellons (§§ 2851.3740-2851.3749 of this title), including amendments, modifications, or variations thereof, or, such other grades, sizes, and maturities as may be recommended by the committee and approved by the Secretary.

§ .12 *Grading.*

"Grading" is synonymous with "preparing melons for commercial market" and means sorting or separation of melons into grades, sizes, maturities, or packs, or any combination thereof, for handling.

§ .13 *Pack.*

"Pack" means a quantity of melons

if he handles melons, shall be eligible for selection as a grower member on

(a) Shifts in melon acreage within the districts and within the production

subsidiaries, affiliates, and representatives in designating nominees for com-

tion, but such selection shall be made on the basis of representation pro-

violation of the provisions of this part; and

(d) To recommend to the Secretary

V 4 3 / 2 1 1 1 0 C 3 1 7 8 V

§ .13 *Pack.*

"Pack" means a quantity of melons specified by grade, size, weight, or count, or by type or conditions of container, or any combination of these recommended by the committee and approved by the Secretary.

§ .14 *Container.*

"Container" means any carton, crate, box, bag, hamper, pallet bin, package, basket, bulk load, or any other type of receptacle used in handiing melons.

§ .15 *Varieties.*

"Varieties" means and includes all classifications, subdividions, or types of melons according to those definitive characteristics now and hereinafter recognized by the U.S. Department of Agriculture or recommended by the committee, and approved by the Secretary.

§ .16 *Export.*

"Export" means shipment of melons to any destination which is not within the 48 contiguous States, or the District of Columbia, of the United States.

§ .17 *District.*

"District" means each of the geographic divisions of the production area initially established pursuant to § .24 or as reestablished pursuant to § .25.

§ .18 *Part and subpart.*

"Part" means the Order Regulating the Handling of Melons in South Texas and all rules and regulations, and supplementary orders issued thereunder. The aforesaid Order Regulating the Handling of Melons Grown in South Texas shall be a "subpart" of such "part."

COMMITTEE

§ .22 *Establishment and membership.*

(a) There is hereby established a South Texas Melon Committee, consisting of ten (10) members, to administer the terms and provisions of this part. Six members shall be growers, three members shall be handlers, and one shall be a public member. Each shall have an alternate who shall have the same qualifications as the member.

(b) Each member, other than the public member, shall be an individual who is, prior to his selection and during his term of office (1) a resident of the production area, and (2) a grower or handler, or an officer or employee of a grower or handler, or of growers' cooperative marketing organization.

(c) Five members shall be growers from district 1 and one members shall be a grower from district 2. No person, if he handles melons, shall be eligible for selection as a grower member on the committee unless at least 100 percent of the melons handled by him during the fiscal period immediately preceding his proposed selection to the committee were his own production, or unless such person is an officer or employee of a growers' cooperative marketing association. Three members shall be handlers from district 1.

(d) The public member and alternate shall be a resident of the production area and be neither a grower nor a handler and shall have no direct financial interest in the commercial production, financing, buying, packing or marketing of melons, except as a consumer, nor shall such person be a director, officer or employee of any firm so engaged.

§ .23 *Term of office.*

(a) Except as otherwise provided in paragraph (b) of this section, the term of office of committee members and their respective alternates shall be for 2 years and shall begin as of March 1 and end the last day of February or for such other 2-year period as the committee may recommend and the Secretary approve. The terms shall be so determined that approximately one-half of the total committee membership shall terminate each year. Members and alternates shall serve in such capacity for the portion of the term of office for which they are selected and have qualified, and until their respective successors are selected and have qualified;

(b) The term of office of the initial members and alternates shall begin on the effective date of this subpart. Approximately one-half the initial committee members and alternates shall serve for a 1 year term.

§ .24 *Districts.*

To determine a basis for selecting committee members, the following districts of the production area are hereby initially established:

District No. 1: (Lower Valley) the counties of Cameron, Hidalgo, Starr, Brooks, Kleberg, Jim Hogg, Kenedy, and Willacy in the State of Texas.

District No. 2: (Laredo) the counties of Zapata, Webb, Duval, Jim Wells, Nueces, San Patricio, La Salle, McMullen, Live Oak, Bee, and Refugio in the State of Texas.

§ .25 *Redistricting.*

The committee may recommend, and pursuant thereto, the Secretary may approve, the reapportionment of members among districts, and the reestablishment of districts within the production area. In recommending any such changes, the committee shall give consideration to:

(a) Shifts in melon acreage within the districts and within the production area during recent years;

(b) The importance of new production in its relation to existing districts;

(c) The equitable relationship of committee membership and districts; and

(d) Other relevant factors. No change in districting or in apportionment of members within districts may become effective less than 30 days prior to the date on which terms of office begin each year and no recommendations for such redistricting or reapportionment may be made less than 6 months prior to such date.

§ .26 *Nominations.*

(a) Initial members. For nominations to the initial committee, the meeting or meetings may be sponsored by the U.S. Department of Agriculture or by any agency or group requested to do so by the Department. The nominations, resulting from these meetings, for each of the six initial grower and three initial handler members of the committee, together with nomination for the initial alternate members for each position shall be submitted to the Secretary prior to the effective date of this subpart. In the event nominations for initial members and alternate members of the committee are not filed pursuant to, and within the time specified in this section, the Secretary may select such initial members and alternate members without regard to nominations, but selection shall be on the basis of the representation provided for in § .22.

(b) Successor members. (1) The committee shall hold or cause to be held, not later than January 15 of each year, or such other date as may be specified by the Secretary, a meeting or meetings of growers and handlers in each district for the purpose of designating at least one nominee for each position as member and for each position as alternate member of the committee which is vacant, or which is about to become vacant;

(2) The names of nominees shall be supplied to the Secretary at such time and in such manner and form as he may prescribe;

(3) Only growers may participate in designating grower nominees and only handlers may participate in designating handler nominees to the committee;

(4) Only growers and handlers who are present at such nomination meetings, or represented at such meetings by a duly authorized employee, may participate in the nomination and election of nominees for members and their alternates.

(c) Each person, whether grower or handler, is entitled to cast only one vote on behalf of himself, his agents,

subsidiaries, affiliates, and representatives in designating nominees for committee members and alternates. An eligible voter's privilege of casting only one vote shall be construed to permit a voter to cast one vote for each position to be filled;

(d) The public member and alternate member shall be nominated by the members of the committee. The public member and alternate member shall not be growers or handlers, or employees of growers or handlers. The committee shall recommend rules for receiving names of persons to be considered for nomination to the public member and alternate positions. Rules shall also be recommended for establishing eligibillty of persons nominated to the public member and alternate positions. The persons nominated for the public member and alternate positions shall be submitted by the incumbent committee to the Secretary by January 15, or such other date recommended by the committee and approved by the Secretary, of the years the terms expire together with information deemed pertinent by the committee or as requested by the Secretary. The names of the nominees for the initial public member and alternate shall be submitted to the Secretary not later than 90 days after the first regular meeting of the initial South Texas Melon Committee.

§ .27 *Selection.*

Committee members and alternates shall be selected by the Secretary on the basis of representation provided for in § .22 from nominations made pursuant to § .26.

§ .28 *Failure to nominate.*

If nominations, including initial nominations, are not made within the time and manner prescribed in § .26, the Secretary may, without regard to nominations, select the members and alternates on the basis of the representation provided for in § .22.

§ .29 *Acceptance.*

Any person selected by the Secretary as member or as an alternate member of the committee shall, prior to serving as such, qualify by filing a written acceptance with the Secretary within the time period specified by the Secretary.

§ .30 *Vacancies.*

To fill committee vacancies, the Secretary may select members or alternates from nominees on the latest nomination reports or from nominations made in the manner specified in § .26 or from other eligible persons. If the names of nominees to fill any such vacancy are not made available to the Secretary within 30 days after such vacancy occurs, the vacancy may be filled without regard to nomination, but such selection shall be made on the basis of representation provided for in § .22.

§ .31 *Alternate member.*

An alternate member of the committee shall act in the place and stead of the member for whom he is an alternate, during such member's absence or when designated to do so by such member. In the event both a member of the committee and his alternate are unable to attend a commmittee meeting, the member or his alternate or the committee, in that order, may designate another alternate from the same district and the same group (handler or grower) to serve in such member's stead. In the event of the death, removal, resignation, or disqualification of a member, his alternate shall act for him until a successor of such member is selected and has qualified. The committee may request the attendance of alternates at any or all meetings, notwithstanding the expected or actual presence of the respective members.

§ .32 *Procedure.*

(a) Seven members of the committee shall be necessary to constitute a quorum and the same number of concurring votes shall be required to pass any motion or approve any committee actions.

(b) In assembled meetings all votes shall be cast in person. However, the committee may provide for meetings by telephone, telegraph, or other means of communication and any vote cast at such meetings shall be promptly confirmed in writing and recorded in the minutes of each meeting so as to reflect how each member voted.

§ .33 *Expenses and compensation.*

Members and alternates, when serving as members of the committee, shall serve without compensation but shall be reimbursed for such expenses authorized by the committee and necessarily incurred by them in attending committee meetings and in the performance of their duties under this part: *Provided*, That the committee at its discretion may request the attendance of one or more alternates at any or all meetings notwithstanding the expected or actual presence of the respective members and may pay expenses as aforesaid.

§ .34 *Power.*

The committee shall have the following powers:

(a) To administer the provisions of this part in accordance with its terms;

(b) To make rules and regulations to effectuate the terms and provisions of this part;

(c) To receive, investigate, and report to the Secretary complaints of violation of the provisions of this part; and

(d) To recommend to the Secretary amendments to this part.

§ .35 *Duties.*

The committee shall have, among others, the following duties:

(a) As soon as practicable after the beginning of each term of office, to meet and organize, to select a chairman and such other officers as may be necessary, to select subcommittees, and to adopt such rules, regulations, and bylaws for the conduct of its business as it deems necessary, and to recommend nominees for the public member and alternate;

(b) To act as intermediary between the Secretary and any grower or handler;

(c) To furnish to the Secretary such available information as he may request;

(d) To appoint such employees, agents, and representatives as it may deem necessary, to determine the compensation and define the duties of each such person, and to protect the handling of committee funds through fidelity bonds;

(e) To investigate from time to time and to assemble data on the growing, harvesting, shipping, and marketing conditions with respect to melons;

(f) To recommend research projects to the Secretary in accordance with this part;

(g) To notify handlers of each meeting of the committee to consider recommendations for regulations and of all regulatory actions taken which might affect growers or handlers and to provide such notification to producers through appropriate news releases or such other means as may be available to the committee;

(h) To give the Secretary the same notice of meetings of the committee and its subcommittee as is given to its members;

(i) To prepare a marketing policy;

(j) To recommend marketing regulations to the Secretary;

(k) To recommend rules and procedures for, and to make determination in connection with appropriate safeguards;

(l) To keep minutes, books, and records which clearly reflect all of the acts and transactions of the committee and such minutes, books, and records shall be subject to examination at any time by the Secretary or his authorized agent or representative. Minutes of each committee meeting shall be reported promptly to the Secretary.

(m) Prior to or at the beginning of each fiscal period, to prepare a budget or anticipated expenses for such fiscal period, together with a report thereon;

(n) To prepare periodic statements of the financial operations of the com-

mittee and to make copies of each such statement available to producers

§ .42 *Assessments.*

(a) The funds to cover the commit-

is responsible, and shall execute such assignments and other instruments as

applied by the committee at the end of such fiscal period to any outstanding obligations due the committee from

packs of melons differently for different varieties, for different districts, for different markets, for different con-

Service and are covered by a valid inspection certificate, except when re-

V 43/211 OCT 31 1978

mittee and to make copies of each such statement available to producers and handlers for examination at the office of the committee;

(o) To prepare and forward to the Secretary, prior to the last day of each fiscal period, an annual report, and make a copy available to each handler and grower who requests it. This annual report shall contain at least:

(1) A complete review of the regulatory operations during the fiscal period.

(2) An appraisal of the effect of such regulatory operations upon the melon industry; and

(3) Any recommendations for changes in the program.

(p) To cause the books of the committee to be audited by a competent accountant at least once each fiscal period and at such other times as the committee may deem necessary or as the Secretary may request. The report of such audit shall show the receipt and expenditure of funds collected pursuant to this part. Two copies of such report shall be furnished to the Secretary and a copy of each such report shall be made available at the principal office of the committee for inspection by growers and handlers; and

(q) To consult, cooperate, and exchange information with other marketing order committees and other individuals or agencies in connection with all proper activities and objectives under this part.

EXPENSES AND ASSESSMENTS

§ .40 *Expenses.*

The committee is authorized to incur such expenses as the Secretary finds are reasonable and likely to be incurred during each fiscal period by the committee for its maintenance and functioning, and for such purposes as the Secretary, pursuant to this subpart, determines to be appropriate. Each first handler's pro rata share of such expenses shall be proportionate to the ratio between the total quantity of melons handled by him as the first handler thereof during a fiscal period and the total quantity of melons so handled by all handlers as first handlers thereof during such fiscal period.

§ .41 *Budget.*

Prior to or at the beginning of each fiscal period and as may be necessary thereafter, the committee shall prepare an estimated budget of income and expenditures necessary for the administration of this part. The committee may recommend a rate of assessment calculated to provide adequate funds to defray its proposed expenditures. The committee shall present such budget to the Secretary with an accompanying report showing the basis for its calculations.

§ .42 *Assessments.*

(a) The funds to cover the committee's expenses shall be acquired by the levying of assessments upon handlers as provided for in this subpart. Each handler who first handles melons shall pay assessments to the committee upon demand, which assessments shall be in payment of such handler's pro rata share of the committee's expenses;

(b) Assessments shall be levied during each fiscal period upon handlers at a rate per unit established by the Secretary. Such rates may be established upon the basis of the committee's recommendations and other available information;

(c) At any time during or after a given fiscal period the committee may recommend the approval of an amended budget and an increase in the rate of assessment in conformance with § .41. Upon the basis of such recommendations, or other available information, the Secretary may approve an amended budget and increase the assessment rate. Such increase shall be applicable to all melons which were handled by each first handler thereof during such fiscal period.

(d) The payment of assessments for the maintenance and functioning of the committee may be required irrespective of whether particular provisions of this part are suspended or become inoperative;

(e) To provide funds for the administration of the provisions of this part the committee may accept the payment of assessments in advance;

(f) If a handler does not pay his assessment within the time prescribed by the committee, the assessment may be increased by a late payment charge or an interest charge at rates prescribed by the committee with the approval of the Secretary.

§ .43 *Accounting.*

(a) All funds received by the committee pursuant to the provisions of this part shall be used solely for the purposes specified in this part. At the end of the fiscal period an annual financial audit shall be conducted by a competent accountant and two copies sent to the Secretary;

(b) The Secretary may at any time require the committee, its members and alternates, employees, agents, and all other persons to account for all receipts and disbursements, funds, property, or records for which they are responsible. Whenever any person ceases to be a member of the committee or alternate, he shall account to his successor, the committee, or to the person designated by the Secretary, for all receipts, disbursements, funds, and property (including but not limited to books and other records) pertaining to the committee's activities for which he is responsible, and shall execute such assignments and other instruments as may be necessary or appropriate to vest in the successor, the committee, or person designated by the Secretary, the right to all such property and funds and all claims vested in such person;

(c) The committee may make recommendations to the Secretary for one or more of the members thereof, or any other person to act as a trustee for holding records, funds, or any other committee property during periods of suspension of this part, or during any period or periods when regulations under this part are not in effect, and, if the Secretary determines such action appropriate, he may direct that such person or persons may act as such trustee or trustees.

§ .44 *Excess funds.*

(a) If, at the end of a fiscal period the assessments collected are in excess of expenses incurred, each handler entitled to a proportionate refund of any such assessments which represent payments by the handler in excess of his pro rata share, shall be credited with such refund against his operations of the following fiscal period or such excess shall be accounted for in accordance with one of the following:

(1) The committee, with the approval of the Secretary, may establish an operating monetary reserve and may carry over to subsequent fiscal periods excess funds in a reserve so established, except funds in the reserve shall not exceed approximately two fiscal periods' expenses. Such reserve funds may be used (i) to defray any expenses authorized under this part, (ii) to defray expenses during any fiscal period prior to the time assessment income is sufficient to cover such expenses, (iii) to cover deficits incurred during any fiscal period when assessment income is less than expenses, (iv) to defray expenses incurred during any period when any or all provisions of this part are suspended or are inoperative, and (v) to cover necessary expenses of liquidation in the event of termination of this part. Any funds remaining after termination should be refunded to handlers on a pro rata basis. If it is found impracticable to return such remaining funds to handlers, such funds shall be disposed of in such manner as the Secretary may determine to be appropriate;

(2) If such excess is not retained in a reserve or used to defray necessary expenses of liquidation, as provided for in subparagraph (1) of this paragraph, it shall be refunded proportionately to the handlers from whom collected, except any sum paid by any handler in excess of his pro rata share of the expenses during any fiscal period may be applied by the committee at the end of such fiscal period to any outstanding obligations due the committee from such handler.

RESEARCH AND DEVELOPMENT

§ .48 *Research and development.*

The committee, with the approval of the Secretary, may establish or provide for the establishment of production research, marketing research, and development projects designed to assist, improve, or promote the marketing, distribution, consumption, or efficient production of melons. The expenses of such projects shall be paid from funds collected pursuant to § .42.

REGULATIONS

§ .50 *Marketing policy.*

(a) Prior to or at the same time initial recommendations in any fiscal period are made pursuant to § .51, and as the Secretary may require, the committee shall prepare a marketing policy statement. Notice of such marketing policy shall be given to producers, handlers, and other interested parties by bulletins, newspapers, or other appropriate media, and copies thereof shall be submitted to the Secretary and shall be available at the committee office to all interested parties;

(b) Marketing policy statements relating to recommendations for regulations shall give appropriate consideration to melon supplies for the remainder of the season, with special consideration to:

(1) Estimates of total supplies including grade, size, and quality thereof, in the production area;

(2) Estimates of supplies of melons in competing areas;

(3) Estimates of supplies of other competing commodities;

(4) Market prices by grades, sizes, containers, and packs;

(5) Anticipated marketing problems;

(6) Level and trend of consumer income; and

(7) Other relevant factors.

§ .51 *Issuance of regulations.*

(a) The Secretary shall limit by regulation the handling of melons when he finds from the recommendations and information submitted by the committee, or from other available information, that such regulations would tend to effectuate the declared policy of the act.

(b) Such regulations may:

(1) Limit the handling of particular grades, sizes, maturities, qualities, or packs, or any combination thereof, of any or all varieties of melons during any period;

(2) Limit the handling of particular grades, sizes, naturities, qualities, or packs of melons differently for different varieties, for different districts, for different markets, for different containers, or any combination of the foregoing, during any period;

(3) Fix the size, capacity, weight, dimension, or pack of the container, or containers, which may be used in the packaging or handling of melons, including appropriate container markings to identify the contents thereof.

(c) The regulations or any portions of such regulations issued hereunder may be amended, modified, suspended, or terminated by the Secretary whenever it is determined:

(1) That such action is warranted upon recommendation of the committee or other available information;

(2) That such action is essential to provide relief from inspection, assessment, or regulations under paragraph (b) of this section for minimum quantities less than customary commercial transactions; or

(3) That regulations issued hereunder obstruct or no longer tend to effectuate the declared policy of the act.

§ .54 *Handling for special purposes.*

Regulations in effect pursuant to § .42, § .52, or § .60 may be modified, suspended, or terminated by the Secretary, upon recommendation of the committee, to facilitate handling of melons for: (a) Relief or charity, (b) experimental purposes, (c) exports, and (d) other special purposes, which may be recommended by the committee and approved by the Secretary.

§ .55 *Safeguards.*

The committee, with the approval of the Secretary, may establish, through rules and regulations, the requirements with respect to proof that shipments made pursuant to § .54 were handled and used for the purpose stated.

§ .56 *Notification of regulation.*

The Secretary shall promptly notify the committee of regulations issued and of any modification, suspension, or termination thereof. The committee shall give notice thereof to all handlers of melons in the production area. In addition, the committee shall make the information available to growers through appropriate news releases or such other means as may be available.

INSPECTION

§ .60 *Inspection and certification.*

(a) Whenever the handling of melons is regulated pursuant to § .52 or at other times when recommended by the committee and approved by the Secretary, no handler shall handle melons unless they are inspected by an authorized representative of the Federal-State Inspection Service and are covered by a valid inspection certificate, except when relieved from such requirements pursuant to § .52(c), or § .54, or paragraph (b) of this section. The cost of such inspection shall be borne by the applicant.

(b) Regrading, resorting, repacking any lot of melons, or breaking any lot (without continuing identification of applicable inspection or subcertification thereof) shall invalidate any applicable inspection certificate insofar as the requirements of this section are concerned. No handler shall handle melons after a lot has been broken, regraded, repacked, or resorted, or in any other way additionally prepared for market, unless such melons are inspected by an authorized representative of the Federal or Federal-State Inspection Service. Such inspection requirements on regraded, resorted, repacked, or broken lots of melons may be modified, suspended or terminated upon recommendation by the committee, and approval of the Secretary.

(c) Insofar as the requirements of this section are concerned, the length of time for which an inspection certificate is valid may be established by the committee with the approval of the Secretary.

(d) When melons are inspected in accordance with the requirements of this section, a copy of each inspection certificate issued shall be made available to the committee by the Inspection Service.

(e) The committee may recommend and the Secretary may require that no handler shall transport or cause the transportation of melons by motor vehicle or by other means unless such shipment is accompanied by a copy of the inspection certificate issued thereon, or such other documents as may be required by the committee. Such certificates or documents shall be surrendered to proper authorities at such time and in such manner as may be designated by the committee, with the approval of the Secretary.

REPORTS

§ .80 *Reports.*

Upon request of the committee, made with the approval of the Secretary, each handler shall furnish to the committee, in such manner and form and at such time as it may prescribe, such reports and other information as may be necessary for the committee to perform its duties under this part.

(a) Such reports may include, but are not necessarily limited to, the following:

(1) The number of acres of melons and the approximate dates planted, for all melons which will be handled by each handler;

(2) The quantities of melons received by a handler;

(3) Identification certificates relating to the melons which were handled pursuant to § .52 or § .54 or

ance therewith prior to such disapproval by the Secretary.

tions imposed upon the members of the committee and upon the said trustees.

person, circumstance, or thing, shall not be affected thereby.

ACTION: Public Hearing On Proposed Rulemaking.

SUMMARY: The hearing is being held

spect to the economic and marketing conditions which relate to the proposed marketing agreement and order,

V 4 3 / 2 1 1

0 C 3 1 7 8

(3) Identification certificates relating to the melons which were handled pursuant to § .52 or § .54 or both.

(b) All such reports shall be held under appropriate protective classification and custody by the committee, or duly appointed employees thereof, so that the information contained therein which may adversely affect the competitive position of any handler in relation to the handlers will not be disclosed. Compilations of general reports from data submitted by handlers is authorized, subject to the prohibition of disclosure of individual handlers' identities or operations.

(c) Each handler shall maintain for at least 2 succeeding years such records and documents on melons received by him as may be necessary to verify reports submitted to the committee pursuant to this section.

(d) For the purpose of assuring compliance with recordkeeping requfrements and certifying reports of handlers, the Secretary and the committee, through their duly authorized employees or agents, shall have access to any premises where applicable records are located, and where melons are handled, and at any time during reasonable business hours shall be permitted to inspect such handler's premises and examine any and all records of such persons with respect to matters within the purview of this part.

(e) Any person filing a report, record, or application that is willfully misrepresented shall be subject to the legal penalties for such misrepresentation of Government reports.

COMPLIANCE

§ .81 *Compliance.*

Except as provided in this subpart, no handler shall handle melons, the handling of which has been prohibited by the Secretary in accordance with provisions of this subpart, or the rules and regulations thereunder, and no handler shall handle melons except in conformity with the provisions of this part.

MISCELLANEOUS PROVISIONS

§ .82 *Right of the Secretary.*

The members of the committee (including successors and alternates) and any agents or employees appointed or employed by the committee shall be subject to removal or suspension by the Secretary at any time. Each and every order, regulation, decisions, determination, or other act of the committee shall be subject to the continuing right of the Secretary to disapprove of the same at any time. Upon such disapproval, the disapproved action of said committee shall be deemed null and void, except as to acts done in reliance thereon or in compliance therewith prior to such disapproval by the Secretary.

§ .83 *Effective Time.*

The provisions of this subpart or any amendment thereto shall become effective at such time as the Secretary may declare and shall continue in force until terminated in one of the ways specified in this subpart.

§ .84 *Termination.*

(a) The Secretary shall, whenever he finds that any or all provisions of this subpart obstruct or do not tend to effectuate the declared policy of this act, terminate or suspend the operation of this subpart of such provision thereof.

(b) The Secretary shall terminate the provisions of this subpart at the end of the then current fiscal period whenever he finds that such termination is favored by a majority of the growers who, during a representative period determined by the Secretary, have been engaged in the production for market of melons within the production area: *Provided*, That such majority has during such representative period, produced for market more than 50 percent of the volume of such melons produced for market.

(c) The provisions for this subpart shall, in any event, terminate whenever the provisions of the Act authorizing them cease to be in effect.

§ .85 *Proceedings after Termination.*

(a) Upon the termination of the provisions of this subpart, the then functioning members of the committee shall continue as joint trustees for the purpose of setting the affairs of the committee by liquidating all funds and property then in the possession of or under control of the committee, including claims for any funds unpaid or property not delivered at the time of such termination. Action by said trusteeship shall require the concurrence of a majority of the said trustees.

(b) The said trustees shall continue in such capacity until discharged by the Secretary; shall, from time to time, account for all receipts and disbursements and deliver all property on hand, together with all books and records of the committee and of the trustees, to such persons as the Secretary may direct; and shall, upon request of the Secretary, execute such assignments or other instruments necessary or appropriate to vest in such persons full title and right to all of the funds, property and claims vested in the committee or the trustees pursuant to this subpart.

(c) Any person to whom funds, property or claims have been transferred or delivered by the committee or its members, pursuant to this section, shall be subject to the same obligations imposed upon the members of the committee and upon the said trustees.

§ .86 *Effect of Termination of Amendments.*

Unless otherwise expressly provided by the Secretary, the termination of this subpart or of any regulation issued pursuant to this subpart, or the issuance of any amendments to either thereof, shall not (a) affect or waive any right, duty, obligation or liability which shall have arisen or which may thereafter arise in connection with any provision of this subpart, or (b) release or extinguish any violation of this subpart or any regulation issued under this subpart, or (c) affect or impair any rights or remedies of the Secretary or of any other person with respect to any such violation.

§ .87 *Duration of Immunities.*

The benefits, privileges and immunities conferred upon any person by virtue of this subpart shall cease upon the termination of this subpart, except with respect to acts done under and during the existence of this subpart.

§ .88 *Agents.*

The Secretary may, by designation in writing, name any person, including any officer or employee of the U.S. Department of Agriculture, to act as his agent or representative in connection with any of the provisions of this subpart.

§ .89 *Derogation.*

Nothing contained in this subpart is, or shall be construed to be, in derogation or in modification of the rights of the Secretary or of the United States to exercise any powers granted by the act or otherwise, or, in accordance with such powers, to act in the premises whenever such action is deemed advisable.

§ .90 *Personal Liability.*

No member or alternate member of the committee nor any employee or agent thereof, shall be held personally responsible, either individually or jointly with others in any way whatever, to any handler or to any person for errors in judgment, mistakes or other acts, either of commission or omission, as such member, alternate, agent or employee, except for acts of dishonesty, willful misconduct or gross negligence.

§ .91 *Separability.*

If any provision of this subpart is declared invalid, or the applicability thereof to any person, circumstance, or thing is held invalid, the validity of the remainder of this subpart, or the applicability thereof to any other person, circumstance, or thing, shall not be affected thereby.

§ .92 *Amendments.*

Amendments to this subpart may be proposed from time to time, by the committee or by the Secretary.

§ .93 *Counterparts.*

This agreement may be executed in multiple counterparts and when one counterpart is signed by the Secretary, all such counterparts shall constitute, when taken together, one and the same instrument as if all signatures were contained in one original.

§ .94 *Additional parties.*

After the effective date hereof, any handler may become a party to this agreement if a counterpart is executed by him and delivered to the Secretary. This agreement shall take effect as to such new contracting party at the time such counterpart is delivered to the Secretary, and the benefits, privileges, and immunities conferred by this agreement shall then be effective as to such new contracting party.

§ .95 *Order with marketing agreement.*

Each signatory handler hereby requests the Secretary to issue, pursuant to the act, an order providing for regulating the handling of melons in the same manner as is provided for in this agreement.

Copies of this notice may be obtained from the Fruit and Vegetable Division, AMS, U.S. Department of Agriculture, Washington, D.C. 20250, or from "Marketing Field Office, Fruit and Vegetable Division, AMS, U.S. Department of Agriculture" at the following address: 320 North Main, Room A-103, McAllen, Tex. 78501.

Signed at Washington, D.C., on October 26, 1978.

WILLIAM T. MANLEY,
Deputy Administrator,
Marketing Program Operations.

[7 CFR Ch. IX]

[Docket No. AO-381]

APPLES GROWN IN STATES OF CONNECTICUT, MAINE, MASSACHUSETTS, NEW HAMPSHIRE, RHODE ISLAND, AND VERMONT

Hearing on Proposed Marketing Agreement and Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Public Hearing On Proposed Rulemaking.

SUMMARY: The hearing is being held to consider a proposed marketing agreement and order regulating the handling of apples grown in the States of Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont. The principal provisions to be considered are: (1) The establishment of a committee of New England apple growers and handlers to assist the Secretary of Agriculture in administering the proposed marketing agreement and order program, (2) authorization for the committee to conduct marketing research and market development programs, including paid advertising, and to collect assessments from apple handlers to cover the costs of the program, and (3) authorization for maturity regulations, establishing maturity dates for individual apple varieties.

DATES: The hearing will be held beginning on December 4 and 7, 1978, at two locations listed under addresses below.

ADDRESSES: The hearing will be held beginning in the Hampden Improvement League Building, Exposition Grounds, 1499 Memorial Avenue, West Springfield, Massachusetts and continuing in the Hilton Auditorium, Blaisdell Building, Rockingham Nursing Home, North Road, Brentwood, New Hampshire.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202-447-6393.

SUPPLEMENTARY INFORMATION: Notice is hereby given of a public hearing to be held beginning at West Springfield, Mass., on December 4, 1978, at 11 a.m., local time in the Hampden Improvement League Building, Exposition Grounds, 1499 Memorial Avenue and continuing at Brentwood (Epping), N.H. on December 7, 1978, at 9:30 a.m., local time, in the Hilton Auditorium, Blaisdell Building, Rockingham Nursing Home, North Road, with respect to a proposed marketing agreement and order regulating the handling of apples grown in the States of Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont. The proposed marketing agreement and order have not received the approval of the Secretary of Agriculture.

The hearing is called pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

The public hearing is for the purpose of: (a) Receiving evidence with respect to the economic and marketing conditions which relate to the proposed marketing agreement and order, hereinafter set forth;

(b) Determining whether the handling of apples grown in the proposed production area is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects interstate or foreign commerce;

(c) Determining whether there is a need for a marketing agreement or order regulating the handling of such apples; and

(d) Determining whether the proposed marketing agreement and order or appropriate modifications thereof will tend to effectuate the declared policy of the Act.

The New England Apple Marketing Order Study Committee submitted, and requested the hearing on, the proposed marketing agreement and order, the provisions of which are as follows (the sections identified with asterisks (***) apply only to the proposed marketing agreement and not to the proposed marketing order):

DEFINITIONS

§ .1 *Secretary.*

"Secretary" means the Secretary of Agriculture of the United States, or any officer or employee of the Department to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in this stead.

§ .2 *Act.*

"Act" means public Act No. 10 73d Congress (May 12, 1933), as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (46 Stat. 31, as amended; 7 U.S.C. 601-674).

§ .3 *Person*

"Person" Means an individual, partnership, corporation, association, or any other business unit.

§ .4 *Production area.*

"Production area" means the States of Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.

§ .5 *Apple(s).*

"Apple(s)" means all of the varieties grown in the production area classified botanically as malus sylvestris (Malus communis) and Malus pumila (Pyrus Malus), with the exception of crabapples.

§ .6 *Varieties.*

"Varieties" means and includes all classifications or subdivisions of apples.

V

§ .7 *Fiscal period.*

"Fiscal period" is synonymous with

ADMINISTRATIVE BODY

§ .20 *Establishment and membership.*

they are selected and have qualified and until their respective successors

preceding fiscal year. If a person is both a grower and a handler of apples, such person may vote either as a

(c) To make and adopt rules and regulations to effectuate the terms and

(o) To give the Secretary the same notice of meetings of the committee as is given to its members.

V 4 3 / 2 1 1 1 0 C 3 1 7 8

§ .7 *Fiscal period.*

"Fiscal period" is synonymous with fiscal year and means the 12-month period beginning on July 1 on one year and ending on the last day of June of the following or such other period as the committee, with the approval of the Secretary, may prescribe.

§ .8 *Committee.*

"Committee" means the New England Apple Administrative Committee established pursuant to § .20.

§ .9 *Grower.*

"Grower" is synonymous with "producer" and means any person who produces apples for market, and who has a proprietary interest therein.

§ .10 *Handler.*

"Handler" is synonmous with "shipper" and means any person who first sells or handles apples or first causes apples to be handled, or sold.

§ .11 *Handle.*

"Handle" or "ship" are synonmous and mean to sell, consign, deliver, or transport apples, or cause apples to be sold, consigned, delivered, or transported within the production area or between the production area and any point outside thereof: *Provided,* that such term shall not include: (1) a contract or common carrier transporting apples owned by another person, or (2) the transportation of apples from the location where grown, to a packing house, or storage facility within the production area or to such other points as the committee may prescribe with approval of the Secretary for the purpose of storing, or having the apples prepared for market.

§ .12 *District.*

"District" means the applicable one of the following described subdivisions of the production area:

(a) "District 1" shall include the State of Maine;

(b) "District 2" shall include the State of New Hampshire;

(c) "District 3" shall include the State of Vermont;

(d) "District 4" shall include the State of Massachusetts;

(e) "District 5" shall include the States of Connecticut and Rhode Island.

§ .13 *Container.*

"Container" means any box, bag, crate, basket, carton, package, bulk carton, or bin, or any other type of receptacle used in packaging or handling of apples.

§ .14 *First sale unit.*

"First sale unit" means approximately 40 pounds of apples in any container or containers or in bulk.

ADMINISTRATIVE BODY

§ .20 *Establishment and membership.*

There is hereby established a New England Apple Committee consisting of fourteen (14) members, each of whom shall have an alternate who shall have the same qualifications as the member for whom he or she is an alternate. Ten (10) of the members and their respective alternates shall be growers and are referred to as "grower" members of the committee. Each of the five (5) districts shall each be represented by two (2) grower members and their respective alternates: *Provided,* That each shall be a producer of apples in his or her respective district; and *Provided further,* that one grower member or alternate representing "District 5" shall be from the State of Rhode Island, Four (4) members and their respective alternates shall be handlers or employees of handlers and are referred to as "handler" members of the Committee. Handler members and alternates shall be selected from the production area at large; *Provided,* That not more than two shall be from one district. The Committee shall be increased by one public member and respective alternate nominated by the Committee and selected by the Secretary. The Committee, with the approval of the Secretary, shall prescribe qualifications, term of office, and the procedure for nominating the public member and alternate.

§ .21 *Term of office.*

(a) The term of office of each member and alternate member of the Committee shall be for 3 fiscal periods: *Provided,* That the initial term of office of one grower member and alternate member of the Committee from each district shall be for 3 years beginning July 1 and ending on the third succeeding June 30. The initial term of office of one grower member and alternate member from each District shall be for 2 years beginning July 1 and ending on the second succeeding June 30. The initial term of office of two handler members and alternate members shall be for 3 years beginning July 1 and ending on the third succeeding June 30. The initial term of office of the other two handler members and alternate members shall be for 2 years beginning and ending on the dates herein prescribed. (Determination of length of term of initial members shall be by lot). No member may serve more than two successive terms. The Committee, with the approval of the Secretary, may change the term of office of members and alternate members.

(b) Members and alternate members shall serve in such capacities for the portion of the term of office for which they are selected and have qualified and until their respective successors are selected and have qualified.

§ .22 *Nomination.*

(a) *Initial members.* Nominations for each of the initial members of the Committee, together with nominations for the initial alternate members for each position, may be submitted to the Secretary by individual growers and handlers. Such nominations may be made by means of a meeting of handlers, and meetings of growers in each district. Such nominations, if made, shall be filed with the Secretary no later than the effective date of this part. In the event nominations for the initial members are not filed pursuant to, and within the time specified in this section, the Secretary may select such initial members and alternate members without regard to nominations, but selection shall be on the basis of the representation provided for in § .20.

(b) *Successor members.* (1) The Committee shall hold or cause to be held, not later than May 15, in the year in which nominations are to be made, a meeting of growers in each district and a meeting of handlers for the purpose of designating nominees for successor members and alternate members of the committee, which shall be publicized and open to all growers and handlers. At each meeting, a chairman and a secretary shall be selected by persons eligible to participate therein. The chairman shall announce at the meeting the number of votes cast for each person nominated for member or alternate member and shall submit promptly to the committee a complete report concerning such meeting. The committee shall, in turn, promptly submit a copy of each such report to the Secretary. (2) Only growers, including duly authorized officers or employees of growers, who are present at such nomination meetings may participate in the nomination and election of nominees for grower members and their alternates. Each grower shall be entitled to cast only one vote for each nominee to be elected in the district which the grower produces apples. No grower shall participate in the election of nominees in more than one district in any one fiscal year. If a person is both a grower and a handler of apples, such person may vote either as a grower or as a handler but not as both. (3) Only handlers, including duly authorized officers or employees of handlers, who are present at such nomination meetings may participate in the nomination and election of nominees for handler members and their alternates. Each handler shall be entitled to cast only one vote, which vote shall be weighted by the volume of apples handled by such handler during the

preceding fiscal year. If a person is both a grower and a handler of apples, such person may vote either as a grower or as a handler but not as both.

§ .23 *Selection.*

From the nominations made pursuant to § .22, or from other qualified persons, the Secretary shall select the 10 grower members of the committee, the four handler members of the committee, and an alternate for each such member.

§ .24 *Failure to nominate.*

If nominations are not made within the time and in the manner prescribed in § .22, the Secretary may, without regard to nominations, select the members and alternate members of the committee on the basis of the representation provided for in § .20.

§ .25 *Acceptance.*

Any person selected by the Secretary as a member or as an alternate member of the committee shall qualify by filing a written acceptance with the Secretary promptly after being notified of such selection.

§ .26 *Vacancies.*

To fill any vacancy occasioned by the failure of any person selected as a member or as an alternate of the committee to qualify, or in the event of the death, removal, resignation, or disqualification of any member or alternate member of the committee, a successor for the unexpired term of such member or alternate member of the committee shall be nominated and selected in the manner specified in § .22 and § .23. If the names of nominees to fill any such vacancy are not made available to the Secretary within a reasonable time after such vacancy occurs the Secretary may fill such vacancy without regard to nominations, which selection shall be made on the basis of representation provided for in § .20.

§ .27 *Alternate members.*

An alternate member of the committee, during the absence or at the request of the member shall act in the place and stead of such member and perform such other duties as assigned. In the event of the death, removal, resignation, or disqualification of a member, the alternate shall act until a successor for such member is selected and has qualified.

§ .30 *Powers.*

The Committee shall have the following powers:

(a) To administer the provisions of this part in accordance with its terms;

(b) To receive, investigate, and report to the Secretary complaints of violations of the provisions of this part;

(c) To make and adopt rules and regulations to effectuate the terms and provisions of this part; and

(d) To recommend to the Secretary amendments to this part.

§ .31 *Duties.*

The Committee shall have, among others, the following duties:

(a) To select a chairman and such other officers as may be necessary, and to define the duties of such officers; and to select subcommittees, and define the duties of each;

(b) To appoint such employees, agents, and representatives as it may deem necessary, and to determine the compensation and to define the duties and procedures of each;

(c) To submit to the Secretary at the beginning of each fiscal year a budget for such fiscal year, including a report in explanation of the items appearing therein and a recommendation as to the rate of assessment for such fiscal year;

(d) To keep minutes, books, and records which will reflect all of the acts and transactions of the Committee and which shall be subject to examination by the Secretary;

(e) To prepare a statement of the financial operations of the committee and to make copies of each such statement available to growers and handlers for examination at the office of the committee;

(f) To require adequate fidelity bonds for all persons handling funds;

(g) To cause its books to be audited by a competent public accountant at least once each fiscal year, and at such other times as the Secretary may request;

(h) To act as intermediary between the Secretary and any grower or handler;

(i) To provide an adequate system for estimating the total season crop of apples and to make such determinations, as it may deem necessary, or as may be prescribed by the Secretary, in connection with the administration of this part;

(j) To investigate the growing, handling, and marketing conditions with respect to apples, and to assemble data in connection therewith;

(k) To engage in such research relating to improved packaging and/or to the determination of maturity, grade and condition standards for apples as may be approved by the Secretary;

(l) To contract with appropriate parties for the purpose of conducting production and marketing research programs, including paid advertising, promotion, and publicity for apples;

(m) To submit to the Secretary such available information, including verified reports, as he may request;

(n) To notify producers and handlers of meetings of the committee; and

(o) To give the Secretary the same notice of meetings of the committee as is given to its members.

§ .32 *Procedure.*

(a) Eight members of the Committee, six of whom shall be grower members including alternates acting for members, shall constitute a quorum; and any action of the committee shall require at least eight concurring grower and/or handler votes.

(b) The Committee may vote by telegraph, telephone, or other means of communication, and any vote so cast shall be confirmed promptly in writing: *Provided,* That, if an assembled meeting is held, all votes shall be cast in person.

§ .33 *Expenses and compensation.*

The members of the Committee and alternates when acting as members, or when requested by the Committee to attend a Committee meeting or to perform another Committee function shall serve without compensation; but shall be reimbursed for expenses necessarily incurred by them in the performance of their duties under this part.

§ .34 *Annual report.*

The Committee shall, as soon as practicable after the end of the fiscal year, prepare and mail an annual report to the Secretary and make a copy available to each handler and grower who requests a copy of the report. This annual report shall contain at least: (a) A review of the operations during the fiscal year; (b) a summary of marketing research and development, promotion and advertising activities, if any; and (c) any recommendations for changes in the program.

EXPENSES AND ASSESSMENTS

§ .40 *Expenses.*

The Committee is authorized to incur such expenses as the Secretary finds are reasonable and likely to be incurred by the Committee for its maintenance and functioning and to enable it to exercise its powers and perform its duties in accordance with the provisions of this part during each fiscal year.

§ .41 *Assessments.*

(a) Each person who first handled apples shall, with respect to the apples so handled by him, pay to the committee upon demand such person's pro rata share of the expenses which the Secretary finds are reasonable and likely to be incurred by the committee during each fiscal year. Each such person's share of such expenses shall be equal to the ratio between the total quantity of apples handled by him as the first handler thereof during the

applicable fiscal year and the total quantity of apples so handled by all persons during the same fiscal year.

years, an operating monetary reserve in an amount not to exceed approxi-

tions be accompanied by a certification by the intended purchaser or re-

committee shall transmit a copy of each marketing policy report or revision thereof to the Secretary. Copies

apples or of apples received and disposed of by him, if applicable, as may be necessary to verify the reports sub-

(b) The Secretary shall terminate or suspend the operation of any and all of the provisions of this part whenever

V 4 3 / 2 1 1 1 0 C 3 1 7 8

applicable fiscal year and the total quantity of apples so handled by all persons during the same fiscal year. The payment of assessments for the maintenance and functioning of the committee may be required under this part throughout the period it is in effect irrespective of whether particular provisions thereof are suspended or become inoperative.

(b) The Secretary, shall fix the rate of assessment not to exceed 5 cents per first sale unit or equivalent in any container or containers to be paid by each such person. At any time during or after the fiscal year, the Secretary may, subject to the limitations of this paragraph, increase the rate of assessment in order to secure sufficient funds to cover any later finding by the Secretary relative to the expense which may be incurred. A higher rate of assessment may be established but first must be approved by grower referendum. Such assessments shall be applied to all apples handled during the applicable fiscal year. In order to provide funds for the administration of the provisions of this part during the fiscal year before sufficient operating income is available from assessments, the committee may accept the payment of assessments in advance and may also borrow money for such purpose.

(c) The committee shall impose a late payment charge on any handler who fails to pay his assessment within the time prescribed by the committee. In the event the handler thereafter fails to pay the amount outstanding, including the late payment charge, within the prescribed time, the committee shall impose an additional charge in the form of interest on such outstanding amount. The rate of such charges shall be prescribed by the committee, with the approval of the Secretary.

§ .42 *Accounting.*

(a) If, at the end of a fiscal year the assessments collected are in excess of expenses incurred, such excess shall be accounted for as follows:

(1) Except as provided in subparagraphs (2) and (3) of this paragraph, each person entitled to a proportionate refund of any excess assessment shall be credited with such refund against the operation of the following fiscal year unless such person demands payment thereof, in which event it shall be paid to him: *Provided*, That any sum paid by a person in excess of his pro rata share of the expenses during any fiscal year may be applied by the committee at the end of such fiscal year to any outstanding obligations of such person.

(2) The committee, with the approval of the Secretary, may establish and maintain during one or more fiscal years, an operating monetary reserve in an amount not to exceed approximately 1 fiscal year's operational expenses. Upon approval by the Secretary, funds in such reserve shall be available for use by the committee for all expenses pursuant to § .40.

(3) Upon termination of this part, any funds not required to defray the necessary expenses of liquidation shall be disposed of in such manner as the Secretary may determine to be appropriate: *Provided*, That to the extent practical, such funds will be returned pro rata to the persons from whom such funds were collected.

(b) All funds received by the committee pursuant to the provisions of this part shall be used solely for the purposes specified in this part and shall be accounted for in the manner provided in this part. The Secretary may at any time require the committee and its members to account for all receipts and disbursements.

(c) Upon the removal or expiration of the term of office of any member of the committee, such member shall account for all receipts and disbursements and deliver all property and funds in his possession to his successor in office and shall execute such assignments and other instruments as may be necessary or appropriate to vest in such successor full title to all of the property, funds, and claims vested in such member pursuant to this part.

§ .43 *Exemptions.*

(a) The committee may, with the approval of the Secretary, relieve from any or all requirements established under this part, the handling of apples for such specified purposes (including shipments to facilitate the conduct of marketing research and development projects established pursuant to< § 0.45), or in such minimum quantities or types of shipments, as may be prescribed.

(b) Except as otherwise provided in this section, any person may, without regard to the provisions of § .41, handle apples he or she produces: (1) in quantities not exceeding 250 first sale units in any fiscal period; (2) for processing and juice; (3) in gift packages; (4) for distribution by relief agencies.

(c) The committee shall, with the approval of the Secretary, prescribe such rules, regulations, and safeguards as it may deem necessary to prevent aples handled under provisions of this section from entering into channels of trade for other than the specific purposes authorized by this section. Such rules, regulations, and safeguards may include requirements that handlers shall file applications and receive approval from the committee for authorization to handle apples pursuant to this section, and that such applications be accompanied by a certification by the intended purchaser or receiver that the apples will not be used for any purpose not authorized by this section.

RESEARCH AND MARKET DEVELOPMENT

§ .45 *Production Research, Marketing Research, and Market Development.*

(a) The committee, with the approval of the Secretary, may establish or provide for the establishment of production research and marketing research and development projects designed to assist, improve, or promote the marketing, distribution, and consumption or efficient production of apples. Such projects may provide for any form of marketing promotion, including paid advertising. The expenses of such projects shall be paid by funds collected pursuant to § .41.

(b) The committee, with the approval of the Secretary, may contract with any person or persons to carry out advertising, promotion, and publicity programs. No advertising, promotion or publicity programs shall be conducted with reference to any particular private brand or trade name and no such program shall disparage the quality, value, sale or use of any other agricultural commodity. The expenses of such programs shall be paid by funds collected pursuant to § .41.

§ .50 *Marketing Policy.*

(a) Each season prior to making any recommendations pursuant to §§ .41 and .52, the committee shall submit to the Secretary a report setting forth its marketing policy for the season. Such marketing policy report shall contain information relative to:

(1) The estimated total production of apples within the production area;

(2) The estimated utilization of the crop, showing the quantity and percentages of the crop expected to be marketed through fresh fruit channels; the quantity and percent of the crop expected to be utilized in processed products; and storage information;

(3) Available supplies of competitive apples from outside the production area, and other competitive fruit;

(4) Other factors having a bearing on the marketing of apples;

(5) The type of maturity regulations expected to be recommended during the season; and

(6) The type of research and market development projects expected to be recommended during the season and the effect on utilization.

(b) In the event that it becomes advisable to substantially modify such marketing policy the committee shall submit to the Secretary a revised marketing policy setting forth the information as required in this section. The committee shall transmit a copy of each marketing policy report or revision thereof to the Secretary. Copies of all such reports shall be maintained in the office of the committee where they shall be available for examination by growers and handlers. The committee shall announce the contents of each marketing policy report, including each revised marketing policy report.

MATURITY REGULATIONS

§ .51 *Recommendations for regulations.*

(a) Whenever the committee deems it advisable to regulate the handling of any variety or varieties of apples in the manner provided in § .52, it shall so recommend to the Secretary.

(b) All meetings of the committee held for the purpose of formulating recommendations for regulations shall be open to growers and handlers. The committee shall give notice of each such meeting to growers and handlers by mailing a notice to each grower and handler who has filed his address with the committee and requested such notice.

§ .52 *Issuance of regulations.*

(a) The Secretary shall regulate, in the manner specified in this section, the handling of apples whenever he finds, from the recommendations and information submitted by the committee that such regulations will tend to effectuate the declared policy of the act. Such regulations may: Prohibit, prior to such date as shall be specified, the handling of any variety or varieties of apples grown in any District which do not meet such maturity standards as shall be prescribed.

(b) The committee shall be informed immediately of any such regulations issued by the Secretary and the committee shall promptly give notice thereof to growers and handlers.

REPORTS

§ .60 *Reports.*

(a) Each grower shall furnish to the committee, at such times and for such periods as the committee may designate, reports covering the production, utilization, and disposition of his or her crop, to the extent necessary for the committee to perform its functions.

(b) Each handler shall furnish to the committee, at such times and for such periods as the committee may designate, certified reports covering, to the extent necessary for the committee to perform its functions, all shipments of apples.

(c) Each grower and handler shall maintain for at least two succeeding fiscal years, such records of the production, utilization and disposition of apples or of apples received and disposed of by him, if applicable, as may be necessary to verify the reports submitted to the committee pursuant to this section.

(d) All reports and records submitted by growers and handlers pursuant to the provisions of this section shall be received by, and at all times be in custody of, one or more designated employees of the committee. No such employee shall disclose to any person, other than the Secretary upon request therefor, data or information obtained or extracted from such reports and records which might affect the trade position, financial condition, or business operation of the particular grower or handler from whom received: *Provided*, That such data and information may be combined, and made available to any person in the form of general reports in which the identities of the individual furnishing the information is not disclosed and may be revealed to any extent necessary to effect compliance with the provisions of this part and the regulations issued thereunder.

MISCELLANEOUS PROVISIONS

§ .61 *Compliance.*

Except as provided in this part, no person shall handle apples except in conformity with the provisions of this part and the regulations issued thereunder.

§ .62 *Right of the Secretary.*

The members of the committee (including successors and alternates), and any agents, employees, or representatives thereof, shall be subject to removal or suspension by the Secretary at any time. Each and every regulation, decision, determination, or other act of the committee shall be subject to the continuing right of the Secretary to disapprove of the same at any time. Upon such disapproval, the disapproved action of the committee shall be deemed null and void, except as to acts done in reliance thereon or in accordance therewith prior to such disapproval by the Secretary.

§ .63 *Effective time.*

The provisions of this part, and of any amendment thereto, shall become effective at such time as the Secretary may declare above his signature and shall continue in force until terminated in one of the ways specified in § .64.

§ .64 *Termination.*

(a) The Secretary may at any time terminate the provisions of the part by giving at least 1 day's notice by means of a press release or in any other manner in which he may determine.

(b) The Secretary shall terminate or suspend the operation of any and all of the provisions of this part whenever he finds that such provisions do not tend to effectuate the declared policy of the act.

(c) The Secretary shall terminate the provisions of this part whenever he finds by referendum or otherwise that such termination is favored by a majority of the growers voting in such referendum: *Provided*, That such majority has, during a representative period determined by the Secretary, produced more than 50 percent of the volume of the apples which were produced within the production area for shipment. Such termination shall become effective on the first day of July subsequent to the announcement thereof by the Secretary.

(d) The Secretary shall, as soon as practicable after the close of the fifth fiscal year following the effective date of this part, conduct a referendum, to ascertain whether continuance of this part is favored by the growers. The Secretary shall terminate the provisions of this part if he finds by such referendum, as provided in paragraph (c) of this section, that termination is favored by growers.

(e) Upon petition and recommendation of 25 percent of the growers of record, the Secretary shall be referendum determine whether termination of this part is favored by growers, but such action shall be effected only if the petition is submitted for validation by the committee on or before December 15 of the current fiscal year. To determine by such referendum whether termination is favored by producers, the required persentages set forth in the act with respect to producer approval of the issuance of a marketing order shall be used.

(f) The provisions of this part shall, in any event, terminate whenever the provisions of the act authorizing them cease to be in effect.

§ .65 *Proceedings after termination.*

(a) Upon the termination of the provisions of this part, the committee shall, for the purpose of liquidating the affairs of the committee, continue as trustee of all the funds and property then in its possession, or under its control, including claims for any funds unpaid or property not delivered at the time of such termination.

(b) The said Trustees shall (1) continue in such capacity until discharged by the Secretary; (2) from time to time account for all receipts and disbursements and deliver all property on hand, together with all books and records of the committee and of the Trustees, to such persons as the Secretary may direct; and (3) upon the request of the Secretary, execute such

assignments or other instruments necessary or appropriate to vest in such person full title and right to all of the

ment wishes to challenge certain population or per capita income estimates prepared by the Bureau of the Census.

In consideration of the foregoing, it is proposed that a new part 90 be added to 15 CFR in the manner set

capita income figure prepared to update earlier census figures.

(f) "State" includes the District of Columbia.

V 43/211/0 C 31 78

assignments or other instruments necessary or appropriate to vest in such person, full title and right to all of the funds, property, and claims vested in the committee or the Trustees pursuant thereto.

(c) Any person to whom funds, property, or claims have been transferred or delivered, pursuant to this section, shall be subject to the same obligation imposed upon the committee and upon the Trustees.

§ .66 *Effect of termination or amendment.*

Unless otherwise expressly provided by the Secretary, the termination of this part or of any regulation issued pursuant to this part, or the issuance of any amendment to either thereof, shall not (a) effect or waive any right, duty, obligation, or liability which shall have arisen or which may thereafter arise in connection with any provisions of this part or any regulation issued under this part, or (b) release or extinguish any violation of this part or of any regulation issued under this part, or (c) affect or impair any rights or remedies of the Secretary or of any other person with respect to any such violation.

§ .67 *Duration of immunities.*

The benefits; privileges, and immunities conferred upon any person by virtue of this part shall cease upon its termination, except with respect to acts done under and during the existence of this part.

§ .68 *Agents.*

The Secretary may, by designation in writing, name any officer or employee of the United States, or name any agency or division in the United States Department of Agriculture, to act as his agent or representative in connection with any of the provisions of this part.

§ .69 *Derogation.*

Nothing contained in this part is, or shall be construed to be, in derogation or in modification of the rights of the Secretary or of the United States (a) to exercise any powers granted by the act or otherwise, or (b) in accordance with such powers, to act in the premises whenever such action is deemed advisable.

§ .70 *Personal liability.*

No member or alternate member of the committee and no employee or agent of the committee shall be held personally responsible, either individually or jointly with others, in any way whatsoever, to any person for errors in judgment, mistakes, or other acts, either of commission or omission, as such member, alternate, employee, or agent, except for acts of dishonesty, willful misconduct, or gross negligence.

§ .71 *Separability.*

If any provision of this part is declared invalid or the applicability thereof to any person, circumstance, or thing is held invalid, the validity of the remainder of this part or the applicability thereof to any other person, circumstance, or thing shall not be affected thereby.

§ .72 *Amendments.*

Amendments to this subpart may be proposed from time to time, by the committee or by the Secretary.

§ .73 *Counterparts.*

This agreement may be executed in multiple counterparts and when one counterpart is signed by the Secretary, all such counterparts shall constitute, when taken together, one and the same instrument as if all signatures were contained in one original. * * *

§ .74 *Additional parties.*

After the effective date hereof, any handler may become a party to this agreement if a counterpart is executed by him and delivered to the Secretary. This agreement shall take effect as to such new contracting party at the time such counterpart is delivered to the Secretary and the benefits, privileges, and immunities conferred by this agreement shall then be effective as to such new contracting party. * * *

§ .75 *Order with marketing agreement.*

Each signatory handler hereby requests the Secretary to issue, pursuant to the Act, an order providing for regulating the handling of apples in the same manner as is provided for in this agreement. * * *

Copies of this notice may be obtained from the Director, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, D.C. 20250.

Dated: October 26, 1978.

CIVIL AERONAUTICS BOARD

[14 CFR Part 302]

[PDR-57, Docket 33723, October 20, 1978]

RULES OF PRACTICE IN ECONOMIC PROCEEDINGS

Applications for Route Authority; Correction

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: This document corrects a previously proposed rulemaking document. These proposed amendments would require a motion to have a new route application consolidated with an earlier one to be made within 30 days of the filing date of the earlier one. It would also prohibit petitions for reconsideration asking for changes in the scope of route proceedings after instituting orders have been issued. The Board is proposing these amendments on its own initiative to reduce the time needed to complete route proceedings.

DATES: Comments by: December 26, 1978.

Comments and other relevant information received after these dates will be considered by the Board only to the extent practicable.

ADDRESSES: Twenty copies of comments should be sent to Docket 33723, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Individuals may submit their views as consumers without filing multiple copies. Comments may be examined in Room 711, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. as soon as they are received.

FOR FURTHER INFORMATION CONTACT:

William F. Adler, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428; 202-673-5205.

SUPPLEMENTARY INFORMATION: The docket number under the address heading was incorrect in the rule published in 43 FR 49993, October 26, 1978. Comments should be sent to Docket 33723.

PHYLLIS T. KAYLOR,
Secretary.

[3510-07-M]

DEPARTMENT OF COMMERCE

Bureau of the Census

[15 CFR Part 90]

CERTAIN POPULATION AND PER CAPITA INCOME ESTIMATES

Challenge Procedures

AGENCY: Bureau of the Census.

ACTION: Proposed rule.

SUMMARY: The purpose of this proposed rule is to establish standard procedures to be followed in the event that a State or unit of local government wishes to challenge certain population or per capita income estimates prepared by the Bureau of the Census. The proposed rule is needed to formalize procedures which were previously followed informally and to extend to the State or unit of local government the right to a hearing prior to a final determination of the challenged estimate by the Director of the Census Bureau. In addition to this notice in the FEDERAL REGISTER, States and units of local government are being informed of this proposed rule through notification in the Census Bureau publication, "Data User News," advance notice to the National League of Cities and the National Association of Counties, and advance notice to the members of the Federal-State Cooperative Program for Local Population Estimates in each State.

DATE: Comments must be received on or before January 2, 1978.

ADDRESSES: Interested persons may participate in this proposed rulemaking by submitting written data, views, or arguments to: Director, Bureau of the Census, Washington, D.C. 20233.

Comments received on or before January 2, 1978, will be considered before final action is taken on this proposal. Copies of all written comments will be available for examination by interested persons at: The Census Library, Room 2471, FB No. 3, Suitland, Md. 20233.

The proposal may be changed in light of the comments received.

FOR FURTHER INFORMATION CONTACT:

Daniel B. Levine, Associate Director for Demographic Fields, Bureau of the Census, Room 2061, FB No. 3, Washington, D.C. 20233, 301-763-5167.

SUPPLEMENTARY INFORMATION: This proposed rule would provide a two-part procedure for States and units of local government wishing to challenge the population or per capita income estimates (or both) of the Bureau. Under this proposal the State or unit of local government would initiate the procedure by writing the Bureau of the Census. The Bureau would receive and review any evidence and attempt to resolve the challenge informally, through letters and telephone calls.

If the challenge is unable to be resolved informally, the State or unit of local government would be given the opportunity of proceeding formally. A hearing officer would be appointed by the Census Director to review the data and to receive any further evidence, atempt to resolve the matter, and conduct a hearing if the State or unit of local government so requests.

In consideration of the foregoing, it is proposed that a new part 90 be added to 15 CFR in the manner set forth below.

PART 90—PROCEDURE FOR CHALLENGING CERTAIN POPULATION AND INCOME ESTIMATES

Sec.
90.1 Scope and applicability.
90.2 Policy of the Bureau of the Census.
90.3 Definitions.
90.4 General.
90.5 When challenge may be filed.
90.6 Where to file challenge.
90.7 Evidence required.
90.8 Review of challenge.
90.9 When formal procedure may be invoked.
90.10 Form of formal challenge and time limit for filing.
90.11 Appointment of hearing officer.
90.12 Qualifications of hearing officer.
90.13 Offer of hearing.
90.14 Hearing.
90.15 Decision by Director.
90.16 Notification of adjustment.

AUTHORITY: 13 U.S.C. 4.

§ 90.1 Scope and applicability.

These rules prescribe the administrative procedure available to States and units of local government to challenge the current estimates of population or per capita income developed by the Bureau of the Census.

§ 90.2 Policy of the Bureau of the Census.

It is the policy of the Bureau of the Census to provide the most accurate population and per capita income estimates possible given the constraints of time, money, and available statistical techniques. It is also the policy of the Bureau to provide States and units of local government the opportunity to challenge these estimates and to present probative evidence relating to the accuracy of the estimates.

§ 90.3 Definitions.

As used in this part (except where the context clearly indicates otherwise) the following definitions shall apply:

(a) "Bureau" means the Bureau of the Census, Department of Commerce.

(b) "Challenge" means, in accordance with this part, the process of objecting to or calling into question the Bureau's population or per capita income estimates of a State or unit of local government by that State or unit of local government.

(c) "Director" means Director of the Bureau of the Census, or an individual designated by the Director to perform under this part.

(d) "Entitlement period" is used consistently with the definition of the term in Pub. L. 92-512, section 141, as amended (31 U.S.C. 1261).

(e) "Estimate" means a statistically derived intercensal population or per capita income figure prepared to update earlier census figures.

(f) "State" includes the District of Columbia.

(g) "Unit of local government" means the government of a county, municipality, township, place, or other minor civil division, which is a unit of general government below the State.

§ 90.4 General.

This part provides a procedure for a State or unit of local government to challenge the population or per capita income estimates of the Bureau. The Bureau shall receive these challenges and attempt to resolve them informally with the locality. If the challenge is not resolved informally, the challenging State or unit of local government may then, at its option, proceed formally.

§ 90.5 When challenge may be filed.

A challenge to the population or per capita income estimates pertaining to a particular entitlement period may be filed any time up to 180 days after the beginning of the General Revenue Sharing (Pub. L. 92-512) initial entitlement period for which the estimates are issued. A challenge to an estimate may also be filed any time up to 180 days from the date the Bureau, on its own initiative, revises that estimate. If, however, a State or unit of local government has sufficiently meritorious reason for not filing in a timely manner, the Bureau has the discretion to accept the challenge.

§ 90.6 Where to file challenge.

A challenge must be in writing and is to be filed with the Chief, Population Division, Bureau of the Census, Room 2011, Federal Building 3, Washington, D.C. 20233.

§ 90.7 Evidence required.

The challenging State or unit of local government shall provide whatever evidence it has relative to the challenge at the time the challenge is filed. The Bureau may request further evidence.

§ 90.8 Review of challenge.

The Chief, Population Division, Bureau of the Census, or the Chief's designee shall review the challenge and the evidence supporting the challenge and shall attempt to resolve the challenge.

§ 90.9 When formal procedure may be invoked.

In the event the Chief, Population Division, is unable to resolve the challenge to the satisfaction of the challenging State or unit of local government, the challenging State or unit of local government shall be informed in

writing of the reasons for the outcome and of its right to proceed formally.

(c) The rule of evidence will not be strictly enforced but irrelevant and unduly repetitious testimony shall be

V 4 3 / 2 1 1 0 C 3 1 7 8

writing of the reasons for the outcome and of its right to proceed formally.

§ 90.10 Form of formal challenge and time limit for filing.

The formal challenge shall be in writing and may be mailed or hand delivered to the Director, Bureau of the Census, Washington, D.C. 20233. The formal challenge shall include a list indicating the material submitted to the Chief, Population Division, during the informal stage, and shall include any additional relevant material it chooses to submit. The formal challenge shall be filed within 30 days of the date the State or unit of local government receives notification by certified mail (return receipt requested) of its right to proceed formally. If, however, a State or unit of local government has a sufficiently meritorious reason for not filing in a timely manner, the Bureau has the discretion to accept the formal challenge.

§ 90.11 Appointment of hearing officer.

Upon receipt of a formal challenge filed in accordance with this part, the Director will appoint a hearing officer to receive written and oral evidence.

§ 90.12 Qualifications of hearing officer.

The hearing officer, a person not involved in the preparation of the estimates being challenged, shall be appointed by the Director from a roster of employees of the Bureau of the Census who have been approved in advance by the Assistant Secretary for Administration, Department of Commerce.

§ 90.13 Offer of hearing.

The hearing officer shall receive the formal challenge and shall notify the State or unit of local government in writing of (a) its right to a hearing prior to the development of a recommended decision for the consideration of the Director; and (b) its right to the development of a recommended decision for the consideration of the Director without a hearing. If the State or unit of local government requests that a hearing be conducted, the hearing officer shall establish the date, time, and meeting place for the hearing.

§ 90.14 Hearing.

(a) The hearing shall be conducted by the same hearing officer who collected the documentary evidence, if possible, and shall be held at Bureau of the Census headquarters in Suitland, Md., unless the Director determines that the hearing should be held elsewhere.

(b) The hearing shall be conducted in a manner so as to bring out the pertinent facts relating to the challenge.

(c) The rule of evidence will not be strictly enforced but irrelevant and unduly repetitious testimony shall be excluded.

(d) Cross-examination of all witnesses is permitted and all testimony shall be received under oath or affirmation.

(e) the hearing officer shall have the authority to: (1) Administer oaths or affirmations, (2) rule on the admissibility of evidence, (3) limit the number of witnesses, (4) exclude any person from the hearing room for contumacious conduct or misbehavior that obstructs the hearing, (5) perform other such acts as are necessary or appreprate to the efficient conduct of any proceeding; and (6) make initial findings, analyses, and recommendations.

(f) The hearing shall be electronically recorded but no written record will be prepared unless the Bureau so orders or unless the challenging locality desires one in whole or part and pays the costs of such a written record, or the apportioned costs should the Bureau also desire a written record.

(g) The hearing officer shall prepare findings, analyses, and recommendations and shall transmit them along with all documentary evidence received and the tape or written record (if any) of the hearing to the Director.

§ 90.15 Decision by Director.

Upon receiving the material specified in § 90.14(g), the Director shall (a) review the findings and recommendations of the hearing officer, and (b) prepare and transmit a letter to the challenging State or unit of local government stating the decision and the reasons therefor. A copy of the hearing officer's findings, analyses, and recommendations shall also be transmitted to the challenging State or unit of local government, and is otherwise publicly available. This decision is final for the Department of Commerce.

§ 90.16 Notification of adjustment.

In the event that the Director finds that the population or per capita income estimate should be adjusted, the Bureau shall promptly inform the appropriate governmental agencies of the revision.

Dated: October 26, 1978.

MANUEL D. PLOTKIN,
Director,
Bureau of the Census.

AMERICAN SOCIETY OF ANESTHESIOLOGISTS, INC.

Consent Agreement With Analysis To Aid Public Comment; Correction

AGENCY: Federal Trade Commission.

ACTION: Correction.

SUMMARY: This document corrects a Commission document previously published in the FEDERAL REGISTER on Wednesday, October 11, 1978. The language of the "Summary" of the original document misstated certain provisions of the Commission's proposed order.

DATE: The correction is effective on October 31, 1978.

FOR FURTHER INFORMATION CONTACT:

Gregory E. Hales, SSR-I-512, Federal Trade Commission, Sixth Street and Pennsylvania Avenue NW., Washington, D.C. 20580; 202-724-1184.

SUPPLEMENTARY INFORMATION: In FR Doc. 78-28588, appearing in FEDERAL REGISTER issue for Wednesday, October 11, 1978, 43 FR 46856, the language of the "Summary" of the document misstated certain provisions of the proposed order. Therefore, the following language is to be substituted for the previously published "Summary":

"In settlement of alleged violations of Federal law prohibiting unfair acts and practices and unfair methods of competition, this provisionally accepted consent agreement, among other things, would require a Park Ridge, Ill., medical society, composed mainly of physicians who have limited their professional activities to the practice of anesthesiology, to cease restraining or impeding anesthesiologists from engaging in the practice of anesthesiology on other than a fee-for-service basis, to cease including statements relating to compensation arrangements in membership documents, and to cease conditioning membership privileges on compensation arrangements. The society would be further required to delete from its files any record of disciplinary sanctions imposed upon members for engaging in practice on other than a fee-for-service arrangement and to advise affected parties of such deletion. Additionally, the society would be required to revoke the charter of any component society which fails to comply with the terms of the order."

CAROL M. THOMAS,
Secretary.

COMMODITY FUTURES TRADING COMMISSION

[17 CFR Part 1]

GENERAL REGULATIONS UNDER THE COMMODITY EXCHANGE ACT

Proposed Rule Requiring That Records Subject to Inspection, and Copies Thereof, Be Provided to the Commission

AGENCY: Commodity Futures Trading Commission.

ACTION: Proposed rulemaking.

SUMMARY: The Commodity Futures Trading Commission is proposing to adopt an amendment to its recordkeeping requirements expressly entitling its representatives to remove temporarily and reproduce any books and records required to be kept and subject to inspection under the Commodity Exchange Act as amended ("Act"),[1] unless copies of such are furnished to the Commission's representative as and when requested.

The Commission has been informed that some confusion exists regarding the procedure pursuant to which Commission staff may obtain books and records or copies thereof to facilitate completion of inspections conducted under the Act. The regulation is intended to clarify this procedure, to set forth expressly the obligations of those persons required to keep books and records pursuant to the Act and Commission regulations, and to facilitate implementation of the broad statutory inspection authority given the Commission.[2]

DATES: Comments must be received on or before November 30, 1978.

ADDRESS: Comments on the proposed amendment should be sent to: Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C. 20581, attention: Secretariat.

FOR FURTHER INFORMATION CONTACT:

Eric Vinson, Esq., Contract Markets Section, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C. 20581. 202-254-8955.

SUPPLEMENTARY INFORMATION: Section 1.31 of the Commission's regulations, 17 CFR 1.31 (1977), implements the Commission's inspection powers over books and records required to be kept by the Act and Commission regulations. Such books and records are required to be kept readily accessible to facilitate inspection by Commission staff in the exercise of Commission regulatory functions. However, the ability to reproduce or copy information quickly is often an essential requirement for the effective, complete and thorough inspection of business records. Moreover, providing copies to Commission staff may reduce the burden and inconvenience, on the person required to keep records, of having Commission staff work with original business records for prolonged periods.

Accordingly, the Commission is proposing to supplement rule § 1.31 by clarifying the procedure Commission staff uses to conduct inspections. The requirement that persons required to keep records must immediately provide copies at their own expense is consistent with the existing provision in § 1.31(c)(3).

Although it is not anticipated that many instances will arise where further access to the original records will be necessary once copies are provided, the proposed amendment expressly provides that the obligation to keep records readily accessible for inspection does not cease after copies are provided. Of course, the copies provided must be true and accurate copies of the originals, and additional inspection may be required to verify that this is so.

The Commission also wishes to emphasize that the procedures covered by regulation 1.31 do not affect the obligations of any person to produce books, records or other documents through the exercise of Commission subpoena power during the course of a formal investigation.

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. All comments submitted will be available, both before and after the closing date, for inspection in the Office of the Secretariat.

The amendment is proposed under the authority of sections 4, 4g, 4i, 5, 5a, 8a, 7 U.S.C. 6, 6g, 6i, 7, 7a, 12a (1976), as amended by Pub. L. 95-405, September 30, 1978, 92 Stat. 865 et seq. In consideration of the foregoing, it is proposed to amend Chapter I of Title 17 of the Code of Federal Regulations by amending § 1.31 as set forth below (paragraph (a)(2) is new language):

§ 1.31 Books and records; keeping and inspection.

(a)(1) All books and records required to be kept by the Act or by these regulations shall be kept for a period of five years from the date thereof and shall be readily accessible during the first 2 years of the 5-year period. All such books and records shall be open to inspection by any representative of the Commission or the United States Department of Justice.

(2) Without limiting the provisions of paragraph (c) of this section, to facilitate effective completion of such inspections, any representative of the Commission may obtain and/or remove temporarily such books and records for reproduction, unless the person required to keep such books and records immediately provides copies thereof, at his own expense, and continues to keep the original books and records readily accessible for inspection in accordance with this section.

(b) Reproductions on microfilm may be substituted for hard copy as follows:

(1) Computer, accounting machine or business machine generated records may be immediately produced or reproduced on microfilm and kept in that form; other records may be immediately produced or reproduced on microfilm and kept in that form if prepared by any means from source documents which are retained in hard copy form for two years as provided in paragraph (b)(2) of this section;

(2) For all other books and records, microfilm reproductions thereof may be substituted for the hard copy for the final 3 years of the 5-year period.

(c) If such microfilm substitution for hard copy is made, the person required to keep such records shall:

(1) At all times have available for examination of his records facilities for immediate, easily readable projection of the microfilm and for producing easily readable facsimile enlargements;

(2) Arrange, index and file the films in such a manner as to permit the immediate location of any particular record; and

(3) Be ready at all times to provide, and immediately provide, at the expense of the person required to keep such records, any facsimile enlargement of such records which any representative of the Commission or United States Department of Justice may request.

Issued in Washington, D.C., on October 26, 1978, by the Commission.

WILLIAM T. BAGLEY,
Chairman, Commodity Futures Trading Commission.

COVERAGE OF EMPLOYEES OF STATE AND LOCAL GOVERNMENTS

Annual Wage Reporting

AGENCY: Social Security Administration, HEW.

ACTION: Extension of Comment Period.

SUMMARY: This Notice extends the period for comments to the Notice of Proposed Rule Making (NPRM) published in the FEDERAL REGISTER on August 9, 1978 (43 FR 35344). The NPRM concerned a change in the wage reporting requirements for State and local governments. The NPRM would change the reporting frequency from quarterly to annual.

Several persons have requested an extension of the time for submitting comments on the proposed rules. They believe that a 60-day comment period is inadequate in view of the importance of these proposed rules. The Department of Health, Education, and Welfare has therefore decided to extend the comment period an additional 60 days.

DATE: Comments concerning the NPRM will now be considered if received on or before December 11, 1978.

FOR FURTHER INFORMATION CONTACT:

MEDICAL DEVICES

Proposed Procedures for Development of Standards; Extension of Comment Period

AGENCY: Food and Drug Adminstration.

ACTION: Extension of comment period.

SUMMARY: In response to a written request, the agency is extending the comment period on proposed procedures for the development of medical device performance standards.

DATE: The deadline for written comments is extended to November 30, 1978.

ADDRESS: Written comments to the Hearing Clerk (HFA-305), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857

FOR FURTHER INFORMATION CONTACT:

James McCue, Bureau of Medical Devices (HFK-305), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Avenue, Silver Spring, Md. 20910, 301-427-7222.

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of July 25, 1978 (43 FR 32264), the Food and Drug Administration (FDA) proposed procedures for the initiation, development, establishment, amendment, and revocation of performance standards for medical devices. These procedures would implement section 514 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360d). The deadline for written comments was September 25, 1978.

The Food and Drug Administration has received a written request for an extension of the comment period, and the Commissioner of Food and Drugs has determined that it is appropriate to extend the period for comment on the proposal.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 501, 502, 513, 514, 701, 52 Stat. 1049-1051 as amended, 1055-1056 as amended, 90 Stat. 540-552 (21 U.S.C. 351, 352, 360c, 360d, 371)) and under authority delegated to him (21 CFR 5.1), the Commissioner hereby grants an extension of the comment period until November 30, 1978.

Interested persons may, on or before November 30, 1978, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Room, 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: October 24, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

[Docket No. 77N-0037]

CERTAIN RED AND BROWN ALGAE

Affirmation of GRAS Status as Direct Human Food Ingredients; Extension of Comment Period

AGENCY: Food and Drug Administration.

ACTION: Extension of comment period.

SUMMARY: This document extends the comment period on the Food and Drug Administration (FDA) proposal to affirm the generally recognized as safe (GRAS) status of certain red and brown algae as direct human food ingredients. This action is taken in response to a request for extension of the comment period.

DATE: Written comments by January 31, 1979.

ADDRESS: Written comments to the Hearing Clerk (HFA-305), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Corbin I. Miles, Bureau of Foods (HFF-335), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C Street SW., Washington, D.C. 20204, 202-472-4750.

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER August 4, 1978 (43 FR 34500), the Commissioner of Food and Drugs proposed to affirm the generally recognized as safe (GRAS) status of a brown alga, *Macrocystis pyrifera*, as a direct human food ingredient. Interested persons were invited to submit comments on the proposal by October 3, 1978.

On October 2, 1978, a letter was received from Japan Food Corp. This letter requested an extension of the comment period for the GRAS affirmation proposal for certain red and brown algae for an additional 120 days, to January 31, 1979. The extension was requested to allow sufficient time for Japan Food Corp. to prepare comments on the proposed rule.

The Commissioner has decided that the opportunity to comment on GRAS affirmation proposals is an important part of the GRAS review process, that an extension of the comment period for this proposal would be appropriate, and that the additional time should be extended to all interested parties.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409, 701(a), 52 Stat. 1055, 72 Stat. 1784-1788 as amended (21 U.S.C. 321(s), 348, 371(a))) and under authority delegated in 21 CFR 5.1, the Commissioner extends the comment period for the GRAS affirmation proposal for certain red and brown algae for an additional 120 days.

Accordingly, interested persons may, on or before January 31, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857, written comments (preferably four copies and identified with the Hearing Clerk docket number found in brackets in the heading of this document) regarding the Commissioner's proposal. The envelope containing the comments should be prominently marked "Red and Brown Algae." Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: October 24, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

Federal Insurance Administration

[24 CFR Part 1917]

[Docket No. FI-4718]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for City of Valley, Douglas County, Nebr.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the city of Valley, Douglas County, Nebr. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the City Hall, 210 North Locust, Valley, Nebr. Send comments to: Hon. Carroll L. Smith, mayor, city of Valley, City Hall, 210 North Locust, Valley, Nebr. 68064.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the city of Valley, Nebr., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Elkhorn River.....	Southeast section of zoning limits bounded by County Road 96 and Union Pacific Railroad.	1,130

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: October 10, 1978.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the City of Hilliard, Franklin County, Ohio

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the city of Hilliard, Franklin County, Ohio. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the 3800 Municipal Square, Hilliard, Ohio. Send comments to: The Honorable Roger Reynolds, Mayor, City of Hilliard, 3800 Municipal Square, Hilliard, Ohio 43026.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the city of Hilliard, Franklin County, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet national geodetic vertical datum
Clover Groff Ditch.	South corporate limits	937
	Just downstream of Scioto Darby Creek Rd.	940
Hayden Run	East corporate limit	909

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Township of East Hanover, Lebanon County, Pa.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the township of East Hanover, Lebanon County, Pa. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Township Building, Old Route 22, East Hanover, Pa. Send comments to: Mr. Henry W. Shuey Chairman of the Board of Supervisors of East Hanover, P.O. Box 68, Ono, Pa. 17077.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the township of East Hanover, Lebanon County, Pa. in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Swatara Creek	Downstream limit of detailed study (3,450 ft downstream of Legislative Route 38004 Bridge).	395
	Legislative Route 38004 (upstream).	397

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Delaware River	Whitman Bridge*	10
Newton Creek	Interstate 676*	10
South Branch Newton Creek.	North-South Freeway*	10
Little Timber Creek.	Broadway*	10

*Centerline

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: October 10, 1978.

GLORIA M. JIMENEZ,
Federal Insurance Administrator.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for Town of New Castle, Westchester County, N.Y.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the town of New Castle, Westchester County, N.Y. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the town clerk's office, New Castle, N.Y. Send comments to: Mr. Charles G. Banks, Jr., Town Supervisor of New Castle, 200 South Greeley Avenue, Chappaqua, N.Y. 10514.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the town of New Castle, Westchester County, N.Y., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Saw Mill River	Downstream Corporate Limits.	309
	Saw Mill River Parkway	312
	New York Route 120	346
	Private Driveway	365
Gedney Brook	Downstream Corporate Limits.	267

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the City of Hilliard, Franklin County, Ohio

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the city of Hilliard, Franklin County, Ohio. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the 3800 Municipal Square, Hilliard, Ohio. Send comments to: The Honorable Roger Reynolds, Mayor, City of Hilliard, 3800 Municipal Square, Hilliard, Ohio 43026.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the city of Hilliard, Franklin County, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the township of Little Mahanoy, Northumberland County, Pa. in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, National geodetic vertical datum
Mahanoy Creek	State Route 225 (downstream).	497
	State Route 225 (upstream).	499
	7,900 ft upstream of State Route 225.	511
	Confluence of Zerbe Run/township Route 405.	518
Zerbe Run	Mahanoy Rd.	518
	Private Rd (3,575 ft upstream of Mahanoy Rd).	532
	Mine Dump Road/township Route 409.	549
	3,500 ft upstream of Mine Dump Road/township Route 409.	568
	7,500 ft upstream of Mine Dump Road/township Route 409.	605

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: October 10, 1978.

GLORIA M. JIMENEZ,
Federal Insurance Administrator.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Township of Manheim, Lancaster County, Pa.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the township of Manheim, Lancaster County, Pa. These base (100-year)

flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the municipal building, 1821 Municipal Drive, Lancaster, Pa. 17601. Send comments to: Mr. Jay Gregg, Township Manager of Manheim, 1821 Municipal Drive, Lancaster, Pa. 17601.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the township of Manheim, Lancaster County, Pa. in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Little Conestoga Creek.	Farmingdale Rd. (upstream).	299
	Harrisburg Pike (upstream).	300
	Shreiner Station Rd. (upstream).	302
	Flory Bros. Mill Rd. (upstream).	310
	Manheim Pike (upstream).	319
	Buch Ave. (upstream)	324
	Petersburg Rd. (upstream).	329
	Quarry Rd. (upstream)	344
Tributary No. 1	Confluence with Little Conestoga Creek.	296

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for Borough of Sharon Hill, Delaware County, Pa.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the borough of Sharon Hill, Delaware County, Pa. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the borough Hall, Sharon Hill, Pa. 19079. Send comments to: Mr. Roscoe R. Woodrow, President of the Council of Sharon Hill, 1319 Spring Street, Sharon Hill, Pa. 19079.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the borough of Sharon Hill, Delaware County, Pa. in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Darby Creek	Upstream of Amtrak Bridge, 800 ft downstream of corporate limits.	22
	Upstream of Conrail Bridge for track from S. S. Kresge Plant.	20
	At confluence of Cobbs Creek.	19
Hermesprota Creek.	Upstream corporate limits.	56
	Upstream of ConRail Bridge.	50
	Upstream of Elmwood Ave.	44
	Downstream corporate limits.	40

any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Darby Creek	Upstream of Amtrak Bridge, 800 ft downstream of corporate limits.	22
	Upstream of Conrail Bridge for track from S. S. Kresge Plant.	20
	At confluence of Cobbs Creek.	19
Hermesprota Creek.	Upstream corporate limits.	56
	Upstream of ConRail Bridge.	50
	Upstream of Elmwood Ave.	44
	Downstream corporate limits.	40

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

[Docket No. FI-4733]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for Township or Tremont, Schuylkill County, Pa.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the township of Tremont, Schuylkill County, Pa. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Office of Mr. Gerald Workman, Chairman of Tremont, R.D. 4, Pine Grove, Pa. 17963. Send comments to: Mr. Gerald Workman, Chairman of the Township of Tremont, R.D. 4, Pine Grove, Pa. 17963

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the township of Tremont, Schuylkill County, Pa. in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vetical datum
Swatara Creek	Corporate limits (downstream).	613
	Legislative Route 53029	630
	1,160 ft upstream of Legislative Route 53029.	637
	Confluence of Black Creek.	669
	1,000 ft upstream of confluence of Black Creek.	672
	4,500 ft upstream of confluence of Black Creek.	718

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: October 10, 1978.

GLORIA M. JIMENEZ,
Federal Insurance Administrator.

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

[29 CFR Part 2700]

PROCEDURAL RULES

Proposed Rulemaking

AGENCY: Federal Mine Safety and Health Review Commission.

ACTION: Proposed rulemaking.

SUMMARY: The Federal Mine Safety and Health Review Commission proposes to issue its Rules of Procedure by which interested parties may participate in the proceedings of the Commission. The Commission is mandated by the Federal Mine Safety and Health Act of 1977 to prescribe rules of procedure for review of cases. The proposed rules are intended to afford simple procedures, to dispense with unnecessary papers, and to be brief.

DATES: Written views and data may be filed until November 30, 1978.

ADDRESS: Address all comments to: Executive Director, Federal Mine Safety and Health Review Commission, 1730 K Street NW., Washington, D.C. 20006.

FOR FURTHER INFORMATION CONTACT:

Robert Pleasure, General Counsel, Federal Mine Safety and Health Review Commission, 1730 K Street NW., Washington, D.C. 20006. Phone, 202-653-5610.

SUPPLEMENTARY INFORMATION: The Federal Mine Safety and Health Review Commission proposes to adopt the following rules pursuant to section 113(d)(2) of the Federal Mine Safety and Health Act of 1977 (the Act) 83 Stat. 742, 30 U.S.C. 801-960. They replace Interim Rules published on March 10, 1978, in the FEDERAL REGISTER at 43 FR 10320. Although notice and opportunity for public comment are not required, the Commission has determined that it is in the public interest to invite the participation of the general public in the formulation of significant Commission rules and believes that seeking public comment at an early date is in keeping with the spirit of Executive Order 12044, "Improving Government Regulations," published in the FEDERAL REGISTER on March 24, 1978.

Persons accepting the Commission's invitation to comment on the proposed Rules of Procedure are requested to read the proposed rules in association with the Federal Mine Safety and Health Act of 1977, 30 U.S.C. 801-960 (the Act), and pertinent provisions of the Administrative Procedure Act, 5 U.S.C. 551 *et seq.*, and particularly 5 U.S.C. 554, "Adjudications." The Commission, in drafting the proposed Rules of Procedure, has sought to avoid unnecessary repetition of provisions already prescribed by statute.

JEROME R. WALDIE,
Chairman, Federal Mine Safety and Health Review Commission.

Under the authority of sections 105 and 113 of the Federal Mine Safety and Health Act of 1977, Pub. L. 95-164 (30 U.S.C. 815 and 823), the Commission proposes that 29 CFR part 2700 be amended to read as follows:

Subpart A—General Provisions

Sec.
2700.1 Scope; rules of construction.
2700.2 Definitions.
2700.3 Parties and representatives.
2700.4 Papers, responses, statements of affirmative defenses, answers to complaints.
2700.5 Amendments to papers.
2700.6 Filing of papers.
2700.7 Service of papers.
2700.8 Computation of time.

Subpart B—Hearings

2700.10 Docketing; assignment of judge.
2700.11 Discovery.
2700.12 Expedited proceedings.
2700.13 Authority and duty of judges.
2700.14 Decision of the judge.

Subpart C—Review by the Commission

2700.20 Petitions for discretionary review.
2700.21 Interlocutory review.
2700.22 Briefs before the Commission.
2700.23 Review by a panel of the Commissioners.
2700.24 Oral argument before the Commission.

Subpart D—Miscellaneous

2700.30 Special circumstances; wavier of rules.
2700.31 Settlement.
2700.32 Ex parte communications.
2700.33 Relief from final orders of the Commission.

2700.34 Hearings before the Commission or members thereof.

AUTHORITY: Secs. 105 and 113, Federal Mine Safety and Health Act of 1977, Pub. L. 95-164 (30 U.S.C. 815 and 823).

Subpart A—General Provisions

§ 2700.1 **Scope; rules of construction.**

(a) These rules govern all proceedings before the Commission and its judges.

(b) These rules shall be construed to afford expeditious, fair, and inexpensive procedures to all parties.

(c) Unless the context indicates differently, words importing the singular also import the plural and vice versa. Words importing the masculine gender also import the feminine and vice versa.

(d) On any procedural question not regulated by the act, these Procedural Rules, or the Administrative Procedure Act (particularly 5 U.S.C. 554 and 556), the Commission or any judge shall be guided to the extent practicable by any pertinent provisions of the Federal Rules of Civil Procedure or Federal Rules of Evidence as appropriate; except that hearsay evidence shall be admissible, in the discretion of the presiding judge or Commission, whether the declarant is available or unavailable, if the evidence is of the type that the presiding judge or Commission finds offers assurances of accuracy.

§ 2700.2 **Definitions.**

(a) "Act" means the Federal Mine Safety and Health Act of 1977, 30 U.S.C. § 801 et seq.

(b) "Commission," "Secretary," "commerce," "operator," "agent," "mine," and "person," have the meanings stated in section 3 of the Act.

(c) Words used in these rules have the meaning with which they are used in the Act.

(d) "A paper initiating a proceeding" or "initiating paper" is: a request for temporary relief under section 105(b)(2), 30 U.S.C. 815(b)(2); a complaint under section 105(c), 30 U.S.C. 815(c); a notice of contest under section 105(d), 30 U.S.C. 815(d); an application under section 107(e)(1), 30 U.S.C. 817(e)(1); or a complaint under section 111, 30 U.S.C. 821.

(e) "Paper" includes a brief, petition, motion, statement of affirmative defenses, answer, response and initiating paper.

(f) The term "Judge" means an Administrative Law Judge qualified pursuant to section 3105 of title 5, United States Code, and appointed by or transferred to the Commission under section 113 of the Act.

§ 2700.3 **Parties and representatives.**

(a) *Party status.* A complaining miner, applicant, or a representative of a miner under sections 105(c) and 111, 30 U.S.C. 815(c) and 821, an affected miner or his representative who has filed a notice of party status before hearing, and an intervenor, are parties. Affected miners or their representatives who state after the start of the hearing their desire to participate as parties shall, upon just terms, be freely accorded party status.

(b) *Intervention.* A motion for leave to intervene may be filed at any time before hearing on the merits. The motion shall set forth the interest of the petitioner, and show that intervention will expedite rather than delay the determination of issues. The Secretary may at any time intervene as of right in proceedings under sections 105(c)(3) and 111, 30 U.S.C. 815(c)(3) and 821.

(c) *Representatives.* A party may appear through a representative. These rules do not require representation by a lawyer, nor do they prohibit representation by persons not lawyers.

§ 2700.4 **Papers, responses, statement of affirmative defenses, answers to complaints.**

(a) *Responses not required; when to file voluntary response.* Unless these rules state otherwise, or a party is ordered otherwise, a response to a paper is not required. A voluntary response shall be filed within 10 days after service of the paper.

(b) *Statement of relief requested.* Every paper, except notices of contest, shall contain a short and plain statement of the relief requested and supporting grounds; a request under section 105(b)(2), 30 U.S.C. 815(b)(2), shall be accompanied by a detailed statement giving reasons for relief. A complaint under section 105(c) or 111, 30 U.S.C. 815(c) or 821, shall state the amount of time or the date from which the complainant was idle or out of work, and his regular rate of pay.

(c) *Answer to complaint required.* Within 20 days after service of a complaint under section 105(c) or 111, 30 U.S.C. 815(c) or 821, and within 10 days after service of a request for temporary relief under section 105(b)(2), 30 U.S.C. 815(b)(2), a person against whom the complaint was issued or who opposes the request shall file an answer with the Commission. An allegation of the complaint or request shall be deemed admitted unless it is denied or the answering party states that despite diligent inquiry he lacks sufficient knowledge to enable him to admit or deny the allegation.

(d) *Commerce coverage.* Any order, complaint, citation, application, or other similar paper issued or filed by the Secretary, and any complaint issued or filed by a miner, representative of miners, or applicant for employment is deemed to impliedly allege that the pertinent mine has products that enter commerce, or has operations or products which affect commerce. This implied allegation is admitted unless specifically denied in a voluntary response, answer, or statement of affirmative defense.

(e) *Statement of affirmative defense.* A statement of affirmative defense shall be filed within 15 days of service of the initiating paper or with an answer or voluntary response.

(f) *Reinstatement order proceedings.* (1) Prior to issuing any reinstatement order, the administrative law judge assigned to the matter shall conduct a preliminary proceeding at which any application of the Secretary for a reinstatement order under section 105(c)(2) shall be supported by a showing of (i) jurisdiction, and (ii) the basis of the Secretary's finding that the miner's complaint was not frivolously brought.

(2) If the administrative law judge finds that the Secretary has adequately shown jurisdiction and that the miner's complaint is not frivolously brought, the adminsitrative law judge shall immediately order the reinstatement of the miner pending final order on the complaint.

(3) No more than 20 days after issuance of the reinstatment order, a hearing shall be held on any application of an operator for modification or termination of the reinstatement order. At such hearing, the reinstatment order may be modified or terminated if the applicant for modification or termination shows:

(i) There is a substantial likelihood applicant will succeed on the merits; and

(ii) Such relief will not adversely affect the safety and health of miners.

(4) Any hearing under this paragraph shall not be a hearing on the merits of the miner's complaint, nor shall any modification or termination limit the right of a miner to proceed for reinstatement under section 105(c)(3) or the authority of the Secretary to issue a complaint under section 105(c)(2) of the Act.

(5) Any complaint filed by the Secretary under section 105(c) of the Act shall be filed within 90 days of the reinstatment order.

§ 2700.5 **Amendments to papers.**

(a) *Amendment of some initiating papers as of right.* A party who has filed a complaint under sections 105(c) or 111, 30 U.S.C. 815(c) or 821, a request for temporary relief under section 105(b)(2), 30 U.S.C. 815(b)(2), or an application under section 107(e)(1), 30 U.S.C. 817(e)(1), may amend his complaint, request, or application once as of right before a response is served, or if no response is served no later than issuance of notice of hearing.

(b) *Amendment of responses as of right.* A party who has filed a response

(d) *Number of copies.* One copy of a paper shall be filed with the judge.

day. When the period of time prescribed or allowed is less than 7 days,

swers to interrogatories may be required, in extraordinary circumstances.

An order approving a settlement proposal is a decision of a judge; the judge shall transmit to the Executive

20 days of the order. A party whose petition for interlocutory review has been granted, shall file any brief within 15 days after the granting of

V 43/211 OCT 31 78

(b) *Amendment of responses as of right.* A party who has filed a response to a paper initiating a proceeding may amend his response before the hearing begins once as of right within 5 days after service of his voluntary response, and within 10 days after service of his required response.

(c) *Motion to amend.* A motion to amend a paper, whether made before, during, or after a hearing, shall be granted unless prejudice to an opposing party's presentation of his claim or defense cannot be cured without unreasonably delaying the proceeding.

(d) *Amendments to conform to issues tried.* An issue not raised in the papers but tried by the actual consent of the parties, express or implied, shall be treated as if it has been raised in the papers. The papers may be amended at any time, upon motion of a party, the judge, or the Commission, to reflect or confirm the trial by consent of an issue not raised in the papers. A failure to object to the introduction of evidence relevant only to an issue not so raised may be considered an indication of trial by consent.

(e) *Relation back of amendments.* A claim or defense raised in an amendment, and a claim asserted against a party added by a amendment, relates back to the date of the original paper, if (1) the claim or defense raised in the amendment arose out of the condition, conduct, transaction, or occurrence that was the subject of the original paper, and (2), in the case of an amendment adding a party, the added party has, within the limitation period set by law, received such notice of the claim that the presentation of his defense will not be prejudiced, and the original paper reflected a mistake concerning the identity of the proper party.

(f) *Amendment of notice of contest.* This rule does not authorize amendment of a notice of contest.

§ 2700.6 Filing of pleadings and other documents.

(a) *Where to file.* A paper not filed in connection with interlocutory review shall be filed, once a judge has been assigned to the proceeding, with the judge, unless his decision has been issued. In all other circumstances, a paper shall be filed with and addressed to the Executive Director of the Commission at: Federal Mine Safety and Health Review Commission, 1730 K Street NW., Washington, D.C. 20006.

(b) *Necessary information.* The first paper filed by a party shall state his address and business telephone number. A paper shall state the docket number of the case, if one has been assigned.

(c) *Effectiveness of filing.* Filing is effective upon receipt.

(d) *Number of copies.* One copy of a paper shall be filed with the judge. Seven copies of a paper shall be filed with the Commission; but if the filing party is not represented by a lawyer or other representative, one copy shall be filed.

(e) *Certificate.* Every paper filed shall be accompanied by a certificate of service.

§ 2700.7 Service of papers.

(a) *Service upon parties.* A copy of a filed paper shall be served upon all parties.

(b) *Service upon nonparties.* A copy of a paper initiating a proceeding, a settlement proposal, and a motion to withdraw either a citation, order, or other request for relief by the Secretary, shall, if filed before a hearing, be served by the filing upon the representatives of affected miners; if there are unrepresented miners, the operator shall serve a copy of the papers by posting it on the bulletin board referred to in section 109(a), 30 U.S.C. 819(a). A posted copy of a paper initiating a proceeding shall be accompanied by a visible notice informing affected miners of their right to participate as parties and that all relevant papers are available for inspection and copying. The notice shall state that a miner may become a party by filing a notice of party status with the Federal Mine Safety and Health Review Commission, 1730 K Street NW., Washington, D.C. 20006. Papers shall remain posted until the hearing begins or until earlier disposition. Proof of posting on the bulletin board shall be filed within 4 working days after posting.

(c) *Service of notice of hearing.* The operator shall serve a copy of the notice of hearing upon the representative of affected miners. If there are unrepresented miners, he shall post a copy of the notice as if it were a paper initiating a proceeding.

(d) *Exclusions from paragraphs (b) and (c).* Paragraphs (b) and (c) do not apply to cases initiated by complaints under sections 105(c) and 111, 30 U.S.C. 815(c) and 821.

(e) *Manner and effectiveness of service.* Unless otherwise ordered, service may be accomplished by first class mail or personal delivery. Service shall be effective upon mailing.

(f) *Service upon representative only.* Service upon a party appearing through a representative shall be made only upon the representative.

§ 2700.8 Computation of time.

(a) In computing any period of time prescribed or allowed in these rules, the day from which the designated period begins to run shall not be included. The last day of the period so computed shall be included unless it is a Saturday, Sunday, or Federal holiday. When the period of time prescribed or allowed is less than 7 days, intermediate Saturdays, Sundays, and Federal holidays shall be excluded in the computation.

(b) When service of a paper is by mail, 3 days shall be added to the time allowed by these rules for the filing of a response or other paper.

Subpart B—Hearings

§ 2800.10 Docketing; assignment of judge.

Upon receipt of a paper initiating a proceeding, including a notice of contest, the Executive Director shall assign a docket number to the proceeding. The docket number shall indicate whether the proceeding must be expedited. The Chairman, or the Chief Administrative Law Judge, if authorized by the Chairman, shall promptly assign an administrative law judge to hear the matter.

§ 2700.11 Discovery.

(a) *Exercise of authority.* This rule defines the manner and circumstances in which the authority in section 113(e), 30 U.S.C. 823(e), is to be exercised.

(b) *Discovery limited by judge.* A judge may limit discovery to expedite any proceeding.

(c) *Relevant evidence; privileges.* Only relevant evidence not validly claimed to be privileged may be discovered.

(d) *Names of miner witnesses and informants.* A judge shall not disclose or order a person to disclose to an operator or his agent the name of a miner who is expected by the judge to testify or who a party expects to summon or call as a witness. A judge shall not, except in extraordinary circumstances, disclose or order a person to disclose to an operator or his agent the name of an informat who is a miner.

(e) *Request for admissions.* A party may request admissions of another party. A statement in a request is admitted unless, within 10 days, it is denied, objected to on stated grounds, or the party served states that despite diligent inquiry he lacks sufficient knowledge to enable him to admit or deny. Filed requests and responses shall be admitted into the record without motion by a party but may later be struck as irrelevant or for other reasons.

(f) *Entry upon land.* A judge may order, for good cause shown, a party to permit a party or his agent to enter upon designated land to inspect and gather information.

(g) *Production of documents and objects.* A judge may order, for good cause shown, a party to produce books, papers, documents or objects.

(h) *Deposition and interrogatories.* Depositions may be compelled, and answers to interrogatories may be required, in extraordinary circumstances.

(i) *Subpenas.* The Commission or a judge may issue a subpena to testify or produce materials under section 113(e), 30 U.S.C. 823(e). A certificate of service shall be filed with the issuing person or body. A person served may move to revoke or modify a subpena within 5 days of service or at the hearing, whichever is sooner.

§ 2700.12 Expedited proceedings.

(a) Expedited proceedings shall be had if required by the Act, or if ordered by two Commissioners upon their own motion or motion of a party. A motion of a party to expedite proceedings may be served and filed by telegram, or may be read verbatim over the telephone if followed by a written motion served with dispatch.

(b) The Commission or a judge, in expedited proceedings, may waiver or modify any requirements in these rules. The judge shall order daily transcripts of the hearing, and may make other orders necessary to insure expedition. A petition for review of an interlocutory ruling of a judge during expedited proceedings will not be entertained, unless accompanied by a sworn statement that the interlocutory ruling will cause irreparable harm to a person.

(c) A hearing on the merits of the case shall not be scheduled with less than 4 days notice to the parties unless all parties to the proceeding consent to an earlier hearing.

§ 2700.13 Authority and duty of judges.

(a) A judge is authorized to: administer oaths and affirmations; require a party to state its position with respect to any issue; regulate the course of the hearing and maintain its decorum; hold conferences for the settlement or simplification of issues; hear reasonably short offers of proof; examine witnesses on his own motion; and take any other action authorized by law.

(b) A judge shall; conduct a fair and impartial hearing; assure that the facts are fully elicited, but without impairment of his impartiality; exclude irrelevant evidence on his own motion; and insure that persons entitled to an opportunity to participate as parties are given the notice required by these rules and the Act.

§ 2700.14 Decision of the judge.

On the day of his decision, the judge shall file with the Executive Director, the record, and as many copies of his decision as there are parties plus seven. After receipt of the record, the decision, and the correct number of copies, the Executive Director shall certify the record and promptly issue to each party a copy of the decision. An order approving a settlement proposal is a decision of a judge; the judge shall transmit to the Executive Director as many copies of such an order as there are parties plus three.

Subpart C—Review by the Commission

§ 2700.20 Petitions for discretionary review.

(a) *Length.* Petitions for discretionary review if more than 10 pages in length shall contain a table of contents and a table of authorities cited.

(b) *Authorities cited.* An unreviewed decision of a judge shall not be precedent binding upon the Commission and is not a principal authority under section 113(d)(2)(A)(iii) of the Act, 30 U.S.C. 823(d)(2)(A)(iii).

(c) *Denial of petition.* A petition not granted is deemed denied.

(d) Statements in opposition to petitions for discretionary review may be filed at the times and places specified in this section for the filing of petitions for discretionary review. Any statement shall contain a concise statement on each portion of the petition to which it is addressed.

§ 2700.21 Interlocutory review.

(a) *Petition for interlocutory review.* A party who desires review of an interlocutory ruling of a judge shall file, within 3 days after receipt of the ruling, if written, or within 5 days after notice of the ruling, if oral, seven copies of a petition for interlocutory review. The petition shall be accompanied by supporting documents, a copy of pertinent portions of the record, if available, and a copy of the ruling, if written. A judge shall reduce his ruling to writing upon the request of a party desiring interlocutory review.

(b) *Action upon the petition.* A petition for interlocutory review shall be granted when the judge and two Commissioners, or three Commissioners, certify that the ruling involves a controlling question of law or policy about which there is substantial ground for difference of opinion and that immediate review may materially expedite the proceeding.

(c) *Stays.* The filing or granting of a petition shall not stay the proceeding or the effect of a ruling unless otherwise ordered.

§ 2700.22 Briefs before the Commission.

(a) *Time for filing briefs.* A party whose petition for discretionary review has been granted, shall file any brief within 20 days after the granting of the petition. Other parties shall file any briefs within 20 days after the petitioner's brief is served or due, whichever is sooner. If the Commission orders review on its own motion, all parties shall file any briefs they wish considered by the Commission within 20 days of the order. A party whose petition for interlocutory review has been granted, shall file any brief within 15 days after the granting of the petition. Any responsive brief shall be filed within 10 days of service or due date of the petitioner's brief, whichever is sooner.

(b) *Length; table of contents or index.* Except by permission of the Commission, a brief shall have no more than 35 pages of text. Briefs in excess of 15 pages shall include a table of contents or index and a table of authorities cited.

(c) *Late filing; motion for extension of time to file brief.* The Commission may reject a brief not timely filed. A motion for extension of time shall not be granted except in an extraordinary circumstance; the burden of a heavy caseload, or a lack of personnel, does not constitute an extraordinary circumstance.

§ 2700.23 Review by a panel of Commissioners.

The Chairman may designate, on behalf of the Commission, three or more Commissioners to serve on a panel. Unless otherwise ordered by the Commission, a panel may exercise any authority of the Commission. A decision of a panel may be reviewed by the full Commission upon its own motion or upon motion of a party.

§ 2700.24 Oral argument before the Commission.

The Commission may, in its discretion, grant an opportunity for oral argument.

Subpart D—Miscellaneous

§ 2700.30 Special circumstances; waiver of rules.

In special circumstances not contemplated by the provisions of these rules, or for good cause shown, the Commission may, upon application by any party, or upon its own motion, waive any rule or make such orders as justice or the administration of the Act requires.

§ 2700.31 Settlement.

(a) *Policy.* Settlement is encouraged at all stages of a proceeding including the review stage.

(b) *Requirements.* A settlement proposal shall be consistent with the provisions and purposes of the Act and these rules. It shall include motions which if granted would finally dispose of the controversy, and shall be signed by all parties.

(c) *Service.* Settlement proposals shall be served upon represented and unrepresented, affected miners who are not parties in the manner prescribed by § 2700.7(b).

(d) *Action.* A settlement proposal shall not be approved until 10 days after service upon represented and unagency" within the meaning of sections 105 (a) and (b)(1)(A) of the Act, 30 U.S.C. 815 (a) and (b)(1)(A).

DATES: Comments must be received on or before December 15, 1978.

no cost. The intent is to improve our capability to detect and deter fraud and abuse. The Department has classi-

V 43/211 OCT 31 1978

(d) *Action.* A settlement proposal shall not be approved until 10 days after service upon represented and unrepresented miners who are not parties.

(e) *Motions to withdraw.* A motion to withdraw that is induced by a promise of another party shall be treated by the parties, the judge, and the Commission, as a settlement proposal.

§ 2700.32 Ex parte communications.

(a) There shall be no ex parte communication, with respect to the merits of any case not concluded, between the Commission, including any member, officer, or agent of the Commission who is employed in the decisional process, and any of the parties or intervenors.

(b) Any inquiries concerning filing requirements, the status of cases, or docket information shall be directed to the Office of the Executive Director of the Commission at: Federal Mine Safety and Health Review Commission, 1730 K Street NW., Washington, D.C. 20006.

(c) In the event an ex parte communication in violation of this section occurs, the Commission or the judge may make such orders or take such action as fairness requires. Upon notice and hearing, the Commission may take such disciplinary action as is appropriate in the circumstances against any person who knowingly and willfully makes or solicits the making of a prohibited ex parte communication.

(d) All ex parte communications in violation of this section shall be placed on the public record of the proceeding.

§ 2700.33 Relief from final order.

(a) Upon motion of a party or the Commission in the case of clerical errors, the Commission may correct clerical errors in a final order. Upon motion of a party and upon such terms as are just, the Commission may relieve a party from a final order for the following reasons: (1) Mistake, inadvertence, surprise, or excusable neglect; (2) newly discovered evidence not discoverable by due diligence; (3) fraud, misrepresentation, or other misconduct of an adverse party; (4) the order is void; (5) the order has been satisfied, released, or discharged, or a prior order upon which it is based has been reversed or otherwise vacated, or should no longer be given prospective effect; or (6) any other reason justifying relief. A party's motion shall be made within a reasonable time, before the filing of the record in a U.S. court of appeals, and, for reasons (1), (2), and (3), not more than 1 year after issuance of the order.

(b) *Exlusion.* This rule does not authorize relief from a final order "not subject to review by any court or agency" within the meaning of sections 105 (a) and (b)(1)(A) of the Act, 30 U.S.C. 815 (a) and (b)(1)(A).

§ 2700.34 Hearings before the Commission or members thereof.

Whenever the Commission deems it necessary in order to effectuate the purposes of the Act or to avoid unnecessary costs or delays, it may order that any proceeding which may have been instituted before it or a judge be transferred to and continued before it or any panel of three members of the Commission. The provisions of this part shall, insofar as applicable, govern proceedings before the Commission or any members pursuant to this section, and the powers granted to administrative law judges in such provisions shall, for the purpose of this section, be reserved to and exercised by the Commission or the members thereof who shall preside.

DEPARTMENT OF LABOR

Mine Safety and Health Administration

[30 CFR Part 45]

INDEPENDENT CONTRACTORS

Advanced Notice of Proposed Rulemaking

AGENCY: Mine Safety and Health Administration, Department of Labor.

ACTION: Advanced notice of proposed rulemaking.

SUMMARY: The Secretary of Labor is considering a regulation which will set criteria and procedures by which certain independent contractors performing services or construction at mines will be identified as operators by the Mine Safety and Health Administration (MSHA). When identified as operators, independent contractors would generally be held solely responsible for their violations of the Federal Mine Safety and Health Act of 1977 (Act), standards and regulations.

A draft of the independent contractor regulation has been mailed to persons known to be interested. All other interested persons may obtain a copy of the draft by submitting a request to the address provided below.

The Secretary is soliciting all relevant comments on the draft proposed rule. Suggestions detailing alternate procedures for identification of independent contractors as operators are also solicited. Interested persons should submit their comments to the address provided below. The draft of the regulation being considered for proposal may be changed in light of the comments received.

DATES: Comments must be received on or before December 15, 1978.

ADDRESSES: Send comments to the Office of Standards, Regulations and Variances, MSHA, Room 631, Ballston Tower No. 3, 4015 Wilson Boulevard, Arlington, Va. 22203.

FOR FURTHER INFORMATION:

Frank A. White, Room 631, Ballston Tower No. 3, 4015 Wilson Boulevard, Arlington, VA. 22203, 703-235-1910.

Dated: October 25, 1978.

ECKEHARD MUESSIG,
Deputy Assistant Secretary for Mine Safety and Health.

Health Care Financing Administration

[42 CFR Part 405]

MEDICARE PROGRAM

Cost to Related Organizations; Decision To Develop Regulations

AGENCY: Health Care Financing Administration (HCFA), HEW.

ACTION: Notice of decision to develop regulations.

SUMMARY: The Department is proposing a revision of medicare reimbursement regulations applicable to services, facilities, and supplies furnished to a provider of services by an organization related to the provider by common ownership or control. The revision will codify policy presently included in program instructions (Provider Reimbursement Manual HIM-15-1) and clarify existing regulations. This revision supplements the notice of proposed rulemaking published on August 17, 1978 (43 FR 36488), which provides specific rules for reimbursement of services, facilities, and supplies furnished by shared service organizations. The Department has classified this as a policy significant regulation.

MEDICARE PROGRAM

Withholding of Payments to Providers of Services and Other Suppliers of Services; Decision To Develop Regulations

AGENCY: Health Care Financing Administration (HCFA), HEW.

ACTION: Notice of decision to develop regulations.

SUMMARY: The regulation would clarify due process procedures that must be followed when payments to providers, physicians, and suppliers of services under the Medicare program (title XVIII of the Social Security Act) are withheld because of suspected fraud or willful misrepresentation. The intent is to assure that due process procedures are adequate and clear. The Department has classified this as a policy significant regulation.

MEDICAID PROGRAM

Fraud in the Medical Assistance Program Verification of Services; Decision To Develop Regulations

AGENCY: Health Care Financing Administration (HCFA), HEW.

ACTION: Notice of decision to develop regulations.

SUMMARY: The Department is amending regulations to require all States to implement a written verification of services program with medicaid recipients. At present, only States with a medicaid management information system are required to do so. States would be permitted to initiate the program on a sample basis if the sample was sufficient to provide information regarding the extent and types of possible aberrant practices by medicaid providers. The regulations would require that the verification notification summarize the services claimed, request a response, and provide a means for the recipient to answer at no cost. The intent is to improve our capability to detect and deter fraud and abuse. The Department has classified this as a policy significant regulation.

MEDICAID PROGRAM

Procedures for the Recovery of Overpayments, Withholding of Payments When There Is Evidence of Fraud, and the Suspension or Exclusion of Providers Who Defraud or Abuse the Medicaid Program

AGENCY: Health Care Financing Administration (HCFA), HEW.

ACTION: Notice of decision to develop regulations.

SUMMARY: The proposed regulation would set forth State plan requirements for States to establish mechanisms for recovery of overpayments, withholding payments when there is evidence of fraud, and the suspension or exclusion of providers who defraud or abuse the medicaid (title XIX of the Social Security Act) program. The intent is to ensure that States have the authority to take administrative action when there is evidence of provider fraud or abuse. The Department has classified this as a policy significant regulation.

INTERSTATE COMMERCE COMMISSION

[49 CFR PART 1201]

[Docket No. 36988]

UNIFORM SYSTEM OF ACCOUNTS FOR RAILROADS

Alternative Methods of Accounting for Railroad Track Structures

AGENCY: Interstate Commerce Commission.

ACTION: Notice of study.

SUMMARY: This notice announces that the Interstate Commerce Commission is beginning a general study considering the adoption of depreciation accounting for railroad track structures. The study will consider the problems associated with any change to depreciation accounting as well as possible improvements to the existing betterment accounting rules.

DATES: Written responses and accompanying data should be filed with the Commission on or before January 2, 1978.

ADDRESSES: Send written responses to: Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

Bryan Brown, Jr., phone 202-275-7448.

SUPPLEMENTARY INFORMATION: The Interstate Commerce Commission is reexamining its accounting rules for railroad track property. To aid this effort, the Commission requests comments from the public on any matter relevant to this subject. Several areas of specific interest to the Commission are outlined below.

The Commission is reexamining the current use of retirement-replacement-betterment accounting (betterment accounting) in light of (1) the April 30, 1976 petition by the Department of Transportation to consider revision of the accounting for existing railroad track structures, and (2) the adoption of depreciation accounting for track structures by five railroads in reports to the Securities and Exchange Commission (SEC) and to the public. The Commission investigated the issue of betterment versus depreciation accounting some 20 years ago and reaffirmed the appropriateness of betterment accounting. However, the Commission believes the railroad industry environment has so changed over the years because of increased Federal subsidization, large scale abandonments, and rehabilitation projects

that a reexamination of this issue is warranted.

The Bureau of Accounts conducted

1-2. Is development of a standard definition for unit of property, which distinguishes capital expenditures

adopt depreciation accounting? If so, how should the beginning balance of accumulated depreciation be estab-

notices

V 4 3 / 2 1 1 0 C 3 1 7 8

that a reexamination of this issue is warranted.

The Bureau of Accounts conducted an informal conference on February 15, 1978 and February 16, 1978 in Docket No. 36557, as an initial step in reopening the subject of depreciation versus betterment accounting for railroad track structures. No resolution of the problems associated with implementing depreciation accounting which reduce the reliability of the financial information was reached at the informal conference. Consequently, we seek to address the issues through publication of this advance notice of proposed rulemaking.

Theoretical arguments relevant to betterment verus depreciation accounting have been set forth in previous investigations without resolution. We believe any final decision can not be based on the theoretical arguments alone. The theoretical arguments are important and will be considered when a final decision is made. However, this study will seek to (1) address the implemention problems associated with depreciation accounting for railroad track structures, (2) address the issue of distortion of the income statement associated with charging massive rehabilitation expenditures of operating expense in the same year they are incurred, (3) consider solutions to the problem of accounting for impairments in economic value of a railroad line segment, and (4) the possible impact on the railroad industry's after tax cash flow.

SUBJECTS ON WHICH PUBLIC COMMENT IS SPECIFICALLY REQUESTED

1-1. Is it necessary to develop a uniform methodology in applying depreciation accounting to railroad track structures?

1-2. Is development of a standard definition for unit of property, which distinguishes capital expenditures from operating expenditures, feasible? If so, how should it be developed?

1-3. To distinguish between capital expenditures and operating expenditures, is routine or "spot" maintenance versus replacement or "programmed" maintenance a more effective criteria than using standard units of property criteria? If so, how should spot maintenance and programmed maintenance be defined?

a. What labor costs should be capitalized? Direct labor? Indirect labor?

b. Should overhead costs be capitalized? If so, how much and on what basis should these costs be allocated?

c. How should relaying of rail from one category of track to another be accounted for?

1 4. Should an estimate of service life apply to the entire track structure or its individual components?

a. Is it necessary or practical to apply separate depreciation rates to the same type of track component when made of different materials (e.g., concrete ties versus wooden ties)?

b. Should the volume of traffic moving over the tracks or the grade and curvature of the track result in different depreciation rates for a track component?

c. What method of life estimation is most appropriate under the circumstances (e.g., turnover method, simulated plant record method)?

d. Should the Commission consider adopting a straight-line method on a basis other than years (e.g., on a use basis) and if so, what should that basis be?

e. Should rail in place be depreciated in light of its high salvage value in comparison to its cost?

1-5. If ratable depreciation were required, can or should property accounts be restated to retroactively adopt depreciation accounting? If so, how should the beginning balance of accumulated depreciation be established? Also, should net worth be increased to reflect this new basis?

1-6. What would be the cost to implement depreciation accounting? Costs would include additional time and money spent for labor costs, revisions to the existing internal reporting system, additional data processing requirements, as well as possible anticipated increases in Federal, State, and local taxes.

2. Should massive track rehabilitation expenditures be capitalized as an alternative to expensing such costs (and possibly distorting the current period's financial statements) in the current period?

a. Under what circumstances would this accounting be appropriate?

b. How can or does a railroad differentiate between "normal" track maintenance, track rehabilitation and track improvement?

c. What problems, if any, can be seen in implementing this accounting?

3. Is accounting recognition of impairment in economic value of a railroad line segment necessary? If so, how should it be reported?

a. What criteria should be used to determine when impairment has occurred?

b. What are the problems in adopting such a procedure?

4. What would be the impact on after tax cash flow for either railroads individually or collectively?

Decided October 18, 1978.

By the Commission, Chairman O'Neal, Vice Chairman Christian, Commissioners Brown, Stafford, Gresham and Clapp.

H. G. HOMME, Jr.,
Acting Secretary.

GUADALUPE ESCARPMENT WILDERNESS PROPOSAL

Public Hearing

Notice is hereby given that public hearings will be held at the time and locations listed below on a proposal for the designation of the Guadalupe Escarpment Wilderness Area, comprised of approximately 21,000 acres within the Lincoln National Forest and 1,800 acres managed by the Bureau of Land Management in Eddy County, State of New Mexico.

December 7, 1978; Albuquerque, N. Mex., at White Winrock Hotel from 1 to 5 p.m. and 7 to 10 p.m.
December 9, 1978; Carlsbad, N. Mex., at La Caverna Hotel from 1 to 5 p.m.
December 11, 1978; El Paso, Tex., at Central Inn from 1 to 5 p.m. and 7 to 10 p.m.

A wilderness proposal and draft environmental statement on the proposal may be obtained from the Forest Supervisor, Lincoln National Forest, Federal Building, 11th and New York, Alamogordo, N. Mex., 88310.

Individuals and organizations may express their views by appearing at this hearing or by submitting written comments for inclusion in the official record to the Regional Forester, U.S. Forest Service, 517 Gold Avenue, SW., Albuquerque, N. Mex. 87102, before January 15, 1979. Those persons wishing to present oral testimony at the hearing should notify the Regional Forester, 517 Gold Avenue, SW., Albuquerque, N. Mex. 87102, prior to November 27, 1978.

Dated: October 24, 1978.

THOMAS C. NELSON,
Acting for Chief, Forest Service.

CIVIL AERONAUTICS BOARD

UNUSED AUTHORITY PROCEEDINGS

GAO Clearance

AGENCY: Civil Aeronautics Board.

ACTION: Notice of GAO clearance for unused authority proceedings.

SUMMARY: The requirement for information specified in 14 CFR 302.1803, 1805, 1806, 1809, and 1910 (PR-180, 43 FR 49529, October 24, 1978) has not yet been cleared by the U.S. General Accounting Office (GAO) as required by the Federal Reports Act, as amended, 44 U.S.C. 3512 (Supp. 5, 1975). The submission is being reviewed by GAO under emergency clearance procedures, but processing of the applications will not begin until GAO has determined that the information required meets the requirements of the Federal Reports Act. The order in which documents have been or will be filed before GAO clearance, and the order in which they will be processed after clearance, are not affected by the clearance.

DATE: Issued under delegated authority on October 25, 1978.

FOR FURTHER INFORMATION CONTACT:

Richard B. Dyson, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428, 202-673-5442.

PHYLLIS T. KAYLOR,
Secretary.

COLUMBIA UNIVERSITY, ET AL.

Applications for Duty Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Statutory Import Programs Staff, Bureau of Trade Regulation, U.S. Department of Commerce, Washington, D.C. 20230, on or before November 20, 1978.

Regulations (15 CFR 301.9), issued under the cited act prescribe the requirements for comments.

A copy of each application is on file, and may be examined between 8:30 a.m. and 5 p.m., Monday through Friday, in Room 6886C of the Department of Commerce Building, 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 79-00012. Applicant: Columbia University, Department of Chemistry, Box 610 Havemeyer Hall, New York, N.Y. 10027. Article: Excimer Laser, Model EMG 500. Manufacturer: Lambda Physik, West Germany. Intended use of article: The article will be used to provide an intense source of ultraviolet coherent laser radiation in photochemical research. Principally, the article will be used to elucidate the kinetics of various reactions of organic molecules. It will also be used to study isotopic effects in chemical reactions. In addition, the article will be used by several graduate and post-doctoral students doing research and at the same time learning how to apply laser techniques to their research. Application received by Commissioner of Customs: October 12, 1978.

Docket No. 79-00013. Applicant: Veterans Administration Medical Center, Iowa City, Iowa 52240. Article: Hampel Micoperfusion Pump, Type III 2-50 nl/mn. Manufacturer: Wolfgang, Hampel, West Germany. Intended use of article: The article is intended to be used in a study designed to isolate the macula densa from the glomerular and perfuse the macula densa with varying concentrations of choloride at normal tubular flow rates. The effects of this perfusion the pre and post glomerular vascular resistances will then be evaluated with micropuncture techniques. Application received by Commissioner of Customs: October 12, 1978.

Docket No. 79-00015. Applicant: University of California Los Alamos Scientific Laboratory, P.O. Box 990, Los Alamos, N. Mex. 87545. Article: CO, Double Discharge Amplifier Kit. Manufacturer: Lumonics Research Ltd., Canada. Intended use of article: The article is intended to be used in a prototype front-end system consisting of all of the parts necessary for one of the six 225-joule beams. This prototype system will be used as a proof of principle of the concepts and techniques to be used in the Antares laser

system. Among the things to be tested are: the on-axis Cassegrain optical system to be used to extract energy

rabbit, and chick species; (b) developing teeth of young rodent; (c) adeno carcinomas and sarcomas from

Reasons: The applications relate to compatible accessories for instruments that have been previously imported

trathin sections. The objectives of

review between 8:30 a.m. and 5 p.m. in Room 6886C of the Department of

Room 6886C of the Department of Commerce Building, at 14th and Con-

V 43/211/78 C

system. Among the things to be tested are: the on-axis Cassegrain optical system to be used to extract energy most efficiently from the preamplifier and driver; to measure the beam quality obtainable in a system like this; to evaluate effects of parasitic oscillation and retropulse damage, and, to establish confidence that the system will deliver the required energy. Application received by Commissioner of Customs: October 12, 1978.

Docket No. 79-00018. Applicant: University of New Orleans, Department of Chemistry, Lakefront Campus, New Orleans, LA. 70122. Article: High Resolution Fourier Transformation Multi-Nuclear Magnetic Resonance Spectrometer System, Model FX-90Q and accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used by a wide variety of chemists to study a wide variety of materials and phenomena including: Investigation of Zinc Binding in Biological Important Molecules and Investigation of Cobalt (II) Oxygen Carriers. Application received by Commissioner of Customs: October 12, 1978.

CORNELL UNIVERSITY, ITHACA, N.Y., ET AL.

Consolidated Decision on Applications for Duty-Free Entry of Accessories for Foreign Instruments

The following is a consolidated decision on applications for duty-free entry of accessories for foreign instruments pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897), and the regulations issued thereunder as amended (15 CFR Part 301). (See especially § 301.11(e).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review between 8:30 a.m. and 5 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00274. Applicant: Cornell University, Department of Chemistry, Baker Laboratory, Ithaca, N.Y. 14853. Article: LKB 14800-1 CryoKit and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for preparing thin sections of (a) intestinal mucosa of human, rat, rabbit, and chick species; (b) developing teeth of young rodent; (c) adeno carcinomas and sarcomas from humans and rodents; (d) long bones of rodents including organ cultured explants; (e) mimosa leaves. These preparations will be studied in the ion microscope, and transmission and scanning electron microscopes with particular attention being given to the existence and location of diffusable ions (Na^+, K^+, Mg^{++}, Mn^{++} Cl^-, P^-). The general goal of the investigation is to further elucidate the specific location and the nature of the cellular involvement of diffusable ions in biological material. Application received by Commissioner of Customs: June 13, 1978. Advice submitted by the Department of Health, Education, and Welfare on: September 26, 1978.

Docket No. 78-00285. Applicant: Mayo Clinic, 200 First Street SW., Rochester, Minn. 55901. Article: Goniometer Stage, Pole Pieces and Edax System for EM 300 Electron Microscope. Manufacturer: Philips Electronic Instruments NVD, The Netherlands. Intended use of article: The article is an accessory to an electron microscope which will be used for studies of nerve embedded into epoxy from experimental animals suffering from lead, arsenic, and thallium neuropathies. The cellular and subcellular distribution of the heavy metals will be investigated to determine the mechanism by which nerve fibers are damaged in these neuropathies. Application received by Commissioner of Customs: June 28, 1978. Advice submitted by the Department of Health, Education, and Welfare on: September 26, 1978.

Docket No. 78-00293. Applicant: Bureau of Biologics, Food and Drug Administration, Building 29, Room 514, 8800 Rockville Pike, Bethesda, Md. 20014. Article: H-5010 Scanning Attachment for Electron Microscope. Manufacturer: Hitachi Ltd., Japan. Intended use of article: The article is an accessory to an electron miroscope which is being used in conducting ultrastructural studies pertinent to control and research activities concerned with biological products including viral, rickettsial and bacterial vaccines, allergenic products, blood and blood fractions, and diagnostic reagents. Application received by Commissioner of Customs: June 26, 1978. Advice submitted by the Department of Health, Education, and Welfare on: September 26, 1978.

Comments: No comments have been received with respect to any of the foregoing applications.

Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign articles, for the purposes for which the articles are intended to be used, is being manufactured in the United States.

Reasons: The applications relate to compatible accessories for instruments that have been previously imported for the use of the applicant institutions. The articles are being manufactured by the manufacturers which produced the instruments with which they are intended to be used. We are advised by the Department of Health, Education, and Welfare in the respectively cited memoranda that the accessories are pertinent to the applicant's intended uses and that it knows of no comparable domestic articles.

The Department of Commerce knows of no similar accessories manufactured in the United States which are interchangeable with or can be readily adapted to the instruments with which the foreign articles are intended to be used.

[3510-25-M]

DEPARTMENT OF AGRICULTURE—BELTSVILLE

Decision on application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897), and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00299. Applicant: U.S. Department of Agriculture, Science and Education Administration, FR, Room 205, Building 004, ARC-West Beltsville, Md. 20705. Article: LKB 2128-010 UM Ultrotome IV Ultramicrotome and Accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for studies to be conducted on the pathological anatomy of higher plant cell interactions with virus, fungus, and bacterial pathogens; fungus-virus interactions; and virus-insect cell interactions. Studies will include investigations of the structural formation of viruses and virus-induced products of infection at the ultrastructural level. Chemical composition of diseased tissues is studied by histochemical and cytochemical methods in observations of thick and ultrathin sections. The objectives of these studies are to investigate pathogen-host interactions both structurally and chemically as a basis for developing improved methods of disease control with an increased understanding of host cell modifications and pathogen development in the processes of disease development.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article has a cutting speed range of 0.1 to 50 millimeters/second (mm/sec). The most closely comparable domestic instrument is the Model MT-2B ultramicrotome manufactured by Ivan Sorvall, Inc. (Sorvall). The Sorvall Model MT-2B ultramicrotome has a cutting speed range of 0.09 to 3.2 mm/sec. We are advised by the Department of Health, Education, and Welfare in its memorandum dated September 26, 1978, that: (1) Cutting speeds in the excess of 4 mm/sec. are pertinent to the applicant's research studies and (2) the domestic instrument does not provide the pertinent feature. We, therefore, find that the Model MT-2B ultramicrotome is not of equivalent scientific value to the foreign article for such purposes as this article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

NATIONAL RADIO ASTRONOMY OBSERVATORY—TUCSON

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00278. Applicant: National Radio Astronomy Observatory Associated Universities, Inc., 2010 North Forbes Boulevard, Suite 100, Tucson, Ariz. 85705. Article: Klystron, Model VRB2113A30. Manufacturer: Varian Associates of Canada Ltd., Canada. Intended use of article: The article is intended to be used as a phase-locked local oscillator in a millimeter wave radio astronomy receiver used in conjunction with a microwave antenna to measure the intensity, polarization, frequency, and direction of cosmic radiation.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides a 105 to 111 gigahertz frequency range. The National Bureau of Standards (NBS) advises in its memorandum dated September 11, 1978 that: (1) The capability of the article described above is pertinent to the applicant's research purposes and (2) it knows of no domestic instrument of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

Decision on Applicotion for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897), and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00198. Applicant: Princeton University, P.O. Box 33, Princeton, N.J. 08540. Article: Differential Scanning Calorimeter (DSC) and Accessories. Manufacturer: Setaram, France. Intended use of article: The article is intended to be used to study the pyrolyses/steam gasification of all forms of biomass in a pressurized steam atmosphere. Heats of reaction and rates of gasification will be determined. Gaseous product composition and rates of species formation will also be measured.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article can use pressurized steam up to 1,000 pounds per square inch. The National Bureau of Standards advises in its memorandum dated September 22, 1978, that: (1) The capability of the foreign article described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

Docket No. 78-00306. Applicant: University of California, Los Angeles, School of Engineering and Applied Science, 405 Hilgard Avenue, Los Angeles, Calif. 90024. Article: Lumonics TEA 600A, CO_2 Laser. Manufacturer: Lumonics Research Ltd., Canada. Intended use of article: The article is intended to be used for far-infrared lasers development, a program which consists of using CO_2 lasers to optically pump molecular gases such as methyl fluoride, deuterium oxide and obtain laser action around 5 mm. These far-infrared lasers are to be used for Tokomak plasmas diagnostics. This part of a line of research in an attempt to find an alternative to oil and other fossil fuels as a source of electrical power.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides a pulse length of 100 n sec. (.0000001 sec.). The National Bureau of Standards (NBS) advises in its memorandum dated September 19, 1978 that: (1) The capability of the article described above is pertinent to the applicant's research purposes and (2) it knows of no domestic instrument of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00288. Applicant: University of California, San Diego, Scripps Institute of Oceanography, Deep Sea Drilling Project A-031, La Jolla, Calif. 92093. Article: ROCK-EVAL Source Rock Analyzer, IFP-FINA Process and Spare Parts. Manufacturer: Technip Geoproduction, France. Intended use of article: The article is intended to be used to determine the genetic potential of sampled rocks to produce hydrocarbons thereby providing a measure useful for safety considerations which are primary in those drilling operation areas which are deemed to have a geologic setting conducive to hydrocarbon generation and/or accumulation.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides real time analysis. The National Bureau of Standards advises in its memorandum dated September 27, 1978 that: (1) The capability of the foreign article described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897), and the regulations issued thereunder as amended (15 CFR part 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00120. Applicant: University of California, Purchasing Department, 1156 High Street, Santa Cruz, Calif. 95064. Article: Scintillation Plastic (Rohaglas 1921) and Accessories. Manufacturer: ROHM GmbH, West Germany. Intended use of article: The foreign article is intended to be used to study low grade scintillator strips which will locate the center of proton-initiated electromagnetic showers to measure some basic scattering amplitudes and determine the change of sub-constitutes of matter.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides the combination of the best possible attenuation length (about 3 meters) and highest light output (about 20 percent normal scintillation). The National Bureau of Standards advises in its memorandum dated September 7, 1978, that: (1) The capability of the foreign article described above is pertinent to the applicant's intended purpose, and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

UNIVERSITY OF ROCHESTER

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897), and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00163. Applicant: University of Rochester, 250 East River Road, Rochester, N.Y. 14623. Article: 2 (two) Imacon 675 Ultrafast streak cameras and accessories. Manufacturer: Hadland Photonics Ltd., United Kingdom. Intended use of article: The article is intended to be used in studies of the feasibility of heating targets with a pulsed high power laser to produce thermonuclear reactions to convert the laser photons to electrons and then sweep the accelerated electrons across a phosphor, transforming temporal to spatial variations. Using the known sweep rate, the length of the streaked laser output can be converted to time history and pulse widths.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, could have been made available to the applicant without excessive delay within the meaning of subsection 301.11(c) of the regulations at the time the foreign article was ordered (January 21, 1977).

Reasons: Excessive delivery time is described in subsection 301.11(c) of the regulations as follows:

Excessive delivery time. Duty-free entry of the article shall be considered justified without regard to whether there is being manufactured in the United States an instrument, apparatus, or accessory of equivalent scientific value for the purposes described in response to question 7 of the application form, if the delay in obtaining such domestic instrument, apparatus, or accessory (as indicated by the difference be-

tween the delivery times quoted by domestic manufacturer and foreign manufacturer)

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-

Virus diseases of the following: Corn, soybeans, berries, grasses, ornamen-

identification of various microparticles

Sciences, Department of Gerontology, Texas Medical Center, 1300 Moursund

Decision: Applications approved. No instrument or apparatus of equivalent

V 43/211 OC 31 78

tween the delivery times quoted by domestic manufacturer and foreign manufacturer) will seriously impair the accomplishment of the purposes. In determining whether the difference in delivery times is excessive, the Deputy Assistant Secretary shall take into account the relevancy of the applicant's program to other research programs with respect timing, the applicant's need to have such instrument, apparatus, or accessory available at the scheduled time for the course(s) in which the article is intended to be used, and other relevant circumstances.

The applicant issued a purchase order, No. B26599C dated January 21, 1977, for the foreign article which required delivery of the first camera on May 30, 1977 and the second camera on June 30, 1977 after receipt of order (ARO). The National Bureau of Standards (NBS) advises in its memorandum dated August 24, 1978, that an equivalent domestic camera was demonstrated to the applicant by General Engineering and Applied Research Inc., Palo Alto, Calif. (GEAR) in June 1977, but that this camera was not demonstrated as available at the time the foreign article was ordered. On September 24, 1976, GEAR indicated to the applicant (in a request for quote relating to a prior purchase), that it could not predict a viable delivery schedule for its streak cameras. GEAR wrote to NBS on October 4, 1977 (after the foreign article was ordered), and, among other things, stated on page 3, "Regarding delivery, we have *tried* to maintain a 4-month ARO for the Pico-V and a 6-month ARO for the Pico-X (emphasis added)." The Department concludes that GEAR, as late as October 1977, could not be certain a fulfilling a contract with specific delivery times.

The applicant identified important projects (requiring useable date by middle 1977), which would be seriously impaired by the delay in receiving the equivalent domestic cameras. NBS advises in its memorandum dated above that the difference in delivery between the domestic instrument and the foreign article is pertinent because any delay of his proposed use would seriously impair his program.

Accordingly, we find that the combination of uncertain domestic availability in January 1977 and the difference in committment to prompt delivery between the domestic and foreign manufacturers amounts to "excessive delivery" within the meaning of subsection 301.11(c) as delay in delivery would seriously impair the timely accomplishment of the applicant's purposes at the time the foreign article was ordered.

UNIVERSITY OF TENNESSEE ET AL.

Consolidated Decision on Applications for Duty-Free Entry of Electron Microscopes

The following is a consolidated decision on applications for duty-free entry of electron microscopes pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301). (See especially section 301.11(e).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review between 8:30 a.m. and 5 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00362. Applicant: University of Tennessee, College of Veterinary Medicine, P.O. Box 1071, Knoxville, Tenn. 37901. Article: Electron Microscope, Model 201C and Watt Haskris Water Chiller with accessories. Manufacturer: Philips Electronics Instruments NVD, The Netherlands. Intended use of article: The article is intended to be used in conducting the following experiments: (1) Hereditary muscular dystrophy—trace the sequential changes in effective muscles to determine the effect of age on the lesions from prenatal to adult life. (2) The retinas of dogs under anesthesia are exposed to various intensities of light and the retinas examined by electron microscopy for extent, rate and type of retinal degenerative change. (3) Animals with experimental myocardial ischemia are treated with lidocaine and the extent of the myocardial degeneration and necrosis is compared with that of controls. (4) Specimens of argentaffin cells will be obtained from different species of animals for anatomical characterization. Article ordered: July 1, 1978.

Docket No. 78-00364. Applicant: Ohio Agricultural Research and Development Center, Madison Hill, Wooster, Ohio 44691. Article: Electron Microscope, Model EM 400 and accessories. Manufacturer: Philips Electronics Instruments NVD, The Netherlands. Intended use of article: The article is intended to be used for research purposes on the following: (1) Virus diseases of the following: Corn, soybeans, berries, grasses, ornamentals, swine, cattle, and animal cell culture. (2) Bacterial DNA characterization. (3) Rumen bacteria morphology. (4) Nematode ultrastructure and morphology. (5) PBB-PCB toxicity in cattle. (6) Receptor morphology of insect antennae. (7) Mammillary development in cattle. (8) Viral serology (plant and animal). (9) Leaf surface bacterial relationships. (10) Muscle fiber degeneration (poultry and animals). (11) General animal pathology. (12) Cellular level effects of pollution and biological toxins. Article ordered: June 17, 1978.

Docket No. 78-00370. Applicant: The Regents of the University of California, Riverside, Materiel Management Department, Riverside, Calif. 92521. Article: Electron Microscope, Model EM 400 with ±60° Tilt Goniometer and Accessories. Manufacturer: Philips Electronics Insturments NVD, The Netherlands. The article is intended to be used for research in plant cell biology, as well as for other investigations on cell ultrastructure, development, and function. In particular, the article will be used for examinations of thin sections of tissue and isolated material, negatively stained and shadowed-preparations, and freeze-fractured and freeze-etched material. Three-dimensional determination of cell, organelle, and membrane organization will also be done, which includes spatial mapping of structural features of steriological determinations of their interrelationships. Determinations of structural relations integrated in series from the tissue through the cell to the ultrastructural level will be done. With the features of scanning electron microscopy and elemental analysis, which can be easily added to this instrument, identifications of particular atomic elements and the determination of their localization, distribution, and relative quantities within tissues and cells will be investigated. In addition, the article will be used in the course, Biology 211, to teach students the principles of specimen preparation and electron optics, as well as how to use the electron microscope. Article ordered: July 10, 1978.

Docket No. 78-00374. Applicant: Minnesota Department of Health, 717 Delaware Street Southeast, Minneapolis, Minn. 55440. Article: Electron Microscope, Model H-500-3 and accessories. Manufacturer: Hitachi, Ltd., Japan. Intended use of article: The article is intended to be used for studies of asbestos and other mineral fibrous particles. Experiments will be conducted for enumeration and identification of fibrous mineral particulates in environmental samples, differentiation of structure between true asbestos, and mechanically derived microfibers and

identification of various microparticles in the occupational setting to determine exposure levels of the people of the state. This information will be used to determine the health significance of these exposures. Article ordered: June 9, 1978.

Docket No. 78-00375. Applicant: The Johns Hopkins University, Charles and 34th Streets, Baltimore, Md. 21218. Article: Electron Microscope, Model EM 10A and accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used to study the structure of cells, tissues, cell organelles, macromolecules, macromolecular assemblies, and viruses in order to learn of the molecular architecture of biological specimens relating to their function. In addition, the article will be used in a course entitled "Optical Methods in Biology" and in the students' thesis research. Article ordered: June 30, 1978.

Docket No. 78-00379. Applicant: The University of Alabama, Department of Biology, P.O. Box 1927, University, Ala. 35486. Article: Electron microscope, model EM 10A complete with accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used for studies of cell division, protozoan development, cytological localization of enzymes in hepatomas, virion morphology and nucleic acid structure, bacterial cell wall structure, striation spacing in fatigued metal, and crystallite sizing and topography. The proposed research will include the following: (1) A study of the comparative cytology and evolutionary affinities of the coccoid, zoospore-producing green algae; (2) Ultrastructure of the Cytoplasmic region containing the cytopharyngeal pouch in *Tetrahymena vorax;* (3) Ultrastructure of the attachment organelle in Oxymonad Flagellates from the Termite Reticulitermes flavipes; (4) Development of the Cytopharyngeal pouch in *Tetrahymena vorax;* (5) Cytochemical localization of Isozymes of aldehyde dehydrogenase in chemically reduced rat hepatomas; (6) Characterization of transducing phages for *Pseudomonas acidovorans;* (7) Cell wall ultrastructure of *Staphylococcus staphylolyticus;* (8) Fatigue crack growth studies; and (9) Crystallite size and surface topography studies of supported metal catalysis by electron microscopy. In addition, the article will be used in the course introduction to electron microscopy to familiarize the student with as many aspects of electron microscopy as possible, especially those which deal with the actual operation of the microscope. Application received by Commissioner of Customs: August 22, 1978.

Docket No. 78-00380. Applicant: Texas Research Institute of Mental Sciences, Department of Gerontology, Texas Medical Center, 1300 Moursund Avenue, Houston, Tex. 77030. Article: Electron microscope, model EM 10A and accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used to study a variety of human and animal tissues including brain, liver, kidney, heart, and skeletal muscle. Subcellular fractions prepared from brain homogenates will also be examined. Subcellular processes associated with aging in the brain and other organs of both human and animal origins will be investigated. Also, studies will be conducted to further basic knowledge of molecular pharmacology and long-term drug effects on the subcellular organization of susceptible target tissues such as the brain and other vital organs of the body. Article ordered: July 31, 1978.

Docket No. 78-00386. Applicant: University of Kansas Medical Center, College of Health Sciences and Hospital, 39th and Rainbow Boulevard, Kansas City, Kans. 66103. Article: Electron Microscope, Model JEM-100S and accessories. Manufacturer: JEOL, Ltd., Japan. Intended use of article: The article is intended to be used for the study of ultrastructure of biological materials from all areas with emphasis on the study of tumor viruses and cells. Experiments involving characterization of tumor cells in vitro will be conducted to perfect these techniques so that new information may be obtained regarding the transformation of normal to malignant cells at the ultrastructural level. The article will also be used for technical, faculty and graduate student instruction in ultra technique in courses in Ultrastructural Histology. Application received by Commissioner of Customs: August 24, 1978.

Docket No. 78-00393. Applicant: Ohio State University, Botany Department, 1735 Neil Avenue, Columbus, Ohio 43210. Article: Electron Microscope, Model H-300 and accessories. Manufacturer: Hitachi (Perkin-Elmer), Japan. Intended use of article: The article is intended to be used to support the following research project: (1) An ultrastructural analysis of Paniceae (Gramineae), (2) membrane ultrastructure in response to TIBA and Ca^{2+}, (3) ultrastructural studies of the green algae, (4) Gametophyte development in ferns, (5) ultrastructural studies of aquatic fungi, and (6) electron microscopy of carboniferous pollen. The article will also be used in the course Electron Microscopy for Botanists, 693 to train students in electron microscopy techniques. Article ordered: July 21, 1978.

Comments: No Comments have been received with respect to any of the foregoing applications.

Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign articles for such purposes as these articles are intended to be used, was being manufactured in the United States at the time the articles were ordered.

Reasons: Each foreign article to which the foregoing applications relate is a conventional transmission electron microscope (CTEM). The description of the intended research and/or educational use of each article establishes the fact that a comparable CTEM is pertinent to the purposes for which each is intended to be used. We know of no CTEM which was being manufactured in the United States either at the time of order of each article described above or at the time of receipt of application by the U.S. Customs Service.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to any of the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used, which was being manufactured in the United States either at the time of order or at the time of receipt of application by the U.S. Customs Service.

Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Statutory Import Programs Staff, Bureau of Trade Regulation, U.S. Department of Commerce, Washington, D.C. 20230, on or before November 20, 1978.

Regulations (15 CFR 301.9) issued under the cited Act prescribe the requirements for comments.

A copy of each application is on file, and may be examined between 8:30

Docket No. 79-00014. Applicant: University of Texas Medical School at Houston, Department of Pathology, P.O. Box 20708, Houston, Tex. 77025. Article: Scanning Electron Microscope, Model JSM-35U and accessories. Manufacturer: JEOL, Ltd., Japan. Intended use of article: The article is intended to be used to examine a variety of specimens from patients with diseases for diagnostic and investigational purposes and for studies of various experimental models of human diseases as a means toward a better understanding of etiology, pathogenesis and control. These studies include: (1) Diagnostic studies of human renal and hepatic biopsies. (2) Diagnostic studies of human lung tissue and of experimental animal lung tissue. (3) Diagnostic studies of human blood and bone marrow specimens. (4) Studies of human tissue upon removal in surgery and freezing in cold stage accessory using low accelerating voltage to reduce specimen damage. (5) Studies of lung inclusions using X-ray analyzer for elemental analysis of trace elements contained in said inclusions. (6) Studies of brain and other nervous tissue in normal and diseased states. The article will also be used in training programs for medical and graduate students in electron microscopy and the use of it in biomedical studies and research. Undergraduates will also be trained in its use as a basis for technical careers and for further training and research in the Graduate School of Biomedical Sciences. Application received by Commissioner of Customs: October 12, 1978.

Docket No. 79-00017. Applicant: University of Chicago Operator of Argonne National Laboratory, 9700 South Cass Avenue, Argonne, Ill. 60439. Article: High Temperature TG DTA Thermal Analyzer and Accessories. Manufacturer: Rigaku Corp., Japan. Intended use of article: The article is intended to be used for studying the processes of separating actinide elements (thorium, uranium, plutonium) from each other using metals and molten salts. Specific experiments include: (1) The establishment of phase diagrams (thorium/cadmium and thorium/cadmium/magnesium); (2) Measurement of heats of transition (thorium alloys); (3) Measurement of the losses of volatile components (cadmium/magnesium); and (4) Identification of intermetallic compounds. Application received by Commissioner of Customs: October 12, 1978.

Docket No. 79-00019. Applicant: Stanford University, 851 Welch Road, Palo Alto, Calif. 94304. Article: Transmission Electron Microscope, Model H-300 and accessories. Manufacturer: Hitachi-Perkin-Elmer, Japan. Intended use of article: The article is intended to be used extensively to study pathological tissue at a molecular and cellular level. The principal areas of research will include the following: (1) Study of renal tissue from kidney biopsies to determine the degree of immunological injury to the basement membrane of the glomeruli. (2) Research of lymphomas and Hodgkin's Disease in which a new thrust is being made to demonstrate surface antigens on tumor cells. (3) Advanced research on tissue obtained by endomyocardial biopsy from humans to determine whether viruses are the cause of myocarditis and cardiomyopathies. (4) Research to try to understand the mechanism of anticancer drug on heart muscle so that larger doses of the drug can be given to cure cancer without also causing heart disease. In addition, the article will be used for training surgical pathology trainees, and medical students in the surgical pathology rotations as well as training in electron microscopy—an essential skill for modern Pathologists. The article will also be used for instructional purposes for two courses: Advanced Analytical Chemistry and Physical Chemistry Laboratory. Application received by Commissioner of Customs: October 16, 1978.

Docket No. 79-00020. Applicant: California Institute of Technology, 1201 E., California Street, Pasadena, Calif. 91125. Article: Gas Chromatograph/Mass Spectrometer, Model MS-25 and accessories. Manufacturer: Kratos, Inc., AEI Scientific Instruments, United Kingdom. Intended use of article: The article is intended to be used for studies of small organic molecules (especially strained ring systems), heterocycles, larger intermediates formed in the attempted total synthesis of prostaglandins, neurotoxins, anti-biotics and other natural products, deuterated organic molecules, organophosphorus compounds, organometallic compounds of early transition metals, oxygen-carrying metal complexes, and various other organic and inorganic compounds. In addition, the products of the hydropyrolysis of coal and lignin will be studied; these are expected to range from CO and ethylene through benzene to compounds with molecular weights in the range 300-1500 with structures resembling that of the parent coal. Varied experiments will be conducted involving many different objectives, of which the following are representative: (a) Studies of intramolecular energy flow and utilization in large molecules under collisionless conditions, and development of schemes for deuterium isotope separation. (b) Devising systems for the selective and sensitive detection of organophosphorus compounds using chemical ionication mass spectrometry. (c) The development of catalysts for the conversion of synthesis gas ($CO+H_2$) to methane and higher alkanes by reduction with electron-deficient metallocenes. (d) Studies of selective isotopic enrichment by infrared-induced rearrangement of chemically identical but isotopically different molecules, as applied to isotope separation. (e) Studies of thermal reactions of high energy organic compounds which result in electronically excited states of product molecules, in order to determine the mechanisms of decomposition. (f) The production of 1,1-dialkyldiazenes (aminonitrenes or N-nitrenes) which are assumed to be intermediates in several chemical reactions. Application received by Commissioner of Customs: October 16, 1978.

Docket No. 79-00021. Applicant: Columbia University, Nevis Laboratories, 136 South Broadway, Irvington, N.Y. 10533. Article: Lead Glass Blocks (130 pcs.) Manufacturer: O'Hara Optical Glass Manufactuiring Co., Ltd., Japan. Intended use of article: The article is intended to be used in elementary Particle Physics experiments in which the lead glass will be mated to photomultiplier tubes and associated electronics. The assembly will be used to detect very high energy electrons and protons which deposit all their energy in the lead glass. Application received by Commissioner of Customs: October 16, 1978.

Docket No. 79-00022. Applicant: Mount Sinai School of Medicine of the City University of New York, One Gustave Levy Place, New York, N.Y. 10029. Article: Circular Diochroism Automatic Recording Spectropolarimeter, Model J-500A and accessories. Manufacturer: Japan Spectroscopic Co., Ltd., Japan. Intended use of article: The article is intended to be used for studies of synthetic polypetides and nucleic acids. Experiments will be conducted to obtain circular dichroism spectra of the molecules and molecular complexes at various temperatures and concentrations. The objectives of these experiments are: (i) To develop quantitative methods of assessing the structure of proteins in solution; (ii) To study subtle changes of the environment of aromatic residues; (iii) To study protein subunit complexes and protein complexes with polysacharides and nucleic acids; and (iv) To compare predicted and experimental structures. Application received by Commissioner of Customs: October 16, 1978.

Docket No. 79-00023. Applicant: University of Maryland, College Park, Md. 20742. Article: Rheovibron Conversion Kit. Manufacturer: Toyo Baldwin Co., Ltd., Japan. Intended use of article: The article is intended to be used in experiments involving the preparation of polymeric blends in a Brabender blender followed by the preparation of a film of the material by heating the blend under pressure in a laboratory press. After various thermal treatments as well as some structural measurements by other techniques the film is inserted directly into the sample chamber of the Rheovibron. The objectives of this investigation are to study molecular and phase interaction in polymer blends and to determine the compatibility of specific blends of hompolymers and copolymers produced from them. Application received by Commissioner of Customs: October 16, 1978.

Docket No. 79-00025. Applicant: The Johns Hopkins University School of Medicine, 720 Rutland Avenue, Baltimore, Md. 21205. Article: LKB 2088 Ultrotome V Ultramicrotome and accessories. Manufacturer: LKB Produkter AB, Sweden. Indended use of article: The article is intended to be used for investigations which include ultrastructural studies on normal and pathologic animal tissues and cultured cells, developmental studies, cyto and histochemical studies, comparative neuroanatomy subcellular changes in cells induced by changes is their biochemical and physical environments, and tracing neuronal pathways, to further basic knowledge and gain an understanding of pathophysiology and treatment of neurological and psychic disorders. Application received by Commissioner of Customs: October 17, 1978.

SEA GRANT REVIEW PANEL

Meeting

The Sea Grant Review Panel will meet on November 8 and 9, 1978, from 8:30 a.m. to 4:30 p.m. on November 8 and from 9 a.m. to 3:30 p.m. on November 9, in the President's Conference Room, University of North Carolina General Administration Building, Chapel Hill, N.C.

The Panel was established in December 1976 under section 209 of the National Sea Grant Program Improvement Act (Pub. L. 94-461), and advises the Secretary of Commerce with respect to:

a. Applications or proposals for, and performance under, grants and contracts awarded under sections 205 and 206 of the act;

b. The Sea Grant Fellowship Program, established under section 208 of the act;

c. The designation and operation of Sea Grant Colleges and Sea Grant Regional Consortia, (which are provided for in Section 207 of the Act) and the operation of Sea Grant programs;

d. The formulation and application of the planning guidelines and priorities established by the Secretary under section 204(2) of the act and applied by the Director in accordance with section 204(c)(1); and

e. Such other matters as the Secretary refers to the Panel for review and advice.

The Panel's meeting agenda is as follows:

November 8, 1978 (8:30 a.m. to 4:30 p.m.)

8:30 a.m. Preliminary remarks and discussion of agenda.

8:45 a.m. A. Presentation by University of North Carolina.

11 a.m. B. Institutional and coherent area program discussions:
- University of Georgia
- University of Minnesota
- University of Hawaii
- University of Alaska
- Virginia Institute of Marine Sciences
- State University of New York/Cornell
- University of Maine/University of New Hampshire
- Mississippi-Alabama Sea Grant Consortium
- University of Maryland
- University of North Carolina
- University of Washington
- New Jersey Marine Sciences Consortium
- State University System of Florida

C. Sea Grant College Candidates Discussion.

The following are eligible to be considered on the basis of 3-year performance as institutional programs:
- University of Georgia
- University of Southern California

4:30 p.m. Recess.

November 9, 1978 (9 a.m. to 3:30 p.m.)

9 a.m. Discussion of budget.
Discussion of progress with national and international projects.
Discussion of the fellowships program.
Discussion of minorities' increased participation in Sea Grant.
Discussion with Sea Grant directors.

3:30 p.m. Adjourn.

All agenda items will be open to public attendance. Approximately 10 seats will be available to the public on a first-come, first-served basis. If time permits before the scheduled adjournment, the Chairman will solicit oral comments by the attendees. Written statements may be submitted at any time before or after the meeting.

Minutes of the meeting will be available 30 days thereafter upon written request addressed to the National Sea Grant Program, 3300 Whitehaven Street, NW., Washington, D.C. 20235.

For further information, contact Mr. Arthur G. Alexiou, Executive Secretary, Sea Grant Review Panel, at the above address. Telephone: 202-634-4019.

Dated: October 25, 1978.

T. P. GLEITER,
Assistant Administrator for Administration, National Oceanic and Atmospheric Administration.

MARINE MAMMALS

Modification of Permit

Notice is hereby given that pursuant to the provisions of §§ 216.33 (d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), and § 222.25 of the regulations governing endangered species permits (50 CFR Part 222), Permit No. 223 issued to Dr. Louis Herman, Marine Mammal Laboratory, University of Hawaii, 1129 Ala Moana, Kewalo Basin, Honolulu, Hawaii 96814, on March 9, 1978 (43 FR 11729), is modified in the following manner:

Section B-1 has been changed to read, "Harassment is defined for the purposes of this section as alteration of an animal's behavior caused by the presence of an observer within the limits of the observational methods as described in section 5(a) of the Holder's application except that the minimum altitude of 500 feet for aerial observations will be maintained."

This modification is effective on October 31, 1978.

The permit as modified, and documentation pertaining to the modification are available for review in the following offices: Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.; and Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street Terminal Island, Calif. 90731.

Dated: October 20, 1978.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service

GOVERNMENT-OWNED INVENTIONS

Availability for Licensing

The inventions listed below are owned by the U.S. Government and are available for domestic and possibly foreign licensing in accordance with the licensing policies of the agency-sponsors.

Copies of the patents cited are available from the Commissioner of Patents and Trademarks, Washington, D.C. 20231, for $.50 each. Requests for copies of patents must include the patent number.

Copies of the patent applications can be purchased from the National Technical Information Service (NTIS), Springfield, Va. 22161, for $4 ($8 outside North American Continent). Requests for copies of patent applications must include the patent application number. Claims are deleted from patent application copies sold to the public to avoid premature disclosure in the event of an interference before the Patent and Trademark Office. Claims and other technical data will usually be made available to serious prospective licensees by the agency which filed the case.

Requests for licensing information on a particular invention should be directed to the address cited for the agency-sponsor.

COMMITTEE FOR IMPLEMENTATION OF TEXTILE AGREEMENTS

CERTAIN COTTON APPAREL PRODUCTS FROM THE FEDERATIVE REPUBLIC OF BRAZIL

Additional Import Controls

OCTOBER 24, 1978.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Controlling cotton apparel from Brazil in category 359 at a level of 152,174 pounds during the agreement year which began on April 1, 1978 and extends through March 31, 1979.

(A detailed description of the categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on January 4, 1978 (43 FR 884), as amended on January 25, 1978 (43 FR 3421), March 3, 1978 (43 FR 8828), June 22, 1978 (43 FR 26773), and September 5, 1978 (43 FR 39408)).

SUMMARY: Under the terms of paragraph 16 of the Bilateral Cotton Textile Agreement of April 22, 1976, as amended, between the Governments of the United States and the Federative Republic of Brazil, the Government of the United States has decided to control imports of cotton textile products in category 359, produced or manufactured in Brazil and exported to the United States during the 12-month period which began on April 1, 1978.

EFFECTIVE DATE: October 30, 1978.

FOR FURTHER INFORMATION CONTACT:

Donald R. Foote, International Trade Specialist, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230, 202-377-5423.

SUPPLEMENTARY INFORMATION: On July 12, 1978, there was published in the FEDERAL REGISTER (43 FR 29975) a letter dated July 7, 1978 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs which established levels or restraint under the new textile category system for certain specified categories of cotton textiles and cotton textile products, produced or manufactured in Brazil, which may be entered into the United States for consumption, or withdrawn from warehouse for consumption, during the 12-month period which began on April 1, 1978 and extends through March 31, 1979. The agreement also establishes consultation levels for categories, like category 359, which are not subject to specific limits. In accordance with the terms of the bilateral agreement, the U.S. Government has decided to control imports in category 359 at the specified consultation level of 700,000 square yards equivalent (152,174 pounds) for the 12-month period which began on April 1, 1978. Accordingly, there is published below a letter from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs directing that imports in this category be limited to the designated level of restraint. The level has not been adjusted to reflect any imports during the period which began on April 1, 1978. Adjustments will be made to account for imports of 143,042 pounds during the period beginning on April 1, 1978 and extending through August 31, 1978.

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Domestic Business Development.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

OCTOBER 24, 1978

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20229

DEAR MR. COMMISSIONER: This directive amends, but does not cancel, the directive issued to you on July, 7, 1978, by the Chairman, Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton textiles and cotton textile products produced or manufactured in Brazil.

Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977; pursuant to the Bilateral Cotton Textile Agreement of April 22, 1976, as amended, between the Governments of the United States and the Federative Republic of Brazil; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to prohibit, effective on October 30, 1978, and for the 12-month period beginning on April 1, 1978, and extending through March 31, 1979, entry into the United States for consumption, and withdrawal from warehouse for consumption, of cotton textile products in Category 359, produced or manufactured in Brazil, in excess of 152,174 pounds.[1]

Entries of cotton textile products in Category 359, produced or manufactured in Brazil and exported to the United States before April 1, 1978, shall not be subject to this directive.

Cotton textile products in Category 359 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) prior to the effective date of this directive shall not be denied entry under this directive.

A detailed description of the categories in terms of TSUSA numbers was published in the FEDERAL REGISTER on January 4, 1978 (43 FR 884), as amended on January 25, 1977 (43 FR 3421), March 3, 1978 (43 FR 8828), June 22, 1978 (43 FR 26773) and September 5, 1978 (43 FR 39408).

In carrying out the above directions, entry into the United States for consumption shall be construed to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of the Federative Republic of Brazil and with respect to imports of cotton textile products from Brazil have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Domestic Business Development.

[3510-25-M]

ADJUSTING IMPORT LEVELS FOR CERTAIN COTTON APPAREL PRODUCTS FROM THE POLISH PEOPLE'S REPUBLIC

OCTOBER 27, 1978.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: (1) Amending the levels of restraint established for imports of certain men's and boys' cotton knit shirts, and other cotton apparel in Categories 338 and 359 from Poland under the terms of an amendment to the bilateral textile agreement.

(2) Controlling imports of cotton coats in Category 334 for the agreement year which began on January 1, 1978, at an increased level. (A detailed description of the textile categories in terms of TSUSA numbers was published in the FEDERAL REGISTER on January 4, 1978 (43 FR 884), as amended on January 25, 1978 (43 FR 3421), March 3, 1978 (43 FR 8828), June 22, 1978 (43 FR 26773), and September 5, 1978 (43 FR 39408).)

SUMMARY: The Governments of the United States and the Polish People's Republic have exchanged letters dated October 19 and 20, 1978, amending the Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of January 9 and 12, 1978, among other things, to increase the levels of restraint for cotton textile products in Categories 334 and 359 and to decrease the level of restraint for Category 338, produced or manufactured in Poland and exported to the United States during the 12-month period which began on January 1, 1978.

EFFECTIVE DATE: November 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Jane C. Bonds, International Trade Specialist, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230, 202-377-5423.

SUPPLEMENTARY INFORMATION: On March 22, 1978, there was published in the FEDERAL REGISTER (43 FR 11845) a letter dated March 17, 1978, from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs, establishing specific levels of restraint for certain cotton, wool, and man-made fiber textile products from Poland, including Categories 338 and 359, during the 12-month period which began on January 1, 1978, pursuant to the terms of the Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of January 9 and 12, 1978, between the Governments of the United States and the Polish People's Republic. The agreement also establishes consultation levels for catergories, such as Category 334, which are not subject to specific ceilings. In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to amend the previously established levels of restraint for Categories 338 and 359 and also to control imports of cotton textile products in Category 334 at the designated level of restraint for the agreement year which began on January 1, 1978, in accordance with the amended bilateral agreement.

EDWARD GOTTFRIED,
Acting Chairman, Committee for the Implementation of Textile Agreements.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

OCTOBER 27, 1978

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20229

DEAR MR. COMMISSIONER: Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977; pursuant to the Bilateral Cotton, Wool, and Man-made Fiber Textile Agreement of January 9 and 12, 1978, between the Governments of the United States and the Polish People's Republic; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to amend, effective on November 1, 1978, the levels of restraint established in the directive of March 17, 1978, for Categories 338 and 359 as follows:

Category and Amended 12-Month Level of Restraint[1]
338—441,359 dozen, of which not more than 264,028 dozen[2] shall be in TSUSA 380.0651 and 380.0652.
359—660,000 pounds.

You are further directed, effective on November 1, 1978, to prohibit entry of cotton textile products in Category 334, produced or manufactured in Poland and exported to the United States during the 12-month period which began on January 1, 1978, in excess of the following level of restraint:

Category and Amended 12-Month Level of Restraint[1]
334—151,937 dozen, of which not more than 16,949 dozen shall be in all TSUSA numbers in the category except TSUSA 380.0611.

Cotton textile products in Category 334 that have been exported to the United States before the effective date of this directive shall not be denied entry under this directive.

Cotton textile products in Category 334 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) prior to the effective date of this directive shall not be denied entry under this directive.

A detailed description of the categories in terms of TSUSA numbers was published in the FEDERAL REGISTER on January 4, 1978 (43 FR 884), as amended on January 25, 1978 (43 FR 3421), March 3, 1978 (43 FR 8828), June 22, 1978 (43 FR 26773), and September 5, 1978 (43 FR 39408).

The actions taken with respect to the Government of the Polish People's Republic and with respect to imports of cotton textile products from Poland have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

EDWARD GOTTFRIED,
Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 78-30844 Filed 10-30-78; 8:45 am]

[1] The level of restraint has not been adjusted to account for any imports after December 31, 1977.

[1] The level of restraint has not been adjusted to account for any imports after March 31, 1978. During the period beginning on April 1, 1978, and extending through August 31, 1978, 143,042 pounds have been imported.

TECHNOLOGY SUB-PANEL OF THE CHIEF OF NAVAL OPERATIONS EXECUTIVE PANEL ADVISORY COMMITTEE

Closed Meeting; Correction

In FR Doc. 78-29138 appearing at page 47665 in the FEDERAL REGISTER of October 16, 1978, the date of the closed meeting of the Technology Sub-Panel of the Chief of Naval Operations Executive Panel Advisory Committee is corrected to November 15-16, 1978, vice October 31-November 1, 1978. Accordingly, in the seventh line of the notice the date is corrected to November 15-16, 1978; in the eighth line the date is corrected to November 15; and in the eleventh line the date is corrected to November 16.

Dated: October 26, 1978.

P. B. WALKER,
Captain, JAGC, U.S. Navy, Deputy Assistant Judge Advocate General (Administrative Law).

Office of the Secretary

DEFENSE INTELLIGENCE AGENCY SCIENTIFIC ADVISORY COMMITTEE

Pursuant to the provisions of subsection (d) of section 10 of Pub. L. 92-463, as amended by section 5 of Pub. L. 94-409, notice is hereby given that a closed meeting of a Panel of the DIA Scientific Advisory Committee will be held as follows: Tuesday, December 5, 1978, Pomponio Plaza, Rosslyn, Va.

The entire meeting, commencing at 0900 hours, is devoted to the discussion of classified information as defined in section 552b(c)(1), Title 5 of the U.S. Code and therefore will be closed to the public. Subject matter will be used in a study on the growth and the potential implications of Soviet technology.

Dated: October 25, 1978.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Washington Headquarters Services, Department of Defense.

DEPARTMENT OF ENERGY

VOLUNTRARY AGREEMENT AND PLAN OF ACTION TO IMPLEMENT THE INTERNATIONAL ENERGY PROGRAM

Meetings

In accordance with section 252(c)(1)(A)(i) of the Energy Policy and Conservation Act (Pub. L. 94-163), notice is hereby provided of the following meetings:

I. A joint meeting of Subcommittees A and C of the Industry Advisory Board to the International Energy Agency (IEA) will be held on November 8, 1978, at the offices of Texaco Inc., 2000 Westchester Avenue, White Plains, N.Y., beginning at 10 a.m. The agenda is as follows:

1. Opening remarks.
2. Framework for antitrust clearances of oil company activities in an emergency.

II. A meeting of Subcommittee A of the Industry Advisory Board (IAB) to the International Energy Agency (IEA) will be held at the offices of Texaco Inc., 2000 Westchester Avenue, White Plains, N.Y. on November 8, 1978, and at the offices of Exxon Corp., 1251 Avenue of the Americas, New York, N.Y., on November 9, 1978. The meeting will begin upon adjournment of the joint meeting of IAB Subcommittees A and C which is being held at the offices of Texaco at White Plains on November 8, and will be continued on November 9, at the offices of Exxon at New York. The agenda is as follows:

1. Opening remarks.
2. Follow-up work on framework for antitrust clearances of oil company activities in an emergency.
3. Computer logging of voluntary offers.
4. Considerations to be included in the design of future tests.
5. Questionnaire A and B reporting instructions.
6. Consumer stocks and reporting under IEA procedures.
7. Review Industry Supply Advisory Group (ISAG) paper on tonnage considerations in a crisis.
8. Emergency management manual revisions.
9. Secretariat report on harmonization of IEA EEC emergency data calculations and procedures.
10. Future work program.

III. A meeting of Subcommittee C of the Industry Advisory Board (IAB) to the International Energy Agency (IEA) will be held on November 8, 1978, at the offices of Texaco, Inc., 2000 Westchester Avenue, White Plains, N.Y., following adjournment of the joint meeting of IAB Subcommittees A and C which is being held at the offices of Texaco at White Plains on November 8. The agenda is as follows:

1. Opening remarks, including a review of developments since the last meeting.
2. Results of joint meeting with Subcommittee A.
3. Settlement of disputes.
4. Pricing in an emergency.
5. Extraordinary and additional costs.
6. Future work of Subcommittee C.

IV. A meeting of the Industry Advisory Board to the International Energy Agency (IEA) will be held on November 10, 1978, at the offices of Mobil Oil Corp., 150 East 42d Street, New York, N.Y., beginning at 9:30 a.m. The agenda is as follows:

1. Opening remarks by the Chairman including:
   A. Communications to and from the IEA.
   B. Report on Standing Group on Emergency Questions (SEQ) meeting of October 4, 1978.
2. Matters arising from the record note of IAB meeting on September 14, 1978.
3. Position of Reporting Companies under:
   A. EEC Competition regulations.
   B. U.S. Voluntary Agreement.
4. Report of Subcommittee C including:
   A. Opening remarks, including a review of developments since the last meeting.
   B. Results of joint meeting with Subcommittee A.
   C. Settlement of disputes.
   D. Pricing in an emergency.
   E. Extraordinary and additional costs.
   F. Future work of Subcommitted C.
5. Report of Subcommittee A including:
   A. Framework for antitrust clearances of oil companies' activities in an emergency.
   B. AST-2 follow-up activities.
   C. Consumer stocks and reporting under IEA procedures.
   D. Future work program.
6. Report of ISAG Manager including:
   A. ISAG/Secretariat operations manual.
   B. Tonnage analyses and forecasts.
   C. Reorganization of ISAG: continuity; training.
   D. Future work program
7. Selection of new IAB Chairman and ISAG Manager.
8. Future work program for the IAB.
9. Dates and venues of future meetings of IAB and Subcommittees.

As provided in section 252(c)(1)(A)(ii) of the Energy Policy and Conservation Act, these meetings will not be open to the public.

Dated: October 25,1978.

ROBERT C. GOODWIN, Jr.,
Assistant General counsel for International Trade and Emergency Preparedness.

[6740-02-M]

Federal Energy Regulatory Commission

[Docket No. RI78-21]

BRADEN-DEEM, INC.

Order Granting Petition for Special Relief and Permitting Intervention

OCTOBER 23, 1978.

On December 7, 1977 Braden-Deem, Inc. (Braden Deem) filed a petition for special relief pursuant to § 2.76 of the Commission's General Policy and Interpretations (18 CFR 2.76) for the sale of natural gas[1] to Panhandle Eastern Pipe Line Co. (Panhandle Eastern) from the White No. 1 Well, Robbins No. 1 Well and Barnes No. 1 Well in the Carver-Robbins Gas Field, Pratt County, Kans. Subsequently, Braden Deem filed and amended petition for special relief on March 21, 1978, and a second amended petition on March 28, 1978.

Braden Deem, an independent small producer, was issued a small producer certificate in Docket No. CS72—0151 on January 31, 1972. Braden Deem is currently receiving 35 cents per Mcf for the sale of this Gas.

Notice of Braden Deem's petition for special relief was issued by the Commission on March 7, 1978; notice of Braden Deem's second amended petition was issued on May 11, 1978. Both notices were published in the FEDERAL REGISTER. Panhandle Eastern Pipe Line Co. field a timely petition to intervene in the original petition for special relief.

In their second amended petition for special relief Braden Deem requests a rate of $1.10 per Mcf for the sale of this gas.[2] Braden Deem states that it will be necessary every three to 5 years to pull and repair bottom hole pumps, repair pumping units, overhaul the pumping unit engines, overhaul the compressors and compressor engines, and treat the formation with a calcium carbonate scale inhibitor to prevent the deposition of scale on bottom hole pumps. Brademn Deem states that it is not economical to continue producing gas from the subject wells at the current rate. Branden Deem filed with its petition for special relief executed amendments dated November 3 and 4, 1977 to its contract with Panhandle Eastern dated October 26, 1960, in which Panhandle Eastern agreed to pay the price for this gas authorized by the FERC.

[1] Braden Deem owns a 93.75 percent working interest in these wells; M. L. Sloan owns the remaining 6.25 percent working interest.

[2] In its original petition Braden Deem requested a rate of 83 cents per Mcf at 14.65 psia plus annual escalations of 14 cents per Mcf for the sale of this gas. In their first amended petition for special relief, Braden Deem requested a price of 97 cents per Mcf plus annual escalations of 14 cents per Mcf.

Braden Deem is not proposing to make any additional investment in these wells to recover the remaining gas. The petition does not meet the criteria for special relief set forth in § 2.76 of the Commission's regulations. Therefore, the petition will be considered as one seeking a rate in excess of the adjusted national rate pursuant to § 2.56(b)b of the Commission's regulations. The rate must be calculated on an "out of pocket" expense basis.

Based on data filed by Braden Deem, Staff has determined that the estimated production expenses over the remaning life of the project will be $241,082. Staff estimates that 218,813 Mcf of reserves attributable to the net working interest of Braden Deem remains to be recovered. Staff's cost study, using these expenses and reserves, indicates that a total rate of $1.10 per Mcf at 14.65 psia is required to recoup all out of pocket expenses associated with continuing production.[3]

Based on the record in this case, including Staff's cost analysis, the Commission concludes that the requested rate is cost supported and that it is in the public interest to grant relief.

The Commission finds. The petition for special relief by Braden Deem should be approved.

The Commission orders. (A) The petition for special relief filed by Braden Deem, as amended, is hereby granted;

(B) Braden Deem is authorized to collect a rate of $1.10 per Mcf at 14.65 psia for the sale of natural gas from the Barnes No. 1 Well, the White No. 1 Well and the Robbins No. 1 Well in the Carver-Robbins Gas Field, Pratt County, Kansas to Panhandle Eastern Pipe Line Co. effective as of the date of the Commission order subject to the condition set forth in Paragraph (C) below;

(C) Braden Deem must file a Notice of Independent Producer Rate Change reflecting the above authorized rate within 30 days of the date of the order herein.

(D) Panhandle Eastern is permitted to intervene in the above-entitled proceeding, subject to the rules and regulations of the Commission: *Provided, however,* That its participation shall be limited to matters affecting asserted rights and interests specifically set forth in its petition to intervene; *And provided, further,* That the admission of Panhandle Eastern in the manner provided shall not be construed as recognition by the Commission that it might be aggrieved because of any orders entered in this proceeding, and Panhandle Eastern agrees to accept the record as it now stands.

By the Commission.

KENNETH F. PLUMB,
Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 9982]

AMBIENT AIR MONITORING REFERENCE AND EQUIVALENT METHOD DESIGNATIONS

Bendix Model 8303 SO_2 Analyzer; Meloy Model NA530R NO_2 Analyzer; Meloy Model SA285E SO_2 Analyzer

Notice is hereby given that EPA, in accordance with 40 CFR Part 53 (40 FR 7044, 41 FR 11252, 41 FR 52694), has designated two additional equivalent methods for the measurement of ambient concentrations of sulfur dioxide (SO_2) and one additional reference method for the measurement of ambient concentrations of nitrogen dioxide (NO_2). All three methods are automated methods (analyzers). The first and third are equivalent methods for SO_2 which employ the "flame photometric detection (FPD)" measurement principle. The other method is a reference method for NO_2, which uses the gas phase chemiluminescence measurement principle specified for NO_2 reference methods by Appendix F of 40 CFR Part 50 (as amended on December 1, 1976—41 FR 52688). The methods are as follows:

EQSA-1078-030, "Bendix Model 8303 Sulfur Analyzer," operated on either the 0-0.5 ppm range or the 0-1.0 ppm range.

This method is available from the Bendix Corp., Environmental and Process Instruments Division, Post Office Box 831, Lewisburg, W.Va., 24901. A notice of receipt of application for this method appeared in the FEDERAL REGISTER, Volume 42, December 7, 1977, page 61894 (43 FR 61894).

RFNA-1078-031, "Meloy Model NA530R Nitrogen Oxides Analyzer."

operated on the following ranges and time constant switch positions:

tronic Drive, Springfield, Va., 22151. A notice of receipt of application for this

be consulted to determine the feasibility of such upgrading

operating their air quality surveillance systems under 40 CFR 51.17(a). Addi-

in the appropriate docket and in a separate "Ex Parte Notebook," both in the Commission's Public Reference

manner in which a bank for cooperatives may offer participations in loans to other banks for cooperatives and fi-

V 4 3 / 2 1 1 OCT 31 1978

operated on the following ranges and time constant switch positions:

Range, ppm	Time constant setting
0-0.1*	4
0-0.25*	3 or 4
0-0.5	2, 3, or 4
0-1.0	2, 3, or 4

Operation of the analyzer requires an external vacuum pump, either Meloy Option N-10 or an equivalent pump capable of maintaining a vacuum of 200 torr (22 inches mercury vacuum) or better at the pump connection at the specified sample and ozone-air flowrates of 1200 and 200 cm³/min, respectively. The analyzer may be operated at temperatures between 10° and 40° C and at line voltages between 105 and 130 volts, with or without any of the following options:

N-1A	Automatic zero and span
N-2	Vacuum gauge
N-4	Digital panel meter
N-6	Remote control for zero and span
N-6B	Remote zero/span control and status (pulse)
N-6C	Remote zero/span control and status (timer)
N-9	Manual zero/span
N-10	Vacuum pump assembly (see alternate requirement above)
N-14B	Line transmitter
N-18	Rack mount conversion
N-18A	Rack mount conversion

This method is available from Meloy Laboratories, Inc., 6715 Electronic Drive, Springfield, VA 22151. A notice of receipt of application for this method appeared in the FEDERAL REGISTER, Volume 43, February 23, 1978, page 7473 (43 FR 7473).

EQSA-1078-032, Meloy "Model SA285E Sulfur Dioxide Analyzer," operated on the following ranges and time constant switch positions:

Range, ppb	Time constant setting
0-50*	1 or 10
0-100*	1 or 10
0-500	off, 1 or 10
0-1000	off, 1 or 10

The analyzer may be operated at temperatures between 10° and 40° C and at line voltages between 105 and 130 volts, with or without any of the following options:

S-5	Teflon coated block
S-14B	Line transmitter board
S-18	Rack mount conversion
S-18A	Rack mount conversion
S-21	Front panel digital meter
S-22	Remote zero/span control and status (timer)
S-22A	Remote zero/span control
S-22B	Remote zero/span control and status (pulse)
S-23	Auto zero adjust
S-23A	Auto/manual zero adjust
S-25	Press to read
S-26	Manual zero and span
S-27	Auto manual zero/span
S-28	Auto range and status
S-30	Auto reignite
S-32	Remote range control and status
S-35	Front panel digital meter with BCD output
S-37	Temperature status lights
S-38	Sampling mode status

This method is also available from Moloy Laboratories, Inc., 6715 Electronic Drive, Springfield, Va., 22151. A notice of receipt of application for this method appeared in the FEDERAL REGISTER, Volume 43, July 31, 1978, page 33311 (43 FR 33311).

*NOTE—With respect to the two Meloy analyzers, models NA530R (RFNA-1078-031) and SA285E (EQSA-1078-032), users should be aware that designation of ranges less than 0.5 ppm (500 ppb) are based on meeting the same absolute performance specifications required for the 0-0.5 ppm (0-500 ppb) range. EPA is considering—but has not yet established—proportionately more restrictive performance specifications applicable to ranges less than 0-0.5 ppm (500 ppb). Thus, designation of these lower ranges does not guarantee commensurably better performance than that obtained on the 0-0.5 ppm. (0-500 ppb) range.

A test analyzer representative of each of these methods has been tested by the respective applicant, in accordance with the test procedures specified in 40 CFR Part 53 as amended on December 1, 1976 (41 FR 52694). After reviewing the results of these tests and other information submitted by the respective applicants, EPA has determined, in accordance with Part 53, that these methods should be designated as either reference or equivalent methods as appropriate. The information submitted by the applicants will be kept on file at the address shown below and will be available for inspection to the extent consistent with 40 CFR Part 2 (EPA's regulations implementing the Freedom of Information Act).

As reference or equivalent methods, these methods are acceptable for use by States and other control agencies for purposes of § 51.17 (a) of 40 CFR Part 51 ("Requirements for Preparation, Adoption, and Submittal of Implementation Plans") as amended on February 18, 1975 (40 FR 7042). For such use, each method must be used in strict accordance with the operation or instruction manual provided with the method and subject to any limitations (e.g., operating range) specified in the applicable designation (see descriptions of the methods above). Vendor modifications of a designated method used for purposes of § 51.17(a) are permitted only with prior approval of EPA, as provided in Part 53. Provisions concerning modification of such methods by users are specified under § 51.17(a)(f) (41 FR 11255).

In general, designation applies to any analyzer which is identical to the analyzer described in the designation. In many cases, similar analyzers manufactured prior to the designation may be upgraded (e.g., by minor modification or by substitution of a new operation or instruction manual) so as to be identical to the designated method and thus achieve designated status at modest cost. The manufacturer should be consulted to determine the feasibility of such upgrading.

Part 53 requires that sellers of designated methods comply with certain conditions. The conditions are given in 40 CFR 53.9 and are summarized below:

(1) A copy of the approved operation or instruction manual must accompany the analyzer when it is delivered to the ultimate purchaser.

(2) The analyzer must not generate any unreasonable hazard to operators or to the environment.

(3) The analyzer must function within the limits of the performance specifications given in Table B-1 of Part 53 for at least 1 year after delivery when maintained and operated in accordance with the operation manual.

(4) Any analyzer offered for sale as a reference or equivalent method must bear a label or sticker indicating that it has been designated as a reference or equivalent method in accordance with Part 53.

(5) If such an analyzer has one or more selectable ranges, the label or sticker must be placed in close proximity to the range selector and indicate which range or ranges have been included in the reference or equivalent method designation.

(6) An applicant who offers analyzers for sale as reference or equivalent methods is required to maintain a list of ultimate purchasers of such analyzers and to notify them within 30 days if a reference or equivalent method designation applicable to the analyzer has been canceled or if adjustment of the analyzers is necessary under 40 CFR 53.11(b) to avoid a cancellation.

(7) An applicant who modifies an analyzer previously designated as a reference or equivalent method is not permitted to sell the analyzer (as modified) as a reference or equivalent method (although he may choose to sell it without such representations), nor to attach a label or sticker to the analyzer (as modified) under the provisions described above, until he has received notice under 40 CFR 53.14(c) that the original designation or a new designation applies to the method as modified or until he has applied for and received notice of a new reference or equivalent method determination for the analyzer as modified.

Aside from occasional breakdowns or malfunctions, consistent or repeated noncompliance with any of these conditions should be reported to: Director, Environmental Monitoring and Support Laboratory, Department E (MD-77), U.S. Environmental Protection Agency, Research Triangle Park, N.C. 27711.

Designation of these reference and equivalent methods will provide assistance to the States in establishing and

operating their air quality surveillance systems under 40 CFR 51.17(a). Additional information concerning this action may be obtained by writing to the address given above.

Dated: October 25, 1978.

STEPHEN J. GAGE,
Assistant Administrator for Research and Development.

[FRL 997-5]

ECOLOGY COMMITTEE OF THE SCIENCE ADVISORY BOARD

Open Meeting

Under Pub. L. 92-463, notice is hereby given that a meeting of the Ecology Committee of the Science Advisory Board will be held beginning at 9:00 a.m. on November 20 and 21, 1978 in the Administrator's Conference Room (room 1112A), Crystal Mall, building 2, 1921 Jefferson Davis Highway, Arlington, Va.

This is the 18th meeting of the Ecology Committeee. The agenda includes a report on Science Advisory Board Activities; commentary on the report, "Mitigation Feasibility for the Keypone-Contaminated Hopewell/James River Areas", briefing relative to review of water quality criteria; report and discussion on EPA's Anticipatory Research Program and other selected programs in the Office of Research and Development; review of Ecology Committee activities and discussion of topics of current and future interest to the Committee.

The meeting is open to the public. Any member of the public wishing to attend, participate, or obtain information should contact Dr. J. Frances Allen, Executive Secretary, Ecology Committee, 703-557-7720, by close of business November 15, 1978.

Dated: October 24, 1978.

RICHARD M. DOWD,
Staff Director Science Advisory Board.

FEDERAL COMMUNICATIONS COMMISSION

EX PARTE PRESENTATIONS IN INFORMAL RULEMAKINGS

OCTOBER 25, 1978.

The following is a list of *ex parte* presentations made during the week of October 16, 1978 in connection with informal rulemaking proceedings now pending at the Commission. Summaries of these presentations are available in the appropriate docket and in a separate "Ex Parte Notebook," both in the Commission's Public Reference Room (Room 239). The Public Reference Room is open Monday through Friday, 8 a.m. to 5:30 p.m. The duplicating contractor, Downtown Copy Center, 1114 21st Street NW., Washington, D.C. 20037, 202-452-1422, will provide, for a fee, copies of ex parte material. Responses will be accepted if made in accordance with the procedures outlined in the Commission's Notice of Inquiry in General Docket No. 78-167 (FCC 78-405), released June 14, 1978 (43 FR 27868), as amended by the Order and Further Notice of Inquiry (FCC 78-517) released July 18, 1978 (43 FR 32832.)

Docket No. 21116—Prohibit the marketing of external of external radio frequency amplifiers. Presentation to Commissioner Brown by Lawrence A. Rogers, Attorney at Law, Oct. 16, 1978.

Docket No. 21117—Type acceptance of equipment marketed in the Amateur Radio Service.

For additional information, call Joyce Butler at 632-7535.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

FARM CREDIT ADMINISTRATION

SEMIANNUAL AGENDA OF REGULATIONS

Pursuant to section 2 of Executive Order 12044, the Farm Credit Administration has established the following agenda of significant regulations which it will have under development and review during the period of November 1, 1978, through March 30, 1979.

SIGNIFICANT REGULATIONS UNDER DEVELOPMENT

12 CFR 612.2030—Nepotism. This regulation prohibits nepotism in the employment practices of the banks and associations of the Farm Credit System. The Farm Credit Administration is considering amending this regulation pursuant to 12 U.S.C. 2243 and 2252 to (1) more clearly deseribe the employment relationships which are prohibited, (2) remove from coverage certain relationships which are so remote that it can reasonably be assumed that they do not influence the employment practices of the institutions, and (3) prohibit the employment of relatives in certain positions which are not now coverd by the regulation.

12 CFR 614.4334—Banks for Cooperatives. This regulation governs the manner in which a bank for cooperatives may offer participations in loans to other banks for cooperatives and financial institutions. Currently, Farm Credit Administration approval is required only for the form of the participation agreement used. In order to preclude the possibility that supplemental arrangements may be used to circumvent other requirements of the regulations, the Farm Credit Administration is considering amending this regulation pursuant to 12 U.S.C. 2243 and 2252 to require its approval of any supplemental agreements and modifications which directly affect such things as capitalization, interest, and loss-sharing.

Neither of the proposed amendments to the above regulations will result in (a) an annual effect upon the economy of $100 million or more, or (b) a major increase in costs or prices for individual industries, levels or government, or geographic regions. Therefore, a regulatory analysis of the type required by section 3 of Executive Order 12044 will not be prepared for these proposals.

SIGNIFICANT REGULATIONS SELECTED FOR REVIEW

12 CFR 615.5210—Annual Budget and Projections (net worth objectives). This regulation sets out requirements for budget and long range financial and operating projections of the banks and associations of the Farm Credit System.

12 CFR 618.8300—618.8359—Release of Information. These regulations govern the release of information concerning borrowers by officials of the Farm Credit institutions.

12 CFR 618.8430—Internal Controls. This regulation provides for the establishment of internal control policies to, among other things, effectively control and account for all funds, property, and other assets of the Farm Credit banks and associations.

STATUS OF REGULATIONS PREVIOUSLY SELECTED FOR REVIEW

On May 22, 1978, the Farm Credit Administration published in the FEDERAL REGISTER (43 FR 21985) a list of significant regulations which it selected for its initial review. The current status of those regulations is as follows:

12 CFR 612.2030—Nepotism. The Farm Credit Administration has under consideration an amendment to this regulation. See Significant Regulations under Development above. The proposed amendment has been submitted to the Farm Credit banks for comment.

12 CFR 614.4260 (c)—Banks for Cooperatives (season loans to finance commodities). On June 27, 1978, the Farm Credit Administration published in

the FEDERAL REGISTER (43 FR 27732) a final rule which amended this regula-

Dated: October 25, 1978.

proval under section 3(a)(1) of the

U.S.C. 2311(c)(1). At the request of the staff, Assistant Attorney General James

Act") provides that certain types of State warranty requirements are inap-

the FEDERAL REGISTER (43 FR 27732) a final rule which amended this regulation to conform to a revised list of commodities authorized for price support programs under regulations of the Commodity Credit Corporation.

12 CFR 615.5120 (a)—Purchase Eligibility Requirements (farm credit investment funds). On October 16, 1978, the Farm Credit Administration published in the FEDERAL REGISTER (43 FR 47489) a final rule amending this regulation to clarify that Farm Credit Administration employees may not purchase these bonds.

12 CFR 615.5330 (a)—Banks for Co<operatives (surplus). On August 15, 1978, the Farm Credit Administration published in the FEDERAL REGISTER (43 FR 36052) a final rule amending this regulation to permit a bank for cooperatives to maintain in surplus an amount less than 25 percent of its outstanding capital stock when approved by the Farm Credit Administration.

For further information concerning any item of this agenda contact:

Mr. Lee R. Brobst, Acting Deputy Governor, Office of Administration, Farm Credit Administration, 490 L'Enfant Plaza East, SW., Washington, D.C. 20578, 202-755-8927.

C. T. FREDRICKSON,
Acting Governor,
Farm Credit Administration.

FEDERAL ELECTION COMMISSION

[Notice 1978-8]

OPINION AND REGULATION INDEX

A new cumulative Index to Advisory Opinions and Opinions of Counsel (discontinued in April 1976) issued by the Federal Election Commission is now available for purchase in the Public Records Division of the Commission. The updated index includes a subject index and U.S. Code section index covering opinions issued from the establishment of the Federal Election Commission in April 1975 through August 1978, as well as an F.E.C. Regulation index covering 1977 and 1978 opinions.

Purchase price of the new Index is $4.20 to cover dupilcation costs, payable in advance. Checks should be made payable to: United States Treasurer. Person to contact: Mr. Craig Brightup, Public Records Division, Federal Election Commission, 1325 K Street, NW., Washington, D.C. 20463. Telephone: 202-523-4181.

Dated: October 25, 1978.

JOAN D. AIKENS,
Chairman for the
Federal Election Commission.

FEDERAL TRADE COMMISSION

PREEMPTIVE EFFECT OF SECTION 111(c)(1) OF MAGNUSON-MOSS WARRANTY ACT

Wisconsin Mobile Home Warranty Law

AGENCY: Federal Trade Commission.

ACTION: Response to request for opinion.

SUMMARY: Published below is a letter with an analysis which responds to a request of the Wisconsin Attorney General for Commission interpretation of section 111(c)(1) of the Magnuson-Moss Warranty Act and its preemptive effect on Wisconsin's Mobile Home Warranty Law. The Commission has determined that several State requirements are rendered inapplicable to warranties complying with Federal law by section 111(c)(1).

FOR FURTHER INFORMATION CONTACT:

Rachel Miller, Attorney, Division of Product Reliability, 202-523-0425, or Charles Taylor, Attorney, Division of Product Reliability, 202-523-3660, Federal Trade Commission, Washington, D.C. 20580.

SUPPLEMENTARY INFORMATION: The letter and analysis follow.

Hon. Bronson C. La Follette
Attorney General
State of Wisconsin
Department of Justice
Madison, Wis. 53702

Dear Attorney General La Follette:

By letter dated February 22, 1978, you requested an opinion on whether any of the provisions of Wisconsin's mobile home warranty law and regulations (§ 218.14 Wis. Stats. and IND 14.50 Wis Admin. Code) are subject to or preempted by section 111(c)(1) of the Magnuson-Moss Warranty Act, 15 U.S.C. 2311(c)(1). At the request of the staff, Assistant Attorney General James Jeffries supplemented your request by filing on March 16, 1978, an informal interpretation of the effect of the Wisconsin law. This letter is in reply to your request for a Commission opinion in this matter.

The Commission has concluded that the following two requirements of the Wisconsin law, and the related provisions of the regulations of the Wisconsin Department of Industry, Labor, and Human Relations, submitted with your request are affected by operation of section 111(c)(1) of the Warranty Act:

(1) Disclosure in the written warranty of the address where notice of problems is to be given. Section 218.14(1)(c)(1), Wis. Stats. IND 14.50(2)(c).

(2) Disclosure in the written warranty of the fact that unsuccessful repair is a breach of warranty, and that the consumer's right to proper repair continues regardless of whether the warranty period has expired. Section 218.14 (1)(c)(2), Wis. Stats.

These requirements are inapplicable to warranties which meet Federal requirements by operation of section 111(c)(1) of the Warranty Act.

Paragraph (2) of section 111(c) of the Warranty Act provides a procedure whereby States may petition the Commission for permission to enforce a State requirement which would otherwise be rendered inapplicable to written warranties complying with Federal standards by operation of paragraph (1) of section 111(c). Upon application of an appropriate State agency the Commission is required to intitate a rulemaking proceeding under section 109 of the Warranty Act to determine if such State requirement affords greater protection to consumers than Federal requirements and does not unduly burden interstate commerce. If the Commission makes such a finding, the State requirement will be applicable to written warranties for so long as the State effectively administers and enforces such provision.

A copy of the Commission's analysis of the effect of the Warranty Act on the Wisconsin State law provisions is enclosed. If upon consideration of this matter you desire the public rulemaking proceeding described above, for consideration of the preservation of the two affected statutory provisions, you should submit an application pursuant to section 111(c)(2) of the Warranty Act to the Secretary of the Commission.

You are invited to contact Rachel Miller, Attorney, Division of Product Reliability, 202-523-1753, or Charles Taylor, Attorney, Division of Product Reliability, 202-523-3660, Federal Trade Commission, Washington, D.C. 20580, should you have any questions concerning this matter.

By direction of the Commission.

[Signed]

CAROL M. THOMAS,
Secretary.

Enclosure.

ANALYSIS OF SECTION 111 OF MAGNUSON-MOSS WARRANTY ACT AND APPLICABILITY TO WISCONSIN MOBILE HOME WARRANTY LAWS

Section 111(c)(1)[1] of the Magnuson-Moss Warranty Act ("the Warranty Act") provides that certain types of State warranty requirements are inapplicable to written warranties complying with the Warranty Act. Section 111(c)(2)[2] provides that an appropriate State agency may apply to the Comisision for an exemption of any State warranty requirement from the preemptive effect of paragraph (1) of that section. Such an exception may be granted if after public hearings the Commission determines that the requirement meets the criteria set out in paragraph (2).

The Attorney General requests a Commission interpretation of paragraph (1) of section 111(c) and an opinion stating which provisions of Wisconsin's mobile home warranty requirements are affected by that paragraph. He has not requested exemption of any such affected requirements as provided in paragraph (2) of section 111(c); therefore the rulemaking procedure specified in the Act for exemption applications is not applicable in this instance. The Attorney General may choose later to request or not to request an exemption under the procedure of paragraph (2) for any provisions of Wisconsin law which the Commission determines are affected by section 111(c)(1) of the Warranty Act.

This analysis builds on the findings made by the Commission in the California determination,[3] which first considered the effect of the Magnuson-Moss Warranty Act on State warranty requirements. In general, the protections of the Warranty Act are in addition to, rather than in lieu of, warranty rights and remedies under State law.[4] Only a very narrow class of State requirements are "preempted" (that

[1] Section 111(c)(1). "Except as provided in subsection (b) and in paragraph (2) of this subsection, a State requirement—(A) which relates to labeling or disclosure with respect to written warranties or performance thereunder; (B) which is within the scope of an applicable requirement of sections 102, 103, and 104 (and rules implementing such sections), and (C) which is not identical to a requirement of section 102, 103, or 104 (or a rule thereunder), shall not be applicable to written warranties complying with such sections (or rules thereunder)."

[2] Section 111(c)(2). "If, upon application of an appropriate State agency, the Commission determines (pursuant to rules issued in accordance with section 109) that any requirement of such State covering any transacton to which this title applies (A) affords protection to consumers greater than the requirements of this title and (B) does not unduly burden interstate commerce, then such State requirement shall be applicable (notwithstanding the provisions of paragraph (1) of this subsection) to the extent specified in such determination for so long as the State administers and enforces effectively any such greater requirement."

[3] Commission's Determination of Application of State of California, 42 FR 54004, Oct. 4, 1977 (hereinafter "California").

[4] Section 111(b)(1). "Nothing in this title shall invalidate or restrict any right or remedy of any consumer under State law or and other Federal law."

is, made inapplicable to warranties complying with the Federal requirements, by section 111(c)(1). Only requirements which relate to labeling or disclosure with respect to written warranties or performance thereunder; which are within the scope of an applicable requirement of sections 102, 103, and 104 (and rules implementing such sections); and which are not identical to a requirement of section 102, 103, or 104 (or a rule thereunder) are preempted.[5] Requirements which are not preempted are not affected by section 111(c)(1) and may be applied to warranties complying with the Warranty Act.

The Wisconsin requirements which are affected by section 111(c)(1) are those which require disclosure in the warranty document itself.[12] The scope of the Federal labeling requirements is set out in section 102 of the Warranty Act and in rules issued by the Commission. Section 102(a)(1) requires that the warranty be clear and conspicuous. Section 102(a)(2) requires that the warranty be available before the sale. Section 102(a)(3) requires that the warranty be readily available for examination by the consumer. Section 102(a)(4) requires that the warranty be made available to the consumer after the sale. Section 102(a)(5) requires that the warranty be expressed in simple and readily understood language. Section 102(a)(6) requires that the warranty conspicuously designate whether it is a full or limited warranty. Section 102(a)(7) requires that the warranty clearly and conspicuously disclose the terms and conditions of the warranty. Section 102(b) requires that the warranty clearly and conspicuously disclose the duration of the warranty, the products or parts covered, the party to whom the warranty is extended, the steps the consumer must take to obtain performance, any limitations on the duration of implied warranties, any limitations on consequential damages, and the statement that the consumer has legal rights and may also have other rights which vary from State to State.

[5] Section 111(c)(1). "Except as provided in subsection (b) and in paragraph (2) of this subsection, a State requirement—(A) which relates to labeling or disclosure with respect to written warranties or performance thereunder; (B) which is within the scope of an applicable requirement of sections 102, 103, and 104 (and rules implementing such sections), and (C) which is not identical to a requirement of section 102, 103, or 104 (or a rule thereunder), shall not be applicable to written warranties complying with such sections (or rules thereunder)."

[12] Section 102(a)(1) requires that the warranty be clear and conspicuous. Section 102(a)(2) requires that the warranty be available before the sale. Section 102(a)(3) requires that the warranty be readily available for examination by the consumer. Section 102(a)(4) requires that the warranty be made available to the consumer after the sale. Section 102(a)(5) requires that the warranty be expressed in simple and readily understood language. Section 102(a)(6) requires that the warranty conspicuously designate whether it is a full or limited warranty. Section 102(a)(7) requires that the warranty clearly and conspicuously disclose the terms and conditions of the warranty. Section 102(b) requires that the warranty clearly and conspicuously disclose the duration of the warranty, the products or parts covered, the party to whom the warranty is extended, the steps the consumer must take to obtain performance, any limitations on the duration of implied warranties, any limitations on consequential damages, and the statement that the consumer has legal rights and may also have other rights which vary from State to State.

Mr. James D. Jeffries, Assistant Attorney General of Wisconsin, informed the Commission's staff that Wisconsin's mobile home warranty law requires that the warranty be written in clear and unambiguous language. This requirement is not affected by section 111(c)(1) because it is not within the scope of section 102, 103, or 104 of the Warranty Act or rules thereunder. Section 102(a)(5) requires that the warranty be expressed in simple and readily understood language. The Wisconsin requirement is not identical to section 102(a)(5) because it is more specific. Section 102(a)(5) requires that the warranty be expressed in simple and readily understood language. The Wisconsin requirement is not identical to section 102(a)(5) because it is more specific. Section 102(a)(5) requires that the warranty be expressed in simple and readily understood language. The Wisconsin requirement is not identical to section 102(a)(5) because it is more specific.

Wisconsin's requirement that the warranty be written in clear and unambiguous language is not affected by section 111(c)(1) because it is not within the scope of section 102, 103, or 104 of the Warranty Act or rules thereunder. Section 102(a)(5) requires that the warranty be expressed in simple and readily understood language. The Wisconsin requirement is not identical to section 102(a)(5) because it is more specific. Section 102(a)(5) requires that the warranty be expressed in simple and readily understood language. The Wisconsin requirement is not identical to section 102(a)(5) because it is more specific. Section 102(a)(5) requires that the warranty be expressed in simple and readily understood language. The Wisconsin requirement is not identical to section 102(a)(5) because it is more specific.

Wisconsin's requirement that the warranty be written in clear and unambiguous language is not affected by section 111(c)(1) because it is not within the scope of section 102, 103, or 104 of the Warranty Act or rules thereunder. Section 102(a)(5) requires that the warranty be expressed in simple and readily understood language. The Wisconsin requirement is not identical to section 102(a)(5) because it is more specific. Section 102(a)(5) requires that the warranty be expressed in simple and readily understood language. The Wisconsin requirement is not identical to section 102(a)(5) because it is more specific. Section 102(a)(5) requires that the warranty be expressed in simple and readily understood language. The Wisconsin requirement is not identical to section 102(a)(5) because it is more specific.

V 4 3 / 2 1 1 0 C 3 1 7 8

is, made inapplicable to warranties complying with the Federal requirements).

The Commission has already made clear that, while allowing the use of uniform warranty documents is a goal of section 111, this goal is subordinate to that of permitting States to fashion their own scheme or warranty rights and remedies which may be more protective than the minimum level of protection of the Federal Act. Only State requirements which have certain specific characteristics are affected by the Federal Act. Those characteristics are: that the requirement does not create a right or remedy for consumers;[5] that it relates to written warranty labeling or disclosure;[6] that it is within the scope of a requirement of sections 102, 103, or 104 of the Warranty Act, or rules under one of these sections;[7] and that is not identical to that requirement.[8] Only if a State requirement has all these characteristics is it "preempted," or rendered inapplicable to warranties complying with Federal law, under section 111 of the Act.[9]

Thus, a State provision which merely creates consumer rights or remedies, without providing for disclosure of them,[10] would be entirely unaffected by the Warranty Act; that is, it would not be subject to "preemption." A provision which both creates a consumer right or remedy, and provides for its disclosure to consumers,[11] must be considered in two stages. The underlying right would continue to be effective in spite of any similarity with or difference from the Federal Act, since section 111(b) specifically preserves such rights and remedies. On the other hand, the method of disclosure of that right provided for in the State law must be considered as to whether it has the final two characteristics. If it does, then the method of disclosure in the State law is "preempted," though the underlying consumer right remains in effect. The Commission adopted this interpretation of section 111 in the course of its California determination because it is the only interpretation which gives meaning to both paragraphs (b) and (c) of that section and is consistent with the Act's legislative history.

In the California determination, the Commission defined the scope of its rule on disclosure of warranty terms, 16 CFR Part 701, to include any requirement that information appear in the warranty document itself.[12] The scope of the Federal labeling requirements, while discussed in the California determination, is not at issue in this analysis of Wisconsin law.

The California determination did not explicitly discuss the meaning of the last characteristic, that the State provision be "not identical to" a Federal disclosure or labeling requirement, although this was implicit in a number of determinations concerning mobile home requirements.[13] Its precise meaning is particularly important where, as here, a State law mandates the giving of a written warranty with certain specified terms.

The Commission interprets "identical to" to mean "having the same effect as" or "resulting in the same disclosure as." If the item of information required by the State to be disclosed in the written warranty would also be disclosed under a Federal disclosure provision, the State requirement is "identical to" the Federal requirement for purposes of section 111. It is not essential that the State provision contain the same words as the Federal provision, or incorporate the Federal provision by reference.

The Commission's rule on warranty disclosure [14] requires that up to 10 enumerated elements of a warranty be disclosed. Usually the manufacturer is free to choose the terms of a written warranty. However, when State law mandates that the written warranty contain certain terms, those mandated terms become terms of the warranty and thus must be disclosed under the Commission's rule. For example, when a State mandates a written warranty with a 1-year duration,[15] that duration must be disclosed under the Commission's rule. Since the 1-year duration of the warranty would have to be disclosed under both State and Federal law, the two requirements are "identical" requirements for purposes of section 111(c)(1).

On the other hand, if the mandatory provision which the State requires to be disclosed is one which the Federal rule does not require to be disclosed, such as a telephone number for giving notice of defects under the warranty,[16] then the State disclosure requirement is not identical to the Federal requirement. Thus if the State law requires disclosure of a term which is not 1 of the 10 elements enumerated in the Commission's rule, then the provision is rendered inapplicable to warranties complying with the Federal rule.

APPLICABILITY TO WISCONSIN MOBILE HOME WARRANTY LAWS

The following paragraphs discuss the specific provisions of the Wisconsin mobile home law [17] and whether or not each is made inapplicable by section 111(c)(1) to warranties complying with the Federal Act, and why. In each case, only the disclosure or labeling aspect is discussed; the underlying rights created by State law cannot in any case be invalidated or restricted by the Federal Act by virtue of section 111(b)(1).

SECTION 218.14(1)

Requires giving buyers a written warranty with certain mandatory terms on mobile homes. The requirement of disclosure of the existence of the warranty is not within the scope of the Federal disclosure rule, which merely establishes what must be disclosed in the warranty once the initial decision to issue a written warranty is decided.

Requires the mandatory 1-year duration to be disclosed. This provision requires the same information to be disclosed as 16 CFR 701.3(a)(4), that is, the duration of the written warranty. Thus it does not meet the "not identical" condition of section 111(c)(1)(C). The State requirement, therefore is not "preempted" or rendered inapplicable to warranties complying with Federal requirements. (Note that the mandatory 1-year duration itself is a consumer right which is preserved by section 111(b)(1).)

SECTION 218.14(1)(a)

Establishes the characteristics or properties which are covered by the mandatory warranty, specifically, that it meet certain standards. This provision requires the same disclosure in the warranty as 16 CFR 701.3(a)(2), "[a] clear description and identification of • • • characteristics, • • • or properties covered by • • • the warranty." It therefore is not affected by section 111(c)(1) of the Warranty Act.

SECTION 218.14(1)(b)

Establishes the characteristics or properties of the product which are covered by the warranty, specifically, that the product be defect-free and habitable. Like paragraph (a), this provision requires the same disclosure as 16 CFR 701.3(a)(2), and is therefore not affected by section 111(c)(1) of the Warranty Act.

Defines "reasonable care and maintenance." By letter of March 16, 1978, Mr. James D. Jeffries, Assistant Attorney General of Wisconsin, informed the staff informally that this definition need not appear in the written warranty document. Under this analysis it is not a disclosure or labeling requirement and is unaffected by section 111(c)(1) of the Warranty Act.

[5] Section 111(b)(1).
[6] Section 111(c)(1)(A).
[7] Section 111(c)(1)(B).
[8] Section 111(c)(1)(C).
[9] *See* California, Section II.
[10] For example, the UCC implied warranty of merchantability.
[11] For example, the requirement that repairs under California's statutory mobile home warranty be performed at the site of the mobile home.
[12] California, p. 54005.
[13] See Staff's Analysis, California Initial Notice, 41 FR 28361, at 28366, and text accompanying n. 27 (July 9, 1976).
[14] 16 CFR 701.3(a), 701.4.
[15] See, e.g., California Civil Code § 1797.3(b).
[16] See, e.g., California Civil Code § 1797.3(d). Note that this provision, otherwise preempted, was preserved under the Commission rulemaking procedures of sec. 111(c)(2).
[17] Sec. 218.14, Wis. Stats; Ind. 14.50 and 14.56 Wis. Admin. Code.

SECTION 218.14(1)(c)(1)

Defines who is responsible under the warranty. This provision requires a disclosure included in those of 16 CFR 701.3(a)(5), that is, identification of the warrantor in the warranty; therefore this requirement is not affected by section 111(c)(1) of the Warranty Act.

Requires disclosure of the warranty duration. Like section 218.14(1), this requirement is not affected by section 111(c)(1) of the Warranty Act.

Requires disclosure of the time within which the consumer must give notice of problems. This requires a disclosurre included in those required by 16 CFR 701.3(a)(5), that is, disclosure of what the consumer must do to get warranty service, and therefore is not affected by section 111(c)(1) of the Warranty Act.

Requires disclosure of the address where notice is to be given. This requirement is within the scope of 16 CFR 701.3(a)(5), but not identical to it. The Federal provision permits warrantors to include in the warranty a toll-free telephone number where warranty information may be obtained or where notice of defects may be given in addition to or instead of an address. Since the address is not required under Federal law if such a telephone number is given, this provision of Wisconsin law will not apply to warranties which meet the requirements of Federal law, by operation of section 111(c)(1) of the Warranty Act. The State of Wisconsin may file an application for preservation of this provision under the savings provision of section 111(c)(2) of the Warranty Act.

Requires disclosure that repairs will be made within 30 days of notice of the problem. This provision requires a disclosure included in those required by 16 CFR 701.3(a)(3). The latter provision requires a statement of what the warrantor undertakes to do under the warranty. Although usually a warrantor is not required to commit itself to performing within a set time, where by law or by choice the warrantor is commited to a certain time for repairs, that time becomes part of its undertaking to be disclosed under the Federal requirement. Therefore the State requirement is not affected by section 111(c)(1) of the Warranty Act.

Requires disclosure that repairs will be performed at the mobile home site. Like the previous requirement, this provision requires a disclosure also required by 16 CFR 701.3(a)(5).

Requires that manufacturers reimburse dealers for warranty repairs. Assistant Attorney General Jeffries has advised that this provision need not be disclosed in the warranty. Therefore, it is not a disclosure or labeling provision and thus is unaffected by section 111(c)(1) of the Warranty Act.

SECTION 218.14(1)(c)(2)

Requires disclosure of the fact that an unsuccessful repair is a breach of warranty, and that the consumer's right to proper repair continues regardless of whether the waranty period has expired. This disclosure requirement is not identical to any requirement of the Federal Act, and therefore it does not apply to warranties which meet the requirements of the Warranty Act. The substantive right created by this provision remains in effect; it is merely the requirement that the right be disclosed in the written warranty which is made inapplicable. The State of Wisconsin may file an application for preservation of this provision under the savings provision of section 111(c)(2).

SECTION 218.14(1)(d)

Requires disclosure of manadatory extension of the warranty for the amount of time the home is uninhabitable. This provision requires a disclosure included among those required by 16 CFR 701.3(a)(4), the measurement of warranty duration. This provision and section 218.14(1) establish that the mandatory duration of the warranty is 1 year's time during which the home is habitable. The provisions require further that this duration be disclosed; such a disclosure requirement is thus identical to the Federal requirement that the duration of a warranty be disclosed.

The other provisions of the Wisconsin law do not contain any requirements relating to disclosure or labeling, and are therefore unaffected by section 111(c)(1) of the Federal Act.

The following paragraphs discuss the effect of the Warranty on those Wisconsin administrative regulations [18] concerning mobile homes which differ from the Wisconsin mobile home law.

IND 14.50(2)(a)(1)

Requires disclosure of the fact that alterations not approved by the regulating agency can affect the continued validity of the warranty. This provision is a statement of parts, characteristics, components, and properties which are excluded from the warranty, which must be disclosed under 16 CFR 701.3(a)(2). The State requirement is therefore within the scope of the Federal provision but identical to it, and so is not affected by section 111(c)(1) of the Warranty Act.

IND 14.50(2)(a)(1)a

Requires disclosure of the fact that such alterations are not covered by the mandatory warranty. This also requires disclosures which 16 CFR § 701.3(a)(2) would require, and is not affected by section 111(c)(1) of the Warranty Act.

IND 14.50(2)(a)(1)b

Gives a definition of "alteration." In the above-mentioned letter of March 16, 1978, Mr. Jeffries stated that the regulation requires this definition to appear in the warranty document. This is merely a detailed description of those characteristics, etc., which are excluded from the warranty, and is not affected by section 111(c)(1) of the Warranty Act.

IND 14.50(2)(g)

Requires disclosure of the date of delivery of the home, on which date the warranty begins. This requires the same disclosures as 16 CFR 701.3(a)(4) requires, that is, disclosure of the date of commencement of the warranty if other than the date of purchase. Therefore the provision is not affected by section 111(c)(1) of the Warranty Act.

The other provisions of the regulation, IND 14.50 and 14.56, either do not concern labeling or disclosure, or are the same as those of the mobile home law and are affected as discussed above.

In summary, the following requirements of the Wisconsin mobile home law and regulations are rendered inapplicable to warranties which comply with the federal warranty requirements, by operation of section 111(c)(1) of the Warranty Act:

(1) Disclosure in the written warranty of the address where notice of problems is to be given. Section 218.14(1)(c)(1), Wis. Stats; IND 14.50(2)(c).

(2) Disclosure in the written warranty of the fact that unsuccessful repair is a breach of warranty, and that the consumer's right to proper repair continues regardless of whether the warranty period has expired. Section 218.14(1)(c)(2), Wis. Stats.

The other disclosure requirements of the law and regulations, as well as their substantive rights and remedies, are unaffected by section 111(c) of the Magnuson-Moss Act.

Wisconsin may apply to the Commission, under the procedure in section 111(c)(2), for preservation of either or both of the affected requirements. Those requirements will be preserved which the Commission finds, after a rulemaking proceeding under section

[18] IND 14.50, Wis. Admin. Code.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

SELECT COMMITTEE ON GRAS SUBSTANCES

Request for Nominations

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) announces the opportunity for interested parties to nominate qualified scientists, particularly those versed in nutritional biochemistry, to serve on the Select Committee on GRAS Substances, which is expanding to 11 members. The Select Committee evaluates available information on the safety of food ingredients classified as generally recognized as safe (GRAS) or subject to a prior sanction.

DATE: Nominations by November 30, 1978.

ADDRESS: Nominations to Dr. Kenneth A. Fisher, Director, Life Sciences Research Office, Federation of American Societies for Experimental Biology, 9650 Rockville Pike, Bethesda, Md. 20014.

FOR FURTHER INFORMATION CONTACT:

Corbin I. Miles, Bureau of Foods (HFF-335), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C Street SW., Washington, D.C. 20204, 202-472-4750.

SUPPLEMENTARY INFORMATION: The Food and Drug Administration is conducting a study of food ingredients classified as GRAS or subject to a prior sanction. As part of this review, the available information relating to the safety of each such ingredient is being evaluated by a Select Committee on GRAS Substances selected by the Life Sciences Research Office of the Federation of American Societies for Experimental Biology under a contract with FDA.

The Select Committee is considering biological information on GRAS Substances provided by a series of scientific literature reviews of experimental studies published from 1920 to 1978, and additional recent toxicological screening tests on certain of the substances and on human exposure from current levels of addition to foods and food consumption patterns obtained from a recent survey by the National Academy of Sciences. The Select Committee currently consists of the following individuals:

1. Joseph F. Borzelleca, Ph. D., Professor of Pharmacology, Medical College of Virginia, Health Sciences Division, Virginia Commonwealth University, Richmond, Va. 23298.
2. Harry G. Day, Sc. D., Professor Emeritus of Chemistry, Indiana University, Bloomington, Ind. 47401.
3. Samuel J. Fomon, M.D., Professor of Pediatrics, College of Medicine, University of Iowa, Iowa City, Iowa 52242.
4. Bert N. La Du, Jr., M.D., Ph. D., Professor and Chairman, Department of Pharmacology, University of Michigan Medical School, Medical Sciences, Room 6322, Ann Arbor, Mich. 48104.
5. John R. McCoy, V.M.D., Professor of Comparative Pathology, New Jersey College of Medicine and Dentistry, Rutgers Medical School, Box 101, Piscataway, N.J. 08854.
6. Gabriel L. Plaa, Ph. D., Professor and Chairman, Department of Pharamacology, Faculty of Medicine, University of Montreal, Case postale 6128, Montreal 101, Quebec, Canada.
7. Michael B. Shimkin, M.D., Professor of Community Medicine and Oncology, Department of Community Medicine, School of Medicine, University of California, San Diego, La Jolla, Calif. 92093.
8. Ralph G. H. Siu, Ph. D., Consultant, 4428 Albemarle Street NW., Washington, D.C. 20016.
9. John L. Wood, Ph. D., Distinguished Service Professor, Department of Biochemistry, University of Tennessee Medical Units, 894 Union Street, Room 210, Memphis, Tenn. 38101.
10. George W. Irving, Jr., Ph. D., Chairman, Life Sciences Research Office, Federation of American Societies for Experimental Biology, Bethesda, Md. 20014.

The Life Sciences Research Office plans to increase the size of the Select Committee working on this project to 11 members. Accordingly, notice is hereby provided for all interested parties to nominate additional qualified scientists, particularly those versed in nutritional biochemistry, to serve on the Select Committee. Nominations are invited from individuals and from consumer, industry, and professional organizations, and should be sent to Dr. Kenneth D. Fisher, Director, Life Sciences Research Office, Federation of American Societies for Experimental Biology, 9650 Rockville Pike, Bethesda, Md. 20014.

Nominations must state that the person nominated is aware of the nomination, is interested in becoming involved in this effort, and appears to be free of conflict of interest. A complete curriculum vitae must be enclosed with each nomination. Nominations should be received by November 30, 1978.

Dated: October 26, 1978.

JOSEPH P. HILE,
Associate Commissioner for Regulatory Affairs.

[4110-03-M]

[Docket No. 78N-0368]

IMPROVING FDA REGULATIONS

Operation Common Sense Recodification Plan

AGENCY: Food and Drug Administration.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA) announces the availability of its plan for reviewing and revising existing regulations under the Department of Health, Education, and Welfare's (HEW's) Operation Common Sense.

FOR FURTHER INFORMATION CONTACT:

Ronald J. Wylie, Compliance Regulations Policy Staff (HFC-10), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3480.

SUPPLEMENTARY INFORMATION: In September 1977, anticipating the President's Executive Order No. 12044 on improving Government regulations, HEW initiated Operation Common Sense—a comprehensive program to simplify, shorten, and expedite the Department's regulations development process.

Notices published in the FEDERAL REGISTER to date that concern HEW's efforts to improve its regulations are as follows:

November 18, 1977, 42 FR 59555, Operation Common Sense.
March 24, 1978, 42 FR 12661, E.O. 12044.
May 30, 1978, 43 FR 23119, HEW response to Executive Order.

As part of Operation Common Sense, HEW has undertaken a 5-year program of reviewing and revising, as appropriate, all of its existing regulations.

The objectives of this program are:

1. To eliminate regulations that are unnecessary, outdated, or ineffectual;
2. To rewrite regulations so that they are as straightforward, understandable, and clear as possible;
3. To remove unproductive, burdensome requirements;
4. To revise regulations on the basis of experience since their issuance; and
5. To better organize and consolidate regulations.

To implement this program for its own regulations, FDA has prepared an Operation Common Sense Recodification Plan (1978-82). This plan covers all FDA regulations and presents the agency's projected schedule for reviewing them.

The opertation Common Sense Recodification Plan is available for public examination in, and copies may be obtained through, the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857, between 9 a.m. and 4 p.m., Monday through Friday.

Dated: October 25, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

Health Resources Administration

HEALTH CAREERS OPPORTUNITY PROGRAM

Grant Application Announcement

The office of Health Resources Opportunity, Health Resources Administration, announces that applications for fiscal year 1979 health careers opportunity program grants are now being accepted under the authority of section 787 of the Public Health Service Act, as amended by the Health Professions Educational Assistance Act of 1976 (Pub. L. 94-484). Based on projected requirements for currently active projects requiring continued support, and estimated $1,870,000 will be available for competitive awards in fiscal year 1979.

Section 787 authorizes the Secretary to make grants to public or nonprofit private health or educational entities for the purpose of assisting individuals from disadvantaged backgrounds to undertake education to enter a health profession. The proposed fiscal year 1979 program funding preference for the health careers opportunity program will be for admissions/retention projects in medicine, osteopathy, dentistry, veterinary medicine, optometry, pharmacy, podiatry, public health and other health professions, e.g., health care administration, and health planning.

Questions regarding the programmatic aspects of these grants should be directed to:

Director, Division of Program Coordination, Office of Health Resources Opportunity, Health Resources Administration, Center Building, Room 10-50, 3700 East-West Highway, Hyattsville, Md. 20782, phone 301-436-7230

All fiscal year 1979 applications must be submitted to the Grants Management Officer, Bureau of Health Manpower, Postmarked on or before January 5, 1979. In addition, requests for application packets and questions regarding grants management policy should be directed to:

Grants Management Officer (HCOP), Bureau of Health Manpower, Health Resources Administration, Center Building, Room 4-27, 3700 East-West Highway, Hyattsville, Md. 20782, phone 301-436-6564.

Dated: October 19, 1978.

HENRY A. FOLEY,
Administrator, Health Resources Administration.

[FR Doc. 78-30643 Filed 10-30-78; 8:45 am]

[4110-83-M]

START-UP ASSISTANCE

Application Announcement for Grants

The Bureau of Health Manpower, Health Resources Administration, announces that applications for fiscal year 1979 grants for start-up assistance are now being accepted under the authority of section 788(a) of the Public Health Service Act, as amended by the Health Professions Educational Assistance Act of 1976 (Pub. L. 94-484).

Section 788(a) authorizes discretionary project grants to new schools of medicine, osteopathy, dentistry, public health, veterinary medicine, optometry, pharmacy, or podiatry. A new school is eligible for a grant the year before it enrolls students and the first, second, and third years in which it has students enrolled.

The deadline for receipt of applications is November 20, 1978.

Questions concerning this grant program should be directed to:

Grants Management Officer, Bureau of Health Manpower, Health Resources Administration, Center Building, Room 4-47, 3700 East-West Highway, Hyattsville, Md. 20782, phone 301-436-6564.

Dated: October 19, 1978.

HENRY A. FOLEY,
Administrator, Health Resources Administration.

REPORT OF BIOASSAY OF 2,3,5,6-TETRACHLORO-4-NITROANISOLE FOR POSSIBLE CARCINOGENICITY

Availability

2,3,5,6 - Tetrachloro - 4 - nitroanisole (CAS 2438-88-2) has been tested for cancer-causing activity with rats and mice in the Bioassay Program, Division of Cancer Cause and Prevention, National Cancer Institute. A report is available to the public.

Summary. A bioassay for possible carcinogenicity of 2,3,5,6-Tetrachloro-4-nitroanisole was conducted using Fischer 344 rats and B6C3F1 mice. Applications of the chemical include use as an agricultural fungicide and acaricide. 2,3,5,6-Tetrachloro-4-nitroanisole was administered in the feed, at either of two concentrations, to groups of male and female animals of each species.

Under the conditions of this bioassay; dietary administration of 2,3,5,6-Tetrachloro-4-nitroanisole was not carcinogenic to male or female Fischer 344 rats or B6C3F1 mice of either sex.

Single copies of the report are available from the Office of Cancer Communications, National Cancer Institute, Building 31, Room 10A21, National Institutes of Health, Bethesda, Md. 20014.

(Catalog of Federal Domestic Assistance Program No. 13.393, Cancer Cause and Prevention Research.)

Dated: October 17, 1978.

DONALD S. FREDRICKSON,
Director, National Institutes of Health.

[4110-08-M]

REPORT ON BIOASSAY OF ANILINE HYDROCHLORIDE FOR POSSIBLE CARCINOGENICITY

Availability

Aniline hydrochloride (CAS 142-04-1) has been tested for cancer-causing activity with rats and mice in the Bioassay Program, Division of Cancer Cause and Prevention, National Cancer Institute. A report is available to the public.

Summary. A bioassay of aniline hydrochloride for possible carcinogenicity was conducted using Fischer 344 rats and B6C3F1 mice. Applications of the chemical include use as an intermediate in the manufacture of dyes. Aniline hydrochloride was administered in the feed, at either of two concentrations, to groups of 50 male and 50 female animals of each species,

with the exception of 49 female mice

REPORT ON BIOASSAY OF PIVALOLACTONE FOR POSSIBLE CARCINOGENICITY

Availability

Pivalolactone (CAS 1955-45-9) has been tested for cancer-causing activity with rats and mice in the bioassay program, Division of Cancer Cause and Prevention, National Cancer Institute. A report is available to the public.

Summary: The bioassay of pivalolactone for possible carcinogenicity was conducted using Fischer 344 rats and B6C3F1 mice. Applications of the chemical include use as an intermediate in the production of polymers. Pivalolactone in water was administered by gavage, at either of two dosages, to groups of 50 male and 50 female animals of each species.

Under the conditions of this bioassay, pivalolactone was found to be carcinogenic to both male and female Fischer 344 rats, producing squamous-cell carcinomas and squamous-cell papillomas of the forestomach. This study provided no evidence for the carcinogenicity of pivalolactone in B6C3F1 mice of either sex.

Single copies of the report are available from the Office of Cancer Communications, National Cancer Institute, Building 31, Room 10A21, National Institutes of Health, Bethesda, Md. 20014

Dated: October 17, 1978.

[4110-08-M]

REPORT ON BIOASSAY OF 5-NITROACENAPHTHENE FOR POSSIBLE CARCINOGENICITY

Availability

5-Nitroacenaphthene (CAS 602-87-9) has been tested for cancercausing activity with rats and mice in the bioassay program, Divison of Cancer Cause and Prevention, National Cancer Institute. A report is available to the public.

Summary: A bioassay of 5-nitroacenaphthene for possible caricinogenicity was conducted using Fischer 344 rats and B6C3F1 mice. Applications of the chemical include use for research purposes. 5-Nitroacenapthene was administered in the feed, at either of two concentrations, to groups of 50 male and 50 female animals of each species.

Under the conditions of this bioassay, 5-nitroacenaphthene was carcinogenic to Fischer 344 rats, causing increased incidences of malignant tumors of the ear canal and lung in both sexes, and of the clitoral gland and mammary gland in females. 5-Nitroacenaphthene was also carcinogenic to female but not male B6C3F1 mice, causing carcinomas of the liver and ovarian tumors.

Single copies of the report are available from the Office of Cancer Communications, National Cancer Institute, Building 31, Room 10A21, National Institutes of Health, Bethesda, Md. 20014.

Dated: October 17, 1978.

National Institutes of Health

NATIONAL CANCER INSTITUTE ADVISORY COMMITTEES

Open Meetings

Pursuant to Pub. L. 92-463, notice is hereby given of the meetings of committees advisory to the National Cancer Institute.

These meetings will be entirely open to the public to discuss issues relating to committee business as indicated in the notice. Attendance by the public will be limited to space available. Meetings will be held at the National Institutes of Health, 9000 Rockville Pike, Bethesda, Md. 20014, unless otherwise stated.

Mrs. Marjorie F. Early, Committee Management Officer, NCI, Building 31, Room 4B43, National Institutes of Health, Bethesda, Md. 20014 301-496-5708 will furnish summaries of the meetings and rosters of committee members upon request.

Other information pertaining to the meeting can be obtained from the Executive Secretary indicated.

Name of Committee: President's Cancer Panel.
Dates: December 12, 1978; 9:30 a.m. to adjournment.
Place: Building 31C, Conference Room 7, National Institutes of Health.
Times: Open for the entire meeting.
Agenda: To hear reports on activities of the President's Cancer Panel and the National Cancer Program.
Executive Secretary: Dr. Richard A. Tjalma, Address: Building 31, Room 11A46, National Institutes of Health. Phone: 301-496-5854.
Name of Committee: Chemical Selection Subgroup of the Clearinghouse on Environmental Carcinogens.
Dates: December 12, 1978; 9 a.m. to adjournment.
Place: Building 31C, Conference Room 10, National Institutes of Health.
Times: Open for the entire meeting.
Agenda: To consider chemicals for bioassay and other matters relevant to chemical selection.
Executive Secretary: Dr. James M. Sontag. Address: Building 31, Room 3A16, National Institutes of Health. Phone: 301-496-5108.
Name of Committee: Data Evaluation/Risk Assessment Subgroup of the Clearinghouse on Environmental Carcinogens.
Dates: December 13, 1978; 9 a.m. to adjournment.
Place: Building 31C, Conference Room 10, National Institutes of Health.
Times: Open for the entire meeting.
Agenda: To review available for bioassay reports and other matters relevant to data evaluation and risk assessment.
Executive Secretary: Dr. James M. Sontag. Address: Building 31, Room 3A16, National Institutes of Health. Phone: 301-496-5108.

Date: October 23, 1978.

SUZANNE L. FREMEAU,
Committee Management Officer, National Institutes of Health.

GENERAL CLINICAL RESEARCH CENTERS COMMITTEE, DIVISION OF RESEARCH RESOURCES

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the General Clinical Research Centers Committee, Division of Research Resources, on December 7 and 8, 1978, in Conference Room 8, Building 31-C, National Institutes of Health, Bethesda, Md. 20014.

The meeting will be open to the public on December 7, 1978, from 9 a.m. to 11 a.m., to discuss administrative matters. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, United States Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on December 7 from 11 a.m. to 5 p.m., and on December 8 from 9 a.m. to adjournment for the review, discussion, and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commerical property such as patentable material, and personal information concerning individuals associated with the applications.

Mr. James Augustine, Information Officer, Division of Research Resources, National Institutes of Health, Room 5B13, Building 31, Bethesda, Md., 20014, telephone 301-496-5545, will provide summaries of the meeting and rosters of the Committee members. Dr. Ephraim Y. Levin, Executive Secretary of the General Clinical Research Centers Committee, Room 5B51, Building 31, National Institutes of Health, Bethesda, Md. 20014, telephone 301-496-6595, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Programs No. 13.333, National Institutes of Health.)

Dated: October 25, 1978.

SUZANNE L. FREMEAU,
Committee Management Officer, National Institutes of Health.

MENTAL RETARDATION RESEARCH COMMITTEE, NATIONAL INSTITUTE OF CHILD HEALTH AND HUMAN DEVELOPMENT

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Mental Retardation Research Committee, National Institute of Child Health and Human Development, on December 11-13, 1978, in the Landow Building, Room A, first floor, 7910 Woodmont Avenue, Bethesda, Md.

This meeting will be open to the public on December 11 from 9 a.m. to 11 a.m. to discuss items relative to the Committee's activities including announcements by the Chief of the Mental Retardation and Developmental Disabilities Branch and the Executive Secretary of the Committee.

In accordance with provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, United States Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on December 11 from 11 a.m. to adjournment on December 13 for the review, discussion and evaluation of individual grant applications. The applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

Mrs. Marjorie Neff, Committee Management Officer, NICHD, Building 31, Room 2A-04, National Institutes of Health, Bethesda, Md., Area Code 301, 496-1848, will provide a summary of the meeting and roster of committee members. Dr. Stanley L. Slater, Executive Secretary, Mental Retardation Research Committee, NICHD, Landow Building, Room 7C16, National Institutes of Health, Bethesda, Md., Area Code 301, 496-1696, will furnish substantive program information.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

CALIFORNIA DESERT CONSERVATION AREA ADVISORY COMMITTEE

Meeting

Notice is hereby given in accordance with Public Laws 92-463 and 94-579 that the California Desert Conservation Area Advisory Committee to the Bureau of Land Management, U.S. Department of the Interior, will meet November 30, December 1 and 2, 1978, in Riverside, Calif. The committee will hear staff and subcommittee reports, followed by public forums using a seminar format to consider the following resources and activities in the California Desert Conservation Area: Soil, air, and water resources; botanical resources; animal resources; scientific research and educational use of the area; livestock grazing; human impacts on desert resources; recovery or rehabilitation of desert resources.

The meetings will be held at Raincross Square, 3443 Orange Street, Riverside, Calif. 92501. Meetings will begin at 7 p.m., Thursday, November 30; 8 a.m., Friday, December 1; and 8 a.m., Saturday, December 2. The subcommittee on interim management will meet at 3 p.m., Thursday, November 30, 1978, in the same location, to review actions currently pending before the Bureau. All meetings of the committee and subcommittees will be open to the public and attendance is invited. Time will be provided at the conclusion of the seminars on Saturday afternoon, December 2, for brief statements by members of the public relative to topics under discussion by the committee.

Anyone wishing to submit a written statement or make an oral statement at the meeting should notify the Chairman, California Desert Conservation Area Advisory Committee, c/o Director, Desert Planning Staff, Bureau of Land Management, 3610 Central Avenue, Suite 402, Riverside, Calif. 92506, in advance of the meeting. Further information, including the meeting agenda, may be obtained from that address or State Director, Bureau of Land Management, 2800 Cottage Way, Room E-2841, Sacramento, Calif. 95825.

Dated: October 20, 1978.

ED HASTEY,
State Director.

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

CALIFORNIA STATE STANDARDS

Approval; California Plan

1. BACKGROUND

Part 1953 of Title 29, Code of Federal Regulations, prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health, (hereinafter called Regional Administrator, OSHA) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4), will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On May 1, 1973, notice was published in the FEDERAL REGISTER (38 FR 10717), of the approval of the California plan and the adoption of Subpart K to Part 1952 containing the decision.

The California plan provides for the adoption of State standards which are at least as effective as comparable Federal standards promulgated under section 6 of the Act. State standards have been revised in accordance with Part 1953 to meet the requirement of adopting Federal Standard revisions and State initiated changes. Accordingly, California has revised these standards and promulgated them in accordance with applicable State procedures. By letter dated July 15, 1977, from Steven A. Jablonsky, Program Manager, California Occupational Safety and Health Administration to Gabriel J. Gillotti, Regional Administrator, OSHA, and incorporated as part of the plan, the State submitted proof documents concerning standards equivalent to Federal amendments to Flammable and Combustible Liquids standards of 29 CFR 1910.106(a)(35), (1910.106(g)(3)(iv)(a) and (b), 1910.106(g)(3)(vi)(a), the storage and handling of Liquefied Petroleum Gases standard of 29 CFR 1910.110(b)(8)(ii), 1910.110(b)(14)(i), 1910.110(b)(14) (xiv) and (xv), 1910.110(e)(3)(ii), Powered Industrial Trucks standard of 29 CFR 1910.178(f)(1) and State initiated change to California General Industry Safety Orders Section 3203. Federal standards that were deleted but which

California did not delete are the Sani-

[4510-26-M]

U.S. Department of Labor, Occupational Safety and Health Adminis-

by posting a copy at all places where

that its veil scaffolds are multitiered scaffolds (usually four working levels),

V 4 3 / 2 1 1 OCT 31 1978

California did not delete are the Sanitation standard of 29 CFR 1910.141(d)(2)(i), the Material Handling and Storage standard of 29 CFR 1910.184(f)(6) and the Toxic and Hazardous Substance standard of 29 CFR 1910.1005 with the deletion of the laboratory activities of §§ 1910.1003, 1910.1004 and 1910.1006 through 1910.1016. These standards, which are contained in Title 8, Chapter 4 of the California Administrative Code were promulgated by the State after public hearings between the dates of January 1, 1977 and June 30, 1977.

2. DECISION

Having reviewed the State submission in comparison with the Federal standards, it has been determined that the State standards are at least as effective as the comparable Federal standards. The detailed standards comparison is available at the locations specified below.

3. LOCATION OF SUPPLEMENT FOR INSPECTION AND COPYING

A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, OSHA, 450 Golden Gate Avenue, Room 9470, San Francisco, Calif. 94102 and California Occupational Safety and Health Administration, Room 3052, 455 Golden Gate Avenue, San Francisco, Calif. 94102; and the Technical Data Center, Room N2439R, 3d and Constitution Avenue NW., Washington D.C. 20210.

4. PUBLIC PARTICIPATION

Under § 1953.2(c) of this chapter, the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the California plan as a proposed change and making the OSHA Regional Administrator's approval effective upon publication for the following reason.

The standards were adopted in accordance with the procedural requirements of State law which included public comment and further public participation would be repetitious.

This decision is effective October 31, 1978.

(Sec. 18, Pub. L. 91-956, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at San Francisco, Calif., this 26th day of July 1978.

GABRIEL J. GILLOTTI,
Regional Administrator, OSHA.

[4510-26-M]

[V-78-9]

GERALD D. HINES INTERESTS

Application for Variance

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Notice of application for variance.

SUMMARY: This notice announces the application of Gerald D. Hines Interests for a variance from the standard prescribed in 29 CFR 1910.66(b)(3), concerning power platforms for exterior building maintenance—design requirements.

DATES: The last date for interested persons to submit comments is November 30, 1978. The last date for affected employers and employees to request a hearing on the application is November 30, 1978.

ADDRESSES: Send comments or requests for a hearing to: Office of Variance Determination, Occupational Safety and Health Administration, U.S. Department of Labor, Third Street and Constitution Avenue NW., Room N3668, Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT:

Mr. James J. Concannon, Director, Office of Variance Determination, at the above address. Telephone: 202-523-7121, or the following Regional and Area Offices:

U.S. Department of Labor, Occupational Safety and Health Administration, 555 Griffin Square Building, Room 602, Dallas, Tex. 75202.

U.S. Department of Labor, Occupational Safety and Health Administration, 1100 No. 505 NASA Road I, Houston, Tex. 77058.

NOTICE OF APPLICATION

Notice is hereby given that Gerald D. Hines Interests, 2100 Post Oak Tower, Houston, Tex. 77056, has made application pursuant to section 6(d) of the Occupational Safety and Health Act of 1970 (84 Stat. 1596; 29 U.S.C. 655) and 29 CFR 1905.11, for a variance from the standards prescribed in 29 CFR 1910.66(b)(3) powered platforms for exterior maintenance—design requirements.

The address of the place of employment that will be affected by the application is as follows: Block 259 Development, 1100 Louisiana Street, Houston, Tex. 77002.

The applicant certifies that employees who would be affected by the variance have been notified of the application by giving a copy of it to their authorized employee representative, and by posting a copy at all places where notices to employees are normally posted. Employees have also been informed of their right to petition the Assistant Secretary for a hearing.

Regarding the merits of the application, the applicant contends that it is providing a place of employment as safe as that required by § 1910.66(b)(3), which states that all new powered platforms for exterior building maintenance shall meet the requirements for Part II and III of ANSI A120.1-1970. The ANSI standard requires that the design of the building or structure face in conjunction with the design of the building contact member on the working platforms shall provide continuous contact of the working platform with the building or structure in order to absorb wind forces and horizontal components of dead and live loads on the working platform.

The face of the building shall be provided with continuous T-rails, indented mullions, or equivalent guides which will positively engage building contact members on the working platform. On buildings where the working platform has a rise of less than 130 feet, guides providing positive engagement are not required.

The applicant contends that its design does not allow for continuous vertical mullions and, therefore, does not provide continuous T-rails or indented mullions required by ANSI A120.1-1970.

The applicant proposes to use an intermittent tie-in system using cable restraints at every third floor to restrict the horizontal movement, and to require that powered platforms used on the building be equipped with building face rollers. The applicant contends that this would provide a cable restraint device at a maximum vertical distance of 40-foot intervals in the areas served. The applicant states that the tie-in device would consist of an insert anchored to the concrete building column and projecting out to the face of granite cladding. A quick release pin will be used to attach the cable restraints to the anchor device. The applicant contends that the lower wing of the building is less than 130 feet high and, therefore, does not require the guides.

The applicant also contends that its alternative method of securing the powered platforms, as described above, is as safe and healthful as the requirements of the standard from which a variance is sought.

Signed at Washington, D.C. this 25th day of October 1978.

EULA BINGHAM,
Assistant Secretary of Labor.

RESEARCH-COTTRELL, INC.

Application for Variance and Interim Order

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTIONS: (1) Notice of application for variance and interim order; (2) denial of interim order.

SUMMARY: This notice announces the application of Research-Cottrell, Inc. for a variance and interim order from the standard prescribed in 29 CFR 1926.451(a) (1), (4), (5), and (10) concerning scaffolding—general requirements.

It also announces the denial of the request for an interim order to provide relief until a decision is rendered on the application for variance.

DATES: The last date for interested persons to submit comments is November 30, 1978. The last date for affected employers and employees to request a hearing on the application is November 30, 1978.

ADDRESSES: Send comments or requests for a hearing to: Office of Variance Determination, Occupational Safety and Health Administration, U.S. Department of Labor, Third Street and Constitution Avenue NW., Room N-3668, Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT:

Mr. James J. Concannon, Director, Office of Variance Determination, at the above address, telephone: 202-523-7121, or the following Regional and Area Offices:

U.S. Department of Labor, Occupational Safety and Health Administration, Gateway Building—Suite 2100, 3535 Market Street; Philadelphia, Pa. 19104.

U.S. Department of Labor, Occupational Safety and Health Administration, Progress Plaza, 49 North Progress Avenue, Harrisburg, Pa. 17109.

U.S. Department of Labor, Occupational Safety and Health Administration, 1375 Peachtree Street NE., Suite 587, Atlanta, Ga. 30309.

U.S. Department of Labor, Occupational Safety and Health Administration, Todd Mall, 2047 Canyon Road, Birmingham, Ala. 35216.

U.S. Department of Labor, Occupational Safety and Health Administration, 32nd Floor, Room 3263, 230 South Dearborn Street, Chicago, Ill. 60604.

U.S. Department of Labor, Occupational Safety and Health Administration, Federal Office Building, Room 847, 1240 East Ninth Street, Cleveland, Ohio 44199.

U.S. Department of Labor, Occupational Safety and Health Administration, 1515 Broadway (1 Astor Plaza), Room 3445,) New York, NY., 10036.

U.S. Department of Labor, Occupational Safety and Health Administration, Building T3, Belle Mead GSA Depot, Belle Mead, N.J. 08502.

I. NOTICE OF APPLICATION

Notice is hereby given that Research-Cottrell, Inc., P.O. Box 750, Bound Brook, N.J. 08805, has made application pursuant to section 6(d) of the Occupational Safety and Health Act of 1970 (84 Stat. 1596; 29 U.S.C. 655), and 29 CFR 1905.11 for a variance, and interim order pending a decision on the application for variance, from the standards prescribed in 29 CFR 1926.451(a) (1), (4), (5) and (10)

The addresses of the places of employment that will be affected by the application are as follows:

Susquehanna Power Station, Berwick, Pa.

Pleasants Power Station, Willow Island, W. Va.

Beleforte Power Station, Hollowood, Ala.

Perry Power Station, Perry, Ohio

The applicant certifies that employees who would be affected by the variance have been notified of the application by giving a copy of it to their authorized employee representative, and by posting a copy at all places where notices to employees are normally posted. Employees have also been informed of their right to petition the Assistant Secretary for a hearing.

Regarding the merits of the application, the applicant contends that it is providing a place of employment as safe as that required by § 1926.451(a) (1), (4), (5), and (10) which sets general scaffolding requirements concerning toeboards, guardrail support spacing, and the maximum permissible spans for scaffold planks, respectively.

The applicant states that its Cooling Tower Division constructs reinforced concrete hyperbolic cooling towers currently ranging in sizes up to 450 feet in diameter and 560 feet in height. The unique shape of the thin-walled shell, called a veil, creates a constantly varying diameter in relation to height. The applicant contends that its veil scaffolds are multitiered scaffolds (usually four working levels), with the top level being the major work platform and the three lower levels being used for light auxiliary work. The top working levels are four planks wide, and the lower levels are two planks wide. The lower levels are hung from the underside of the top level by means of 2-inch by $\frac{3}{16}$-inch carbon steel straps. The applicant further contends that there are a few variations of design and operation between different veil scaffolds at the different worksites, but basically they are similar in nature.

The applicant states that the veil scaffolds, installed completely around the veil, on both faces of the forms, must be capable of contracting and then expanding during the course of construction of the veil. Typical movement would be from an original circumference of 1,100 feet in to 645 feet, and then out to 785 feet during construction of the veil.

The applicant states that the scaffolds and the forms are independently supported from one main support system. It also alleges that the forms and the scaffolds are not, and cannot be, connected to each other in any manner because they must move independently of each other. The scaffolds are hydraulically jacked approximately 5 feet, once each day, in slightly over 4-inch increments.

The applicant contends that its main support system consists of independent pairs of nearly vertical aluminum beams bolted together radially through the previously placed concrete. The forms are primarily secured in the web areas of the beams, and the scaffolds are primarily secured to the outside faces of the flanges of the beams by a dog-and-ratchet system. The number of beam-pair supports required for a particular cooling tower is a function of the design requirements for the structure. The number of beam-pair supports does not change during construction of a veil. The contraction and expansion of the scaffolding is accomplished by varying the distances between support points. The applicant contends that the guardrails, midrails, and scaffold plank arrangements have been designed to safely adjust to the changes in circumference.

The applicant states that it is providng a place of emplomeht as safe and healthful as § 1926.451(a)(4), which requires the use of toeboards on scaffolding more than 10 feet above the ground.

The applicant states that past attempts at toeboard installation have been unsatisfactory and have created additional hazards to the employees walking and working on the veil scaffolds. The applicant contends that it

has not been able to develop a safe

of wire rope cables operated from base

Section 1926.451(a)(5) states in part,

the same brackets that hold the guard-

Therefore, it does not appear from the facts presented that the applicant

Or the following Regional and Area Offices:

V 4 3 / 2 1 1 0 C 3 1 7 8

has not been able to develop a safe method of installing toeboards on the veil scaffolds that will: Serve the intended purpose for toeboards; be able to contract and expand; be able to be kept out of the walk and work areas on the scaffolds; and, be able to be kept tight against the scaffold planks.

The applicant states that because it has been unable to install a toeboard system to serve as "a barrier secured along the sides and ends of a platform to guard against the falling of material" (§ 1926.452(b)(31)), it has taken the following precautions to help prevent the falling of material, and to help prevent any material that might fall from striking anyone below:

(1) Limit the amount of loose material, such as reinforcing rods, on the scaffold to a 1-day supply.

(2) Tie loose material, such as buckets and wedges, to the scaffold or to the support beams so they cannot be accidentally knocked off.

(3) Use trash drums on the scaffolds for the proper disposal of trash and scrap thus preventing the loose waste from being kicked off the scaffolds.

(4) Completely enclose the exterior faces of the scaffolds with safety nets (6x6x½ nylon mesh) from the top guardrail on the top scaffold down to and completely under the botton level of scaffold.

(5) Instruct the employees working on the scaffolds of the necessity for helping prevent any material from falling.

(6) Prohibit work directly below the veil scaffolds while overhead work is being done. The one exception to this is covered in Item 10.

(7) Provide access between the ground and the viel scaffolds by means of a temporary stairtower on the outside face of the veil. Cover the exterior sides of the stairtower with chickenwire to help prevent material from falling.

(8) Install warning barricades and overhead work signs around the exterior face of the base of the structure to warn employees and other people of the overhead work.

(9) Install a covered walkway at the base of the structure to allow safe passage for employees who must pass under the work areas.

(10) Use one-lift mobile scaffolds with scaffold planks secured on the top of the scaffold, to provide overhead protection for the one to two employees who must work under the veil scaffolds while checking the alignment of the forms.

(11) Maintain a lifting area for materials in the center of the base slab (floor) and thus away from the overhead work. Material is lifted diagonally upward from the center of the base slab to the work areas on the scaffolds. The material is lifted by means of wire rope cables operated from base mounted drum hoists.

(12) Cover the base-mounted drum hoist locations with timber sheds, and locate them in the least susceptible locations within the structure.

(13) Instruct the drum hoist operators in the safest routes of travel to and from their operating locations.

(14) Install specific roadways in the base slab area for trucks delivering material to the central lift area, and post warning signs stating that pedestrians are to use the covered walkway.

(15) Conduct weekly safety training meetings for all employees to instruct and remind everyone of the proper safety methods, and to discuss any apparent hazards noticed on the worksite.

In addition to the above, the applicant proposes to install snow fence baricades and overhead work signs around the base of the structure, both on the inside and the outside of the structure, to warn employees and other people of the overhead work. The intent of the snow fence barricade is to serve as an "engineering control", a "physical barrier", against unintentional entrance into the area under the overhead work.

The applicant further proposes to install these snow fence barricades with the top of the fence approximately 4 feet high. It contends anchoring of the fence will depend on general conditions. Metal fence posts will be used if they can be driven into the ground.

Where ground conditions will not accept driven posts, concrete blocks will be used as anchors. In areas where the permanent concrete base slab has been installed inside the structure, the fence will be attached to the protruding reinforcing rods, or will be anchored used the concrete block method. Spacing of the posts or anchors will be determined through actual practice. However, the spacing will be adequate to support the fence in a neat, stable condition without unreasonable sag.

The applicant states that access through the fence will be provided by latching the end of a section of fence to an achor point. Thus, by deliberately removing the latched section, and pulling the fence aside, access can be gained into the fenced area. Access into the fenced area will require permission from a member of site supervision. Access will be permitted if the employee will be exposed to the overhead work.

The applicant states that the work practices described above and snow fence barricades will prevent any employee from being struck by a falling object, thus creating a work environment as safe as the use of a toeboard on the scaffold.

Section 1926.451(a)(5) states in part, that guardrail supports shall be at intervals not to exceed 8 feet. The applicant contends that its guardrail support spacing is established by the distant between the main support beams. The guardrail supports are connected to the pairs of aluminum beams at the main support points. When the veil scaffold is originally installed, the spacing between the support points may be 11 feet. During construction of the veil, the support spacing will reduce to approximately 7 feet and then will expand to approximately 8 feet at the top of the cooling tower.

The applicant further states that to maintain safe guardrails, it uses 1½-inch and 2-inch schedule 40 carbon steel pipe for the guardrails and midrails on the top level of the scaffolds, and 2 x 4 lumber on the lower levels.

The applicant contends that the 2-inch pipe guardrails and midrails on the top level of the *outside* scaffold are anchored at one end to the 3 by 4.1 channel iron posts. The opposite end of the pipe extends through a hole in the channel iron post thus allowing the changes in spacing between posts. Adjacent sections of guardrails and midrails are set at slightly different elevations to allow one section to pass the adjacent section. The excess length of pipe extends beyond the post and outside of the scaffold.

The applicant contends that the pipe guardrails and midrails on the top level of the *inside* scaffolds consists of a length of 1½-inch pipe anchored at one end to the 3 by 4.1 posts with the opposite end of the pipe inserted into a 2-inch pipe which is secured at its far end to the adjacent channel iron post. Contraction and expansion is obtained by the telescoping action of the pipes. Thes sections of pipe are designed to have at least 16 inches of telescoped overlap when the distance between supports are the maximum.

The applicant alleges that all work on the lower levels of the scaffolds, where 2 x 4 guardrails and midrails are provided, is a one- and two-man operation which involves light working loads. The outside face of each lower level is completely covered by the safety net.

The applicant contends that the guardrail spacing will provide a safe and healthful workplace for the veil scaffolds and a work area as safe as the 8-foot interval supports required by § 1926.451(a)(5).

Section 1926.451(a)(10)—Table L-3 states that the maximum permissible span is 10 feet. The applicant states that its scaffold plank spacing is governed by the same dimensions as its guardrail support spacing intervals. The scaffold planks are supported by the same brackets that hold the guardrail posts.

The applicant states that to maintain safe planks, it uses 2 x 12 inches R4S, grade 171A lumber for all planking on all levels of the scaffolds.

The applicant further states that within each bay, one end of each plank is cleated and wired to paired C3x2.1 support brackets for the top scaffold. The opposite ends of the planks rest on top of the planks in the adjacent bay. With the maximum spacing between support brackets, the 14-foot long planks overlap the adjacent planks by 24 inches and the adjacent support by 18 inches.

The applicant contends that the three outside planks on both of the top levels of scaffolding are bolted to a 1½ x 1½ x 3/16 angle iron scab on the underside of the planks near the midpoint of the span. The fourth plank, near the form, is hinged to the third plank to allow the fourth plank to be turned out of the way for form work prevented from being displaced or dropped. It is them folded back into place to close the opening between the form and the scaffold. The cleating together of the planks causes them to react to the working loads more as a single platform rather than as individual planks. The planking on the lower levels of scaffold is cleated and wired to a support bracket at one end and rides on top of the adjacent planking at the other end with a minimum overlap of 24 inches. Only work involving light working loads is performed from the planks on the lower levels. The lower levels of scaffolding are enclosed by the safety nets.

The applicant contends that the 2 x 12 planking and the planking system provides safety on the scaffolds, and a work area as safe as would have been required by § 1926.451(a)(10).

Denial of Interim Order

The applicant has also requested an interim order to be effected until a decision is rendered on the variance application.

Section 1926.451(a) (1), (4), (5), and (10) provides specific requirements for toeboards, guardrail support spacing intervals, and maximum permissible spans for scaffolding planks respectively.

It does not appear that the applicant has presented a method or specifications which will assure that employees will be protected to the degree required by the standards. While work practices and the concept of a physical barrier design to prevent unauthorized entry are theoretically sound, they are not always practicable. We have determined that employees could enter into the danger area of the vail to gain access to other areas.

Therefore, it does not appear from the facts presented that the applicant will be providing a place of employment as safe and healthful as the requirements of the standard from which a variance is sought. For these reasons pursuant to the authority in 29 CFR 1905.11(c), and in Secretary of Labor's Order No. 8-76 (41 FR 25059), the application for an interim order is denied.

Signed at Washington, D.C., this 25th day of October 1978.

EULA BINGHAM,
Assistant Secretary of Labor.

YOUNGSTOWN SHEET & TUBE CO.

Application for Variance

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Notice of application for variance.

SUMMARY: This notice announces the application of Youngstown Sheet & Tube Co. for a variance from the standard prescribed in 29 CFR 1910.179(n)(1) concerning the prohibition for loading a crane beyond its rated load.

Since a hearing has already been requested by the applicant, interested parties, including affected employers and employees, may file a request to present views and evidence, and to participate in the hearing. Such requests shall contain a statement of the position to be taken and a concise summary of the evidence to be introduced in support of that position.

A notice of "Hearing on Application for Variance" will appear in a future volume of the FEDERAL REGISTER.

DATE: The last date for interested persons to submit comments, to file requests to present views and evidence, and to participate in the hearing is November 30, 1978.

ADDRESS: Send comments and requests to participate in the hearing to: Office of Variance Determination, Occupational Safety and Health Administration, U.S. Department of Labor, Third Street and Constitution Avenue NW., Room N3668, Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT:

Mr. James J. Concannon, Director, Office of Variance Determination, at the above address, telephone 202-523-7121.

Or the following Regional and Area Offices:

U.S. Department of Labor, Occupational Safety and Health Administration, 32d Floor, Room 3263, 230 South Dearborn Street, Chicago, Ill. 60604.

U.S. Department of Labor, Occupational Safety and Health Administration, Federal Office Building, Room 847, 1240 East Ninth Street, Cleveland, Ohio 44199.

Notice of Application

Notice is hereby given that Youngstown Sheet & Tube Co., Campbell Works, P.O. Box 900, Youngstown, Ohio 45501, has made application pursuant to section 6(d) of the Occupational Safety and Health Act of 1970 (84 Stat. 1596; 29 U.S.C. 655) and 29 CFR 1905.11 for a variance from the standards prescribed in 29 CFR 1910.179(n)(1) concerning the prohibition for loading a crane beyond its rated load. The address of the place of employment that will be affected by the application is as follows:

Youngstown Sheet & Tube Co., Campbell Works, P.O. Box 900, Youngstown, Ohio 44501.

The applicant certifies that employees who would be affected by the variance have been notified of the application by giving a copy of it to their authorized employee representative, and by posting a copy at all places where notices to employees are normally posted. Employees have also been informed of their right to petition the Assistant Secretary for a hearing, although one has already been requested by the applicant.

Regarding the merits of the application, the applicant contends that it is providing a place of employment as safe as that required by § 1910.179(n)(1), which states that cranes shall not be loaded beyond their rated loads except for test purposes.

The applicant states that it owns a Shaw Alliance overhead crane, identified as TM-6, that is located in the "Hall Shop" of the Coupling Department of the Continuous Tube Mill. The crane is rated at a 5-ton load capacity and is normally used to transport containers of threaded pipe sections within the "Hall Shop." These containers reach a maximum weight of 2 tons, or approximately 40 percent of the rated capacity.

The "Hall Shop" contains several Stamets boring machines, which were installed in 1939, and which are used to thread the pipe couplings manufactured by the applicant at its Campbell Works plant. The applicant contends that these machines presently require complete rebuilds by independent contractors. However, the "Hall Shop" is

brick walled, with small, low doors.

the area of the crane runway shall be

ministrator, Occupational Safety and

under section 18 of the Occupational

The information upon which the de-

[4510-28-M]

V 4 3 / 2 1 1 0 OCT 31 1978

brick walled, with small, low doors. The shop is also inaccessible to heavy equipment since it is located in the middle of the mill surrounded by other shops. There is no way in which higher-rated portable or traveling cranes could be brought into the "Hall Shop" to move the Stamets boring machines to the door of the "Hall Shop."

The applicant contends that when the Stamets machines are removed for rebuilding, they can be almost completely disassembled and moved in segments, thus lightening the load. However, when the rebuilt machines are returned to Youngstown, they can only be disassembled to a limited extent without destroying the integrity of the machines alinement. The machines will then weigh a maximum of approximately 10 tons each.

The applicant further contends that in moving these machines from their present locations to the door of the "Hall Shop" following rebuilding, they are to be lifted approximately 10 to 12 inches off the ground. The total length of the moves will vary with each machine, but it is expected to be less than 100 feet total for each of them.

Since 1976, crane TM-6 has been radio controlled. Other than the handling of the Stamets machines, the crane has not been used for any oversize loads. It receives both general weekly and monthly inspections, conducted by trained and qualified Youngstown personnel, including one hourly employee, who is a Union member, and one supervisor, representing management.

The applicant proposes that the following conditions be utilized when operating the Shaw Alliance 5-ton overhead remote controlled crane, TM-6, for loads beyond its rated capacity:

(a) The maintenance history of the crane, including reports of any prior special lifts, shall be reviewed;

(b) Structural, mechanical, and electrical components of the crane design shall be checked by a crane manufacturer or other qualified person, according to accepted crane design standards such as CMAA No. 70 or AISE No. 6;

(c) The crane supporting structure design shall be checked for conformance to AISE or other applicable design standards;

(d) A complete inspection of the crane as described in OSHA Standard 29 CFR 1910.179(j) shall be made just prior to making the lift. The crane support shall be inspected and any deterioration or damage shall be taken into consideration in design calculations;

(e) The lift shall be made under controlled conditions under the direction of an appointed person. In addition to these requirements, all personnel in the area of the crane runway shall be alerted;

(f) The operator shall test the crane at his special lift by lifting the load a short distance and setting the brakes;

(g) Complete records of the lift, including all distances moved, shall be placed on file where readily available to appointed personnel;

(h) After the special heavy lift is concluded, a thorough inspection shall be made of all critical parts of the crane;

(i) All special heavy lifts shall be made under the charge of maintenance or rigger supervision and performed by qualified crane operators;

(j) A complete inspection of crane No. TM-6, track, and supporting members shall be completed on a monthly basis with a signed report;

(k) While the special heavy load is suspended and being moved, tag lines and/or guide poles shall be used to control movement; hand guiding shall be prohibited except when final setdown guidance is required;

(l) Temporary machine supports shall be preset to eliminate employee exposure;

(m) The President of Local 1418, USWA, shall be notified 10 days in advance of any special heavy load lifts on crane No. TM-6; and,

(n) The President of Local 1418, will designate two Union Members to be present while the special heavy load lift is being conducted.

The applicant contends that the conditions described above are patterned after but are more stringent than those specified in Item 2-3.2.1.1 "Special Heavy Lifts," of the latest American National Safety Standard, ANSI B30.2.0-1976, *Overhead and Gantry Cranes (Top Running Bridge, Multiple Girder)*.

The applicant further states that no employees will be beneath the crane or its load during the lift, and that the only employees directly involved in the area of the lift will be those guiding the final setdown of the load.

The applicant contends that under the conditions, as described above, employee health and safety will be fully protected.

Signed at Washington, D.C., this 25th day of October 1978.

EULA BINGHAM,
Assistant Secretary of Labor.

[FR Doc. 78-30760 Filed 10-30-78; 8:45 am]

[4510-26-M]

WYOMING STATE STANDARDS

Approval

1. BACKGROUND

Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On May 3, 1974, notice was published in the FEDERAL REGISTER (39 FR 15394) of the approval of the Wyoming Plan and the adoption of Subpart BB to Part 1952 containing the decision.

The Wyoming Plan provides for the adoption of Federal standards as State standards after public hearings. Section 1953.23(a)(2) of 29 CFR provides that whenever a Federal standard is promulgated, the State must adopt or promulgate a standard or standard change which will make the State standard at least as effective as the Federal standard or change within 6 months of the Federal promulgation or change. In response to Federal standard changes, the State has submitted by letters dated June 27, 1978, July 10, 1978, and September 28, 1978, from Donald D. Owsley, Health and Safety Administrator, to Curtis A. Foster, Regional Administrator, and incorporated as part of the plan, State standards comparable to the 29 CFR 1910.1018 Occupational Exposure to Inorganic Arsenic which was published in FEDERAL REGISTER (43 FR 19584), Friday, May 5, 1978, and (43 FR 23472), Friday, June 30, 1978. These standards, which are contained in the Wyoming Occupational Safety and Health Rules and Regulations for General Industry, were promulgated after hearings held on August 11, 1978, and by resolution adoption by the Wyoming Occupational Health and Safety Commission on August 11, 1978, and became effective on September 25, 1978, pursuant to section 27-278 Wyoming Status 1957 as amended 1973.

2. DECISION

Having reviewed the State submission in comparison with the Federal standards, it has been determined that the State standards are at least as effective as the comparable Federal standards.

3. LOCATION OF SUPPLEMENTS FOR INSPECTION AND COPYING

A copy of the standards supplements, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, Room 1554, Federal Building, 1961 Stout Street, Denver Colo. 80294; the Occupational Health and Safety Department, 200 East Eighth Avenue, Cheyenne, Wyo. 82001; and the Technical Data Center, Room N2439R, 200 Constitution Avenue NW, Washington, D.C. 20210.

4. PUBLIC PARTICIPATION

Under § 1953.2(c) of 29 CFR Part 1953, the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Wyoming State Plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reason:

The standards were adopted in accordance with the procedural requirements of State law, which included public comments, and further public participation would be unnecessary.

This decision is effective October 31, 1978.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667))

Signed at Denver, Colo., this 11th day of October, 1978.

CURTIS A. FOSTER,
Regional Administrator.

Office of the Secretary

[TA-W-3783]

ALATEX, INC., ANDALA PLANT, ANDALUSIA, ALA.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3783: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on May 31, 1978 in response to a worker petition received on May 25, 1978 which was filed by the Amalgamated Clothing and Textile Workers' Union on behalf of workers and former workers producing men's dress shirts at the Andala plant, in Andalusia, Ala., of Alatex, Inc.

The notice of investigation was published in the FEDERAL REGISTER on June 20, 1978 (43 FR 26497). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Alatex, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

The Department's investigation revealed that U.S. imports of men's and boys' woven dress and business shirts increased from 30,800,000 units in 1975 to 64,283,000 units in 1976 and increased to 64,446,000 units in 1977. U.S. imports of these articles increased from 16,011,000 units during the first quarter of 1977 to 17,168,000 units during the first quarter of 1978. The ratio of imports to domestic production increased from 36.2 percent in 1975, to 70.4 percent in 1976 and to 72.6 percent in 1977.

A survey conducted with the major customer of Alatex, Inc. indicated that this customer had substantially increased its purchases of imported men's dress shirts in 1977 compared to 1976 and continued importing men's dress shirts in the first half of 1978.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with men's dress shirts produced at the Andala plant, Andalusia, Ala. of Alatex, Inc. contributed importantly to the decline in sales and production and to the total or partial separation of workers at that plant. In accordance with the provisions of the Act, I make the following certification:

All workers at the Andala plant, in Andalusia, Ala., of Alatex, Inc., who became totally or partially separated from employment on or after May 4, 1977 are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 24th day of October 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

ALATEX, INC. ANDALUSIA PLANT, ANDALUSIA, ALA. ET AL.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

TA-W-4042, Alatex, Inc., Andalusia plant, Andalusia, Ala.; TA-W-4043, Alatex, Inc., Troy plant, Troy, Ala.; TA-W-4044, Alatex, Inc., Pike plant, Troy, Ala.; TA-W-4045, Alatex, Inc., Brantley plant, Brantley, Ala.; TA-W-4046, Alatex, Inc., Enterprise plant, Enterprise, Ala.

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4042, 4043, 4044, 4045, 4046: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on August 8, 1978 in response to worker petitions received on August 8, 1978 which were filed by the Amalgamated Clothing and Textile Workers' Union on behalf of workers and former workers producing men's dress shirts at the Andalusia, Troy, Pike, Brantley, and Enterprise plants (in Alabama) of Alatex, Inc.

The notice of investigation was published in the FEDERAL REGISTER on August 29, 1978 (43 FR 38634). No public hearing was requested and none was held.

The information upon which the determinations were made was obtained principally from officials of Alatex, Inc., its customers, U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of the Act must be met. It is concluded that all of the requirements have been met.

The Department's investigation revealed that U.S. imports of men's and boys' woven dress and business shirts increased from 30,800,000 units in 1975 to 64,283,000 units in 1976 and increased to 64,446,000 units in 1977. U.S. imports of these articles increased from 16,011,000 units during the first quarter of 1977 to 17,168,000 units during the first quarter of 1978. The ratio of imports to domestic production increased from 36.2 percent in 1975, to 70.4 percent in 1976 and to 72.6 percent in 1977.

A survey conducted with the major customer of Alatex, Inc. indicated that this customer had substantially increased its purchases of imported men's dress shirts in 1977 compared to

1976 and continued importing men's

Union on behalf of workers and

same period of 1977. The ratio of imports to domestic production increased

that firm. In accordance with the pro-

1976 and continued importing men's dress shirts in the first half of 1978.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with men's dress shirts produced at the Andalusia, Troy, Pike, Brantley, and Enterprise plants (in Alabama) of Alatex, Inc. contributed importantly to the decline in sales and production and to the total or partial separation of workers of these plants. In accordance with the provisions of the Act, I make the following certificatios:

All workers at the Andalusia, Ala. plant of Alatex, Inc. who became totally or partially separated from employment on or after June 2, 1978 are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974, and

All workers at the Troy plant in Troy, Ala. of Alatex, Inc. who became totally or partially separated from employment on or after June 2, 1978 are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974, and

All workers at the Pike plant in Troy, Ala. of Alatex, Inc. who became totally or partially separated from employment on or after June 2, 1978 are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974, and

All workers at the Brantley, Ala. plant of Alatex, Inc. who became totally or partially separated from employment on or after June 3, 1978 are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974, and

All workers at the Enterprise, Ala. plant of Alatex, Inc. who became totally or partially separated from employment on or after June 2, 1978 are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 24th day of October 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-3165]

CATANIA CLOTHING CORP., NEW YORK, N.Y.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-3165: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on February 21, 1978, in response to a worker petition received on February 6, 1978, which was filed by the Amalgamated Clothing & Textile Workers' Union on behalf of workers and former workers producing men's suit coats and sportcoats at Catania Clothing Corp., New York, N.Y.

The notice of investigation was published in the FEDERAL REGISTER on March 3, 1978 (43 FR 8864). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from Catania Clothing Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of men's and boys' tailored suits increased from 3,106 thousand units in 1975 to 3,562 thousand units in 1976 and to 4,091 thousand units in 1977.

The import to domestic production ratio increased from 19 percent in 1976 to 20 percent in 1977.

U.S. imports of men's and boys' tailored dress coats and sportcoats increased from 5,465 thousand units in 1975 to 6,965 thousand units in 1976 and then declined to 6,269 thousand units in 1977 before increasing to 1,776 thousand units for the first quarter of 1978 from 1,323 thousand units for the first quarter of 1977.

A Department survey was conducted with manufacturers who contracted work to Catania Clothing. One manufacturer, which also acts as a retailer, decreased contract work with Catania and increased its purchases of imported men's suits and sportcoats from 1976 to 1977 and in the first quarter of 1978 compared to the first quarter of 1977. Another manufacturer, which decreased contract work with Catania, had lost sales to retail customers which increased imports of suits and coats from 1976 to 1977. Workers at this manufacturer's firm have been certified as eligible to apply for trade adjustment assistance.

Workers at Catania Clothing Corp. were previously certified as eligible to apply for trade adjustment assistance on January 23, 1976 (TA-W-291). That certification expired January 23, 1978.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with men's suit coats and sportcoats produced by Catania Clothing Corp., New York, N.Y., contributed importantly to the decline in production and to the total or partial separation of workers at that firm. In accordance with the provisions of the Act, I make the following certification.

All workers of Catania Clothing Corp., New York, N.Y., who became totally or partially separated from employment on or after January 23, 1978, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 24th day of October 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc. 78-30589 Filed 10-30-78; 8:45]

[4510-28-M]

[TA-W-3487]

CITY TERRANCE SPORTSWEAR, INC., NEWBURGH, N.Y.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-3487: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on April 11, 1978, in response to a worker petition received on March 31, 1978, which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing rainwear at City Terrace Sportswear, Inc., Newburgh, N.Y. The investigation revealed that women's coats and raincoats are produced.

The notice of investigation was published in the FEDERAL REGISTER on May 2, 1978 (43 FR 18790). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of City Terrace Sportswear, Inc., its customers, the National Cotton Council of America, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of women's, misses', and children's raincoats increased from 191 thousand dozen in 1975 to 261 thousand dozen in 1976 and decreased to 242 thousand dozen in 1977. In the first quarter of 1978, imports increased to 129 thousand dozen compared to 84 thousand dozen in the same period of 1977. The ratio of imports to domestic production increased from 36.8 percent in 1975 to 45 percent in 1976 and decreased to 40.3 percent in 1977.

U.S. imports of women's, misses', and children's coats and jackets increased from 1,517 thousand dozen in 1975 to 2,252 thousand dozen in 1976 and increased to 2,723 thousand dozen in 1977. In the first quarter of 1978 imports decreased to 572 thousand dozen compared to 590 thousand dozen in the same period of 1977. The ratio of imports to domestic production increased from 48.3 percent in 1976 to 54.9 percent in 1977.

A survey of the manufacturer which contracts most of the production at City Terrace Sportswear, Inc., revealed decreased sales by the manufacturer in 1976 and 1977. A survey of this manufacturer's customers revealed that some of these customers had increased import purchases while decreasing their purchases from the manufacturer.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with women's raincoats and other women's coats produced by City Terrace Sportswear, Inc., contributed importantly to the total or partial separation of workers at the plant. In accordance with the provisions of the act, I make the following certification:

All workers at City Terrace Sportswear, Inc., Newburgh, N.Y., who became totally or partially separated from employment on or after October 20, 1977, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 24th day of October 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[4510-28-M]

[TA-W-3323]

DAVIS-LYNCH GLASS CO., STAR CITY, W. VA.

Affirmative Determination Regarding Application for Reconsideration

On September 25, 1978, the petitioners for workers and former workers of Davis-Lynch Glass Co. requested administrative reconsideration of the Department of Labor's negative determination regarding eligibility to apply for worker adjustment assistance. This determination was published in the FEDERAL REGISTER on September 8, 1978 (43 FR 40075).

The petitioners cite new evidence that imports of glass lamp products, especially from Mexico, have resulted in lower sales of Davis-Lynch Glass Co. products and imply that the Department's survey of Davis-Lynch Glass Co.'s customers was inadequate.

CONCLUSION

After review of the application, I conclude that the claims of the petitioners are of sufficient weight to justify reconsideration of the Department of Labor's prior decision. The application is, therefore, granted.

Signed at Washington, D.C., this 24th day of October 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-3615]

DEL-BA COAT, INC., HOBOKEN, N.J.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-3615: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on May 8, 1978, in response to a worker petition received on April 28, 1978, which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats and suits at Del-Ba Coat, Inc., Hoboken, N.J. The investigation revealed that the company produced only ladies' coats.

The notice of investigation was published in the FEDERAL REGISTER on May 26, 1978 (43 FR 22793). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Del-Ba Coat, Inc., its customers (manufacturers), the U.S. Department of Commerce, the U.S. International Trade Commission, the National Cotton Council of America, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met. The Department's investigation revealed that all of the requirements have been met.

U.S. imports of women's, misses', and children's coats and jackets increased from 2,252 thousand dozen in 1976 to 2,723 thousand dozen in 1977. Imports declined from 590 thousand dozen in the first quarter of 1977 to 572 thousand dozen in the first quarter of 1978. The ratio of imports to domestic production increased from 48.3 percent in 1976 to 54.9 percent in 1977.

The Department conducted a survey of the principal manufacturers for which Del-Ba Coat, Inc. worked in 1977 and 1978. Manufacturers that accounted for a significant portion of sales in 1977 reduced purchases from Del-Ba Coat, Inc. and increased purchases of imports in the first half of 1978 compared to the first half of 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increased imports of articles like or directly competitive with the ladies' coats produced at Del-Ba Coat, Inc., Hoboken, N.J., contributed importantly to the decline in sales and to the separation of workers at that plant. In accordance with the provisions of the Act, I make the following certification:

All workers of Del-Ba Coat, Inc., Hoboken, N.J., who became totally or partially separated from employment on or after November 1, 1977, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 24th day of October 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[FR Doc. 78-30591 Filed 10-30-78; 8:45 am]

[4510-28-M]

[TA-W-3726]

E PLUS E, INC., LOS ANGELES, CALIF.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3726: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on May 18, 1978 in response to a worker petition received on April 10, 1978 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' better dresses at E Plus E, Inc., Los Angeles, Calif.

The Notice of Investigation was published in the FEDERAL REGISTER on June 13, 1978 (43 FR 25498-9). No public hearing was requested and none was held.

The information upon which the de-

[TA-W-3328]

ply tires. This is reflected both in in-

trial fire protection systems at Graviner, Inc., Mountainside, N.J. The

ers and former workers producing chain link fence and fittings at the

became totally or partially separated from employment on or after April 1, 1977, are

V 4 3 / 2 1 1 0 C 3 1 7 8

The information upon which the determination was made was obtained principally from officials of E Plus E, Inc., its customers (manufacturer), the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criteria has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the total or partial separations, or threats thereof, and to the absolute decline in sales or production.

Imports of women's and misses' dresses decreased from 659,000 dozen in 1976 to 587,000 dozen in 1977. Imports increased from 114,000 dozen in the first quarter of 1977 to 194,000 dozen in the first quarter of 1978. The ratio of imports to domestic production decreased from 4.6 percent in 1976 to 4 percent in 1977.

E Plus E produced ladies' dresses as a contractor for only one manufacturer until August 1978. That manufacturer reduced purchases from E Plus E but did not purchase imports. The manufacturer's sales did not decline in 1977 and in the first quarter of 1978 were higher than in the first quarter of 1977.

The manufacturer produces women's designer or couture ready-to-wear clothing, excluding sportswear. Industry sources and customers of the manufacturer who were surveyed indicated that price competition is not an important factor in the market for ladies' designer apparel.

CONCLUSION

After careful review I determine that all workers of E Plus E, Inc., Los Angeles, Calif., are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 24th day of October 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-3328]

GOODYEAR TIRE AND RUBBER CO., AKRON PLANT II, AKRON, OHIO

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3328: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on March 9, 1978 in response to a worker petition received on February 24, 1978 which was filed by the United Rubber, Cork, Linoleum and Plastic Workers of America on behalf of workers and former workers producing passengger car tires at the Akron, Onio Plant II of Goodyear Tire and Rubber Co.

The Notice of investigation was published in the FEDEAL REGISTER on March 24, 1978 (43 FR 12401). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Goodyear Tire and Rubber Co., its customers, the Rubber Manufacturers Association, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

The Department's investigation revealed that U.S. imports of passenger car tires increased to 12,643 thousand units in 1976 compared to 9,940 thousand units in 1975 and increased to 13,077 thousand units in 1977. The ratio of imports to domestic production increased in 1976 compared to 1975 and then decreased in 1977 compared to 1976.

Goodyear's imports of bias passenger car tires increased 2,913.3 percent in 1976 compared to 1975 and decreased 88.1 percent in 1977 compared to 1976, but the 1977 figure was 260.0 percent higher than the 1975 level of company imports. Goodyear's imports of radial passenger car tires increased 374.6 percent in 1976 compared to 1975 and increased 12.7 percent in 1977 compared to 1976.

The Akron Plant II has been primarily a bias-ply production facility with approximately two-thirds of the plant's output being bias-ply and bias-belted passenger car tires in 1976 and 1977, the remaining being radial passenger tires. These tires are sold in the replacement market.

In the national tire market radials are rapidly replacing traditional bias-ply tires. This is reflected both in increased production of radials and increased imports which are believed to be predominately (over 90 percent) radials. Radial tires are directly competitive with bias tires.

Imported passenger car tires, predominantly of radial construction, are primarily targeted for the replacement market. This impacts on the Akron Plant II in two ways: The longer life of radials and the preference by consumers for imported radials which replace both domestically produced bias and radial passenger car tires.

The Department conducted a survey of the major customers of Goodyear Tire and Rubber Co. Some of these customers increased import purchases while decreasing tire purchases from domestic sources, including Goodyear in 1976, 1977 and the first half of 1978. Several customers claimed that tire imports were capturing an increasing share of growth in tire demand.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with passenger car tires produced at the Akron, Ohio Plant II of Goodyear Tire and Rubber Co. contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of the Akron, Ohio Plant II of Goodyear Tire and Rubber Co. who became totally or partially separated from employment on or after August 27, 1977 are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 24th day of October 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc. 78-30593 Filed 10-30-78; 8:45 am]

[4510-28-M]

[TA-W-3872]

GRAVINER, INC., MOUNTAINSIDE, N.J.

Negative Determinotion Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3872: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on June 20, 1978, in response to a worker petition received on June 16, 1978, which was filed on behalf of workers and former workers producing industrial fire protection systems at Graviner, Inc., Mountainside, N.J. The notice of investigation incorrectly identified the petitioner.

The notice of investigation was published in the FEDERAL REGISTER on June 30, 1978 (43 FR 28580). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Graviner, Inc., industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. The Department has determined that services are not "articles" within the meaning of section 222 of the Act.

Workers at Graviner, Inc., were not engaged in the production of smoke detectors. They were engaged only in the testing and marketing of imported smoke detectors. Graviner, Inc., purchased the finished smoke detectors from Graviner, Ltd., in the United Kingdom. Each unit was tested at Graviner, Inc., at Mountainside, N.J. No workers involved in the testing of the smoke detectors worked solely or primarily on them.

CONCLUSION

After careful review, I determine that all workers employed in marketing services at Graviner, Inc., Mountainside, N.J., be denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 24th day of October 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc. 78-30594 Filed 10-30-78; 8:45 am]

[4510-28-M]

[TA-W-3537, 3537a]

HACKNEY CORP., BIRMINGHAM, ALA., COLUMBIANA, ALA.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3537 and 3537a: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on April 25, 1978, in response to a worker petition received on April 12, 1978, which was filed by the United Steelworkers of America on behalf of workers and former workers producing chain link fence and fittings at the Birmingham, Ala., plant of Hackney Corp.

The investigation was expanded to include the Columbiana, Ala., plant of the Hackney Corp. as well as distribution centers at Birmingham and Mobile, Ala., Louisville, Ky., Jacksonville, Fla., and Charlotte, N.C.

The notice of investigation was published in the FEDERAL REGISTER on May 5, 1978 (43 FR 19478-9). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Hackney Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

The Department's investigation revealed that U.S. imports of chain link fencing increased from 5.3 thousand short tons in 1975 to 8.7 thousand short tons in 1976. Imports decreased to 6.3 thousand short tons in 1977. Imports increased from 1.9 thousand short tons in the first quarter of 1977 to 3.7 thousand short tons in the first quarter of 1978.

U.S. imports of carbon steel pipe and tube increased from 1,542.5 thousand tons in 1975 to 1,820.7 thousand tons in 1976. Imports increased to 2,343.9 thousand tons in 1977. The ratio of imports to domestic production increased from 22.8 percent in 1975 to 35.8 percent in 1976, and increased to 38.5 percent in 1977.

A departmental survey of customers of Hackney Corp. indicated that customers accounting for a significant proportion of the subject firm's sales increased purchases of imported chain link fencing and fence components and decreased purchases from the subject firm in 1977 compared to 1976.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with chain link fencing and fence components produced at the Birmingham and Columbiana, Ala., plants of Hackney Corp. contributed importantly to the decrease in sales and production and to the total or partial separations of workers of those plants. In accordance with the provisions of the Act, I make the following certification:

All workers of the plants and distribution centers of Hackney Corp., listed below, who became totally or partially separated from employment on or after April 1, 1977, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Plants: Birmingham, Ala., Columbiana, Ala.

Distribution centers: Birmingham, Ala., Mobile, Ala., Louisville, Ky., Jacksonville, Fla., Charlotte, N.C.

Signed at Washington, D.C., this 24th day of October 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[4510-28-M]

[TA-W-3315]

MAVEST, INC. AND MODERN MANUFACTURING CORP., TIMONIUM, MD.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3315: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on March 7, 1978 in response to a worker petition received on February 21, 1978 which was filed by the Amalgamated Clothing and Textile Workers Union on behalf of workers and former workers producing men's tailored clothing at Mavest, Inc. and Modern Manufacturing Corp. in Timinium, Md. Subsequent investigation revealed the company primarily produces sportcoats.

Workers at Mavest, Inc. and Modern Manufacturing Corp. were previously certified as eligible to apply for adjustment assistance on July 7, 1975. That certification expired on July 7, 1977 (TA-W-24).

The Notice of Investigation was published in the FEDERAL REGISTER on March 17, 1978 (43 FR 11277). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Mavest, Inc. and Modern Manufacturing Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the total or partial separations, or threats thereof, and to the absolute decline in sales or production.

Imports of women's and misses' dresses decreased from 659,000 dozen in 1976 to 587,000 dozen in 1977. Imports increased from 114,000 dozen in the first quarter of 1977 to 194,000 dozen in the first quarter of 1978. The ratio of imports to domestic production decreased from 4.6 percent in 1976 to 4 percent in 1977.

E Plus E produced ladies' dresses as a contractor for only one manufacturer until August 1978. That manufacturer reduced purchases from E Plus E but did not purchase imports. The manufacturer's sales did not decline in 1977 and in the first quarter of 1978 were higher than in the first quarter of 1977.

The manufacturer produces women's designer or couture ready-to-wear clothing, excluding sportswear. Industry sources and customers of the manufacturer who were surveyed indicated that price competition is not an important factor in the market for ladies' designer apparel.

CONCLUSION

After careful review I determine that all workers of E Plus E, Inc., Los Angeles, Calif., are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 24th day of October 1978.

[TA-W-3828]

V 4 3 / 2 1 1 0 C 3 1 7 8

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Imports of men's dress coats and sportcoats declined from 6,965 thousands of units in 1976 to 6,269 thousands of units in 1977. For the period January through June 1977, imports again declined from 3,537 units to 3,237 units in the same period January through June 1978. Likewise, the ratio of imports to domestic production declined from 30.0 percent in 1976 to 26.5 percent in 1977.

CONCLUSIONS

After careful review I determine that all workers of Mavest, Inc. and Modern Manufacturing Corp. located in Timonium, Md. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 24th day of October 1978.

PEN-JAY, INC., FALL RIVER, MASS.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3569: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on May 3, 1978 in response to a worker petition received on April 20, 1978 which was filed on behalf of workers and former workers producing ladies' vests, slacks and skirts at Pen-Jay, Inc., Fall River, Mass.

The Notice of Investigation was published in the FEDERAL REGISTER on May 16, 1978 (43 FR 21068-21069). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Pen-Jay, Inc., its manufacturer, the National Cotton Council, of America, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

During 1976 and the first 8 months of 1977 a substantial proportion of Pen-Jay's business was comprised of contract work performed for a single manufacturer. With the cessation of orders to Pen-Jay, the manufacturer increased orders to other domestic contractors. Sales by the manufacturer increased in 1977 compared to 1976.

CONCLUSION

After careful review, I determine that all workers of Pen-Jay, Inc., Fall River, Mass. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 24th day of October 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-2956]

PARIS KNITTING MILLS, CARLSTADT, N.J.

Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on January 25, 1978 in response to a worker petition received on January 9, 1978, which was filed on behalf of workers and former workers producing women's knit apparel at Paris Knitting Mills, Inc., Carlstadt, N.J.

The Notice of Investigation was published in the FEDERAL REGISTER on February 17, 1978 (43 FR 7068). No public hearing was requested and none was held.

During the course of the investigation it was established that all workers of Paris Knitting Mills, Inc. are included in a petition dated January 4, 1978. The petition for TA-W-2956 is dated January 5, 1978. In the event that more than one petition is received for the same group of workers, the earliest petition will stand and subsequent petitions will be terminated. The investigation has therefore been terminated.

Signed at Washington, D.C., this 25th day of October 1978.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[4510-28-M]

[TA-W-3388]

RCA CORP., DEPTFORD, N.J.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3388: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was intitiated on March 21, 1978 in response to a worker petition received on March 6, 1978 which was filed on behalf of workers and former workers marketing and distributing electronic receiving tubes at the Deptford, N.J. facility of RCA Corp.

The Notice of Investigation was published in the FEDERAL REGISTER on March 28, 1978 (43 FR 12967). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of RCA Corp., industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. The investigation revealed that all of the requirements have been met.

On May 9, 1976, the Department issued a certification of eligibility to apply for adjustment assistance applicable to workers of the Deptford, N.J. facility of RCA Corp. engaged in employment related to the production of electronic receiving tubes. (TA-W-625). That certification expired on May 9, 1978—2 years from its date of issuance.

The certification applicable to TA-W-625 covered workers involved in the sales and distribution of electronic receiving tubes formerly produced by RCA Corp. at a plant in Harrison, N.J. With the closure of the Harrison plant in March 1975, workers engaged in such activities were transferred to Cherry Hill and Deptford, N.J. Previous determinations by the Department (TEA-W-249 and TA-W-1198) covered workers involved directly in the production operations at Harrison.

RCA is continuing to gradually phase out its electronic receiving tube operations. The firm continues to sell off inventories of tubes produced at Harrison prior to its closure. As inventories are depleted, RCA reduces the workforce engaged in the sales and distribution of electronic receiving tubes at Deptford and at several regional locations (workers at the regional locations are considered Deptford employees). Thus, increased imports of electronic receiving tubes which resulted in the closure of RCA's Harrison plant continue to have an adverse impact on workers engaged in the sales and distribution of tubes formerly produced by RCA.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with electronic receiving tubes formerly produced by RCA Corp. contributed importantly to the separation of workers engaged in employment related to the sales and distribution of such products by RCA's Deptford, N.J. facility. In accordance with the provisions of the Act, I make the following certification:

All workers of the Distributor and Special Products Division of RCA Corp., Deptford, N.J., engaged in employment related to the distribution and marketing of electronic receiving tubes, who became totally or partially separted from employment on or after May 9, 1978 are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 24th day of October 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[4510-28-M]

[TA-W-4016]

TWINKLE UNDERGARMENT CO., INC., NEW YORK, N.Y.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4016: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on July 31, 1978 in response to a worker petition received on July 18, 1978 which was filed on behalf of workers and former workers producing ladies' undergarments at Twinkle Undergarment Co., New York, N.Y.

The Notice of Investigation was published in the FEDERAL REGISTER on August 8, 1978 (43 FR 35130-31). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Twinkle Undergarment Co., Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

Imports of women's, misses' and juniors' underwear declined in absolute terms from 1973 to 1974, increased from 1974 to 1975, and increased from 1975 to 1976. Imports increased 33 percent from 1,861 thousand dozens in 1976 to 2,470 thousand dozens in 1977. The ratios of imports to domestic production and consumption increased from 2.2 percent for both ratios in 1975 to 2.7 percent for both ratios in 1976.

The Department's survey of Twinkle Undergrament Co.'s customers revealed that respondents increased their purchases of imported ladies' panties (Twinkle's major product) in 1977 compared with 1976. Purchases from Twinkle Undergarment Co. were reduced during the same period.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases in imports of articles like or directly competitive with ladies' undergarments produced at Twinkle Undergarment Co., New York, N.Y. contributed importantly to the decline in sales and production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Twinkle Undergarment Co., Inc., New York, N.Y. who became totally or partially separated from employment on or after July 11, 1977 and before January 1, 1978 are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974. All workers separated after January 1, 1978 are denied program benefits.

Signed at Washington, D.C., this 24th day of October 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[4510-28-M]

[TA-W-2828]

VALLEY NITROGEN PRODUCERS, INC., HERCULES, CALIF.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2828: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on December 28, 1977 in response to a worker petition received on December 12, 1977, which was filed by the Oil, Chemical and Atomic Workers International Union on behalf of workers and former workers producing chemical fertilizers at Valley Nitrogen Producers, Inc., Hercules, Calif.

The Notice of Investigation was published in the FEDERAL REGISTER on January 10, 1978 (43 FR 1554). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Valley Nitrogen Producers, Incorporated, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analyst and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

U.S. imports of nitrogenous fertilizers and intermediate products increased from 1,827.6 thousands of short tons in 1975 to 2,190.8 thousands of short tons in 1976 and increased to 3,350.2 thousands of short tons in 1977. The ratio of imports to domestic production increased from 6.2 percent in 1976 to 10.3 percent in 1977.

Valley Nitrogen Producers, Inc. opened its Hercules, Calif. plant in October 1976. Production and employment remained stable through July 1977. Workers at Hercules went on strike on August 2, 1977 and remained on strike until the plant closure in November 1977. This strike was the dominant factor in the declines in sales and production at the Hercules plant.

CONCLUSION

After careful review, I determine that all workers of Mavest, Inc. and Modern Manufacturing Corp. located in Timonium, Md. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 24th day of October 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-3388]

RCA CORP., DEPTFORD, N.J.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3388: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was intitiated on March 21, 1978 in response to a worker petition received on March 6, 1978 which was filed on behalf of workers and former workers marketing and distributing electronic receiving tubes at the Deptford, N.J. facility of RCA Corp.

The Notice of Investigation was published in the FEDERAL REGISTER on March 28, 1978 (43 FR 12967). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of RCA Corp., industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. The investigation revealed that all of the requirements have been met.

On May 9, 1976, the Department issued a certification of eligibility to apply for adjustment assistance applicable to workers of the Deptford, N.J. facility of RCA Corp. engaged in employment related to the production of electronic receiving tubes. (TA-W-625). That certification expired on May 9, 1978—2 years from its date of issuance.

The certification applicable to TA-W-625 covered workers involved in the sales and distribution of electronic receiving tubes formerly produced by RCA Corp. at a plant in Harrison, N.J. With the closure of the Harrison plant in March 1975, workers engaged in such activities were transferred to Cherry Hill and Deptford, N.J. Previous determinations by the Department (TEA-W-249 and TA-W-1198) covered workers involved directly in the production operations at Harrison.

RCA is continuing to gradually phase out its electronic receiving tube

INVESTIGATIONS REGARDING CERTIFICATIONS OF ELIGIBILITY TO APPLY FOR WORKER ADJUSTMENT ASSISTANCE

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of subpart B of 29 CFR part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than November 13, 1978.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than November 13, 1978.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210.

Signed at Washington, D.C. this 20th day of September 1978.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[TA-W-4047]

ALATEX, INC., MONTGOMERY, ALA.

Certificotion Regarding Eligibillty To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4047: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the act.

The investigatjon was initiated on August 8, 1978 in response to a worker petition received on August 8, 1978 which was filed by the Amalgamated Clothing and Textile Workers' Union on behalf of workers and former workers engaged in employment related to the warehousing and distribution of men's dress shirts at the Montgomery, Ala. Distribution Center of Alatex, Inc.

The Notice of Investigation was published in the FEDERAL REGISTER on August 29, 1978 (43 FR 38634). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Alatex, Inc. its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the act must be met. It is concluded that all of the requirements have been met.

The Department's investigation revealed that U.S. imports of men's and boys' woven dress and business shirts increased from 30,800,000 units in 1975 to 64,283,000 units in 1976 and increased to 64,446,000 units in 1977. U.S. imports of these articles increased from 16,011,000 units during the first quarter of 1977 to 17,168,000 units during the first quarter of 1978. The ratio of imports to domestic production increased from 36.2 percent in 1975, to 70.4 percent in 1976 and to 72.6 percent in 1977.

A survey conducted with the major customer of Alatex, Inc. indicated that this customer had substantially increased its purchases of imported men's dress shirts in 1977 compared to 1976 and continued importing men's dress shirts in the first half of 1978.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with men's dress shirts produced by Alatex, Inc. contributed importantly to the decline in sales and production and to the total or partial separation of workers at the Montgomery, Ala. Distribution Center of Alatex, Inc. In accordance with the provisions of the act, I make the following certification:

All workers at the Montgomery, Ala. Distribution Center of Alatex, Inc. who became totally or partially separated from employment on or after March 31, 1978, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 25th day of October 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

ASARCON DIVISION OF ASARCO, INC., AND FEDERATED METALS CORP., PERTH AMBOY, N. J.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3762: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the act.

The investigation was initiated on May 24, 1978 in response to a worker petition received on February 7, 1978 which was filed by the United Steelworkers of America on behalf of all workers producing copper rod and tubes and atomic shielding at the Perth Amboy plant of Asarco, Inc. The investigation revealed that Asarco produced cast alloy rod and tube and lead products (atomic shielding). These operations were sold to its subsidiary, Federated Metals Corp., in April 1977. The two operations are known as the Asarcon Division.

The Notice of Investigation was published in the FEDERAL REGISTER on June 6, 1978 (43 FR 24834). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Asarco, Incorporated, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. Without regard to whether any of the other criteria have been met the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

The Department's investigation revealed that sales and production of cast alloy rod and tube and lead products increased in quantity and value in the first 6 months of 1977 compared to the same period in 1976. When the labor contract with the United Steelworkers expired at the end of June 1977 there was a strike. The plant never reopened. In January 1978 Federated Metals completely shut down the Perth Amboy plant.

CONCLUSION

After careful review I determine that all workers engaged in employment related to the production of cast alloy rod and tube and lead products at the Asarcon Division of Asarco, Inc., and Federated Metals Corp., Perth Amboy, N.J., are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 24th day of October 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-3838]

CLINTON ENGINES CORP., MAQUOKETA, IOWA

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3838: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the act.

The investigation was initiated on June 14, 1978 in response to a worker petition received on June 12, 1978 which was filed by the International Association of Machinists on behalf of workers and former workers producing motors for lawn mowers and air-cooled outboard motors at Clinton Engines Corp., Maquoketa, Iowa.

The Notice of Investigation was published in the FEDERAL REGISTER on June 27, 1978 (43 FR 27924). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Clinton Engines Corporation, its customers, manufacturers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the act must be met. It is concluded that all of the requirements have been met.

Imports of gasoline engines under 11 horsepower excluding outboards increased both absolutely and relative to domestic production in 1977 from 1976 and in January-June 1978 from the same period in 1977. Imports of outboard motors increased in 1977 from 1976. Clinton Engines Corp. began importing four cycle engines in August 1977. Separations resulting from the termination of four cycle production occurred during the second half of 1977. Company imports of four cycle engines were terminated in July 1978.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with the motors for lawn mowers and air-cooled outboard motors produced at Clinton Engines Corp., Maquoketa, Iowa contributed importantly to the decline in production and to the total or partial separation of workers of that firm. In accordance with the provisions of the act, I make the following certification:

All workers of Clinton Engines Corp., Maquoketa, Iowa who became totally or partially separated from employment on or after June 8, 1977 and before December 31, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974. Workers separated after December 31, 1977 are denied program benefits.

Signed at Washington, D.C. this 24th day of October 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[4510-28-M]

[TA-W-3132]

GENERAL REFRACTORIES CO., U.S. DIVISION, CLAYSBURG, PA.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-3132: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on February 15, 1978, in response to a worker petition received on February 2, 1978, which was filed by the United Steelworkers of America on behalf of workers and former workers producing silica coke oven brick at the General Refractories Co., U.S. Division, Claysburg Works, Claysburg, Pa.

The Notice of Investigation was published in the FEDERAL REGISTER on February 28, 1978 (43 FR 8209). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of the U.S. Division of General Refractories Co., the U.S. Department of Commerce, the U.S International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of silica refractory products increased from 4,124 thousands of 9-inch brick equivalents in 1976 to 7,591 thousands of 9-inch brick equivalents in 1977. The ratio of imports to domestic production increased from 10 percent in 1976 to 26.1 percent in 1977. Imports increased from 911 thousands of 9-inch brick equivalents in the first 3 months of 1977 to 1,835 thousands of 9-inch brick equivalents in the same period of 1978. The ratio of imports to domestic production increased from 13.9 percent in the first 3 months of 1977 to 21.89 percent in the same period of 1978.

Refractory products are produced according to contracts awarded by customers on a competitive bid basis. Evidence developed during the course of the investigation revealed that bids lost by General Refractories to foreign refractory producers in 1977 constituted a major portion of the decline in Claysburg's sales in that year.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with silica refractory products produced at the Claysburg, Pa., plant of the U.S. Division of the General Refractories Co. contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of the Claysburg, Pa., plant of the U.S. Division of the General Refractories Co. who became totally or partially separated from employment on or after January 31, 1977, and before February 1, 1978, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974. All workers separated from employment after February 1, 1978, are denied program benefits.

Signed at Washington, D.C., this 25th day of October 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-3767]

KOPPERS CO., INC., CONTAINER MACHINERY DIVISION, CRANFORD, N.J.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3767: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on May 24, 1978, in response to a worker petition received on May 22, 1978, which was filed on behalf of workers of the Cranford, N.J. plant of the Container Machinery Division of Koppers Co., Inc.

The Notice of Investigation was published in the FEDERAL REGISTER on June 6, 1978 (43 FR 24634-24635). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Koppers Co., Inc., its customers, the U.S. Department of Commerce, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of machinery for making corrugated boxes increased in value from $18 million in 1976 to $22.8 million in 1977. Imports increased from $12.4 million during January-June 1977 to $18.5 million during January-June 1978. Imports amounted to 13.5 percent of total domestic production in 1976 and 14.7 percent in 1977.

A survey conducted by the Department revealed that some customers who decreased purchases from the Container Machinery Division of Koppers Co., Inc., in 1977 and the first quarter of 1978 increased purchases of imported machinery during the same period.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with machinery for the corrugated box industry produced at the Cranford, N.J., plant of the Container Machinery Division of Koppers Co., Inc., contributed importantly to the decline in sales or production and to the total or partial separation of workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All workers of the Cranford, N.J. plant of the Container Machinery Division of Koppers Company, Inc., who became totally or partially separated from employment on or after May 15, 1977, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 25th day of October 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-4035]

PYR-A-LARM, INC., DUBLIN, GA.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-4035: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the act.

The investigation was initiated on August 3, 1978, in response to a worker petition received on August 2, 1978, which was filed by the International Union of Electrical, Radio, and Machine Workers on behalf of workers and former workers producing residential smoke detectors at Pyr-A-Larm Inc., of Dublin, Ga.

The Notice of Investigation was published in the FEDERAL REGISTER on September 1, 1978 (43 FR 39193). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Pyr-A-Larm, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the act must be met. The investigation revealed that all of the criteria have been met.

U.S. imports of smoke detectors increased from 900,000 units in 1976 to 2,600,000 units in 1977, and further increased from 1,200,000 units in the first 6 months of 1977 to 1,700,000 units during the same period in 1978. The import-to-production ratio increased from 12.7 in 1976 to 25.0 in 1977, and from 23.1 in the first 6 months of 1977 to 23.3 during the same period in 1978.

The decline in the Dublin, Ga. plant's sales and employment is direct-

ly linked to the import influence in

The National Advisory Council on Economic Opportunity is authorized

praisal for the renewal of License No. SNM-145. On the basis of this appraisal

appraisal need not be prepared in connection with issuance of these amend-

V 4 3 / 2 1 1 0 C 3 1 7 8

ly linked to the import influence in the industry. A major U.S. firm and a price leader in the U.S. market, imports 100 percent of its residential smoke detectors from Europe. This major firm increased its imports of smoke detectors 43 percent in 1977 compared to 1976 and 152 percent in the first 9 months of 1978 compared to the same period in 1977. Another major U.S. participant in the residential smoke detector industry imported virtually all of its products from Hong Kong in 1978 and increased its imports significantly over 1977. These import increases reduced the market share for Pyr-A-Larm and placed downward pressure on prices. As a consequence of this important development, inventories of domestically-produced smoke detectors grew, making it unprofitable for Pyr-A-Larm to continue production at former levels.

The Department's investigation revealed that company sales and production of smoke detectors by Pyr-A-Larm Inc., decreased significantly in the third quarter of 1978 compared to the same quarter in 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with smoke detectors produced at the Dublin, Ga., plant of Pyr-A-Larm Inc., contributed importantly to the decline in sales and to the total or partial separation of the workers of that plant. In accordance with the provisions of the act, I make the following certification:

All workers at the Dublin, Ga. plant of Pyr-A-Larm Inc., who became totally or partially separated from employment on or after June 15, 1978, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 24th day of October 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-4015]

SPORN DRESS CO., FREEHOLD, N.J.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-4015: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on July 31, 1978, in response to a worker petition received on July 28, 1978, which was filed on behalf of all workers and former workers producing ladies' gowns, dresses, and pants suits at the Freehold, N.J., plant of the Sporn Dress Co.

Subsequent investigation revealed that ladies' dresses were the only product produced at the plant.

The Notice of Investigation was published in the FEDERAL REGISTER on August 8, 1978 (43 FR 35130). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Sporn Dress Co., its customer, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

Imports of women's, misses', and children's dresses declined from 1,614 thousand dozen in 1976 to 1,420 thousand dozen in 1977. The ration of imports to domestic production of women's, misses', and children's dresses declined from 8 percent in 1976 to 6.7 percent in 1977.

The Department of Labor surveyed the only customer of the Spron Dress Co. This customer indicated it did not purchase imported dresses or use foreign contractors to produce dresses in 1976 and 1977.

CONCLUSION

After careful review, I determine that all workers of the Sporn Dress Company, Freehold, N.J., are denied eligibility to apply for trade adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 25th day of October 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

UNION RAILROAD CO.

Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On May 26, 1978, the Director of the Office of Trade Adjustment Assistance issued a Notice of Termination of Investigation (43 FR 25500), in response to a petition which was filed by the Brotherhood of Locomotive Engineers on behalf of workers and former workers engaged in transporting of raw materials into the United States Steel Corp. plants, interplant moves, and finished products from the plants to interchange points at Union Railroad Co., East Pittsburgh, Pa. (TA-W-2849). The investigation was terminated on the grounds that the group of workers covered by the petition were included in a separate petition.

On the basis of additional information, the Director of the Office of Trade Adjustment Assistance has decided to reopen the investigation to determine the workers' eligibility for adjustment assistance.

Signed at Washington, D.C., this 24th day of October 1978.

NATIONAL ADVISORY COUNCIL ON ECONOMIC OPPORTUNITY

COMMITTEE AND COUNCIL MEETINGS

OCTOBER 26, 1978.

Pursuant to section 10 of the Federal Advisory Committee Act of 1972, notice is hereby given that the National Advisory Council on Economic Opportunity will hold two committee meetings on December 7, 1978, and have a full Council meeting on December 8, 1978. The committee and Council meetings will be held at the Council Office at 1725 K Street NW. (Room 405), Washington, D.C. All committee and Council meetings will begin at 9 a.m. and are open to the public.

On December 7, one committee of the Council will discuss health delivery systems as they affect the poor, welfare reform, inflation and related issues. Also on December 7, a committee of the Council will discuss policy issues involving community economic development and employment and training programs.

On December 8, the Council wil discuss and review committee reports and other relevant issues affecting antipoverty programs.

The National Advisory Council on Economic Opportunity is authorized by section 605 of the Community Services Act to advise the President and the Director of the Community Services Administration on policy matters arising under the administration of the Act and to review the effectiveness and operations of programs under the Act.

Records shall be kept of all proceedings and shall be available for public inspection at the office of the National Advisory Council on Economic Opportunity.

BABCOCK & WILCOX NUCLEAR MATERIAL DIVISION, COMMERCIAL NUCLEAR FUEL FABRICATION PLANT, BOROUGH OF APOLLO, PA.

Negative Declaration Regarding Renewal of License No. SNM-145

The U. S. Nuclear Regulatory Commission (the Commission) has renewed Special Nuclear Material License SNM-145 for the continued operation of the B&W Nuclear Fuel Fabrication Plant at Apollo, Pa.

The Commission's Division of Fuel Cycle and Material Safety has prepared an environmental impact appraisal for the renewal of License No. SNM-145. On the basis of this appraisal, the Commission has concluded that an environmental impact statement for this particular license renewal was not warranted because there will be no significant environmental impact attributable to the proposed action. The environmental impact appraisal is available for public inspection and copying at the Commission's Public Document Room at 1717 H Street, NW., Washington, D.C.

[Dockets Nos. 50-317 and 50-318]

BALTIMORE GAS & ELECTRIC CO.

Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendments Nos. 35 and 17 to Facility Operating Licenses Nos. DPR-53 and DPR-69, issued to Baltimore Gas & Electric Co. (the licensee), which revised Technical Specifications for operation of the Calvert Cliffs Nuclear Power Plant units Nos. 1 and 2, located in Calvert County, Md. The amendments are effective as of the date of issuance.

The amendments change the Technical Specifications to delete the requirements for 10 hydraulic snubbers on the unit No. 1 and 4 hydraulic snubbers on the unit No. 2 support systems associated with the Containment Charcoal Filter Dousing System.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendment dated June 13, 1978, (2) Amendments Nos. 35 and 17 to Licenses Nos. DPR-53 and DPR-69, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public document Room, 1717 H Street, NW., Washington, D.C. and at the Calvert County Library, Prince Frederick, Md. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 16th day of October 1978.

For The Nuclear Regulatory Commission.

[Docket No. 50-247]

CONSOLIDATED EDISON CO. OF NEW YORK, INC.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 41 to Facility Operating License No. DPR-26, issued to Consolidated Edison Co. of New York, Inc. (the licensee), which revised Technical Specifications for operation of the Indian Point Nuclear Generating Unit No. 2 (the facility) located in Buchanan, Westchester County, N.Y. The amendment is effective as of the date of issuance.

The amendment changes the license to provide generalized provisions for sealed radioactive sources and changes the Technical Specifications to provide for standard surveillance requirements for these sources.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. [Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.]

The Commission has determined that the issuance of this amendment did not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendment dated October 6, 1978, (2) Amendment No. 41 to License No. DPR-26, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Indian Point Public Library, Broadway, Buchanan, N.Y. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 16th day of October 1978.

[Docket No. 50-255]

CONSUMERS POWER CO.

Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 44 to Provisional Operating License No. DPR-20, issued to Consumers Power Co. (the licensee), which revised the Technical Specifications for operation of the Palisades Plant, (the facility) located in Covert Township, Van Buren County, Mich. The amendment is effective as of its date of issuance.

The amendment authorizes deletion of a requirement to perform weekly monitoring of fish impingment on the intake traveling screens.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment did not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated November 24, 1976, as supplemented by letter dated October 28, 1977, (2) Amendment No. 44 to License No. DPR-20, and (3) the Commission's related transmittal letter. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Kalamazoo Public Library, 315 South Rose Street, Kalamazoo, Mich. 49006. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md. this 16th day of October 1978.

For the Nuclear Regulatory Commission.

DENNIS L. ZIEMANN,
Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[Docket No. 50-409]

DAIRYLAND POWER COOPERATIVE

Issuance of Amendment To Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 14 to Provisional Operating License No. DPR-45, issued to Dairyland Power Cooperative (the licensee), which revised the Technical Specifications for operation of the La Crosse Boiling Water Reactor (LACBWR) located in Vernon County, Wisc. The amendment is effective as of its date of issuance.

The amendment deletes the requirement for operable fire detectors in the Reactor Containment Building during the performance of the containment integrated leak rate test.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated September 27, 1978, (2) Amendment No. 14 to License No. DPR-45, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the La Cross Public Library, 800 Main Street, La Crosse, Wisc. 54601. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 11th day of October 1978.

For the Nuclear Regulatory Commission.

[Docket No. 50-414]

DUKE POWER CO. NORTH CAROLINA MUNICIPAL POWER AGENCY NO. 1

Issuance of Amendment to Construction Permit

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 1 to Construction Permit No. CPPR-117, issued to the Duke Power Co. The amendment reflects a change in the ownership of the Catawba Nuclear Station, Unit 2 (the facility) located in York County, S.C. The amendment is effective as of its date of issuance.

The amendment adds the North Carolina Municipal Power Agency No. 1 as a co-owner of and co-applicant for the facility. The Duke Power Co. will retain sole responsibility for the design, construction, and operation of the facility.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the amendment.

Prior public notice of this amendment was not required since this amendment does not involve a significant hazards consideration.

For further details with respect to this action, see (1) the application for amendment dated May 15, 1978, and suplementary information dated September 11, 1978, (2) Amendment No. 1 to Construction Permit CPPR-117, (3) the Commission's related Safety Evaluation, and (4) the Environmental Impact Appraisal and Negative Declaration supporting Amendment No. 1 to that construction permit.

All of these items and other related material are available for public inspection at the Commission's Public Document Room 1717 H Street, NW., Washington, D.C., and at the local Public Document Room located at the York County Library, 325 South Oakland Avenue, Rock Hill, S.C. 29730.

A copy of item (2) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, attention: Director, Division of Project Management.

Dated at Bethesda, Md., this 19th Day of October 1978.

For the Nuclear Regulatory Commission.

HOUSTON LIGHTING AND POWER CO., (ALLENS CREEK NUCLEAR GENERATING STATION, UNIT 1)

Order Scheduling Special Prehearing Conference

Pursuant to 10 CFR 2.751a, on November 17, 1978 (and on November 18th, if necessary) at 9:30 a.m. local time the Special Prehearing Conference will be held at the Host International Hotel, 18700 John F. Kennedy Boulevard, Houston, Tex. 77205 in order to:

a. Permit identification of the key issues in the proceeding;

b. Take any steps necessary for further identification of the issues;

c. Consider all intervention petitions to allow the presiding officer to make such preliminary or final determinations as to the parties to the proceeding, as may be appropriate; and

d. Establish a schedule for further actions in the proceeding.

Further, pursuant to 10 C.F.R. 2.714(b), as amended, not later than fifteen (15) days prior to the holding of the Special Prehearing Conference, any person who filed a petition for leave to intervene pursuant to the Corrected Notice Of Intervention Procedures published in the FEDERAL REGISTER on September 11, 1978 (43 FR 40328) shall file a supplement to this petition to intervene which must include a list of the contentions which petitioner seeks to have litigated in the matter and the bases for each contention set forth with reasonable specificity. Any person who filed a petition for leave to intervene pursuant to the Notice Of Intervention Procedures published in the FEDERAL REGISTER on May 31, 1978 (43 FR 23666) and complied with the Memorandum and Order Re: Persons Seeking Intervention And Scheduling Special Prehearing Conference dated August 14, 1978, may amend previously filed contentions not later than fifteen (15) days prior to the holding of the Special Prehearing Conference.

Limited Appearance statements will not be received at the above-mentioned [illegible] will be received at the

extension is for a reasonable period, the bases for which are set forth in a

[7590-01-M]

[Docket Nos. 50-275 and 50-323]

PACIFIC GAS AND ELECTRIC CO. DIABLO CANYON NUCLEAR POWER PLANT, UNITS 1 AND 2

Order Extending Construction Completion Dates

Pacific Gas & Electric Co. is the holder of Construction Permit Nos. CPPR-39 and CPPR-69 issued by the Atomic Energy Commission[1] on April 23, 1968 and December 9, 1970, respectively, for construction of the Diablo Canyon Nuclear Power Plant, Units 1 and 2, presently under construction at the Company's site in San Luis Obispo County, Calif.

On August 11, 1978 and August 23, 1978, Pacific Gas and Electric Company filed requests for extensions of the completion dates for Units 1 and 2.

On May 11, 1976 and September 10, 1976, the Commission's staff published Supplements 4 and 5 to the Safety Evaluation Report for the Diablo Canyon Nuclear Power Plant documenting the need for a reevaluation of the plant's seismic capabilities, the criteria to be used in the reevaluation and the staff's request that Pacific Gas & Electric Co. perform such a reevaluation. This reevaluation has resulted in significant modifications to upgrade the plant's seismic resistance. For Unit 1, additional time is required to complete the modifications and to conclude the licensing process. For Unit 2, additional time is required to complete the modifications by personnel who are giving priority to completing Unit 1.

This action involves no significant hazards consideration; good cause has been shown for the delays; an environmental statement, negative declaration or environmental impact appraisal need not be prepared in connection with the extension; and the requested extension is for a reasonable period, the bases for which are set forth in a staff evaluation of request for extension.

For further details with respect to this action, see (1) the applicant's requests for extension of the construction permit completion dates dated August 11, 1978 and August 23, 1978 and (2) the staff's related evaluation, all of which are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW, Washington, D.C. 20555 and at the Local Public Document Room located in San Luis Obispo County Free Library, P.O. Box X, San Luis Obispo, Calif. 93406.

It is hereby ordered that the latest completion date for CPPR-39 is extended from September 30, 1978 to April 30, 1979 for Unit 1 and the latest completion date for CPPR-69 is extended from December 31, 1978 to October 31, 1979 for Unit 2.

Date of Issuance: October 13, 1978.

For the Nuclear Regulatory Commission.

ROGER S. BOYD,
Director, Division of Project Management, Office of Nuclear Reactor Regulation.

[7590-01-M]

[Docket Nos. 50-582 and 50-583]

SAN DIEGO GAS & ELECTRIC CO.

Availability of Final Site Environmental Statement for the Sundesert Nuclear Plant, Unit Nos. 1 and 2

Pursuant to the National Environmental Policy Act of 1969 and the United States Nuclear Regulatory Commission's regulations in 10 CFR Part 51, notice is hereby given that the Final Site Environmental Statement prepared by the Commission's Office of Nuclear Reactor Regulation, relative to suitability of the proposed site for eventual construction of the Sundesert Nuclear Plant, Unit Nos. 1 and 2 by the San Diego Gas and Electric Company in Riverside County, Calif., is available for inspection by the public in the Commission's Public Document Room at 1717 H Street, NW., Washington, D.C. and in the Palo Verde Valley District Library, 125 West Chanslorway, Blythe, Calif., and the San Diego County Law Library, 1105 Front Street, San Diego, Calif. The Final Site Environmental Statement is also being made available at the Office of the Governor, Office of Planning and Research, 1400 Tenth Street, Sacramento, Calif., and the Southern California Association of Governments, Suite 1000, 600 South Commonwealth Avenue, Los Angeles, Calif.

In early 1978 following issuance of the Draft Environmental Statement, the California Public Utilities Commission issued an order to SDG&E to cease all expenditures on this project except as necessary to preserve the site and water supply for future use in meeting the electrical energy needs of Southern California. SDG&E then requested the NRC to continue the licensing effort with a view toward issuing the Final Environmental Statement for site suitability. Consequently, this Final Site Environmental Statement relative to determination of the suitability of the site for eventual construction of the Sundesert Nuclear plant is being issued. This statement is necessary for SDG&E and the Department of Interior to consummate exchange of ownership of the publicly-owned site for other lands; however, no hearings are presently contemplated by NRC.

The notice of availability of the Draft Environmental Statement for the Sundesert Nuclear Plant, Unit Nos. 1 and 2, and requests for comments from interested persons was published in the FEDERAL REGISTER on February 6, 1978 (43 FR 4891). The comments received from Federal, State, and local agencies and interested members of the public have been included as appendices to the Final Site Environmental Statement.

Copies of the Final Site Environmental Statement (Document No. NUREG-0455) may be purchased, at current rates, from the National Technical Information Service, Springfield, Va. 22161.

Dated at Bethesda, Md., this 23rd day of October 1978.

For The Nuclear Regulatory Commission.

WM. H. REGAN, Jr.,
Chief, Environmental Projects Branch 2, Division of Site Safety and Environmental Analysis.

[Docket Nos. 50-445A, 50-446A]

TEXAS UTILITIES GENERATING CO., ET AL. (COMANCHE PEAK STEAM ELECTRIC STATION, UNITS 1 AND 2).

Order Granting Intervention Petitions and Notice of Special Prehearing Conference

I

OCTOBER 19, 1978.

Petitions for leave to intervene in this proceeding have been filed pursuant to the Notice of Receipt of Attorney General's Advice and Time for Filing of Petitions to Intervene on Antitrust Matters (43 FR 34850, August 7, 1978). The State of Texas has intervened as "an interested state" pursuant to 10 CFR 2.715(c), and the Committee on Power for the Southwest has elected to make a limited <appearance in accordance with the provisions of 10 CFR 2.715(a). Without objection, both are granted leave to participate in these respective roles.

On September 6, 1978, a petition for leave to intervene was filed by Central and South West Corp. (CSW), a public utility holding company, and its four operating subsidiaries, Central Power & Light Co. (CPL), Public Service Co. of Oklahoma (PSO), Southwestern Electric Power Co. (SWEP), and West Texas Utilities Co. (WTU). The Applicant, Texas Utilities Generating Co. (TUGCO), filed an answer on September 21, 1978, objecting to portions of the petition and urging that no ruling be made on CSW's party status until contentions have been submitted and responded to. The Staff filed its response on September 26, 1978, supporting the adequacy of the CSW intervention petition.

Under the *Wolf Creek* criteria,[1] an intervening petitioner must set forth with reasonable particularity (1) an interest in the proceeding, (2) an allegation of a situation inconsistent with the specified antitrust laws, (3) a nexus between the alleged inconsistent situation and the activities to be licensed, and (4) a request for specific relief.

CSW is a registered public utility holding company whose subsidiaries' service areas adjoin those of the operating company subsidiaries of Texas Utilities Co. (TU), whose system is allegedly the largest in Texas. The TU subsidiaries are the applicants in this proceeding. CSW alleges that the policy of TU and Houston Lighting & Power Co. (HL&P) to refuse to deal with interstate utilities, denies its subsidiaries meaningful access to the Comanche Peak nuclear facility. It is also claimed that this intrastate policy denies some of the benefits of existing interconnections to some of its subsidiaries. These allegations constitute an adequate showing of interest under 10 CFR 2.714.

CSW alleges that TU and its subsidiaries have combined with others to refuse to deal with interstate utilities, and that it has used its dominance to monopolize and attempt to monopolize various relevant markets. These actions are asserted to be inconsistent with sections 1 and 2 of the Sherman Act and § 5 of the Federal Trade Commission Act (15 U.S.C. §§ 1, 2, 45). This is a sufficient pleading of a situation inconsistent with the antitrust laws.

CSW further alleges that TU has refused to grant interstate utilities access to Comanche Peak, and that the continuation of the policy would frustrate relief in another antitrust hearing (South Texas) because the intrastate only policy is enforced through the threat of disconnection by the combination of TU and HL&P, which are dominant in Texas. This pleading satisfies the nexus requirement of a connection between the anticompetitive situations and the licensed activities.

It is requested that any operating license be conditioned so as to effectively neutralize TU's intrastate only policy. This is an adequate request for relief in an antitrust licensing proceeding. Accordingly, CSW's petition for leave to intervene is granted.

II

By its petition for leave to intervene, filed on September 20, 1978, Tex-La Electric Cooperative, Inc. (Tex-La) sought to intervene in this proceeding on behalf of its seventeen member co<operatives which operate in Texas. TUGCO filed an answer on October 4, 1978, which denied the adequacy of the petition to show interest, a situation inconsistent with the antitrust laws, or nexus. The Staff's response filed October 10, 1978, considered that the petition satisfied the requirements of 10 CFR 2.714.

Tex-La's seventeen member cooperatives allegedly purchase substantial amounts of power at wholesale from TU through its subsidiary, TP&L. Its interest is to ensure that its members are not restricted from access to bulk power supplies from interstate or intrastate sources. Tex-La also asserts an interest in participating in the Comanche Peak Nuclear Facilities. These pleadings sufficiently assert a cognizable interest. Tex-La asserts that TU has conditioned its agreements with Tex-La and others to preclude the interstate transmission of electricity, that TU has restricted participation in Comanche Peak to intrastate utilities, and that TU's activities violate the antitrust laws. This is a sufficient allegation of a situation inconsistent with the antitrust laws, which should be refined by a statement of contentions within 15 days prior to the special prehearing conference under the provisions of 10 CFR 2.714.(b), as amended.

Tex-La further alleges that TU's intrastate restraint on participation in Comanche Peak is anticompetitive and constitutes the required nexus between the inconsistent situation and the licensed activities, citing *Louisiana Power & Light Co.* (Waterford Steam Electric Generating Station, Unit 3), CLI-73-25, 6 AEC 619, 620-21 (1973). These allegations sufficiently plead the nexus requirement.

Tex-La requests that the Comanche Peak operating license be conditioned to allow both interstate and intrastate access to the plants output, and to mandate an opportunity for Tex-La to participate in the facility. This request for relief satisfies the requirements of 10 CFR 2.714, as amended, and the request for leave to intervene is granted.

III

Notice is hereby given the parties that a special prehearing conference pursuant to the provisions of 10 CFR 2.751a, will be held at 9:30 a.m., local time, in the Nuclear Regulatory Commission Hearing Room, 5th Floor, located at 4350 East-West Highway, Bethesda, Md. 20014, on December 5, 1978.

Intervention petitions shall be supplemented to state contentions and the bases therefor reasonable specificity, in accordance with the provisions of 10 CFR 2.714(b), as amended.

It is so ordered.

Dated at Bethesda, Md. this 19th day of October 1978.

For the Atomic Safety and Licensing Board.

NUCLEAR REGULATORY COMMISSION

[Docket No 50-414]

CATAWBA NUCLEAR STATION, UNIT 2

Negative Declaration Regarding Proposed Amendment to the Construction Permit

The U.S. Nuclear Regulatory Comission (the Commission) is considering the issuance of an amendment to Construction Permit No. CPPR-117 issued to Duke Power Co. for the Catawba Nuclear Station, Unit 2, located in York County, S.C.

The amendment would authorize the addition of North Carolina Municipal Power Agency No. 1 as co-owner of the station with Duke Power Co.

The Commission's Division of Site Safety and Environmental Analysis has prepared an environmental impact appraisal for the proposed amendment and has concluded that an environmental impact statement for this particular action is not warranted because there will be no environmental impact attributable to the proposed action.

The environmental impact appraisal is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the York County Library, 325 South Oakland Avenue, Rockhill, S.C. A copy may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Attention: Director, Division of Site Safety and Environmental Analysis.

Dated at Bethesda, Md., this 19th day of October, 1978.

For the Nuclear Regulatory Commission.

Levi A. Jackson, Director, 1707 Orleans, Detroit, Mich. 48207.

David M. Sparling, Director, 18395 Pinebrook Northville, Mich. 48167.

Kenneth Whipple, Jr., Director, 29475 Briarbank Court, Southfield, Mich. 48034.

Ford Motor Co., 100 percent stockholder, The American Road, Dearborn, Mich. 48121.

Ford Motor Credit Co., Investment Adviser/Manager, The American Road, Dearborn, Mich. 48121.

The applicant, a Delaware corporation, with its principal place of business located at The American Road, Dearborn, Mich. 48121, will begin operations with $500,000 of paid-in capital and paid-in surplus, derived from the sale of 1,000 shares of common stock.

The applicant will conduct its activities principally in the State of Michigan, and in other areas within the United States of America.

Applicant intends to provide assistance to all qualified socially or economically disadvantaged small business concerns as the opportunity to profitably assist such concerns is presented.

As a small business investment company under section 301(d) of the act, the applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Small Business Investment Act of 1958, as amended, from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social economic or disadvantages.

Matters involved in SBA's consideration of the applicant include the general business reputation and character of the proposed management, and the probability of successful operation of the applicant under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act and SBA rules and regulations.

Any person may, not later than November 15, 1978, submit to SBA written comments on the proposed applicant. Any such communication should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Dearborn, Mich.

F&F VENTURE CAPITAL CORP.

[License No. 09/09-5179]

Termination of License

Notice is hereby given that F&F Venture Capital Corporation (F&F), Route No. 1, Chino Airport, Chino, California 91710, has surrendered its license to operate as a small business investment company under Section 301(d) of the Small Business Investment Act of 1958, as amended (the Act).

F&F was licensed by the Small Business Administration on January 28, 1975.

Under the authority vested by the Act and pursuant to 13 CFR 107.105 (1978), the surrender of F&F's license is hereby approved.

Accordingly, all rights, privileges and franchises derived from the license are hereby terminated.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

FORM 990, RETURN OF ORGANIZATION EXEMPT FROM INCOME TAX

Proposed Revision

AGENCY: Internal Revenue Service, Department of the Treasury.

ACTION: Notice of proposed revision of Form 990, Return of Organization Exempt from Income Tax, for 1979.

SUMMARY: As part of their forms simplification and reporting burden reduction efforts, the Internal Revenue Service is asking for public comments on a proposed extensive revision of Form 990, Return of Organization Exempt from Income Tax, for 1979. After considering all comments and suggestions, the Service will decide whether to adopt the proposed revision for 1979.

DATE: Written comments and suggestions should be mailed or delivered by December 15, 1978.

ADDRESS: Written comments and suggestions should be mailed or delivered to the Chairman, Tax Forms Coordinating Committee, Internal Revenue Service, Room 5577, 1111 Constitution Avenue NW., Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert I. Brauer, 1111 Constitution Avenue NW., Washington, D.C. 20224, telephone 202-566-6150 (not a toll-free telephone number).

SUPPLEMENTARY INFORMATION: The proposed revision provides the means for an organization to report the nature and amount of available resources, net changes in fund balances and the amounts expended for programs, fundraising and management and general purposes.

The proposed revision is simpler to complete for organizations that have gross receipts of $25,000 or less. A substantial number of organizations are in this category. They will have to complete: (1) Lines 1(f), 2, 3, 4, 5(e), 6, 7(e), 8(d), 9(e), 10, 14, and 15 of part I; (2) columns A and B of part II; (3) all of part III; (4) line 51 of part IV; and (5) all of part V. The specific instructions are keyed to the applicable line items and are explicit as to the information to be recorded thereon.

The Service is hopeful that this revised form will be adopted by states to meet their financial reporting requirements of charitable and other organizations.

Return preparers and organizations are cautioned not to make any program changes based on the proposed revision before it is adopted.

This document does not meet the criteria for significant regulations set forth in paragraph 8 of the proposed Treasury Directive appearing in the FEDERAL REGISTER for Wednesday, May 24, 1978.

Dated: October 24, 1978.

S. ALLEN WINBORNE,
Assistant Commissioner, Employee Plans, Exempt Organizations.

Form 990 (19) Page 4

Part V Statements Regarding Certain Activities

	Yes	No
63 Describe briefly the nature of the activities conducted in accomplishing your exempt purpose(s):		
64 Have you engaged in any activities not previously reported to the Internal Revenue Service? If "Yes," attach a detailed description of such activities.		
65 Have any changes not previously reported to the Internal Revenue Service been made in your organizing or governing documents? If "Yes," attach a copy of the changes.		
66 (a) Did you have unrelated business gross income of $1,000 or more during the year covered by this return?		
(b) Have you filed a tax return on Form 990–T, Exempt Organization Business Income Tax Return, for this year?		
(c) If you have gross sales or receipts from business activities not reported on Form 990–T, attach a statement explaining your reason for not reporting them on Form 990–T.		
67 Was there a liquidation, dissolution, termination, or substantial contraction during the year (see instructions)? If "Yes," attach a schedule of the dispositions for the year showing type of assets disposed of, the dates disposed, the cost or other basis, the fair market value on dates of disposition and the names and addresses of the recipients of the assets distributed.		
68 Are you related (other than by association with a statewide or nationwide organization) through common membership, governing bodies, trustees, officers, etc., to any other exempt or nonexempt organization (see instructions)? If "Yes," enter the name of organization ▶ ..... and check whether it is ☐ exempt or ☐ nonexempt.		
69 (a) Enter amount expended, if any, directly or indirectly for political purposes		
(b) Did you file Form 1120–POL, U.S. Income Tax Return of Certain Political Organizations, for this year?		
70 Did your organization receive donated services or the use of facilities or equipment at no charge or at substantially less than fair rental value? If "Yes," you may if you choose indicate the value of such services or items here. Do not include this amount elsewhere on this return ▶		
The following statements should be completed ONLY by the organizations indicated.		
71 *Section 501(c)(5) or (6) organizations.*—Did you expend any amounts in connection with any attempt to influence the general public, or segments thereof, with respect to legislative matters or referendums (see instructions and section 1.162–20(c) of the Income Tax Regs.)? If "Yes," enter the total amount expended for this purpose		
72 *Section 501(c)(7).*—Enter amount of:		
(a) Initiation fees and capital contributions included on line 10		
(b) Gross receipts from general public from use of club facilities included in line 10 (see instructions)		
(c) Does your governing instrument or any written policy statement provide for discrimination against any person because of race, color or religion?		
73 *Section 501(c)(12) organizations*—Enter:		
(a) The total amount of gross income received from members or shareholders		
(b) The total amount of gross income received from other sources (do not net amounts due or paid to other sources against amounts due or received from them)		
74 *Public interest law firm.*—Attach information required by specific instruction for line 74.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

INSTRUCTIONS FOR FORM 990—RETURN OF ORGANIZATION EXEMPT FROM INCOME TAX

UNDER SECTION 501(C) (EXCEPT PRIVATE FOUNDATION), 501(E) OR (F) OF THE INTERNAL REVENUE CODE

(Section references are to the Internal Revenue Code, unless otherwise indicated)

General Instructions—Exempt Organizations (Under Section 6033)

Rounding Off to Whole-dollar Amounts

Money items may be shown as whole-dollar amounts by eliminating amounts less than 50 cents, and increasing amounts from 50 cents through 99 cents to the next higher dollar.

A. *Who Must File Form 990.*—An annual return on this form is required of organizations exempt from tax under section 501(a) of the Code (including foreign organizations and cooperative service organizations described in sections 501(e) and (f)) except the following:

(1) A church, an interchurch organization of local units of a church, a convention or association of churches, or an integrated auxiliary of a church (such as a men's or women's organization, religious school, mission society, or youth group).

(2) A school below college level affiliated with a church or operated by a religious order, even though it is not and integrated auxiliary of a church.

(3) A mission society sponsored by or affiliated with one or more churches or church denominations, more than one-half of the activities of that society are conducted in, or directed at persons in, foreign countries.

(4) An exclusively religious activity of any religious order.

(5) For tax years ending on or after December 31, 1976, an organization (other than a private foundation as described in (8) below) that normally has gross receipts in each taxable year of not more than $10,000.

(6) A State institution whose income is excluded from gross income under section 115.

(7) An organization described in section 501(c)(1). Section 501(c)(1) organizations are corporations organized under an Act of Congress that are:

(a) instrumentalities of the United States, and;

(b) exempt from Federal income taxes (under such Acts as amended and supplemented).

(8) A private foundation exempt under section 501(c)(3) and described in section 509(a). (Required to file Form 990-PF, Return of Private Foundation Exempt from Income Tax.)

(9) A stock bonus, pension, or profit-sharing trust which qualified under section 401. (See Form 5500, Annual Return/Report for Employee Benefit Plan.)

(10) A religious or apostolic organization described in section 501(d). (Required to file Form 1065, U.S. Partnership Return of Income.)

Return When Exempt Status Not Established.—If your application for exemption is pending with the Internal Revenue Service and you claim exempt status under section 501(a) prior to a determination by the Service, you should file the appropriate return. An organization acknowledging that is a private foundation should file Form 990-PF.

B. *Section 501(c)(3) Organizations.*—Section 501(c)(3) organizations (other than private foundations filing Form 990-PF) must also complete Schedule A (Form 990), Organization Exempt Under 501(c)(3) Supplementary Information.

C. *Filing Requirements Tests.*—You are exempted from filing Form 990 if your gross receipts are normally not more than $10,000. Your gross receipts are the sum of lines 1(f), 2, 3, 4, 5(a), 6, 7(a), 8(a), and 9(e) of Part I, plus the expenses of special fundraising events and activities deducted on line 9. (These expenses must be added back because line 9(e) reflects the net income rather than the gross amount received from the special fundraising events and activities reported on that line.) If you meet this exception we ask that you fill in only the heading of Form 990 and check the first box in the note above Part I. Send this information form to the service center for your area. This will help us keep our records current and we won't have to contact you later asking why a return wasn't filed.

D. *Shortened Return Format for Small Organizations.*—If your gross receipts (see instruction C for computation) are $25,000 or less but normally more than $10,000, you should complete only the shaded items in Parts I, II, and V and all of Parts III and IV. Be sure to check the second box in the note above Part I, Form 990, so that we know that you didn't have to complete all items, and you won't be subject to a penalty for and incomplete return.

E. *Complete Returns.*—All line items on Form 990 must be completed unless the organization has gross receipts of $25,000 or less. (If this exception applies, refer to instruction D.) There are items on Form 990 which may not be applicable to you, but for which we need and answer even if it is negative.

A penalty of $10 a day for failure to file a return under section 6652(d) (see instruction F below) may be charged if an incomplete return is submitted. If one or more line items on the return are not filled in we may consider the return incomplete or contact you for the missing information. Therefore, we urge that you be sure to make and entry in each part of the form, even those that do not apply to you. If a part or line item does not apply enter "N/A" (not applicable), or if a dollar amount is zero enter "—0—." Please make sure your return is complete before it is submitted. (See Rev. Rul. 77-462, 1977-1 C.B. 400.)

F. *Accounting Period.*—The return shall be on the basis of the established annual accounting period of the organization. If the organization has no such established accounting period, the return shall be on the basis of the calendar year.

A group return (see "K" below) shall be on the basis of the established annual accounting period of the central organization.

To change your accounting period, file Form 1128, Application for Change in Accounting Period.

G. *Period to Be Covered by Return.*—File the 1979 return for the calendar year 1979 and fiscal years beginning in 1979. If the return is for a fiscal year, fill in the taxable year space at the top of the return.

H. *Accounting Methods.*—Gross income, receipts and disbursements must be computed in accordance with the method of accounting regularly used by the organization in maintaining its books and records, unless otherwise specified in the instructions.

I. *When and Where to File.*—This return must be filed on or before the 15th day of the fifth month following the close of the accounting period.

Requests for extension of time to file may be made by filing Form 2758, Application for Extension of Time to File.

In case of a complete liquidation, dissolution or termination file the return on or before the 15th day of the fifth month following complete liquidation, dissolution or termination.

If the principal office of the organization is located in—	Send the return to—
Connecticut, New Hampshire, Maine, Massachusetts, Rhode Island, or Vermont.	Internal Revenue Service Center, Andover, Mass. 05501
Alabama, Florida, Georgia, Mississippi, North Carolina, South Carolina, or Tennessee.	Internal Revenue Service Center, Atlanta, Ga. 31101
Arkansas, Colorado, Kansas, Louisiana, New Mexico, Oklahoma, Texas, or Wyoming.	Internal Revenue Service Center, Austin, Tex. 73301
Indiana, Kentucky, Michigan, Ohio, or West Virginia.	Internal Revenue Service Center, Cincinnati, Ohio 45999
Arizona, California, Hawaii, Nevada, or Utah.	Internal Revenue Service Center, Fresno, Calif. 93888
Alaska, Idaho, Minnesota, Montana, North Dakota, Oregon, South Dakota, Washington, or Wisconsin.	Internal Revenue Service Center, Ogden, Utah 84201
Any other State, the District of Columbia, any U.S. possession or foreign country.	Internal Revenue Service Center, Philadelphia, Pa.19255

J. *Penalty for Failure to File on Time.*—If an organization fails to file the return on or before the due date, section 6652(d) imposes a penalty of $10 for each day the return is late (not to exceed $5,000), unless it can be shown that the failure was due to reasonable cause. The Internal Revenue Service may make written demand that the deliquent return be filed within a reasonable time after notice of mailing of the demand. The person failing to file the deliquent return (unless it can be shown to be due to reasonable cause) will have to pay $10 for each day (not to exceed $5,000) after the period expires, if more than one person is liable for failure to file the deliquent return, all such persons shall be jountly and severally liable with respect to such failure. (See section 6652(d).)

There are penalties for willful failure to file and, for filing fraudulent returns and statements. (See sections 7203, 7206, and 7207.)

K. *Group Return.*—A group return may be filed by a central, parent, or like organization for two or more local organizations, none of which are private foundations, provided the local organizations are: (a) affiliated with the central organization at the close of the central organization's annual accounting period; (b) subject to the general supervision or control of the central organization; and (c) exempt from tax under a group exemption letter which is currently in effect. Each local organization must annually authorize the central organization in

writing to include it in the group return and must also annually file with the central organization a declaration, under penalty of perjury, of the truth and completeness of the authorization and statements required by this form. The group return is in addition to the separate return of the central organization but instead of separate returns by the local organizations included in the group return. There shall be attached to such group return schedules showing separately: (a) the total number, names, addresses, and employer identification numbers of the local organizations included; and (b) the same information for those not included therein.

If no local organization included in the group return has more than $25,000 of gross receipts, a group return may be prepared in accordance with general instruction D.

Receipts by a central organization from organizations included in a group return need not be itemized in the central organization's separate return.

The four-digit group exemption number required in block "F," page 1 of the return, is not to be confused with the nine-digit employer identification number (EIN) required in block "A" in the heading of the return.

L. *Public Inspection of Form 990.*—The information reported on or with Form 990, including all attachments other than the list of contributors required with respect to line 6, Part I, will be made available for public inspection under section 6104(b). This applies both to information required by the form or instructions and to information furnished voluntarily.

The forms and attachments should be such quality that they can be reproduced photographically.

M. *Signature and Verification.*—The return must be signed by the president, vice president, treasurer, assistant treasurer, chief accounting officer, or other corporate officer (such as tax officer) authorized to sign. A receiver, trustee, or assignee must sign any return which he or she is required to file on behalf of a corporation. If the return is filed on behalf of a trust, it must be signed by the duly authorized trustee or trustees. The return must also be signed by any outside person, firm, or corporation who was paid for preparing it. If prepared by a paid firm or corporation, it should be signed in the name of the firm or corporation. The verification is not required if the return is prepared by a regular full-time employee of the organization.

N. *Form 990-T.*—Every organization exempt from tax under section 501(a), except organizations described in section 501(c)(1), must file a return on Form 990-T if it has gross income of $1,000 or more derived from business which is unrelated to the purpose on which the organization's exemption is based. There are special rules for foreign organizations; organizations described in sections 501(c)(7), (9) and (19); unrelated debt-financed income; rents; and income from controlled subsidiaries. Domestic organizations taxable at corporate rates must file a return on or before the 15th day of the 3d month following the close of the taxable year. Those taxable at trust rates must file on or before the 15th day of the 4th month. See Form 990-T. For further information, you may obtain *Publication 598*, Tax on Unrelated Business Income of Exempt Organizations, from your local Internal Revenue Service Office.

O. *Information Returns and Forms That May Be Required.*—

(1) Forms W-2 and W-3.—Employee's wage and tax statement, and transmittal of income and tax statements.

(2) Form W-2P.—Statement for recipients of annuities, pensions or retired pay.

(3) Form 1096—Annual summary and transmittal of U.S. information returns.

(4) Form 5452.—Corporate report of nontaxable dividends.

(5) Forms 1099—DIV, INT, MED, MISC, OID, PATR, and R.—Information returns for reporting certain dividends, interest, medical and health care payments, miscellaneous income, original issue discount, patronage dividends, and lump-sum distributions from profit-sharing and retirement plans.

P. *Attachments.*—If you need more space on forms or schedules, attach separate sheets and use the same arrangement as the printed forms, but show your totals on the printed forms. Be sure to put your name and employer identification number on these separate sheets.

Q. *Organizations Organized or Created in a Foreign Country or United States Possession.*—Amounts must be reported in United States currency (state conversion rate used) and information must be furnished in the English language. All items must be reported in aggregate including amounts from both within and without the United States.

R. *Liquidation, Dissolution, Termination or Substantial Contraction.*—In the case of liquidation, dissolution, termination or substantial contraction, organizations required to file this return shall attach a statement to the return showing the nature of liquidation, dissolution, termination or substantial contraction, and in the case of a complete liquidation of a corporation or termination or a trust, whether or not a final distribution of assets has been made and the date made. Such organizations will also attach a certified copy of the resolution or plan, if any, of liquidation, etc., together with all amendments or supplements not previously filed and a schedule indicating the names and addresses of all recipients of assets distributed in liquidation, dissolution or substantial contraction and the nature and fair market value of assets distributed to each such recipient.

If the organization ceases to exist, write *"Final Return"* at the top of the form.

Substantial Contraction.—The term "substantial contraction" shall include any partial liquidation or any other significant disposition of assets (other than transfers for full and adequate consideration or distributions out of current income).

A "significant disposition of assets" shall not include any disposition for a taxable year when the aggregate of:

(1) the dispositions for the taxable year, and

(2) where any disposition for the taxable year is part of a series of related dispositions made during prior taxable years, the total of the related dispositions made during such prior taxable years,

is less than 25 percent of the fair market value of the net assets of the organization at the beginning of the taxable year (in the case of (1) above) or at the beginning of the taxable year in which any of the series of related dispositions was made (in the case of (2) above).

The determination whether a significant disposition has occurred through a series of related dispositions will be determined from all the facts and circumstances of the particular case.

Label—Name, Address, and Employer Identification Number.—If you received a Form 990 from the Internal Revenue Service with a pre-addressed removable label, please affix the removable label to the name and address area of the return you file. If the name or address on the label is wrong, draw a line through the incorrect portion and enter the correct information.

You should have only one identification number. If you have more than one number and have not been advised which one to use, notify the appropriate Internal Revenue Service Center shown under instruction I above, of the numbers you have, the name and address to which each number was assigned, and the address of your principal office. The Service will then advise you which number to use.

T. *Fair Market Value of Assets at End of Year.*—Enter on page 1, under F, the total fair market value of securities for which market quotations are readily available plus the total fair market value of all of your other assets. If the fair market value of an asset is not readily ascertainable, you may use an estimated figure.

U. *Definitions:*

Gross Receipts for Purposes of this Return.—Gross receipts means the gross amount received by the organization during its annual accounting period from all sources without reduction for any costs or expenses; including for example—cost of goods sold or cost of assets sold, cost of operations, or expenses of earnings, raising, or collecting such amounts. Thus, gross receipts includes but is not limited to (a) the gross amount received as contributions, gifts, grants and similar amounts without reduction for the expenses of raising and collecting such amounts; (b) the gross amount received as dues or assessments from members or affiliated organizations without reduction for expenses attributable to the receipt of such amounts; (c) gross sales or receipts from business activities including business activities unrelated to the purpose for which the organization received an exemption, the net income or loss from which may be required to be reported on Form 990-T; (d) the gross amount received from the sale of assets without reduction for the cost or other basis of the property and expense of sale; and (e) the gross amount received as investment income such as interest, dividends, rents and royalties. Instruction C indicates how to compute gross receipts.

Organizations Described in Section 501(c)(8).—In the case of organizations described in section 501(c)(8), where a local organization merely collects insurance premiums for the parent organization and forwards them to the parent without asserting any right to use them or otherwise derive benefit from their collection and the parent fully and currently reports the collection of those premiums, the premiums shall not be considered as gross receipts by the local organization. (Rev. Rul. 73-364, 1973-2 C.B. 393.)

Normally Not More Than $10,000.—For the purpose of instruction A(4) above, the annual gross receipts of an organization are normally not more than $10,000 if:

(1) in the case of an organization which has been in existence for one year or

only those line items in the Restricted and

Organizations in determining whether a

ceive some economic or physical benefit as a result of the service, facility, or product ob-

1(c). *Contributions, etc. received as allotments from fund raising organizations.*—Enter the total of contributions received in-

through (e). See the instructions for line 1 above for information regarding the schedule of contributors required in some circum-

V 4 3 / 2 1 1 0 C 3 1 7 8

(1) in the case of an organization which has been in existence for one year or less, the organization has received, or donors have pledged to give, gross receipts of $15,000 or less during the first taxable year of the organization,
(2) in the case of an organization which has been in existence for more than one, but less than three years, the average of the gross receipts received by the organization in the first two taxable years is $12,000 or less, and
(3) in the case of an organization which has been in existence for three years or more, the average of the gross receipts received by the organization in the immediately preceding three years, including the year for which the return would be filed, is $10,000 or less.

SPECIFIC INSTRUCTIONS

PART I.—ANALYSIS OF REVENUE EXPENSES AND FUND BALANCES

Part I has three colums headed "Total," "Restricted," and "Unrestricted." All organizaitons required to file this return must complete the Total column and provide the information inquired in the line items to the left of that column.

The Restricted and Unrestricted columns are strictly for the optional use of organizations that want to reflect any externally imposed restrictions on the use of contributions, gifts, grants, endowment income, and other amounts received in the current year. These columns also provide a summarized accounting for the utilization of restricted funds received in the current year or in any prior year. Externally imposed restrictions primarily refer to those designated by donors and grantors as to the use of their separate contributions and grants and in the case of endowment gifts, the income earned by such funds. However, the term could also apply to restrictions imposed by any applicable State or Federal statute or regulations issued by an administrative agency of a State or the Federal Government. An appropriation of funds made at the discretion of the organization's governing body is not an externally imposed restriction.

The Restricted and Unrestricted columns are a breakdown of the information required to be reported in the Total column and the individual line items to the left of that column. Therefore, for any line item, the combined amount of the Restricted and Unrestricted columns should equal the figure reported in the Total column or to the left of that column.

When any externally imposed restriction on the use of funds lapses, the transfer to an unrestricted fund should be reported on line 17 of Part I by showing a decrease in the amount involved in the Restricted column and a corresponding increase in the Unrestricted column. These offsetting entries would result in a -0- entry in the Total column. The change would also be reflected in lines 57-61 of the fund balances section of the balance sheet in Part IV of the return. Do no show the transfer on lines 1-10 of Part I since those lines are for reporting the initial receipt or accrual of restricted and unrestricted amounts.

Although the IRS does not require any organization to complete the Restricted and Unrestricted columns, an organization that does so should follow the above instructions. Also, an organization may complete only those line items in the Restricted and Unrestricted columns that it chooses to complete and not all the applicable lines in those two columns.

Line 1—Contributions. Gifts, Grants, and Similar Amounts Received

Lines 1(a) through (e) are to be used to report amounts received as voluntary contributions: i.e., payments for which the payer (donor) does not receive full and adequate consideration from the recipient (donee) organization. (In the case of grants see the discussion below under the heading "Grants Equivalent to Contributions".) Income from fund raising events such as dinners, door-to-door sales of merchandise, raffles, carnivals, bingo games, and dances should not be reported as contributions received, but as either gross sales (line 8) if the sale of merchandise is involved, or other revenue (line 9) in all other circumstances. However, when the amount received or to be received from the payer exceeds the value of the consideration furnished by the filer, the excess represents a contribution and should be reported as such. When the recipient organization furnishes consideration having only nominal value, the entire amount received should be reported as a contribution. (See the instructions for line 2 for a discussion of when membership dues and assessments should be treated as contributions.)

On lines 1(a) through (f) do not report as a contribution received the value of any donated services rendered to the organization or similar items (such as the free use of facilities or equipment) for which a charitable contribution deduction is not allowable under section 170 of the Code. This applies whether the services or facilities are provided by individuals or organizations, including organizations that are exempt from tax. This amount may be reported in the block on line 70 of Part V.

Attach an itemized schedule (not subject to public inspection) where money, securities, or other property of $5,000 or more is received directly or indirectly from one person during the year showing the name, address, date received, and the total amount received from each such person.

An organization described in section 501(c)(3) which meets the 33⅓ percent support test of the regulations under section 170(b)(1)(A)(vi) (without regard to whether such organization otherwise qualifies as an organization described in section 170(b)(1)(A)) need only furnish the above information for a person contributing $5,000 or more if the contribution exceeds 2 percent of total contributions, bequests, and devises received by the organization during the year.

An organization need only report the name and address of the contributor where it has actual knowledge of the contributor. For instance, an organization need not require an employer which withholds contributions from the compensation of employees and pays over to the organization periodically the total of amounts withheld, to specify the amounts paid over with respect to a particular employee. In such case, unless the organization has actual knowledge that a particular employee gave more than $5,000 (and in excess of 2 percent if the above paragraph is applicable), the organization need report only the name and address of the employer and the total amount paid over.

Organizations in determining whether a person has contributed $5,000 or more need only aggregate gifts of $1,000 or more from such person. Separate and independent gifts need not be aggregated if less than $1,000. If a contribution is in the form of property where the fair market value is readily ascertainable (such as market quotations for securities), the description and fair market value must be submitted. If the fair market value of the property is not readily ascertainable, you may submit an estimated value.

The term "person" includes individuals, fiduciaries, partnerships, corporations, associations, trusts and exempt organizations.

Organizations described in section 501(c)(7), 501(c)(8), 501(c)(10), or 501(c)(19) that receive contributions or bequests to be used exclusively for the purposes described in sections 170(c)(4), 2055(a)(3), or 2522(a)(3), must attach a schedule with respect to all gifts which aggregate $1,000 or more from any one person showing (a) the name of the donor, (b) the amount of such contribution or bequest, (c) the specific purpose for which such contribution or bequest was given, and (d) the specific use to which such amount was put. In the case of an amount set aside for such purposes, the organization shall indicate the manner in which such amount is held (for instance, whether such amount is commingled with amounts held for other purposes). If the contribution or bequest was transferred to another organization, the schedule must include (a) the name of the transferee organization, (b) a description of the nature of such organization, and (c) a description of the relationship between the transferee and transferor organizations. Such organizations must also attach a statement showing the total dollar amount of contributions and bequests received for such purposes which are $1,000 or less.

Grants equivalent to contributions.—Only those grants that are equivalent to contributions should be reported on lines 1(a)-(c). As discussed in section 1.509 (a)-3(g) of the Income Tax Regulations, a grant is normally made to encourage the grantee organization to carry on certain programs or activities in furtherance of its exempt purposes. It may contain certain terms and conditions imposed by the grantor to ensure that the grantee's programs or activities are conducted in a manner compatible with the grantor's own programs and policies. The use of the grant funds may be restricted to one or more specific projects or activities of the grantee, as, for example, a voter registration drive or the restoration of a historically significant building.

A grant would still be equivalent to a contribution if the grantee performs a service or produces a work product which only incidently benefits the grantor. (See the examples in the instructions for line 1(d).) However, if the terms of a grant require that a specific service, facility, or product be provided the grantor—the purpose of which is to serve the direct and immediate needs of that grantor rather than primarily to confer a direct benefit upon the general public or that segment of the public served by the organization in the case of organizations other than those described in section 501(c)(3)—such grant does not represent a contribution but a payment for services and/or rental income depending upon the specific facts. In general, any payment made primarily to enable the payer to realize or receive some economic or physical benefit as a result of the service, facility, or product obtained should not be treated as a contribution.

As an example, assume that a public interest organization described in section 501(c)(4) makes a grant to another organization to conduct a nationwide survey using a scientific sampling method. The purpose of the survey is to determine voter attitudes on various issues in which the grantor has an interest. The grantor plans to use the survey results in planning its program for the next three years. Under these circumstances the grant to fund the survey does not represent a contibution since conducting the survey and furnishing the survey report primarily serve the direct and immediate needs of the grantor and the benefit to the grantor would be more than incidental. The grantee should treat the grant funds as other revenue (line 9) when they are taken into account as income.

Research leading to the developement of tangible products for the use or benefit of the payer should generally be treated as a service provided to serve the direct and immediate needs of the payer, whereas basic research or studies carried on in the physical or social sciences generally should not be so treated.

(a). *Contributions, etc. received directly from the public.*—Enter the total contributions, etc. received by the organization directly from the public. However, do not include any amounts received through a professional fundraiser which are required to be reported on line 1(b).

Amounts to be reported here include contributions, gifts, grants, etc. received from individuals, trusts, corporations, estates and foundations. Also to be included are contributions and grants from public charities and other exempt organizations that the not fund raising organizations (see instructions for line 1(c)) or affiliates of the filing organization (see instructions for line 1(e)). To the extent that membership dues and assessments represent contributions from the public rather than affiliated organizations, they should be reported on line 1(a).

Amounts contributed by any commercial co-venturer should be reported on line 1(a) as a contribution received directly from the public. These are amounts due to the donee organization for letting an outside organization or individual use its name in a sales promotion campaign in which the donor advertises that it will contribute a certain dollar amount to the named donee organization for each unit of a particular product or service sold or for each occurrence of a specified type.

1(b). *Contributions, etc. received through professional fundraisers.*—Enter the amount of contributions received from the public through any solicitation campaign conducted for the organization by a professional fundraiser. Under such an arrangement the fundraiser typically utilizes its own mailing list and conducts the mail campaign (or has employees who solicit contributions in person or by telephone), is compensated for certain direct costs such as printing and mailing expenses and employee salaries and is paid a fee that may be based on the use of the mailing list and the net contributions received (total contributions reduced by mailing list charges and/or direct expenses).

Do not include on line 1(b) contributions received through solicitation campaigns conducted by the organization itself.

1(c). *Contributions, etc. received as allotments from fund raising organizations.*—Enter the total of contributions received indirectly from the public through solicitation campaigns conducted by federated fund raising agencies (such as a United Way organization and certain sectarian federations) and similar fund raising organizations. These organizations conduct fund raising campaigns, normally within a single metropolitan area or some part of a particular State, and allot a portion of the net proceeds to each participating organization on the basis of the designations made by individual donors and other factors taken into account by the particular distribution formula utilized.

Contributions from public charities and other publicly supported organizations that are not fund raising agencies of the type described above should be reported on line 1(a) unless the donor and donee organization are affiliates. In the latter event, the donee should report such contributions on line 1(e).

1(d). *Contributions, etc. received as government grants.*—The discussion under Grants Equivalent to Contributions is particularly applicable to this line item. A grant or other payment from a governmental unit represents a contribution if the purpose of the payment is primarily to enable the donee to provide a service to, or maintain a facility for, the direct benefit of the public (even if part of the expense of providing such service or facility is paid for by the public) rather than to serve the direct and immediate needs of the grantor.

Following are examples of governmental grants and other payments that satisfy this requirement and therefore represent contributions.

(1) Amounts paid by a government unit for the construction or the maintenance of library or hospital facilities which are open to the public.
(2) Amounts paid under government programs to nursing homes or homes for the aged in order to provide health care or domiciliary services to residents of such facilities.
(3) Amounts paid to child placement or child guidance organizations under governmental programs serving children in the community.

The general public derives the primary benefit (and a direct one) from the above payments. Any benefit to the governmental unit itself would be indirect and insubstantial as compared to the public benefit.

1(a). *Other contributions, etc.*—Enter the aggregate amount of contributions, etc. received from all sources other than those covered by lines 1(a)—(d). As indicated by the instructions for line 1(a), contributions and grants from organizations affiliated with the donee organization should be reported on this line (1(e)).

A national organization's affiliates would include its local, State, and area chapters. The affiliates of any of these chapters would include both the national organization and any other chapter. An auxiliary or similar organization is an affiliate of the organization that it operates in close association with (whether or not there is any overlapping control) and to which it provides financial support or from which it receives such support.

1(f). *Total contributions, etc.*—Enter the total of the contributions, gifts, grants and similar amounts reported on lines 1(a) through (e). See the instructions for line 1 above for information regarding the schedule of contributors required in some circumstances.

2. *Membership dues and assessments.*—Enter the total of membership dues and assessments from members and affiliates for the year that do not represent contributions. The rationale applied in Revenue Rulings 54-565, 1954-2 C.B. 95, and 68-432, 1968-2 C.B. 104, is applicable in making this distinction. These rulings state that dues paid to a charitable organization are a form of contribution to the extent that the amount paid exceeded the monetary value of the benefits and privileges accruing (but whether or not availed of) to the dues payer as an incident of membership.

Examples of such benefits and privileges include subscriptions to publications, newsletters (other than those which merely provide information as to the activities of the organization), free or reduced rate admissions to events sponsored by the organization or the use of its facilities, and discounts on articles or services available for purchase by both members and nonmembers. Other intangible benefits, such as the right to attend meetings, vote or hold office in the organization and the publicity or distinction arising from being a member of the organization, may be disregarded in determining the value of the benefits of membership.

In the case of membership organizations, other than those described in section 501(c)(3), there are generally benefits or consideration received in return for the payment of dues and therefore the dues are not contributions. This is particularly true with organizations described in section 501(c)(5), 501(c)(6) or 501(c)(7), although the benefits accruing to members may be somewhat indirect.

When a dues payment is made primarily to provide financial support for the activities of the recipient organization rather than for the payer to derive certain benefits having more than nominal monetary value, that dues payment represents a contribution. The fact that benefits whose aggregate value is more than a nominal amount are available to the dues payer evidences that that person's intent (and that of all members of the same class) in paying the dues was to receive those benefits and not to make a contribution.

3. *Interest.*—Enter the total interest income for the year including interest on certain governmental obligations that is not subject to tax in accordance with section 103 of the Code, but excluding amounts earned on program-related investments (reportable on line 9). Program-related investments are those made for the primary purpose of accomplishing an exempt purpose consistent with the investing organization's exempt status rather than for the production of income. All income from loans, the purpose of which is to accomplish an exempt purpose, should be reported on line 9. Following are examples of such loans: scholarship loans; low interest loans to charitable organizations, indigents, or victims of a disaster; loans to affiliated organizations; and loans by a credit union to its members. Loans to officers, directors and trustees do not fall within this category.

4. *Dividends.*—Enter the total dividend income for the year, excluding any capital gains dividends which should be reported on line 7. Dividends on stock that represents a program-related investment (see instruc-

tions for line 3 for definition) should be reported on line 4. Dividends on stock that represents a program-related investment should be reported on line 9.

5. *Net rental income.*—Enter the net rental income for the year. Net rental income is the excess of rental income over the deductions directly connected with the production of such income. Rental income includes amounts received for the use of property or equipment, including charges for services that are incidental to the use of the property or equipment. Deductions directly connected with the production of rental income include depreciation, interest, taxes, and maintenance and repairs. Net rental income should be reported on line 5 even if the organization is not engaged in the business of renting property or equipment.

6. *Net gain or loss from sale of assets.*—Enter the net gain or loss from the sale of assets. Net gain or loss is the excess of the sales price over the cost or other basis of the assets sold. Cost or other basis includes the expenses of sale. Net gain or loss should be reported on line 6 even if the organization is not engaged in the business of selling property or equipment.

7. *Gross profit or loss from sales of inventory.*—Enter the gross profit or loss from sales of inventory. Gross profit or loss is the excess of the sales price over the cost of the inventory sold. Cost includes the expenses of sale. Gross profit or loss should be reported on line 7 even if the organization is not engaged in the business of selling inventory.

8. *Special events and activities.*—Enter the gross income from special events and activities. Special events and activities are those conducted by the organization to raise funds that are not ordinarily received by the organization as contributions, gifts, grants, or bequests. Gross income is the total amount received from special events and activities before any deductions. Special events and activities include, but are not limited to, dinners, door-to-door sales of merchandise, raffles, carnivals, bingo games, and dances. Gross income from special events and activities should be reported on line 8 even if the organization is not engaged in the business of conducting special events and activities.

9. *Other revenue.*—Enter the total of other revenue not reported on lines 1 through 8. Other revenue includes income from activities that are not substantially related to the organization's exempt purpose. Examples of other revenue are: income from the sale of assets other than inventory; income from the sale of inventory; income from special events and activities; income from the sale of publications; royalties; and income from the production of rental property. Other revenue does not include contributions, gifts, grants, or bequests received from the public or from affiliated organizations.

10. *Total revenue.*—Enter the total of lines 1 through 9.

11. *Fundraising.*—In the Total columns,

8(c) and 9 of Part I, all of the expenses paid or incurred by the organization (including those of affiliates) for the production of income, the management of property held for the production of income, and fundraising activities. Fundraising activities include, but are not limited to, the cost of printing and distributing fundraising solicitations, the cost of conducting special events and activities, and the cost of maintaining mailing lists for fundraising solicitations. Fundraising activities also include the salaries of and other compensation paid to or expenses paid or incurred for officers, directors, trustees, members of boards of governors or boards of directors, and employees of the organization who devote time to activities connected with raising funds. Fundraising activities do not include expenses paid or incurred for the conduct of activities undertaken primarily to accomplish the exempt purposes of the organization, even though income may be received from such activities.

Fundraising expenses also include the cost of any activity undertaken with the purpose of soliciting contributions, gifts, grants, or bequests, if, as part of the activity, there is any advertising which indicates that any person making contributions, gifts, grants, or bequests will be relieved from paying all or a part of the fair market value of goods, facilities, services, or anything else of value furnished by the organization in connection with the activity. Fundraising expenses also include the cost of any activity undertaken with the purpose of inducing persons to purchase goods, services, or facilities, if, as part of the activity, there is any advertising which indicates that any person purchasing goods, services, or facilities will contribute all or a part of the purchase price to the organization.

Fundraising expenses do not include the cost of preparing and distributing routine publications, such as newsletters, magazines, or annual reports, which include information concerning fundraising activities, unless the principal purpose of the publication is fundraising.

Fundraising expenses do not include the cost of any activity undertaken with the purpose of obtaining grants from foundations or governmental agencies.

12. *Payroll taxes.*—Enter the amount of Federal, State, and local payroll taxes for the year, but only those taxes that are imposed on the employer. Payroll taxes withheld from employees' wages should not be reported on this line.

V 43/211/0C31/78

tions for line 3 for definition) should be reported on line 9.

5(a). *Gross rents.*—Enter the gross amount of rental income for the year from investment property. Do not include amounts that represent income from an exempt function (program service) which should be reported on line 9 (and the related expenses of which should be reported in column (C) of Part II). For example, an organization whose exempt purpose is to provide low-rental housing to persons with low income would derive exempt function income from such rentals. Renting office space or other facilities or equipment to unaffiliated exempt organizations does not give rise to income from an exempt function (and, therefore, should be reported on line 5(a)) unless the charge is materially below the fair rental value of the property, and the lesser's purpose in charging less than fair rental value was to assist the lessee in carrying out its exempt purposes. For purposes of completing Form 990 only, income derived from renting property to affiliated exempt organizations should be treated as exempt function income and reported on line 9.

5(b). *Rental expenses.*—Enter the total expenses paid or incurred that are attributable to the income reported on line 5(a). These expenses included depreciation if that expense is recorded on the organization's books of account.

5(c). *Net rental income.*—Enter the difference between lines 5(a) and 5(b). Any loss should be shown in parentheses.

6. *Royalties.*—Enter the total royalty income for the year from all sources.

7(a)-(c). *Capital gains.*—Attach a schedule showing with respect to each asset (whether or not depreciable) sold or exchanged: (a) date acquired, manner of acquisition, date sold, and to whom sold; (b) gross sales price; (c) cost, other basis, or value at time of acquisition if donated (state which); (d) expense of sale and cost of improvements subsequent to acquisition; and (e) if depreciable property, depreciation since acquisition.

Publicly traded securities.—In the case of sales of publicly traded securities through a broker, an organization may aggregate the gross sales price, the cost or other basis, and the expense of sale on all securities sold and report lump sum figures in lieu of the detailed reporting required in the above paragraph.

For purposes of this return, publicly traded securities include common and preferred stocks, bonds (including governmental obligations) and mutual fund shares which are listed and regularly traded in an over-the-counter market or on an established exchange and for which market quotations are published or otherwise readily available.

An exempt organization may use average cost basis in reporting gain or less from sales of securities, porvided such averaging is confined to sales reported for informational purposes only. For this purpose, when securities are sold, gain or loss may be computed by comparing the sales price with the average cost basis of the particular security.

The gross sale price should be entered on line 7(a) of Part I, the cost or other basis, expenses, etc. (less depreciation if applicable), should be aggregated and entered on line 7(b), and the net gain or loss entered on line 7(c). Capital gains dividends, the organization's share of capital gains and losses from a partnership, and capital gains distributions from trusts should be reported on lines 7(a) and 7(c) and the source indicated on the schedule described above.

8(a) through 8(d). *Gross profit on sales of inventory.*—On the appropriate line provided, enter the amount of gross sales, returns and allowances, cost of goods sold, and gross profit (or loss) from the sale of inventory items. These are items either produced by the organization itself for sales to others or purchased by the organization for resale. The latter does not include investments on which the organization anticipated deriving a profit through appreciation and subsequent sale. (Such sales should be reported on line 7.) Sales revenue and the related cost of goods sold should be reported on line 8 whether the sale of the merchandise involved constitutes an exempt function of the organization, unrelated trade or business, or a special fundraising event or activity.

9. *Other revenue.*—The amount of income from all sources not covered by lines 1 through 8 should be entered on lines 9(a) through 9(d). The nature of the income items should be stated in the spaces provided.

Reporting income from special fundraising events and activities.—Income from fundraising events and activities involving the sale of merchandise should be reported on line 8. Income from all other special fundraising events and activities such as dances, carnivals, bingo games, etc.—BUT NOT RECEIPTS REPRESENTING CONTRIBUTIONS—should be reported on line 9. In themselves, these fundraising activities do not accomplish an exempt purpose other than incidently. Their sole or primary purpose is to raise funds to finance the exempt activities of the organization.

For the above types of special fundraising events and activities that are reportable on line 9, report the net income from each such event or activity in the Total column of lines 9(a)-(d). A description of the event or activity generating the receipts, the amount received, and the total expenses incurred should be entered on the line to the left of the Total column or on an attached schedule. For example, a line entry might be "Dance receipts, $2,400; less expenses, $850" and the net income of $1,550 would be entered in the Total column.

For each special fundraising event or activity, attach a schedule reflecting the expenses incurred. Do not report these expenses in column (B) of Part II.

10. *Total revenue.*—Enter the total of lines 1 through 9.

Lines 11 through 14—Expenses

The completed schedule of expenses in Part II provides the information needed to complete the Total column of lines 11 through 14. In completing Part II, it is necessary to add together expenses of the same object classification (salaries, travel and entertainment, occupancy, etc.) to reflect the functional activity (fundraising, program services, or management and general) in connection with which they were paid or incurred, without regard to whether the expenses was financed out of restricted or unrestricted funds. In completing lines 11-14 of the Restricted and Unrestricted columns, it is necessary to resegragate these amounts to reflect the utilization of funds subject to externally imposed restrictions and those free of such restrictions.

11. *Fundraising.*—In the Total columns, enter the amount from column (B) of line 38.

12. *Program services.*—In the Total column, enter the amount from column (C) of line 38.

13. *Management and general.*—In the Total column, enter the amount from column (D) of line 38.

14. *Total expenses.*—In the Total column, enter the amount from column (A) of line 38.

Lines 15 through 18—Fund Balances

15. *Excess (deficit) for the year.*—Enter the difference between line 10 and line 14. If line 14 is greater than line 10, enter the deficit in parentheses.

16. *Fund balances or net worth, beginning of year.*—Enter the amount from column (A) of line 61.

17. *Other changes in fund balances or net worth.*—Attach a schedule explaining any changes in fund balances or net worth between the beginning and end of the year that are not accounted for by the excess or deficit on line 15. Transfers between restricted and unrestricted funds should be reflected in the Restricted and Unrestricted columns (by organizations that elect to complete those columns), but the net effect of such transfers would be -0- in the Total column.

18. *Fund balances or net worth, end of year.*—Enter the total of lines 15, 16, and 17. The figure in the Total column should equal the amount reported in column (B) of line 61.

PART II.—ALLOCATION OF EXPENSES BY FUNCTION

Part II reflects the organization's expenses by object classification (e.g., salaries, printing and postage, supplies) allocated into the three functional areas of fundraising (column (B)), program services (column (C)), and management and general (column (D)). These functional areas are explained below. Any expense item required to be reported on line 5(b), 7(b), 8(c) or 9 in Part I should not also be reported in Part II.

Organizations should follow their normal method of accounting in reporting their total expenses paid or incurred in column (A). If the filer's accounting system does not segregate expenses into categories that are readily compatible with columns (B), (C) and (D), any reasonable method may be used to allocate expenses among the three categories. Figures should be reasonably accurate if precise figures cannot be determined.

Expenses attributable solely to a specific function should be reported in the column appropriate for that function. Expenses such as officers' salaries that are attributable to several functions should be reflected as an expense of the separate functions on the basis of the time devoted by each of the officers. Some shared expenses such as occupancy, supplies, and depreciation of furniture and fixtures must be allocated among columns (B), (C) and (D) using an appropriate basis for each type of cost while other shared expenses should be reported in column (D) only. The instructions for the individual columns discuss this further.

Column (A). *Total.*—Column (A) is the total of columns (B), (C) and (D) for each line item in Part II. With the exception of those expenses reported on lines 5(b), 7(b), 8(c) and 9 of Part I, all of the expenses paid or incurred by the organization (including contributions awarded and depreciation expense, if any) should be reported in column (A).

Column (B). *Fundraising.*—Fundraising expenses include the total costs of soliciting (restricted and unrestricted) contributions, gifts, grants, etc. Both direct and indirect expenses, including allocable amounts of overhead and other shared costs, should be reported in column (B). Expenses incurred in connection with special fundraising events and activities such as dances, raffles, bingo games, carnivals, etc. should not be reported in this column or anywhere else in Part II. Such expenses should be reported on line 8 of Part I if the sale of merchandise is involved or on line 9 in all other circumstances. See the instructions for line 9 for additional discussion of the reporting of income and expenses from special fundraising events and activities.

Column (C) *Program services.*—Program services are those activities conducted by the organization that form the basis of the organization's qualification for exemption from tax as an organization described in section 501(c). When reporting these expenses, it does not matter whether these activities are self-funded (in whole or in part) or funded entirely out of contributions, investment income, accumulated income or any other source.

When an organization receives a grant requiring it to conduct research, produce a work product or perform a service either to meet the specific needs of the grantee or for the direct benefit of the public, the costs incurred represent program service expenses. These costs should not be treated as fund raising expenses even if the grant is reported as a contribution on line 1.

Column (D). *Management and general.*—This column is to be used to report those expenses which relate to the overall management and functioning of the organization rather than the direct supervision or conduct of fundraising activities or program services. Specific types of expenses that should be reported here include those attributable to meetings of the board of directors or similar group, committee and staff meetings, general legal services, accounting, personnel and other centralized functions, auditing, investment expenses other than those relating to rental income (line 5(b)), general liability insurance, preparation, publication and distribution of an annual report and office management. However, this is true only regarding expenses of a general nature and not expenses incurred in connection with a special meeting or other activity dealing with fund raising or specific program services.

Salaries of officers and their staffs and related expenses should be allocated to program services and fund raising on the basis of the officers' time devoted to those functions. Only the remainder should be reported as management and general expenses.

19. *Contributions, gifts, grants, and similar amounts awarded.*—Attach a schedule to support contributions, gifts, grants, scholarships, etc., showing: (a) each class of activity; (b) separate total for each activity; (c) name and address of donee and amount of distribution to donee; and (d) relationship of donee; if related by blood, marriage, adoption, or employment (including children of employees) to any person or corporation having an interest in the organization such as creator, donor, director, trustee, officer, etc. Activities should be classified according to purpose in greater detail than merely charitable, educational, religious, or scientific. For example, payments for nursing service, or laboratory construction, for fellowships, or for assistance to indigent families should be so identified. In case of payments for assistance to indigent families, the identity of the individual donees need not be reported on the attached schedule.

Although the actual distribution of cash, securities or other property is to be entered on line 19, column (C) the expenses in connection with the distributions are not to be included on that line, but should be entered on lines 21 through 37 of column (C).

Where the fair market value of the property at the time of disbursement is the measure of a contribution, the schedule must also show: (a) description of the contributed property; (b) book value of the contributed property; (c) the method used to determine the book value; and (d) the date of the gift. In such case the difference between fair market value and book value should be reflected in the books of account.

20. *Benefits disbursed to or for members.*—Organizations furnishing benefits to members or dependents (such as those organizations exempt under section 501(c)(8), 501(c)(9) or 501(c)(17)) attach a schedule showing amount of: (a) death, sickness, hospitalization, or disability benefits, (b) unemployment compensation benefits, and (c) other benefits (state nature). Do not report on this line the cost of benefits furnished officers and employees of the organization.

21. *Compensation of officers, directors, and trustees.*—Enter the aggregate amount of compensation of officers, directors, and trustees for the taxable year. The name, compensation, and other information relating to each officer, director, and trustee must be listed in Part III.

The organization's officers, directors, trustees, etc., should include in their income all payments and allowances made to them or on their behalf, unless the payments are specifically excluded by some provision of the Code. For more detailed information regarding the types of income to be reported here, please see Publication 525, Taxable Income and Nontaxable Income.

All organizations, except for certain ones exempt under section 501(c)(3), that pay salaries, wages, or other compensation to officers or other employees are generally liable for filing Forms 941 and 940 to report social security, withholding, and Federal unemployment taxes. Your exemption letter will state whether or not your organization is subject to these taxes.

22. *Other salaries and wages.*—Enter the aggregate salaries of all employees not reported on line 21.

23. *Pension plan contributions.*—Enter the employer's share of contributions to qualified and nonqualified pension plans for the year. Complete Form 5500 for your plan and file as a separate return. If you have more than one plan, complete a Form 5500 for each plan. File this form on or before the last day of the 7th month following the close of the plan year.

24. *Other employee benefits.*—Enter the amount of your contributions to employee benefit programs (e.g., insurance, health and welfare programs) that are not an incidental part of a pension plan included on line 23. Also, see instructions for Form 5500.

25. *Payroll taxes.*—Enter the amount of Federal, State, and local payroll taxes for the year, but only those taxes that are imposed on the employer. This would include the employer's share of FICA taxes, the FUTA tax, State unemployment compensation taxes, and other State and local payroll taxes. Do not include taxes (such as Federal and State income taxes and the employee's share of FICA tax) withheld from employees' salaries and paid over to the various governmental units.

26. *Fees for fundraising.*—Enter the amount paid or incurred as fees to outside fundraisers in connection with solicitation campaigns conducted by them and the receipts from which are reported on line 1(b). (See the instructions for line 1(b).) Also include fees paid or due to fundraisers for services such as providing consulting services in connection with a solicitation campaign conducted by the organization itself.

27. *Other professional services.*—Enter the total expense for the year for professional services including legal, accounting, investment advice, medical and other professional services not reported on line 26. Do not include amounts paid to employees of your organization.

28. *Interest.*—Enter the total interest expense for the year. Do not include any interest expense attributable to rental property which is reportable on line 5(b).

29. *Occupancy.*—Enter the aggregate amount paid of incurred for the use of office space or other facilities, heat, light, power, and other utilities other than that reported on line 32, outside janitorial services, and similar expenses.

30. *Rental and maintenance of equipment.*—Enter the total expense of renting and maintaining equipment other than automotive equipment. Include the latter on line 35 (other expenses) along with all other automobile operating costs.

31. *Printing and postage.*—Enter the total printing and postage costs for the year from all activities.

32. *Telephone.*—Enter the total telephone expense for the year. Telegram expenses may be included on this line or listed separately on line 35.

33. *Supplies.*—Enter the total cost of office, classroom, medical, and other supplies utilized during the year as determined under the organization's normal method of accounting for supplies.

34. *Travel and entertainment.*—Enter the total of all travel expenses (other than automobile operating costs reportable on line 35) and all entertainment costs for the year.

35. *Other expenses.*—Enter the total of all other expenses and attach a schedule reflecting the type and amount of each.

36. *Total expenses before depreciation.*—Enter the total of lines 19 through 35.

37. *Depreciation, depletion, etc.*—If your organization follows the accounting practice of recording depreciation, depletion, and similar expenses, enter the total of such expenses for the year. Include any depreciation (amortization) of leasehold improvements. If you do record depreciation, attach a schedule (or use Form 4562, Depreciation) showing: (a) description of property; (b) date acquired; (c) cost or other basis (exclude land); (d) depreciation allowed or allowable in prior years (e) method of computation; (f) rate (%) or life (years); and (g) depreciation this year (total additional first-year depreciation claimed must be shown on

a separate line of the depreciation schedule).

of such items in Part I or II of this return. (See instructions for line 1.) However, some

Public Law 94-568 provides, in part, that an organization described in section 501(c)

dents and therefore are not qualified for tax exemption under section

V 4 3 / 2 1 1 0 C 3 1 7 8

a separate line of the depreciation schedule).

Attach Form T if a deduction is claimed for depletion of timber.

38. *Total.*—Enter the total of lines 36 and 37. The figures entered in columns (A), (B), (C), and (D) should be reported on lines 14, 11, 12, and 13, respectively, of the Total column in Part I.

PART III.—LIST OF OFFICERS, DIRECTORS AND TRUSTEES

Enter the amount of compensation and other payments made by the organization during its annual accounting period (or during the calendar year ending within such period) to the officers, directors, and trustees (or any person having responsibilities or powers similar to those of officers, directors, or trustees) of the organization.

Column (E). *Expense account and other allowances.*—Enter only those amounts that are includable in the gross income of the recipients (i.e., reportable on their separate income tax returns) because no accounting was provided the organization, because allowances or reimbursements exceeded the expenses incurred by the payee in rendering services to the organization, or for any other reason.

PART IV.—BALANCE SHEETS

The balance sheets should agree with the books of account or any differences should be reconciled.

Lines 57 through 61—Fund Balances and Net Worth Section

Fund Accounting

Organizations that use fund accounting should check the block in the left column and complete lines 57 through 61 using the line item captions in that column. Fund accounting is a procedure under which an organization segregates its assets, liabilities, and net worth into separate funds according to externally imposed restrictions on the use of certain assets, similar designations by the organization's governing board, and other amounts that are unrestricted as to use. Each fund is like a separate entity in that it has a self-balancing set of accounts reflecting assets, liabilities, equity (fund balance), "income", and expenses. Since these funds are actually components of a single entity, they are all included in that organization's own financial statements. Similar accounts in the various funds may or may not be consolidated in those statements according to the organization's preference and practice. Parts I, II, and IV of this form, however, require such consolidation. Recognition of the separate funds and the net changes within the various funds during the year is accomplished by the fund balances section (lines 57 through 61) of the balance sheet.

57(a). *Current funds, unrestricted.*—Enter the fund balance per books for the current unrestricted fund.

57(b). *Current funds, restricted.*—Enter the aggregate fund balances per books for all current restricted funds.

58. *Land, buildings and equipment fund.*—Enter the fund balance per books for the land, buildings and equipment fund (plant fund).

59. *Endowment and similar funds.*—Enter the aggregate fund balances per books for the (permanent) endowment fund, term endowment funds, and funds functioning as endowment (funds designated by the board to be retained and invested, with the income to be used for either general or specified purposes). The fund balances of the annuity and life income funds may be reported here if immaterial in amount or on line 60.

60. *Other funds.*—Enter the aggregate fund balances per books for all funds not reported on lines 57 through 59.

61. *Total fund balances.*—Enter the total of lines 57 through 60. The beginning of the year figure in column (A) should be carried over to the Total column in Part I at line 16. The end of year figure in column (B) should agree with the figure on line 18 of the Total column in Part I.

62. *Total liabilities and fund balances.*—Enter the total of lines 56 and 61. That total must equal the figure for total assests reported on line 51 for both the beginning and end of year.

All Others

All organizations that do not use fund accounting should check the block in the right column and report their net worth on lines 58 through 61.

58. *Capital stock or trust principal.*—For corporations, enter the balance per books in the capital stock accounts representing the par or stated value (or total amount received upon issuance in the case of stock with no par or stated value) of all classes of stock issued and, as yet, uncancelled. For trusts, enter the amount in the trust principal or corpus account.

59. *Paid-in or capital surplus.*—Enter the balance per books for all paid-in capital in excess of par or stated value for all stock issued and, as yet, uncancelled. Also, organizations that record them in such manner should include any paid-in capital representing donations from both stockholders and others. (Note: This does not apply to section 501(c)(3) organizations and most of the other organizations that file this form.) Any current year donations that would be included in the line 59 total must also be reported on line 1 of Part I.

60. *Retained earnings or accumulated income.*—For corporations, enter the balance in the retained earnings or similar account, less the cost of any treasury stock held by the corporation. For trusts, enter the balance per books in the accumulated income or similar account.

61. *Total net worth.*—Enter the total of lines 58 through 60. The beginning of the year figure in column (A) should be carried over to the Total column in Part I at line 16. The end of year figure in column (B) should agree with the figure on line 18 of the Total column in Part I.

62. *Total liabilities and net worth.*—Enter the total of lines 56 and 61. That total must equal the figure for total assets reported on line 51 for both the beginning and end of year.

PART V.—STATEMENTS REGARDING CERTAIN ACTIVITIES

63. *Description of activities.*—Provide a brief activities of the various exempt purpose activities you engaged in during the period covered by this return. Generally, these will include those program services, the expenses of which are reported in column (C) of Part II. See the instructions for column (C).

64. *Change in activities.*—Attach a statement explaining any significant changes in the nature of type of activities that you conduct in furtherance of your exempt purpose. These new or modified activities would be those not specified as being conducted currently or planned in your application for recognition of exemption or those not previously made known to the Internal Revenue Service by means of a letter to your key district director or by an attachment to your return for any prior year. Besides the commencement of new activities or the modification of existing ones, any major program activities that are being terminated should also be disclosed.

65. *Changes in organizing or governing documents.*—Attach a copy of any changes to your articles of incorporation, constitution, trust instrument or other organizing document or your bylaws or other governing document. When a significant number of changes are made, a copy of the entire organizing instrument or governing document, as revised, should also be provided.

66. *Unrelated business income.*—See general instruction N for a discussion of unrelated business income and the Form 990-T filing requirements for section 501(c) organizations having such income. All items of income and expense reported on Form 990-T must also be reported on Form 990 when the organization is required to file both forms.

67. *Liquidation, dissolution, termination, or substantial contraction.*—See general instruction R for definitions and instructions regarding the information required to be furnished in the event of a liquidation, dissolution, termination, or substantial contraction.

68. *Relation to other organizations.*—Answer this question "Yes" if a majority of the organization's governing body, officers, trustees or membership consists of individuals who are also officers, directors, trustees or members of any one other organization.

A strictly coincidental overlap of membership with another organization, i.e., where membership or affiliation with one organization is not a condition of membership in the other, should be disregarded.

Affiliation with any statewide or nationwide organization also should be disregarded.

69. *Expenditures for political purposes.*—An "expenditure for political purposes" is any expenditure intended to influence the selection, nomination, election, or appointment of any individual to any Federal, State, or local public office or office in a political organization, or the election of Presidential or Vice Presidential electors, whether or not such individual or electors are selected, nominated, elected or appointed.

An expenditure includes a payment, distribution, loan, advance, deposit, or gift, of money, or anything of value, and includes a contract, promise, or agreement to make an expenditure, whether or not legally enforceable.

Section 501(c) organizations are required to file Form 1120-POL if the amount of their expenditures for political purposes and their net investment income each exceed $100 for the year.

Section 501(c) organizations that maintain separate segregated funds described in section 527(f)(3) should refer to the instructions for Form 1120-POL for filing requirements.

70. *Donated services or facilities.*—Organizations that receive donated services or the use of facilities or equipment at less than fair rental value should not report the value of such items in Part I or II of this return. (See instructions for line 1.) However, some organizations may want this information to be reflected on the return since, as discussed in instruction L, Form 990 is available for public inspection.

Organizations that maintain records indicating the amount and aggregate value of the donated services or use of assets may enter that information in the space provided on line 70. (The IRS does not require the maintenance of such records or the reporting of this information.) Also, estimates may be furnished where there is a clearly objective basis for measuring the value of donated services or facilities.

71. *Section 501(c)(5) or (6) organizations.*—Attempts to influence the opinion of the general public, or any segment of the general public, with respect to legislative matters or referendums consititute grassroots lobbying. Such lobbying may be explicit in the case of an advertisement which urges or encourages the public to contract members of a legislative body for the purpose of proposing, supporting, or opposing specific legislation. Grassroots lobbying may also be implicit in any advertisement or other communication directed at the public if the intent of the communication is to mold the public's opinion on a particular legislative matter or referendum. Any lobbying directed at the members of the organization is directed at "potential" members, employees of members, or stockholders of members would be. See section 1.162-20(c) of the income Tax Regulations for further discussion of grassroots lobbying.

72. *Clubs exempt under section 501(c)(7).*—A 501(c)(7) organization is permitted to receive up to 35 percent of its gross receipts, including investment income, from sources outside of its membership without losing its tax-exempt status. Of the 35 percent, not more than 15 percent of the gross receipts should be derived from the use of a social club's facilities or services by the general public.

Gross receipts are defined for this purpose as those receipts from normal and usual activities of the club (that is, those activities it has traditionally conducted) including charges, admissions, membership fees, dues, assessments, investment income (such as dividends, rents, and similar receipts), and normal recurring capital gains on investments, but excluding initiation fees and capital contributions. However, where a club receives unusual amounts of income, such as from the sale of its clubhouse or similar facility, that income is not to be included in the formula: that is, such unusual income is not to be included in either the gross receipts of the club or in the permitted 35- or 15-percent allowances. On the other hand where college fraternities or sororities charge membership initiation fees, but no annual dues, such fees will be included in their gross receipts, notwithstanding that initiation fees are ordinarily excluded.

If an organization has outside income in excess of the 35-percent limit (or 15 percent in the case of gross receipts derived from nonmember use of a club's facilities), all the facts and circumstances are to be taken into account in determining whether the organization qualifies for exempt status.

If the application of the above rules does not affect the club's exempt status, the amount of income shown on line 72(b) must be reported on Form 990-T.

Public Law 94-568 provides, in part, that an organization described in section 501(c)(7) is not exempt from income tax for any taxable year beginning after October 20, 1976, if, at any time during such a taxable year, its governing instrument, operating procedures or any written policy statement provides for discrimination against any person on the basis of race, color or religion.

73. *Section 501(c)(12) organizations.*—For purposes of section 501(c)(12, the term "gross income" means gross receipts less cost of goods sold.

74. *Public interest law firms.*—Public interest law firms exempt under section 501(c)(3) or 501(c)(4) must attach a statement that sets forth the cases in litigation, or that have been litigated during the year. With respect to each such case, the statement must include a description of the matter in dispute and an explanation as to how the litigation will benefit the public generally. See Rev. Proc. 71-39, 1971-2 C.B. 575. The firms must also attach a report of all fees sought and recovered. See Rev. Proc. 75-13, 1975-1 C.B. 662, for procedures for the acceptance of attorneys' fees.

PRIVATE TAX—EXEMPT SCHOOLS

Public Comments on Proposed Revenue Procedure

AGENCY: Internal Revenue Service, Treasury.

ACTION: Extension of time for comments.

SUMMARY: This document provides notice of an extension of time for submitting comments with respect to a proposed revenue procedure on private schools, and a December 5, 1978, public hearing on the proposed procedure.

DATES: Written comments by persons who wish to speak at the December 5, 1978 hearing, must be submitted by October 31, 1978. Outlines of oral comments by persons who wish to speak at the hearing must be submitted by November 20, 1978. Written comments by persons who do not wish to speak at the hearing must be submitted by December 5, 1978.

ADDRESS: Send comments and outlines to: Commissioner of Internal Revenue, Attn: E:EO, Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT:

James E. Griffith, of the Exempt Organizations Division, Internal Revenue Service, Washington, D.C. 20224, 202-566-6181.

SUPPLEMENTARY INFORMATION: A proposed revenue procedure that sets forth guidelines the Internal Revenue Service will apply in determining whether certain private schools have racially discrimatory policies as to students and therefore are not qualified for tax exemption under section 501(c)(3) of the Internal Revenue Code of 1954 was announced on August 21, 1978, in a news release (IR-2027), and also appeared in the FEDERAL REGISTER for Tuesday, August 22, 1978, at page 37296 (43 FR 37296). A public hearing on the proposed revenue procedure to be held December 5, 1978, was announced on October 13, 1978, in a news release (IR-2043), and also appeared in the FEDERAL REGISTER for Wednesday, October 18, 1978, at page 48091 (43 FR 48091). The proposed revenue procedure and the notice of public hearings stated that comments were to be delivered or mailed by October 23, 1978. For persons who wish to speak at the December 5, 1978 hearing, the date by which their comments must be delivered or mailed is hereby extended to October 31, 1978. For persons who do not wish to speak at the hearing, the date by which their comments must be submitted is hereby extended to December 5, 1978.

This document does not meet the criteria for significant regulations set forth in paragraph 8 of the proposed Treasury Directive appearing in the FEDERAL REGISTER for Wednesday, May 24, 1978.

W. E. WILLIAMS,
Acting Commissioner of Internal Revenue.

DEPARTMENT OF THE TREASURY

Office of the Secretary

TITANIUM DIOXIDE FROM BELGIUM, FRANCE, THE FEDERAL REPUBLIC OF GERMANY, AND THE UNITED KINGDOM

Antidumping Proceeding

AGENCY: U.S. Treasury Department.

ACTION: Initiation of Antidumping Investigation.

SUMMARY: This notice is to advise the public that a petition in proper form has been received and an antidumping investigation is being initiated for the purpose of determining whether imports of titanium dioxide from Belgium, France, West Germany, and the United Kingdom are being, or are likely to be, sold at less than fair value within the meaning of the Antidumping Act of 1921, as amended. There is substantial doubt that imports of the subject merchandise, allegedly at less than fair value, are causing, or are likely to cause, injury to an industry in the United States. Therefore, the case is being referred to the U.S. International Trade Com-

mission for a determination on the injury question.

industry's profit margins have eroded in the last 2 years, annual price in-

attempt will be made to publish notices of cancellation of hearings as

mission for a determination on the injury question.

EFFECTIVE DATE: October 31, 1978.

FOR FURTHER INFORMATION CONTACT:

Mary S. Clapp, Duty Assessment Division, U.S. Customs Service, Constitution Avenue NW., Washington, D.C. 20229, telephone 202-566-5492.

SUPPLEMENTARY INFORMATION: On September 18, 1978, a petition in proper form was received pursuant to sections 153.26 and 153.27, Customs Regulations (19 CFR 153.26, 153.27), from counsel on behalf of SCM Corporation, New York, N.Y., alleging that titanium dioxide from Belgium, France, West Germany, and the United Kingdom is being, or is likely to be, sold at less than fair value within the meaning of the Antidumping Act of 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as the "Act").

Titanium dioxide, TiO_2, is the primary white pigment consumed in the paint and coatings, paper and paper bond, and plastics industries. It is classifiable under item 473.70 of the Tariff Schedules of the United States.

It appears that foreign producers and some purchasers in the United States are related within the meaning of the Act and, therefore, it will be necessary to establish the exporter's sales price of the merchandise in the U.S. market.

Based upon the information set forth in the petition and that derived from the Customs Service's summary investigation, it appears that the margins of dumping may range from as low as 5 percent to as much as 37 percent depending on the source of the imports.

There is evidence on record concerning injury, or likelihood of injury, to the U.S. industry from the alleged less than fair value imports of titanium dioxide from Belgium, France, West Germany, and the United Kingdom. The petition indicates that the alleged less than fair value imports represent an increasing share of the U.S. market, having expanded from 4.1 percent of the U.S. market in 1973 to 10.2 percent in 1977. Although year-end stocks of titanium dioxide have grown continuously since 1973, preliminary reports show a small decline in 1977.

The petition also indicates that domestic production of titanium dioxide dropped 4 to 5 percent in 1977. However, the volume of overall domestic shipments and consumption has been rising. In addition, the capacity utilization of the domestic industry apparently has stablized with a substantial expansion of production capacity likely in the near future. Finally, although the petitioner has submitted information to demonstrate that the industry's profit margins have eroded in the last 2 years, annual price increases have occurred with the most recent increase made effective in June 1978. More importantly, if price supression does, in fact, exist, it may be a result of competition among domestic producers rather than a result of sales by foreign manufacturers at less than fair value.

On the basis of such evidence, it has been concluded that there is substantial doubt of injury or likelihood of injury to an industry in the United States by virtue of such imports from Belgium, France, West Germany, and the United Kingdom. Accordingly, the U.S. International Trade Commission is being advised of such doubt pursuant to section 201(c)(2) of the act (19 U.S.C. 160(c)(2)).

Having conducted a summary investigation as required by section 153.29 of the Customs Regulations (19 CFR 153.29), and having determined as a result thereof that there are grounds for so doing, the U.S. Customs Service is instituting an inquiry to verify the information submitted and to obtain the facts necessary to enable the Secretary of the Treasury to reach a determination as to the fact or likelihood of sales at less than fair value. Should the International Trade Commission, within 30 days of receipt of this referral, advise the Secretary that there is no reasonable indication that an industry in the United States is being, or is likely to be, injured by reason of the importation of such merchandise into the United States, this investigation will be terminated. Otherwise, the investigation will continue to conclusion.

This notice is published pursuant to section 153.30 of the Customs Regulations (19 CFR 153.30).

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

OCTOBER 25, 1978.

INTERSTATE COMMERCE COMMISSION

[Notice No. 734]

ASSIGNMENT OF HEARINGS

OCTOBER 26, 1978.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

No. MC-F-13608, Arkansas Best Freight System, Inc.—Control and Merger—Navajo Freight Lines, F.D. 28771, Arkansas Best Freight System, Inc. and F.D. 28772, Arkansas Best Freight, Inc., now assigned for Prehearing Conference on November 20, 1978, at Washington, DC is canceled.

No. MC 144285F, Bay Haven Marina, Inc., now assigned for hearing on November 15, 1978, at Chicago, IL is canceled.

No. MC 119988 (Sub-145F), Great western Trucking Co., Inc., now being assigned for hearing on December 11, 1978, (1 day), at Dallas, TX in a hearing room to be later designated.

No. MC 119777 (Sub-349F), Ligon Specialized Hauler, Inc., now being assigned for hearing on December 12, 1978, (2 days), at Dallas, TX in a hearing room to be later designated.

No. MC 134477 (Sub-228F), Schanno Transportation, Inc., now being assigned for hearing on January 23, 1979, (2 days), at Chicago, IL in a hearing room to be later designated.

No. MC 78228 (Sub-79F), J. Miller Express, Inc., now being assigned for hearing on January 25, 1979, (2 days), at Chicago, IL in a hearing room to be later designated.

No. MC 35358 (Sub-40F), Berger Transfer & Storage, Inc., now being assigned for hearing on January 30, 1979, (2 days), at Chicago, IL in a hearing room to be later designated.

No. MC 30032 (Sub-8F), Houdek Motor Service, Inc., now being assigned for hearing on February 1, 1979, (2 days), at Chicago, Il in a hearing room to be later designated.

No. MC 140829 (Sub-87F), Cargo Contract Carrier Corp., now being assigned for hearing on January 29, 1979, (1 day), at Chicago, IL in a hearing room to be later designated.

No. MC 144690 (Sub-1F), Cherry-Wink, Inc., now being assigned for hearing on December 14, 1978, (2 days), at Dallas, TX in a hearing room to be later designated.

No. MC 105045 (Sub-83F), R.L. Jeffries Trucking Co., Inc., now being assigned for hearing on December 18, 1978, (1 day), at Dallas, TX in a hearing room to be later designated.

No. MC 83835 (Sub-151F), Wales Transportation, Inc., now being assigned for hearing on December 19, 1978, (2 days), at Dallas, TX in a hearing room to be later designated.

No. MC 134906, Cape Air Freight, Inc. and No. MC 134906 (Sub-1, 2, 3, 4, 5, 6, and 7) Cape Air Freight, Inc. now assigned for continued hearing December 5, 1978 (9 days) at Louisville, KY in a hearing room to be later designated.

No. MC-F-13606, Crouse Cartage Co.—Purchase (Portion)—The Rock Island Motor Transit Co. and No. MC-F-13622, Paris Motor Freight, Inc.—Purchase (Portion)—Rock Island Motor Transit Co. and No. MC-F-13631 Witte Transportation Co.—Purchase (Portion)—The Rock Island Motor Transit Co. and No. MC-F-13649 Ideal Truck Lines, Inc.—Purchase (Portion)—The Rock Island Motor Freight Co., and No. MC-F-13657, Century-Mercury Motor Freight, Inc.—Purchase (Portion)—The Rock Island Motor Transit Co. and No. MC-F-13663 Murphy Motor Freight Lines, Inc.—Purchase (Portion)—The Rock Island Motor Transit Company and No. MC-F-13668F, Garrison Motor Freight, Inc.—Purchase (Portion)—The Rock Island Motor Transit Co. and No. MC-F-13670 Winters Truck Line, Inc.—Purchase (Portion)—Rock Island Motor Transit Co. and No. MC 57393 (Sub-7F), Winters Truck Line, Inc., and No. MC-F-13691F, Jerry Simpson d.b.a. Thornton Transfer—Purchase (Portion)—The Rock Island Motor Transit Co. now assigned for pre-hearing conference November 27, 1978 at Washington, DC and will be held at the Office of the Interstate Commerce Commission. No MC 118159 (Sub-277F) National Refrigerated Transport, Inc., now assigned December 12, 1978 (1 day) at Denver, CO, and will be held at Room C-503 U.S. Courthouse 1929 Stout Street.

No. MC 107295 (Sub-73), Pre-Fab Transit Co., now assigned for hearing on October 31, 1978, at Boston, MA is postponed indefinitely.

[No. MC-133689 (Sub-104)]

OVERLAND EXPRESS, INC.

Extension—Farmers Union Central Exchange, Inc. (New Brighton, MN); Decision

Decided: October 20, 1978.

We have considered the application and the record in this proceeding, including the decision of the Administrative Law Judge, the exceptions filed by applicant and protestant Hilt Truck Line, Inc., the reply to applicant's exceptions filed by protestant Hilt, and the reply to protestant Hilt's exceptions filed by applicant.

The Administrative Law Judge recommended the granting to applicant of a certificate authorizing the operation described in the appendix to this decision.

The pleadings raise no new or material matters of fact or law not adequately considered and properly disposed of by the Administrative Law Judge in his decision, and are not of such nature as to require the issuance of a decision discussing the evidence in the light of the pleadings.

We find: The evidence considered in the light of the pleadings does not warrant a result different from that reached by the Administrative Law Judge. The statement of facts, the conclusions, and the findings of the Administrative Law Judge are proper and correct in all material respects, and are affirmed.

It is ordered: The application is granted to the extent set forth in the appendix and subject to the republication condition imposed there. A certificate will be issued if applicant complies with the appropriate requirements set forth in Code of Federal Regulations (49 CFR 1043, 1044, and 1307). Applicant must comply within 90 days after the date of service of this decision. If it fails to comply, the grant of authority will be void.

This decision will become effective 30 days from the date of service.

By the Commission, Division 2, Commissioners Stafford, Gresham, and Christian.

H. G. HOMME, JR.,
Acting Secretary.

APPENDIX

Service authorized

Operation by applicant, in interstate or foreign commerce, as a common carrier by motor vehicle, over irregular routes, of hardware, hand agricultural implements, agricultural implement parts, chemicals, appliances, heaters, furnaces, motor vehicle parts and accessories, feed, and iron and steel articles, from points in IL, IN, MO, MI, NJ, NY, OH, PA, and SC, to points in IA, MN, NE, ND, SD, and WI, restricted (1) against the transportation of commodities which, because of their size or weight, require the use of special equipment, and (2) to traffic destined to the facilities of Farmers Union Central Exchange, Inc. (Cenex) or of its member cooperatives.

Conditions

(1) A notice of the authority granted in this decision will be published in the FEDERAL REGISTER and, at the expiration of 30 days, this decision shall become effective as the decision of the Commission, provided that in the interim no party in interest has filed a petition for leave to intervene in this proceeding.

(2) The grant of authority and any existing authority held by applicant that it duplicates shall be construed as conferring a single operating right.

Notice

By this decision, this proceeding is rendered administratively final within the meaning of 49 CFR 1101.2(f) of the Commission's regulations; and, in accordance with the provisions of section 558(c) of the Administrative Procedure Act, any corresponding temporary authority expires and operations thereunder must cease upon the effective date of this decision, except that to the extent permanent authority is granted in this proceeding (and if partial, only to that extent) the corresponding temporary authority or portion thereof will continue in effect until a certificate or permit is issued and becomes effective. The filing of any further pleadings in this matter will not stay the expiration of the temporary authority related to the denied portion of the sought permanent authority.

NOTE.—This decision does not constitute authority to operate.

[7035-01-M]

[Finance Docket No. 28884F]

RICHMOND RAILROAD CO.—ACQUISTION AND OPERATION—OVER DARDANELLE AND RUSSELLVILLE RAILROAD CO., IN POPE COUNTY, AR

Richmond Railroad Co., 1700 West Loop South, Houston, TX 77027, represented by Forrest R. Qualls, Rich-

mond Railroad Co., 1700 West Loop South, Houston, TX 77027, hereby specified action with respect to such application.

Wegznek, Melvin B. Werner, and David B. Wuehmann

[7035-01-M]

Commission's policy of simplifying grants of operating authority.

mediate points, and serving the junctions of (a) Interstate Hwy 10 and CA

V43/211 OC31 78

mond Railroad Co., 1700 West Loop South, Houston, TX 77027, hereby give notice that on the 18th day of October 1978, it filed with the Interstate Commerce Commission at Washington, DC, an application under section 1(18) of the Interstate Commerce Act for a decision approving and authorizing acquisition and operation of the entire system of the Dardanelle and Russellville Railroad Co., a wholly owned subsidiary of Applicant, which application is assigned Finance Docket No. 28884F.

Applicant has acquired all of the issued and outstanding stock of the Dardanelle and Russellville Railroad Co., (D&R), and proposed to merge the D&R into Applicant. Applicant will be the surviving corporation and will continue the operation of the railroad. The line is located entirely in Pope County, AR. The line has 5.22 miles of main line track and 1.27 miles of siding, a distance of 6.49 miles.

The operation of this line is necessary and desirable to provide common carrier rail service to industries along the line and in the area traversed by the line, and such other industries as may be reasonably expected to locate in the immediate area.

In the opinion of the applicant, the granting of the authority sought will not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969. In accordance with the Commission's regulations (49 C.F.R. 1108.8) in Ex Parte No. 55 (Sub-4), *Implementation—National Environmental Policy Act, 1969,* 352 I.C.C. 451 (1976), any protests may include a statement indicating the presence or absence of any effect of the requested Commission action on the quality of the human environment. If any such affect is alleged to be present, the statement shall indicate with specific data the exact nature and degree of the anticipated impact. See *Implementation—National Environmental Policy Act, 1969, supra* at p. 487.

Pursuant to the provisions of the Interstate Commerce Act, as amended, the proceeding will be handled without public hearings unless comments in support or opposition on such application are filed with the Secretary, Interstate Commerce Commission, 12th and Constitution Avenue, NW., Washington, DC 20424, and the aforementioned counsel for applicant, within 30 days after date of first publication in a newspaper of general circulation. Any interested person is entitled to recommend to the Commission that it approve, disapprove, or take any other specified action with respect to such application.

H. G. HOMME, Jr.,
Acting Secretary.

[7035-01-M]

[Section 5a Application No. 24; Amendment No.3]

SAN FRANCISCO MOVER TARIFF BUREAU

OCTOBER 23, 1978.

The Commission is in receipt of an application in the above proceeding for approval of amendments to the approved agreement.

Filed July 7, 1978 by: Ann M. Pougiales, Loughran & Hegarty, 100 Bush Street, 21st Floor, San Francisco, CA 94104.

The amendments involve: Complete revision of presently approved agreement and changes to make the by-laws comply with Ex Parte 297 Sub 4.

The complete application may be inspected at the Office of the Commission, in Washington, DC.

Any interested person desiring to protest and participate in this proceeding shall notify the Commission in writing within 30 days from the date of publication of this notice in the FEDERAL REGISTER. As provided by the General Rules of Practice of the Commission, persons other than applicants should fully disclose their interest, and the position they intend to take with respect to the application. Otherwise, the Commission, in its discretion, may proceed to investigate and determine the matters involved without public hearing.

H.G. HOMME, Jr.,
Acting Secretary.

[Decisions Vol. No. 20]

DECISION-NOTICE

Correction

In FR Doc. 78-23367 appearing on page 37301 in the issue of Tuesday, August 22, 1978, on page 37307, the first and second applications (MC 129788 (Sub-7F)) are duplicates; therefore, delete the second MC 129788 (Sub-7F) and insert the following application which was omitted from the original publication:

"MC 129788 (Sub-8F), filed July 7, 1978. Applicant: NASS TRUCK LINES, INC., A Delaware corporation, Box 'H', Wenona, IL 61377. Representative: E. Stephen Heisley, 805 McLachlen Bank Building, 666 11th Street NW., Washington, DC 20001. Authority granted to operate as a *common carrier,* by motor vehicle, over irregular routes, transporting: *Malt beverages,* from Detroit, MI, to Decatur, Springfield, Champaign, and Jacksonville, IL. (Hearing site: Chicago, IL, or Washington, DC.)"

[1505-01-M]

[Decisions Volume No. 17]

DECISION-NOTICE

Correction

On page 33861 in the issue of Tuesday, August 1, 1978, on page 33868, first column, in MC 138328 (Sub-70F), the next to the last line should read as follows: "* * * MS, MO, NM, OK, and TN. (Hearing [site: Omaha, NE.)].".

On page 33870, in the middle column, in MC 144852 F, from the 14th line to the end of that paragraph, the text should read, "* * * States (except AK and HI), (2) materials, equipment, and supplies used in manufacture of new furniture, from points in the United States (except AK and HI), to facilities of Sirco Manufacturing, at or near (a) Missoula, MT and (b) Stevens Point, WI, under a continuing contract(s) with Sirco Manufacturing, of Missoula, MT. (Hearing site: Missoula, MT.)."

The file line was inadvertently omitted at the end of the document on page 33871. The file line should read: [FR Doc. 78-21099 Filed 7-31-78; 8:45 am].

[7035-01-M]

[Decisions Volume No. 41]

DECISION-NOTICE

Decided: October 16, 1978

The following applications are governed by special rule 247 of the Commission's rules of practices (49 CFR § 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date notice of the application is published in the FEDERAL REGISTER. Failure to file a protest, within 30 days, will be considered as a waiver of opposition to the application. A protest under these rules should comply with rule 247(e)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (as specifically noted below), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. A protestant should include a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describe in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named. If the protest includes a request for oral hearing, such request shall meet the requirements of section 247(e)(4) of the special rules and shall include the certification required in that section.

Section 247(f) provides, in part, that an applicant which does not intend timely to prosecute its application shall promptly request that it be dismissed, and that failure to prosecute an application under the procedures of the Commission will result in its dismissal.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. Broadening amendments will not be accepted after the date of this publication.

Any authority granted may reflect administratively acceptable restrictive amendments to the service proposed below. Some of the applications may have beem modified to conform to the Commission's policy of simplifying grants of operating authority.

We find: With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each common carrier applicant has demonstrated that its proposed service is required by the public convenience and necessity, and that each contract carrier applicant qualifies as a contract carrier and its proposed contract carrier service will be consistent with the public interest and the national transportation policy. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of the Interstate Commerce Act and the Commission's regulations. This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

It is ordered: In the absence of legally sufficient protests, filed within 30 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extend that the authority sought below may duplicate an applicant's existing authority, such duplication shall not be construed as conferring more than a single operating right.

By the Commission, review board number 2, members Eaton, and Liberman, board member Boyle not participating.

H. G. HOMME, Jr.,
Acting Secretary.

MC 730 (Sub-417F), filed August 30, 1978. Applicant: PACIFIC INTERMOUNTAIN EXPRESS CO., a Nevada corporation, 25 North Via Monte, P.O. Box 8004, Walnut Creek, CA 94598. Representative: A. G. Krebs (same as applicant). To operate as a *common carrier,* by motor vehicle, transporting: *General commodities* (except articles of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) between Beaumont, CA, and Pratt, KS, from Beaumont, CA, over Interstate Hwy 10 to junction U.S. Hwy 80, then over U.S. Hwy 80 to junction U.S. Hwy 60, then over U.S. Hwy 60 to junction Interstate Hwy 25, then over Interstate Hwy 25 to junction U.S. Hwy 60, then over U.S. Hwy 60 to junction U.S. Hwy 281, then over U.S. Hwy 281 to Pratt, KS, and return over the same route, serving no intermediate points, and serving the junctions of (a) Interstate Hwy 10 and CA Hwy 86, (b) U.S. Hwys 60 and 80, (c) U.S. Hwy 60 and Interstate Hwy 25, (d) U.S. Hwys 54 and 60, and (e) U.S. Hwys 60 and 70, for purposes of joinder only, as an alternate route for operating convenience only, in connection with carrier's otherwise authorized regular-route operations, (2) between San Diego, CA, and junction U.S. Hwys 60 and 70, from San Diego, CA, over Interstate Hwy 8 to junction Interstate Hwy 10, then over Interstate Hwy 10 to junction combined U.S. Hwys 70 and 82, then over combined U.S. Hwys 70 and 82 to junction U.S. Hwy 54, then over U.S. Hwy 54 to junction U.S. hwy 70, then over U.S. Hwy 70 to junction U.S. Hwy 60, and return over the same route, serving no intermediate points, and serving the junctions of (a) Interstate Hwy 8 and CA Hwy 86, (b) Interstate Hwy 10 and U.S. Hwy 89, and (c) U.S. Hwys 54 and 70, for purposes of joinder only, as an alternate route for operating convenience only, in connection with carrier's otherwise authorized regular-route operations, (3) between junction Interstate Hwy 10 and CA hwy 86, and junction Interstate Hwy 8 and CA Hwy 86, over CA Hwy 86, serving no intermediate points, as an alternate route for operating convenience only, in connection with carrier's otherwise authorized regular-route operations, (4) between junction Interstate Hwy 25 and U.S. Hwy 60, and Albuquerque, NM over Interstate Hwy 25, serving no intermediate points, as an alternate route for operating convenience only, in connection with carrier's otherwise authorized regular-route operations, (5) between junction U.S. Hwys 54 and 70, and junction U.S. Hwys 54 and 66, from junction U.S. Hwys 54 and 70, over U.S. Hwy 54 to junction U.S. Hwy 66 then over U.S. Hwy 66 to junction U.S. Hwy 54, and return over the same route, serving no intermediate points, and serving junction U.S. Hwys 54 and 60, for purposes of joinder only, as an alternate route for operating convenience only, in connection with carrier's otherwise authorized regular-route operations. NOTE.—The restriction contained in the grant of authority in this proceeding is phrased in accordance with the policy statement entitled Notice to Interested Parties of New Requirements Concerning Applications for Operating Authority to Handle Traffic to and from points in Canada published in the FEDERAL REGISTER on December 5, 1974, and supplemented on November 18, 1978. The Commission is presently considering

whether the policy statement should be modified, and is in communication with ap-

products, and articles distributed by meat-packing houses, as described in

and east of ND, SD, NE, KS, MO, AR, and LA. (Hearing site: St. Paul, MN.)

to Denver, CO. (Hearing site: St. Paul, MN.)

common carrier, by motor vehicle, over irregular routes, transporting:

operate as a *common carrier*, by motor vehicle, over irregular routes, trans-

V 43/211 OCT 31 78

whether the policy statement should be modified, and is in communication with appropriate officials of Canada regarding this issue. If the policy statement is changed, appropriate notice will appear in the FEDERAL REGISTER and the Commission will consider all restrictions or conditions which were imposed pursuant to the prior policy statement, regardless of when the condition or restriction was imposed, as being null and void and having no further force or effect.

MC 128235 (Sub-21F), filed September 5, 1978. Applicant: AL JOHNSON TRUCKING, INC., 1516 Marshall NE., Minneapolis, MN 55413. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Beverages*, and (2) *materials and supplies* used in the manufacture and distribution of beverages, between Walpole, MA, on the one hand, and, on the other, points in CT, ME, NH, NJ, NY, PA, RI, and VT, under continuing contract(s) with Charles V. Zarba, Inc., d.b.a. Walpole Bottling Co., of Walpole, MA. (Hearing site: Boston, MA.)

MC 144547 (Sub-2F), filed August 22, 1978. Applicant: DURA-VENT TRANSPORT CORP., 2525 El Camino Real, Redwood City, CA 94064. Representative: Barry Roberts, 888 17th Street NW., Washington, DC 20006. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Wood stoves and coal stoves*, from Boston, MA, to Urbana, OH, Chicago, IL, Great Bend, KS, Petoskey, MI, Portage, WI, Memphis, TN, Fort Smith, AR, Portland, OR, Seattle, WA, and San Jose, CA, under continuing contract(s) with Southport Stoves, Inc., of Stratford, CT, (2) *masonry fireplace units, cast iron stoves, cast iron stove parts, and accessories, steel, and building materials*, from Detroit, MI, and Loudon, TN, to Salt Lake City, UT, Phoenix, AZ, Denver, CO, Albuquerque, NM, and Las Vegas, NV, under continuing contract(s) with Building Products Manufacturing Co., division of "Hutch" Manufacturing Co., of Detroit, MI, (3) *farm machinery, cast iron stoves, and steel stoves*, from Richmond, IN, to points in the United States (except AK and HI), under continuing contract(s) with Dunham Lehr, Inc., of Richmond, IN, and (4) *cast iron stoves and steel stoves*, from Richmond, IN, to points in the United States (except AK and HI), under continuing contract(s) with All Nighter Stove Works West, Inc., of Richmond, IN. (Hearing site: San Francisco, CA, or Washington, DC)

MC 144894 (Sub-1F), filed August 17, 1978. Applicant: BRANTLEY & FISHER TRANSPORT, INC., Rural Delivery No. 2, Box 401H, Absecon, NJ 08201. Representative: James H. Sweeney, P.O. Box 684, Woodbury, NJ 08096. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Plastic bottles*, from Nashua, NH, to points in CA, IL, IN, IA, MN, ND, MO, TX, FL, and GA, under continuing contract(s) with the Bemis Co., Inc., of Nashua, NH. (Hearing site: Philadelphia, PA, or Washington, DC.)

MC 145106 (Sub-1F), filed August 8, 1978. Applicant: EDINA CARTAGE CO., a corporation, 1000 Taylor Avenue, Flat River, MO 63601. Representative: E. Stephen Heisley, 805 McLachlen Bank Building, 666 11th Street NW., Washington, DC 20001. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Needles, syringes, and blood collection tubes*, and (2) *materials, equipment, and supplies* used in the manufacture and distribution of the commodities named in (1) above (except commodities in bulk), from the facilities of Sherwood Medical Industries, division of Brunswick Corp., at or near Norfolk, NE, to points in the United States (except AK and HI), under continuing contracts(s) with Sherwood Medical Industries, division of Brunswick Corp., of Norfolk, NE. (Hearing site: Washington, DC.)

MC 145116F, filed July 27, 1978. Applicant: EASTERN SUPPLY COMPANY, INC., a Delaware corporation, Route 9, Freehold, NJ 07728. Representative: Robert J. Gaughran, 64 East Main Street, Freehold, NJ 07728. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Garden and farm equipment materials, and supplies*, and (2) *agricultural commodities* otherwise exempt from economic regulation pursuant to section 203(b)(6) of the Interstate Commerce Act, when transported in mixed loads with the commodities in (1) above, between points in Monmouth County, NJ, on the one hand, and, on the other, points in the United States (except AK and HI), under continuing contract(s) with Brock Farms, Inc., of Freehold, NJ. (Hearing site: Newark, NJ. or New York, NY.)

MC 145144F, filed August 7, 1978. Applicant: WALL TRUCKING, INC., 22 School Street, Shrewsbury, MA 01545. Representative: John F. O'Donnell, 60 Adams Street, Milton, MA 02187. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Waste neutralized acid sludge and waste metal sludge*, except in tank vehicles, from Worcester, MA, to Waterbury, CT, and Lewiston, NY, under continuing contract(s) with Wyman-Gordon Co., of Worcester, MA. (Hearing site: Boston, MA.)

NOTE.—Applicant has filed a motion to dismiss on the grounds that the commodities are waste items, have no known use, that there is no market for these commodities, and that accordingly the commodities are not properly under the part II of the Interstate Commerce Act. This motion will be considered following the publication period.

MC 145149 (Sub-3F), filed September 26, 1978. Applicant: MATADOR SERVICE, INC., P.O. Box 2256, Wichita, KS 67201. Representative: Clyde N. Christey, Kansas Credit Union Building, Suite 110L, 1010 Tyler, Topeka, KS 66612. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Anhydrous ammonia and nitrogen fertilizer solutions*, from the facilities of Farmland Industries, Inc., near Dodge City, KS, to points in CO, NE, OK, NM, and TX; (2) *anhydrous ammonia*, from the facilities of Farmland Industries, Inc., (a) near Farnsworth, TX, to points in CO, KS, NM, and OK, (b) near Enid, OK, to points in AR, CO, KS, MO, and TX, (c) near Barnesville and Benson, MN, to points in ND, SD, MT, and WI, and (d) near Hoag, NE, to points in IA, KS, and MO, and (3) *anydrous ammonia*, from the Mapco Pipeline Terminal facilities near Conway and Clay Center, KS, to points in MO and NE. (Hearing site: Kansas City, MO.)

MC 145202F, filed August 11, 1978. Applicant: K-LINES, LTD., 3125 South 11th Street, Council Bluffs, IA 51501. Representative: James M. Hodge, 1980 Financial Center, Des Moines, IA 50309. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products and meat byproducts*, and *articles* distributed by meat-packing houses, as described in sections A and C of appendix I to the report in descriptions in Motor Carrier Certificates, 61 MCC 209 and 766 (except hides and commodities in bulk), (1) from the facilities of American Beef Packers, Inc., in Pottawattamie County, IA, to points in FL and GA, under continuing contract(s) with American Beef Packers, Inc., of Oakland, IA, and (2) from the facilities of Coast Packing Co., of Omaha, Inc., at Omaha, NE, to points in AL, FL, GA, KY, LA, MS, NC, SC, and TN, under continuing contract(s) with Coast Packing Co., of Omaha, Inc., of Omaha, NE. (Hearing site: Omaha, NE.)

MC 145227 (Sub-1F), filed August 21, 1978. Applicant: ROGERS TRANSPORTATION CO., INC., 1316 South Blount Street, Raleigh, NC 27611. Representative: David H. Permar, P.O. Box 527, Raleigh, NC 27602. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum and petroleum products*, in bulk, in tank vehicles, from points in NC, to points in Horry, Dillon, Marlboro, and Spartanburg Counties, SC, under continuing contract(s) with Rogers Oil Co., of Raleigh, NC. (Hearing site: Raleigh, NC.)

MC 145394F, filed August 7, 1978. Applicant: A & B FREIGHT LINE, INC., 2800 Falund Street, Rockford, IL 61109. Representative: Robert M. Kaske, 2800 Falund Street, Rockford, IL 61109. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Lawn equipment and parts for lawn equipment*, from Genoa, IL, to points in IN, IA, MN, and WI, and (2) *materials and equipment* used in the manufacture of the commodities in (1) above, from points in IN, IA, MN, and WI, to Genoa, IL under continuing contract(s) in (1) and (2) above with Sycamore Manufacturing Co., of Genoa, IL. (Hearing site: Washington, DC, or Chicago, IL.)

NOTE.—Dual operations are involved in this proceeding.

MC 145409 (Sub-1F), filed September 25, 1978. Applicant: STA-GREEN TRANSPORTATION CO., INC., 321 North Anniston Avenue, Sylacauga, AL 35150. Representative: Robert E. Tate, P.O. Box 517, Evergreen, AL 36401. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Fertilizer and fertilizer ingredients, seed, and pesticides*, from the facilities used by Parker Fertilizer Co., Inc., in Talladega County, AL, to points in the United States (except AK and HI), and (2) *equipment, materials and supplies* used in the manufacture and distribution of the commodities in (1) above, from points in the United States (except AK and HI), to the facilities used by Parker Fertilizer Co., Inc., in Talladega County, AL. (Hearing site: Birmingham, AL, or Washington, DC.)

MC 145429F, filed September 28, 1978. Applicant: MEL'S EXPRESS, LTD., P.O. Box 479, Bradford, Ontario, Canada LOG 1CO. Representative: J. G. Dail, Jr., P.O. Box 567, McLean, VA 22101. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Juices, beverages, and citrus products*, from the facilities of Tropicana Products, Inc., at or near Bradenton and Ft. Pierce, FL, to the ports of entry on the international boundary line between the United States and Canada and in NY and MI, restricted to the transportation of traffic destined to points in the Province of Ontario, Canada. Condition: Prior receipt from applicant of an affidavit setting forth its complementary Canadian authority or explaining why no such Canadian authority is necessary. (Hearing site: Tampa, FL.)

NOTE.—The restriction and conditions contained in the grant of authority in this proceeding are phrased in accordance with the policy statement entitled Notice to Interested Parties of New Requirements Concerning Applications for Operating Authority to Handle Traffic to and from points in Canada published in the FEDERAL REGISTER on December 5, 1974, and supplemented on November 18, 1975. The Commission is presently considering whether the policy statement should be modified, and is in communication with appropriate Canadian officials regarding this issue. If the policy statement is changed, appropriate notice will appear in the FEDERAL REGISTER and the Commission will consider all restrictions or conditions which were imposed pursuant to the prior policy statement, regardless of when the condition or restriction was imposed, as being null and void and having no force or effect. (Hearing site: Tampa, FL.)

MC 145438F, filed September 17, 1978. Applicant: ABC TRUCK CO., a corporation, 2724 LaMotte, Marlette, MI 48453. Representative: Edwin M. Snyder, 22375 Haggerty Road, P.O. Box 400, Northville, MI 48167. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities* as are dealt in and used by producers and distributors of alcoholic beverages (except commodities in bulk, in tank vehicles), between the facilities of Heublein, Inc., at or near Paducah, KY, on the one hand, and, on the other, points in the United States (except AK and HI), under continuing contract(s) with Heublein, Inc., of Hartford, CT. (Hearing site: Chicago, IL.)

MC 145439F, filed September 15, 1978. Applicant: DAVID STOCK, d.b.a. DAVID STOCK TRUCKING, Rural Route 1, Box 108, Newton, WI 53063. Representative: Michael J. Wyngaard, 150 East Gilman Street, Madison, WI 53703. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs*, from Fredricksburg, IA, Chicago, IL, Green Bay, Hilbert, Livingston, Mayville, Merrill, Milwaukee, Monroe, and Sheboygan, WI, to the facilities of Crescent Food Co., at or near Los Angeles, CA, under continuing contract(s) with Crescent Food Co., of Los Angeles, CA. (Hearing sites: Milwaukee, WI, or Chicago, IL.)

MC 145459F, filed September 6, 1978. Applicant: SERVICE EQUIPMENT & TRUCKING, INC., P.O. Box 162, Mattoon, IL 61938. Representative: Thomas F. Kilroy, Suite 406, Executive Building, 6901 Old Keene Mill Road, Springfield, VA 22150. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Printed matter*, from Mattoon, IL, to Chicago, Decatur, and Villa Grove, IL, Indianapolis, IN, and St. Louis, MO. (Hearing site: Chicago, IL.)

MC 2908 (Sub-25F), filed September 14, 1978. Applicant: CAPITAL MOTOR LINES, a corporation, 520 North Court Street, P.O. Box 1427, Montgomery, AL 36102. Representative Edward G. Villalon, 1032 Pennsylvania Building, Pennsylvania Avenue and 13th Street NW., Washington, DC 20004. To operate as a *common carrier*, by motor vehicle, transporting: (1) Over regular routes, *passengers and their baggage, and express and newspapers*, in the same vehicle with passengers, between junction U.S. Hwy 80 and AL Hwy 28, near Coatopa, AL, and junction U.S. Hwy 80 and U.S. Hwy 11, near Cuba, AL: over U.S. Hwy 80, serving all intermediate points; and (2) over irregular routes, *passengers and their baggage*, in one-way and round-trip charter operations, between points in Sumter County, AL, on the one hand, and, on the other, points in the United States (including AK, but excluding HI). (Hearing site: Meridian, MS, or Selma, AL.)

NOTE.—The person or persons who it appears may be engaged in common control between applicant and another regulated carrier must either file an application under section 5(2) of the Interstate Commerce Act, or submit an affidavit indicating why such approval is unnecessary.

MC 125156 (Sub-2F), filed August 4, 1978. Applicant: DAWSON'S CHARTER SERVICE, INC., Box 144, Sandy Spring, MD 20860. Representative: Donald J. Balsley, Jr., 1747 Pennsylvania Avenue NW., Suite 1050, Washington, DC 20006. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, in the same vehicle with passengers, in round-trip special and charter operations, beginning and ending at points in Anne Arundel, Howard, Montgomery, and Prince Georges Counties, MD, and extending to points in DE, FL, GA, MD, NC, NJ, NY, PA, SC, TN, VA, WV, and DC. (Hearing site: Washington, DC.)

MC 130507F, filed June 26, 1978. Applicant: A. MARGARET PARROTT, d.b.a. PARROTT'S TOURS, 2191 Black River Street, Deckerville, MI 48427. Representative: Karl L. Gotting, 1200 Bank of Lansing Building, Lansing, MI 48933. To engage in operations, in interstate or foreign commerce, as a *broker* at Deckerville, MI, in arranging for the transportation of: *Passengers and their baggage*, in the same vehicle with passengers, in round-trip special and charter operations, beginning and ending at points in St. Clair, Sanilac, Huron, Tuscola, Lapeer, Genesee, Saginaw, and Bay Counties, MI, and extending to points in the United States (including AK, but excluding HI.) (Hearing site: Lansing or Detroit, MI.)

NOTE.—Applicant is cautioned that arrangements for charter parties or groups

SECURITIES AND EXCHANGE COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: To be published October 27, 1978.

STATUS: Closed meeting.

PLACE: Room 825, 500 North Capitol Street, Washington, D.C.

DATE PREVIOUSLY ANNOUNCED: Tuesday, October 31, 1978.

The meeting previously scheduled for Tuesday, October 31, 1978, at 10 a.m., has been rescheduled for Monday October 30, 1978, at 3 p.m.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meeting may be considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)(A), and (10) and 17 CFR 200.402(a) (8), (9)(i), and (10).

Chairman Williams and Commissioners Evans, Loomis, and Pollack determined that Commission business required the above change and that no earlier notice thereof was possible.

INTERNATIONAL TRADE COMMISSION

PRIVACY ACT ISSUANCES

Notice of Incorporation by Reference

AGENCY: United States International Trade Commission.

ACTION: Incorporation by reference of Privacy Act issuances.

SUMMARY: Federal agencies are required by the Privacy Act of 1974 to give annual notice of certain records they maintain. The notices published last year were compiled by the Office of the Federal Register into "Privacy Act Issuances—1977 Compilation." The purpose of this document is to incorporate by reference the notices that appear in "Privacy Act Issuances—1977 Compilation" and to publish in full the systems that this agency has amended since publication of the 1977 Compilation.

DATES: This document fulfills the annual notice requirements of the Privacy Act for 1978.

FOR FURTHER INFORMATION CONTACT: Mary Martin, Esq. (523-0359)

APPROVAL OF THE DIRECTOR

The notices of systems of records of this agency which appear in "Privacy Act Issuances—1977 Compilation" are incorporated by reference. The Director of the Office of the Federal Register granted approval to incorporate by reference these Privacy Act issuances on October 4, 1978. Published below is the full text of systems of records that this agency has amended since publication of the 1977 Compilation.

System name: Employment and Financial Disclosure Records—U.S.I.T.C.

System location: Deputy Conselor for Employee Responsibilities and Conduct (Assistant to the General Counsel), Office of the General Counsel, United States International Trade Commission, 701 E Street, NW., Washington, D.C. 20436.

Categories of individuals covered by the system: 1. GS Employees: All current employees of the U.S.I.T.C. at grade 13 and above, or at a comparable pay level under other authority, and U.S.I.T.C. employees below GS-13, or at a comparable pay level under other authority, who are (1) responsible for making a decision or taking an action in regard to Commission contracting or procurement, (2) responsible for conducting investigative and research activities where the decision to be made or action to be taken could have an impact on any non-Federal enterprise, or (3) responsible for exercising the authority of any supervisory employee in the absence of such employee. Certain Commission employees within this class may not be required to file confidential statements of employment and financial disclosure if a determination is made pursuant to 19 CFR 200.735-114a that (1) the duties of the position are such that the likelihood of the incumbent's involvement in a conflict-of-interest situation is remote, or (2) that the duties of a position are at such a level of responsibility that the submission of a statement of employment and financial interests is not necessary because of the degree of supervision and review over the incumbent or the inconsequential effect on the integrity of the Government. In addition, U.S.I.T.C. employees not required to file confidential statements of employment and financial interests, but who wish to voluntarily file such statements, are included.

2. Special Employees: All special employees of the U.S.I.T.C. file a Confidential Statement of Employment and Financial Interests for Special Government employees. "Special Government Employee" is defined at 18 U.S.C. 202 and includes, but is not limited to, experts, consultants and advisors hired for temporary duties either on a full-time or intermittent basis.

Categories of records in the system: 1. GS Employees: This system of records consists of a confidential statement of employment and financial interests. Employees of the U.S.I.T.C. required to file this statement must list the names of all corporations, companies, firms, or other business enterprises, partnerships, non-profit organizations, and educational or other institutions: (a) with which the employee is connected as an employee, officer, owner, director, member, trustee, partner, advisor, or consultant; or (b) in which the employee has any continuing financial interests, through a pension or retirement plan, shared income, or other arrangement as a result of any current or prior employment or business or professional association; or (c) in which the employee has any financial interest through the ownership of stock, stock options, bonds, securities, or other arrangements including trusts.

An employee of the U.S.I.T.C. required to file this statement must also list the names of his creditors other than those to whom he may be indebted by reason of a mortage on property which he occupies as a personal residence or to whom he may be indebted for current and ordinary household and living expenses such as household furnishings, automobiles, education, vacation and similar expenses.

Further, the U.S.I.T.C. employee required to file such a statement must list his interest in real property or rights in lands, other than property which he occupies as a personal residence. If any of the above information is to be supplied by other persons, e.g., trustee, attorney, accountant, relative, the employee must also list the names and addresses of such persons, the date upon which the employee requested that the information be supplied, and the nature of the subject matter involved.

2. Special Employees: This system of records consists of a confidential statement of employment and financial interests for special employees. The special employee must disclose all other federal agencies and other organizational segments of the U.S.I.T.C. in which he is presently employed. He must also name all corporations, companies, firms, State and local Governmental organizations, research organizations, and educational or other institutions in which he is serving as employee, officer, member, owner, trustee, director, expert, adviser, or consultant, with or without compensation.

The Special Employee must also disclose his financial interests by listing the names of all copporations, companies, firms, or other business enterprises, partnerships, non-profit organizations, and educational or other institutions in which he has any financial interest in any amount through the ownership of stock, stock options, bonds, securities, or other arrangements including trusts.

Authority for maintenance of the system: 1. The Confidential Statement of Employment and Financial Interests for GS-employees is required by section 402 of Executive Order 11222, dated May 8, 1965, prescribing standards of ethical conduct for Government officers and employees.

The confidential statement of employment and financial interest for special Government employees is required by section 306 of Executive Order 11222.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: These records and information in these records may be used:

a. By the Deputy Counselor for Employee Responsibilities and Conduct to determine whether or not an employee has a direct or indirect financial interest which conflicts substantially, or appears to conflict substantially, with his U.S.I.T.C. duties or responsibilities.

b. By the Deputy Counselor to determine whether a U.S.I.T.C. employee has engaged in, directly or indirectly, a financial transaction as a result of, or primarily relying on, information obtained through U.S.I.T.C. employment.

c. For review by the Deputy Counselor. The Deputy Counselor is responsible for maintaining these records in confidence and may not disclose information from these records to other persons or agencies except as the Civil Service Commission or the Chairman of the U.S.I.T.C. may determine for good cause shown.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: These records are maintained in folders.

Retrievability: These records are indexed by the names of the individuals on whom they are maintained.

Safeguards: These records are kept in a locked filing cabinet in the office of the Deputy Counselor for Employee Responsibilities and Conduct (Assistant General Counsel), who is normally the only official with authorized access to them. However, the Statements of Employment and Financial Interest of the Deputy General Counsel (Assistant General Counsel) and of his immediate superior (the General Counsel) are submitted directly to the Counselor for Employee Responsibilities and Conduct (one of the U.S.I.T.C. commissioners).

Retention and disposal: These records are maintained by the Deputy Counselor while the employee is at the U.S.I.T.C. and for 5 years after the employee has left the U.S.I.T.C. Thereupon these records are destroyed.

System manager(s) and address: Deputy Counselor for Employee Responsibilities and Conduct (Assistant General Counsel), Office of the General Counsel, United States International Trade Commission, 701 E Street, NW., Washington, D.C. 20436.

Notification procedure: Director, Personnel Division (same address as above).

Record access procedures: Director, Personnel Division (same address as above).

Contesting record procedures: Director Personnel Division (same address as above).

Record source categories: Information in this system is supplied by the individuals to whom the records pertain.

AVAILABILITY OF 1977 COMPILATION

"Privacy Act Issuances—1977 Compilation" is available from Regional Depository Libraries at 50 locations around the country and can be examined at these libraries free of charge. The 1977 Compilation is also available at the General Services Administration Federal Information Centers, which are located at 38 central points around the country and may be examined at the central headquarters and all field offices of this agency. It is also available for purchase from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Upon request, the Office of the Federal Register will furnish a photocopy of the full text of a particular records system published in the 1977 Compilation for a nominal fee.

Location of Notices in 1977 Compilation

Notices of this agency's systems of records appear in Volume 1 of the 1977 Compilation at page 48175 (42 FR 48175, September 22, 1977). The price of this Volume is six dollars and fifty cents.

Issued: October 16, 1978.

Kenneth R. Mason,
Secretary.

System name: Operating personnel files (Nonpermanent records), ICC.

System location: ICC Headquarters Bureaus and Offices, Washington, D.C., and Regional Detached Offices (49 CFR 1001).

Categories of individuals covered by the system: ICC employees.

Categories of records in the system: Working papers and documents developed during the course of an individual's employment which are not permanently retained. These will include the Standard Form 7B (OF 4B), Employee Record Card, and nonofficial records generally limited to information on experience, education, training, special qualifications and skills, position descriptions, performance appraisals and conduct. The Regional Managers' files may contain duplicate copies of official documents (SF 171, SF 50, etc.).

Authority for maintenance of the system: Federal Personnel Manual Supplement 293-31.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: For the use of operating officials as a source of data to initiate requests for personnel actions, to plan and schedule employee training, to counsel employees on their performance, to establish a basis for proposing commendations or disciplinary actions, and to carry out their personnel management responsibilities in general. In the event that a system of records maintained by this agency to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto. The information contained in this system of records will be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular No. A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Maintained in individual file folders.

Retrievability: Indexed by name.

Safeguards: Kept in locked file cabinets under direct control of responsible official.

Retention and disposal: Retained until employee leaves the agency through transfer or other separation and then forward to the Personnel Office where it is screened to insure that it contains no documents that should be permanently filed in the Official Personnel Folder, and then is destroyed.

System manager(s) and address:
Administrative Officer (Assistant), ICC
Headuarters Bureaus and Officers, Washington, D.C.
Regional Managers and Officer-in-charge—Detached Offices

Notification procedure: Same as above.

Record access procedures: Same as above.

Contesting record procedures: Same as above.

Record source categories: Employees and their supervisors.

Systems exempted from certain provisions of the act: None.

32-20-002

System name: National Defense Executive Reserve files, ICC.

System location: Recruitment and assignment files Bureau of Operations, Interstate Commerce Commission, 12th and Constitution Avenue, NW., Washington, D.C. 20423. Appointment files Personnel Office, Interstate Commerce Commission, 12th and Constitution Avenue, NW., Washington, D.C. 20423.

Categories of individuals covered by the system: Letters and/or memorandums addressed to members of the Commission's National Defense Executive Reserve or to staff involving recruitment of reservists.

Categories of records in the system: Letters, Memorandum or NDER Forms 1, 2, and 3, or Form BOp D11 concerning reservists' assignments or responsibilities in connection with the National Defense Executive Reserve program, letters of appointment and statement of understanding.

Authority for maintenance of the system: EO 11179 and EO 11490.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Maintaining management control system of the Commission's membership and staff responsibilities in connection therewith and of individuals selected to participate in the National Defense Executive Reserve program. The information in this system of records will be exchanged as a matter of routine use with the Federal Preparedness Agency, General Services Administration, in connection with both agencies' responsibilities for administering the National Defense Executive Reserve and Emergency Preparedness programs, assigned by Executive Orders Nos. 11179, dated September 22, 1964, and 11490, dated October 30, 1969. In the event that a system of records maintained by this agency to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulations, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto. The information contained in this system of records will be disclosed to the Office of Management and Budget in connection with the review of private legislation as set forth in OMB Circular No. A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: File folders and card file, 3 inch x 5 inch cards, basic control of quarterly computer printouts, membership listing of National Defense Executive Reserves, listing names, addresses and employment information about each reservist.

Retrievability: Files maintained by individual name.

Safeguards: Kept in locked file cabinets under control of responsible official.

Retention and disposal: Permanent for card file; correspondence and rosters, etc., three-year active file and then destroyed.

System manager(s) and address:

Record source categories: Employee.

Systems exempted from certain provisions of the act: None.

32-20-003

System name: Unit Medical Records, ICC.

System location: Occupational Health Unit, ICC 12th and Constitution Avenue, NW., Washington, D.C. 20423.

Categories of individuals covered by the system: ICC employees.

Categories of records in the system: Contains employee's Name, date of birth, address, telephone number, Bureau or Office where employed, name of person to contact in case of emergency, name of employee's personal physician. Nurse's Notes visits and treatment in the Health Unit, records pertaining to blood donations and individual records of physical examinations, laboratory test results, x-rays and other individual health records with pertinent medical opinions.

Authority for maintenance of the system: Federal Personnel Manual Supplement 792-1.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Maintained expressly for the well-being of employees in relation to work assignments. For use of Director of Personnel in providing counseling services to employees and agency officials. In the event that a system of records maintained by this agency to carry its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto. The information contained in the system of records will be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular No. A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Maintained in indivual file folders.

Retrievability: Indexed by name.

Safeguards: Kept in locked file, with access only by the Occupational Health Nurse and/or Physician.

Retention and disposal: Retained unitl one year after the employee leaves the agency, and then destroyed. Upon separation, will be given to employee at his request or to his personal physician, if so desired.

System manager(s) and address:
Occupational Health Nurse
Room 1414
Interstate Commerce Commission
12th and Constitution Avenue, NW.,
Washington, D.C 20423

Notification procedure: Same as above.

Record access procedures: Same as above.

Contesting record procedures: Same as above.

Record source categories: Employee.

Systems exempted from certain provisions of the act: None.

32-20-004

System name: Automated Personnel and Payroll System, ICC.

System location: Section of Systems Development, ICC, 12th and Constitution Avenue, NW., Washington, D.C. 20423.

Categories of individuals covered by the system: ICC employees.

Categories of records in the system: Contains the name, social security number, employee number, date of birth, employment status, leave status, pay status, tax status, insurance status, saving bond and charity deductions, time and attendance data, and the organization of each ICC employee.

Authority for maintenance of the system: 49 U.S.C. 12.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: File is used for the: Transfer of information to the Internal Revenue Service for wage, levy and tax requirements—transfer of information to the Treasury Department for completion of payroll processing—transfer of information to the American Federation of Government Employees, Graphic Arts International Union, and the Professional Association of the ICC for the processing of union dues—transfer of information to state and city revenue offices for tax unemployment processing—transfer of information to the Civil Service Commission for personnel requirements—employee separation and retirement processing—employee time attendance accounting—employee salary payment and deduction control—employee bond, charity and health benefits processing—employee leave control—employee parking assignment control—employee telephone directory—employee personnel action processing and control—Commission budget planning, monitoring and control—creation of internal management reports, summaries and work files which are located throughout the agency.

In the event that a system of records maintained by this agency to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute of particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcement implementing the statute, or rule, regulation or order issued pursuant thereto.

The information contained in this system of records will be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular No. A-19 at any stage of the legislative coordination and clearance as set forth in legislative coordination and clearance process as set forth in that Circular.

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Maintained on magnetic tape.

Retrievability: Indexed by social security number.

Safeguards: Stored in secure computer facility under the supervision of the tape librarian.

Retention and disposal: Fifty-two week retention for files. A five-year retention period for year-end files. At the end of each of these periods, files are destroyed.

32-20-005

System name: Case Status System (Formal Case Control), ICC.

System location: Section of System Development, ICC 12th and Constitution Avenue, NW., Washington, D.C. 20423.

Categories of individuals covered by the system: Adminstrative Law Judges and Attorney-Advisers who have been assigned to work on cases before the Commission—parties of record and parties to be advised of all proceedings.

Categories of records in the system: Contains the various processing stages that case passes through as it is reviewed by the Commission—contains Administrative Law Judge and Attorney-Adviser names who are responsible for various processing stages of the case—contains the names of parties of record and parties to be advised of all proceedings—contain hearing locations, when applicable—contains carrier identity.

Authority for maintenance of the system: Commission directive.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Provides identification of all pending cases before the Commission—identifies older cases to expedite processing—identifies cases with normal time allowances—provides an area being processed within inventory of pending cases by stage of processing—identifies the responsible Administrative Law Judge or Attorney-Adviser and organizational unit responsible for various stages of case processing—identifies parties of record and parties to be advised of all proceedings for a given case—used to produce management reports located throughout the agency. In the event that a system of records maintained by this agency to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

The information contained in this system of records will be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular No. A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Maintained on magnetic tape and computer disk files.

Retrievability: Indexed by case and carrier identity and Administrative Law Judge or Attorney-Adviser name.

Safeguards: Stored in secure computer facility. Data base access is under the supervision of a data base administrator.

Retention and disposal: Records are maintained on each case until it has been decided. The record is then transferred to an inactive history file for permanent retention.

System manager(s) and address:

Record access procedures: Same as above.

Contesting record procedures: Same as above.

Record source categories: Carrier(s) involved, and commission staff.

Systems exempted from certain provisions of the act: None.

32-20-006

System name: Correspondence and Management Control, ICC.

System location: ICC Headquarters Bureaus and Offices Washington, D.C., and Regional Detached Offices (49 CFR 1001).

Categories of individuals covered by the system: Names of assignments with a control slip, including due dates for either individuals or sections within various organizational elements of the Commission covering letters, memoranda, or other inquiries for which responsibility to reply exists, normal business production transactions, time frames, on special projects, and all aspects of overall correspondence and workload control, as well as individual signed records for government property accountability.

Categories of records in the system: The overall Commission performance monitoring system incoporates a series of subsystems which identity the various measurements of productivity which are implicit in the operation of the Commission. Maintenacne of records on the performance and the production of Branches, Sections, Offices and individual employees is necessary to enable the Commission effectively manage its work load. These records include the names of individuals assigned to specific activities, the dates of assignments, dates products received, name of signer for correspondence which is going out, and general evaluation criteria of the individual performance of the element being monitored.

Authority for maintenance of the system: 49 U.S.C. 12, 18

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Control of the production of the total employee force of the interstate Commerce Commission and assurance that productivity is achieved by the employees assigned individual organizational elements. Additionally, to mainatin a suspense on specific actions being levied upon an individual to assure that the response is timely, as well as qualitative. Used for control of government property assuring individual accountability.

In the event that a system of records maintained by this agency to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

The information contained in this system of records will be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular NO. A-19 at any stage of the legislative coordination and clearance process as set forth in the Circular.

Disclosure may be made to a congressional office from the record of an individual in respose to an inquiry from the congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Both card, suspense special forms, and computer-related assignment records, are maintained to control the overall system. Maintained in sequence by the organizational element and/or the individual assigned to a special task, as well as cross-referenced by the number of the task involved.

Safeguards: Maintained at supervisory levels on an informal basis with access prohibited outside of the Commission.

Retention and disposal: One-year active operation and subsequently destroyed.

System manager(s) and address:
Managing Director
Interstate Commerce Commission
Room 2118
12th and Constitution Avenue, NW.,
Washington, D.C. 20423

Notification procedure: Same as above.

Record access procedures: Same as above.

Contesting record procedures: Same as above.

Record source categories: Employee.

Systems exempted from certain provisions of the act: None.

32-20-007

System name: Consumer Complaint System, ICC.

System location: Public Information and Consumer Affairs Office, ICC, 12th and Constitution Avenue, NW., Washington, D.C. 20423. Headquarters, ICC Bureau and Offices, and Regional Detached Offices (49 CFR 1001).

Categories of individuals covered by the system: Letters received from consumers and/or shippers regarding the operation of the ICC or carriers subject to its regulations.

Categories of records in the system: These records include letters on virtually every subject. They are concentrated in three areas: complaints from individual consumers on household goods shipments, complaints from travelers on rail passenger facilities, and complaints from passengers on motor passenger facilities. Additionally, information on general subjects of the operation of the Interstate Commerce Commission and, specifically, shipper complaints against carrier practices and/or tariffs are included in overall complaint files. Files generally are accessed by name of individual complaining or subject of the complaint or name of the carrier against which the complaint is tendered. Notice is given that when complaints generate an investigative file portions of this overall file are extracted and exempted under the provisions and notice provided in the publication of ICC VIII, Preliminary Investigative Files, and ICC IX, Inforcement Files.

Authority for maintenance of the system: 49 U.S.C. 12, 18.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: To respond to complaints from individuals, to correlate information received from individuals to assure policies are developed supporting the overall public interest in the regulatory process, to provide information to carriers relative to shortcomings they are experiencing, and take informal compliance action, as well as to transfer the files to formal investigative or enforcement action, when justified. This is a public file available for public review under the terms of the Freedom of Information Act. Individuals submitting special complaint correspondence to the Commission, unless identifying their desire to remain anonymous, will not be protected from disclosure of the information contained within the complaint letter. In the event that a system of records maintained by this agency to carry its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in ths system of records may be referred, as a routine use, to the appropriate agency, whether Federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

The information contained in this system of records will be disclosed to the Office of Management and Budget in connection with the review of private legislation as set forth in OMB Circular No. A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: In conventional file cabinets, alphabetically, by sender, and potentially by subject of complaint, dispersed for filing to office have primary operational use.

Retrievability: Maintained in alphabetical order, by complainant, with potential cross-index for identification of entity against which the complaint has been made, and further cross-reference by subject of complaint.

Safeguards: Minimal, since the files are public in nature.

Retention and disposal: Maintained for approximately two years and then destroyed.

System manager(s) and address:
Public Information Officer, ICC
12th and Constitution Avenue, NW., Washington, D.C. 20423

Notification procedure: Same as above.

Record access procedures: Same as above.

Contesting record procedures: Same as above.

Record source categories: Consumers and/or shippers.

Systems exempted from certain provisions of the act: None

32-20-008

System name: Preliminary Investigative Files, ICC.

System location: Bureau of Operations, Interstate Commerce Commission, 12th and Constitution Avenue, NW., Washington, D.C. 20423, and Regional Detached Offices (49 CFR 1001).

Categories of individuals covered by the system: Suspected violators of the Interstate Commerce Act or ICC orders or regulations.

Categories of records in the system: These files contain information indicating or alleging that an individual or entity could be in violations of the Interstate Commerce Act. Such records could be arrest records from the various states received pursuant to Public Law 89-170, which allows cooperative agreements between the states and this Commission in the provision of information. For example, these files could contain warning letters involving alleged violations, miscellaneous correspondence, newspaper clippings, records of contacts with entities or individuals by Commission personnel, copies of preliminary investigation reports, and prior enforcement actions taken by the Interstate Commerce Commission or the courts because of violations of the Interstate Commerce Act.

Authority for maintenance of the system: 49 U.S.C. 12

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Used employees of the Interstate Commerce Commission to administer the Act, increase compliance with orders, regulations and statutes for the regulation of surface transportation, and initiate appropriate enforcement action.

In the event that a system of records maintained by this agency to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

The information contained in this system of records will be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular No. A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Maintained in individual file folders.

Retrievability: Indexed by name of entity of individual.

Safeguards: Kept in locked file cabinets under direct control of responsible official.

Retention and disposal: Maintained for a minimum of five years and then destroyed.

System manager(s) and address:
Washington, D.C.:
Director, Bureau of Operations
Room 7115
Interstate Commerce Commission
12th and Constitution Ave. NW.,
Washington, D.C. 20423
Regional Detached Offices:
Regional Managers (49 CFR 1001)
Field Offices:
Officers in Charge (49 USC 1001)

Notification procedure: Same as above.

Record access procedures: Same as above.

Contesting record procedures: Same as above.

Record source categories: Author of letters.

Systems exempted from certain provisions of the act: Under the provisions of Section (j)(2), this file is exempted from any part of Section 5 U.S.C. 552(a), except Subsections (b), (c) (1), and (2), (e)(4) (A) through (F), (e) (6), (7), (9), (10), and (11), and (i). This material is collected in the process of investigating all potential violations of the Interstate Commerce Act, whether civil or criminal, and is exempted for the reasons expressed in 5 U.S.C. 552(b)(7). Under the provisions of Section (k)(2), this file is exempted from Subsections (c)(3), (d), (e)(1), (e)(4) (G), (H), and (I), and (f). This material is collected in the process of investigating all potential violations of the Interstate Commerce Act, whether civil or criminal, and is exempted for the reasons expressed in 5 U.S.C. 552(b)(7).

32-20-009

System name: Investigative and Enforcement Records, cross-indexed, ICC.

System location: Bureau of Enforcement (cross-indexed and central file) Interstate Commerce Commission, 12th and Constitution

Avenue, NW., Washington, D.C. 20423, and ICC Regional Offices

32-20-010

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Control of ICC Identifica-

usually includes the employee's name, address, and organization, the mode, purpose, dates and places of travel, the method and amount of

V 43/211 0C 31 78

Avenue, NW., Washington, D.C. 20423, and ICC Regional Offices (investigative files with assigned geographical jurisdiction).

Categories of individuals covered by the system: Individual, corporation, partnership or sole proprietorship, subject to enforcement actions being taken by the Interstate Commerce Commission as a result of preliminary investigations.

Categories of records in the system: The central cross-index contains the name and address of individual, partnership, corporation, or sole proprietorship, and includes a cross-reference to the enforcement file containing the investigative reports, as well as other information gathered as part of the criminal prosecution and/or civil forfeiture action. The basic cross-reference file does not contain significant information other than the name and address of the entity involved, but the cross-reference to the investigative file, which is maintained by case number, does provide access based upon individual name. Individual investigative and enforcement files are maintained by Enforcement file number, both at Headquarters and Regions.

Authority for maintenance of the system: 49 U.S.C 12.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Used to monitor and control the progress of enforcement actions, both within the Commission for civil forfeitures and in relationship with the Department of Justice on those actions that are going through the courts. The central cross index is the only practical method for access to the appropriate file based upon any individual identifier. Actual file information is used for prosecution of civil and criminal actions. In the event that a system of records maintained by this agency to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant, records in the system of records may be referred as a routine use, to the appropriate agency, whether Federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto. The information contained in this system of records will be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular No. A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Maintained on folding 5 inch by 8 inch index cards.

Retrievability: Indexed by individual, partnership, corporation, or sole proprietorship (index). Actual files retrieved by enforcement file number.

Safeguards: Stored in a special room of the Bureau of Enforcement with Commission employees present during all duty hours (index).

Retention and disposal: Cards are maintained in the active cross-reference and indexing file while the file is open and transferred to the closed card section after the file is concluded.

System manager(s) and address:

Assistant Director
Bureau of Enforcement
Interstate Commerce Commission
12th and Constitution Avenue, NW.,
Washington, D.C. 20423

Notification procedure: Same as above.

Record access procedures: Same as above.

Contesting record procedures: Same as above.

Record source categories: Preliminary investigative files (ICC VIII).

Systems exempted from certain provisions of the act: Under the provisions of Section (j)(2), this file is exempted from any part of Section 5 U.S.C. 552(a) except Subsections (b), (c) (l) and (2), (e)(4) (A) through (F), (e) (6), (7), (9), (10) and (11), and (i). This material is collected in the process of investigating all potential violations of the Interstate Commerce Act, whether civil or criminal, and is exempted for the reasons expressed in 5 U.S.C. 552(b)(7). Under the provisions of Section (k)(2) this file is exempted from Subsections (c)(3), (d), (e)(4)(G), (l) and (f). This material is collected in the process of investigating all potential violations of the Interstate Commerce Act, whether civil or criminal, and is exempted for the reasons expressed in 5 U.S.C. 552(b)(7).

32-20-010

System name: ICC employee parking permit applications for carpools, ICC.

System location: Section of Administrative Services, ICC, 12th and Constitution Avenue, NW., Washington, D.C. 20423.

Categories of individuals covered by the system: All individuals applying for, or assigned, parking facilities.

Categories of records in the system: ICC Form MD-21, Revised March 1975, Interstate Commerce Commission, Application for Parking Space, Contents: Carpool member names, home address, office telephone number, bureau or office, service computation date, vehicle license number, distance between residence and ICC and the name of the employer.

Authority for maintenance of the system: FDMR Temporary Regulations D-47, May 22, 1974.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Use is to maintain control of assigned parking spaces. In the event that a system of records maintained by this agency to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order is issued pursuant thereto. The information contained in this system of records will be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular No. A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Maintained on 5 inch by 8 inch cards.

Retrievability: Indexed by location of parking space, number of carpool members and order of parking permit number.

Safeguards: Secured in locked metal, lateral file cabinet under the supervision of the space and services unit.

Retention and disposal: Cards are maintained for a three-year period and then discarded.

System manager(s) and address:

Chief, Building Services, Space Management Branch
Room 1315
Interstate Commerce Commission
12th and Constitution Avenue, NW.,
Washington, D.C. 20423

Notification procedure: Same as above.

Record access procedures: Same as above.

Contesting record procedures: Same as above.

Record source categories: Individuals seeking parking facilities.

Systems exempted from certain provisions of the act: None.

32-20-011

System name: ICC Indentification System File.

System location: Interstate Commerce Commission, Section of Administrative Services, 12th and Constitution Avenue, NW., Washington, D.C. 20423.

Categories of individuals covered by the system: A. All ICC Headquarters employees.

B. All nongovernment employees requiring access to office space occupied in the ICC Headquarters Building in Washington, D.C.

C. All ICC employees issued investigative credentials.

Categories of records in the system: A. name, date of birth, social security number.

B. Name, organization (firm), social security number.

C. Name, title, Bureau or Office, credential number.

Authority for maintenance of the system: 49 CFR 1000.5.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Control of ICC Identification System. In the event that a system of records maintained by this agency to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regualtion, rule or order issued pursuant thereto, to relevant records in the system of records may be referred, as a routine use, to the appropriate agency whether Federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto. The information contained is this system of records will be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular No A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: A. 8 inch by 10 inch log book. B. 5 inch by 8 inch sheets. C. 5 inch by 8 inch sheet.

Retrievability: A. Indexed by date issued. B. Indexed by organization and date issued. C. Indexed by Bureau or Office and credential number.

Safeguards: All three segments of the identification system are stored in the Section of Administrative Services under the supervision of the Space and Services Unit.

Retention and disposal: Maintained two years after completion of log book, then destroyed. B. Maintained for two years after which cards are destroyed. C. Maintained until credential is returned and destroyed or marked retired upon separation of employee. Inactive records are stored two years and discarded.

System manager(s) and address:

Chief, Building Services, Space Management Branch
Section of Administrative Services
Interstate Commerce Commission
12th and Constitution Avenue, NW.,
Washington, D.C. 20423

Notification procedure: Same as above.

Record access procedures: Same as above.

Contesting record procedures: Same as above.

Record source categories: Employee.

Systems exempted from certain provisions of the act: None.

32-20-012

System name: Employee Travel Records, ICC.

System location: Budget and Fiscal Office, ICC, 12th and Constitution Avenue, NW., Washington, D.C. 20423.

Categories of individuals covered by the system: ICC employees.

Categories of records in the system: The record consists primarily of a series of standard and Commission forms and index file cards designed to record pertinent travel information. The information usually includes the employee's name, address, and organization, the mode, purpose, dates and places of travel, the method and amount of reimbursement and the amount of travel advance outstanding.

Authority for maintenance of the system: 49 U.S.C. 18.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: The records are available for any use by any person. The Commission uses these records to establish approval for travel on official business, the reimbursement of the employee for approved expenses, control of annual budget estimates, input to the Commission's internal accounting system and periodic and special reports required by agencies outside the Commission, and the compilation of information for internal management purposes. Portions of the file are made available to Commission management personnel for monitoring assigned functional and geographical areas of responsibility. In the event that a system of records maintained by this agency to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use to the appropriate agency, whether Federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto. The information contained in this system of records will be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular No. A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Maintained in individual file folders.

Retrievability: Indexed by employee name.

Safeguards: Kept in locked file cabinet under supervision of Budget and Fiscal Officer.

Retention and disposal: Records are destroyed in accordance with GSA retention schedules.

System manager(s) and address:

Chief, Budget and Fiscal Office
Room 1330
Interstate Commerce Commission
12th and Constitution Avenue, NW.,
Washington, D.C. 20423.

Notification procedure: Same as above.

Record access procedures: Same as above.

Contesting record procedures: Same as above.

Record source categories: Employee.

Systems exempted from certain provisions of the act: None.

DEPARTMENT OF ENERGY

IMPROVING GOVERNMENT REGULATIONS

Semiannual Agenda of Significont Regulations

AGENCY: Department of Energy.

ACTION: Notice of regulations under development or review.

SUMMARY: In accordance with Executive Order 12044, "Improving Government Regulations," the Department of Energy (DOE) is publishing the first semiannual agenda of DOE regulations that are under development or review as of October 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Kristina Clark (Office of General Counsel), Department of Energy, Federal Building, 12th and Pennsylvania Avenue, NW., Room 5146, Washington, D.C. 20461, 202-566-9565.

SUPPLEMENTARY INFORMATION: On March 23, 1978, the President promulgated Executive Order No. 12044, "Improving Government Regulations" (43 FR 12661, March 24, 1978). The Order set forth a number of measurcs which Federal agencies were to take in order to improve the process by which regulations administered by such agencies are developed and monitored. One of the objectives of the Order is to improve the degree of public participation in the regulatory development and review process, and to that end the Order requires, among other things, that each agency governed by the Order publish semiannually an agenda setting forth those of its significant regulations that are currently under development and/or review. The agenda is to describe such regulations, the need for and legal basis for the action being taken, and the status of regulations previously listed on the agenda. In addition, each item on the agenda is to include the name and telephone number of a knowledgeable agency official and, if possible, state whether a regulatory ananlysis is required. The agenda is also to include existing regulations scheduled to be reviewed for possible amendment.

Appended to this Notice is the first such regulatory agenda for the DOE. In an attempt to be as comprehensive as possible, the agenda is intended to include those DOE regulations, both significant and nonsignificant, that are under development or review as of October 13, 1978.

As a result of legislative action occurring after October 13, 1978, additional regulations may come under development or review. However, as of the time of preparation of this agenda the nature and scope of regulatory action required by this recent legislation has not been fully determined. Therefore, the agenda does not include regulations which may be developed pursuant to such legislation. DOE may publish a supplementary agenda containing this information in the near future.

The DOE is also currently developing a Departmental Order intended to implement generally the provisions of Executive Order No. 12044. That Departmental Order will, among other things, establish the procedures and criteria under which regulations will be reviewed and under which particular regulations will be determined to be significant or not significant. Although these procedures and criteria have not finally been established, the attached list of actions includes both significant and non-significant regulations that the offices within DOE having primary program responsibility have identified as being under development or review as of October 13, 1978.

Issued in Washington, D.C. on October 26, 1978.

JOHN F. O'LEARY,
Deputy Secretary.

CONSERVATION

1. *Program for state energy conservation plans.* DOE intends to propose changes in certain State energy conservation program measures including some technical amendments.

It has not been decided whether a regulatory analysis is required.

Status: No notice concerning the regulation has yet been published.

Authority: Energy Policy and Conservation Act, Title III, Part C, Pub. L. 94-163, as amended.

Contact: John Rivera, 202-566-7442.

2. *Weatherization assistance.* DOE has proposed amendments to existing Weatherization Assistance Regulations for the purpose of improving efficiency of program administration.

A regulatory analysis is not required.

Status: A Notice of Proposed Rulemaking has been issued.

Authority: Energy Conservation and Production Act, Title IV, Part A, Pub. L. 94-385.

Contact: Mary Bell, 202-566-3091.

3. *Industrial reporting.* DOE plans to propose several amendments to the industrial reporting program.

It has not been determined whether a regulatory analysis is required.

Status: No notice concerning the regulation has yet been published.

Authority: Energy Policy and Conservation Act, Title III, Part D, Pub. L. 94-163, as amended.

Contact: Douglas Harvey, 202-376-4648.

4. *Electric and hybrid vehicle loan guarantees.* DOE plans to amend the electric and hybrid vehicle loan guarantee program to clarify program coverage.

It has not been determined whether a regulatory analysis is requred.

Status: No notice concerning the regulation has yet been published.

Authority: Electric and Hybrid Vehicle Research, Development and Demonstration Act of 1976, as amended.

Contact: Thomas Calhoun, 202-376-4747.

5. *Electric and hybrid vehicle planning grants.* DOE will promulgate rules to establish the requirements for grant applications under the Electric and Hybrid Vehicle Research, Development and Demonstration Act of 1976.

It has not been determined whether a regulatory analysis is required.

Status: No notice concerning the regulation has yet been published.

Authority: Electric and Hybrid Vehicle Research, Development and Demonstration Act of 1976, as amended.

Contact: Thomas Calhoun, 202-376-4747.

6. Energy conservation program for appliances. DOE plans to promulgate test procedures for heat pumps under the Energy Conservation Program for Appliances.

It has not been determined whether a regulatory analysis will be required.

Status: No notice concerning the regulation has yet been published.

Authority: Energy Policy and Conservation Act, Title III, Part B, Pub. L. 94-163, as amended.

Contact: James Smith, 202-376-4814.

7. *Municipal and industrial waste reprocessing loan guarantees.* DOE will promulgate rules enabling DOE to guarantee loans for municipal and industrial waste reprocessing.

It has not been decided whether a regulatory analysis is required.

Status: No notice concerning the regulation has yet been published.

Authority: Federal Nonnuclear Energy Research and Development Act of 1974, Section 19(y), Pub. L. 93-577, as amended.

Contact: Don Walter, 202-376-1964.

8. *Building energy performance standards.* DOE intends to propose Federal standards for new residential and commercial buildings.

A decision as to whether a regulatory analysis is needed has not been made.

Status: No notice concerning the regulation has yet been published.

Authority: Energy Conservation and Production Act, Pub. L. 94-385.

Contact: Jim Brinkley, 202-376-4888.

9. *Federal energy management and planning guidelines.* DOE will promulgate guidelines, regulations and procedures which Federal agencies will use in preparing their individual energy conservation plans.

It has not been determined whether a regulatory analysis is required.

Status: No notice concerning the regulation has yet been published.

Authority: Executive Order 11912.

Contact: Paul Brumsby, 202-376-4017.

DEFENSE PROGRAMS

1. *Revision of 10 CFR, Part 795, "Safeguarding of Restricted Data".* DOE will revise and upgrade security requirements imposed on access permittees to the level imposed on DOE and DOE contractor personnel.

A regulatory analysis is not required.

Status: No notice concerning the regulation has yet been published.

Authority: 10 CFR, Part 795.

Contact: Harvey Lyon, 301-353-5106.

2. *Proposed revision of 10 CFR, Part 710, "Criteria and Procedures for Determining Eligibility for Access to Classified Matter or Significant Quantities of Special Nuclear Material".* DOE will determine if current procedures expedite case processing and if current criteria are valid, particularly in light of recent court decisions.

A regulatory analysis is not required.

Status: No notice concerning the regulation has yet been published.

Authority: 10 CFR, Part 710.

Contact: Harvey Lyon, 301-353-5106.

ECOMOMIC REGULATORY ADMINISTRATION

CRUDE OIL

1. *Entitlements treatment for Alaska refineries.* DOE has proposed an amendment to the domestic crude oil allocation program to clarify the proper calculation of entitlements to be issued to certain refineries located in the State of Alaska, in order to avoid the potential for duplicate entitlement issuances for the same volume of crude oil.

A regulatory analysis is not required.

Status: A Notice of Proposed Rulemaking has been issued.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Contact: Robert Kane, 202-254-7200.

2. *Incentives for enhanced crude oil recovery.* By this continued rulemaking and request for comments DOE will determine whether additional price incentives are needed for tertiary enhanced recovery projects in order to provide for adequate capital commitment to such projects.

It has not been determined whether a regulatory analysis is required.

Status: DOE issued a final rule containing incentives for undertaking tertiary recovery projects. That Notice of Final Rule contained a Notice of Continued Rulemaking and Request for Comments.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Contact: Douglas Harnish, 202-254-7477.

3. *Petroleum substitute guidelines.* DOE will develop final guidelines for implementation of a program to grant entitlements benefits for petroleum substitutes.

A regulatory analysis is not required.

Status: Proposed guidelines have been issued. The final rule which the guidelines will implement has been issued.

Authority: Emergency Petroleum Allocation Act, Pub. L. 93-159, as amended.

Contact: David Welsh, 202-254-3336.

4. *Further rulemaking on entitlements for petroleum substitutes.* DOE may propose an amendment to the mandatory petroleum allocation regulations to expand the scope of the synthetic fuels which will qualify for designation as a petroleum substitute. Comments are now being received on the petroleum substitute guidelines, and will be evaluated, along with those received in response to the final rulemaking which the guidelines are intended to implement, in determining whether a further rulemaking is necessary.

It has not been determined whether a regulatory analysis is required.

Authority: Emergency Petroleum Allocation Act, Pub. L. 93-159, as amended.

Contact: David Welsh, 202-254-3336.

5. *Revision of the small refiner bias program.* An independent report was commissioned by DOE to study the current small refiner bias level under the entitlements program. DOE will propose revisions to the small refiner bias program.

A regulatory analysis will be completed.

Status: A report and a Notice of Inquiry concerning the report have been issued; hearings have been held.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

6. *Non-refining uses of price controlled crude oil.* DOE plans to amend the entitlements program to provide a mechanism to account for controlled domestic crude oil that is not covered by the program because the crude oil was not run in domestic refineries.

A regulatory analysis is not required.

Status: A notice of Inquiry and a Notice of Intent to issue a rulemaking has been issued

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Contact: Robert Kane, 202-254-7200.

7. *Simplified crude oil price control program.* DOE may propose to simplify the mechanism for controling crude oil prices by causing the entitlements program to be the primary determinant of prices paid to crude oil producers.

A regulatory analysis will be completed.

Status. A Notice of Inquiry has been issued.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Contact: Norman Breckner, 202-254-7477.

8. *Revision of crude oil supplier purchaser rule.* The 1973 freeze on supplier/purchaser relationships is being further examined to determine whether it unduly inhibits competition or unnecessarily burdens producers and purchasers of domestic crude oil.

It has not been determined whether a regulatory analysis is required.

Status: No notice concerning the regulation has yet been published.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Contact: Robert Kane, 202-254-7200.

9. *Canadian allocation program (CAP) revisions.* Amendments may be proposed to reflect the declining volumes of Canadian crude oil exports, the varying success refineries have had in finding non-Canadian supplies and the simplification of the administration and industry reporting requirements of CAP.

A regulatory analysis is not required.

Status: A Notice of Inguiry has been issued; hearings have been held.

Legal authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Contact: Robert Kane, 202-254-7200.

10. *Crude oil resellers price rule.* DOE will evalute crude oil resale price rules to determine if modifications are needed.

It has not been determined whether a regulatory analysis is required.

Status: No notice concerning this regulations has yet been published.

Authority: Emergency Petroleum Allocation Act of 1973, Pub L. 93-159, as amended.

Contact: Ralph Rohweder, 202-254-7268.

11. *Processing agreements.* DOE is considering whether to provide further guidance to retailers and refiners concerning the treatment of crude oil processing agreements under the Mandatory Petroleum Price Regulations.

It has not been determined whether a regulatory analysis is required.

Status: No notice concerning the regulation has yet been issued.

Authority: Energy Policy and Conservation Act, Pub. L. 94-163, as amended.

Contact: Ed Mampe, 202-254-7200.

12. *Marginal well incentive pricing.* DOE is considering amending the pe-

troleum price regulations to provide

Federal Energy Regulatory Commission.

Status: A Notice of Proposed Rulemaking has been issued.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Contact: Lloyd Costley, 202-254-8034.

V 4 3 / 2 1 1 0 OCT 31 1978

troleum price regulations to provide production incentivies for certain lower tier crude oil from wells which produce at low rates under conditions of high operating costs.

It has not been determined whether a regulatory analysis is required.

Status: No notice concerning the regulations has yet been published.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Contact: Douglas Harnish, 202-254-7477.

13. *Small stripper certification procedure.* DOE is considering the feasibility of adopting a procedure for small crude oil stripper producers to apply for a predetermination as to whether their wells qualify as stripper wells.

A regulatory analysis is not required.

Status: No notice has yet been published.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 95-159, as amended.

Contact: Thomas Miller, 202-254-8580.

14. *Refinery ownership and certification regulations.* DOE is considering promulgating a regulation regarding what facilities qualify as refineries, certification procedures for refineries, and determination of refinery ownership.

A regulatory analysis is not required.

Status: No notice concerning the regulation has yet been published.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Contact: Dennis Kourkoumelis, 202-254-5338.

15. *Transfer pricing and ocean transportation.* DOE is considering simplification or possible revision to standby regulatory and continuing information gathering status of rules concerning prices of future inter-affiliate transfers of imported crude oil. Relates to decontrol of refined products.

It has not been determined whether a regulatory analysis is required.

Status: No notice concerning the regulation has yet been published.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Contact: Dan Thomas, 202-254-7477.

ECONOMIC REGULATORY ADMINISTRATION

REFINED PRODUCTS

1. *Price rules for product exchanges.* DOE is revising procedures by which refiners, resellers and retailer will determine the increased costs applicable to products received in exchanges.

A regulatory analysis will be completed.

Status: A Notice of Proposed Rulemaking has been issued.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Contact: Dan Thomas, 202-254-7477.

2. *Middle distillate set-aside.* DOE is considering proposing a special rule to provide for a procedure whereby suppliers of home heating oil may be required to set aside a portion of their supplies for distribution by State energy offices in the event of emergency conditions which interrupt normal distribution systems.

A regulatory analysis is not required.

Status: No notice concerning this regulation has yet been published.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Contact: James Berry, 202-254-7477.

3. *NGL allocation revision.* DOE is amending the mandatory petrolem allocation regulations to correct various problems that appear to have arisen in the allocation of propane, butane and natural gasoline.

A regulatory analysis is not required.

Status: A Notice of Proposed Rulemaking has been issued; the Federal Energy Regulatory Commission has held hearings.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Contact: Robert Reinstein, 202-254-9766.

4. *NGL price amendments—Further rule.* DOE has issued a rule to provide gas processors with passthroughs of actual nonproduct cost increases. DOE may propose a further notice or notices on a number of additional matters raised in prior proceedings to determine if additional rulemakings are needed.

It has not been determined whether a regulatory analysis is required.

Status: No further notice concerning the regulation has yet been published.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Contact: Roger Miller, 202-634-7610.

5. *Resubmissions and refiling of FEO-96, P110, and EIA-14 forms.* DOE has proposed to amend its petroleum price regulations concerning reporting requirements of refiners. Generally, it has been proposed that refiners would not be permitted to refile FEO-96 forms, FEA/DOE P110 forms, or DOE EIA-14 forms after 60 days from the date of the originial filing, except where expressly authorized by DOE regulation or order or where written permission is granted by DOE for good cause shown.

A regulatory analysis is not required.

Status: A Notice of Proposed Rulemaking has been issued; hearings have been held.

Contact: Lloyd Costley, 202-254-8034.

6. *Annual revision of fee free allocations under the mandatory oil import program.* DOE will revise the Mandatory Oil Import Program to reflect the fee-free allocation levels established by Presidential Proclamation 3279 for the next allocation year which begins on May 1, 1979.

No regulatory analysis is required.

Status: No notice concerning this regulation has yet been published.

Authority: Presidential Proclamation 3279, as amemded.

Contact: Robert Goodwin, 202-566-9380.

7. *Entitlements export sales deduction exemption for bunker use of middle distillates.* ERA has been petitioned to establish a rule that would not require an entitlements deduction under the export sales provision of § 211.67(d)(2) for middle distillates used as bunker fuels. No determination has been made at this time as to whether a notice concerning this matter will be issued.

It has not been determined whether a regulatory analysis is required.

Status: No notice concerning this regulation has yet been published.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Contact: Robert Kane, 202-254-7200.

ECONOMIC REGULATORY ADMINISTRATION

DECONTROL

1. *Motor gasoline exemption.* The DOE will decide whether to propose to Congress the deregulation of motor gasoline.

A regulatory analysis or equivalent will be completed.

Status: A Notice of Proposed Rulemaking has been issued and the exemption has been considered by the Federal Energy Regulatory Commission.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Contact: William Caldwell, 202-254-8034.

2. *Aviation fuel decontrol.* DOE has issued a proposal to exempt kerojet and aviation gasoline from the mandatory petroleum allocation and price regulations, inasmuch as recent supplies and market conditions appear to justify ending both types of controls.

Findings issued concurrently with the Notice of Proposed Rulemaking are determined by ERA to satisfy the requirement for the preparation of a regulatory analysis for significant regulations which have a major economic impact.

Status: A Notice of Proposed Rulemaking has been issued and the exemption has been considered by the Federal Energy Regulatory Commission.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Contact: William Caldwell, 202-254-8034.

3. *Decontrol of butane, natural gasoline, propane and natural gas liquids* (NGL's). DOE may propose rules to exempt butane, natural gasoline, propane, and NGL's from allocation and price controls.

A regulatory analysis will be completed.

Status: No notice concerning this regulation has yet been published.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Contact: Gerald Emmer, 202-254-7500.

4. *SNG feedstocks.* DOE will consider whether to issue a proposal to exempt SNG feedstocks from allocation controls.

No decision has been made as to the need for a regulatory analysis.

Status: No notice concerning this regulation has yet been published.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Contact: Bart House, 202-254-3905.

ECONOMIC REGULATORY ADMINISTRATION

EMERGENCY PREPAREDNESS

1. *International oil allocation.* DOE has proposed regulations to implement the oil sharing provisions of the International Energy Program. Comments received are currently being reviewed to determine the nature and scope of final standby rules on this subject.

It has not been determined whether a regulatory analysis is required.

Status: A Notice of Proposed Rulemaking has been issued.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Contact: Robert Kane, 202-254-3923.

2. *Contingency gasoline rationing plan.* DOE will promulgate a contingency rationing plan for diesel fuel and gasoline, to be implemented in the event of a severe nationwide gasoline shortage.

A regulatory analysis will be completed.

Status: A Notice of Proposed Rulemaking has been issued.

Legal authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

3. *Standby crude oil pricing and allocation regulations.* DOE has proposed changes to the crude oil pricing and allocation regulations on a standby basis, to be activated in the event of a significant supply interruption.

A regulatory analysis is not required.

Status: A Notice of Proposed Rulemaking has been issued.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Contact: Robert Kane, 202-254-3923.

4. *Standby product pricing and allocation regulations.* DOE has proposed short-term changes to the product pricing and allocation regulations on a standby basis, to be activated in the event of a significant supply interruption. Comments received are currently under review.

A regulatory analysis is not required.

Status: A Notice of Proposed Rulemaking has been issued.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Contact: Gerald Emmer, 202-254-7200.

5. *Development of long-term standby product allocation and price regulations.* DOE is considering additional standby regulations to devlop the Nation's emergency preparedness. This action is to identify and develop standby product measures to be implemented (on a long-term basis) is the event of a severe supply interruption.

A regulatory analysis will be completed.

Status: No notice concerning the regulation has yet benn published.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Contact: William Caldwell, 202-254-7200.

ECOMONIC REGULATORY ADMINISTRATION

ENFORCEMENT

1. *Revision of remedial order regulations.* DOE will revise previous Federal Energy Administration remedial order regulations to provide review of proposed orders by the DOE Office of Hearings and Appeals. The revision will provide formal procedures for review of issues raised in each remedial order proceeding prior to the issuance of orders in final form.

A regulatory analysis is not required.

Status: An interim rule is in effect.

Authority: Department of Energy Organization Act, Pub. L. 95-91.

Contact: George Breznay, 202-254-9681.

2. *Procedural regulations for investigations.* DOE will propose revisions to Part 205 of the DOE regulations to clarify the procedures for issuance of subpenas during enforcement investigations and the requirements for conducting investigative interviews pursuant to subpenas. The proposal may include modification of the appeal procedures concerning subpenas.

A regulatory analysis is not required.

Status: No notice concerning the regulation has yet been published.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended.

Contact: Jerry Weiner, 202-632-5072.

3. *Proposed amendments to the civil and criminal penalty regulations, with particular regard to the definition "Notice of Non-compliance".* In its final report dated July 13, 1977, the Task Force on Compliance and enforcement recommended at page V-5, that the FEA reconsider the present definition of Notice of Non-compliance at 10 CFR 205.203(e)(2)(B) which states that such notices are limited to Remedial and Consent Orders. Notices of Non-compliance are "notices" given to corporate officials pursuant to the Energy Policy and Conservation Act as a precondition to their being subject to criminal penalties for a willful violation of regulations promulgated under the Emergency Petroleum Allocation Act of 1973 (EPAA). The report recommended that Notices of Probable Violation (or any actual Notice of Non-compliance provided at any time) should also serve as Notices of Non-compliance (as the term had been defined previously). Pursuant to that recommendation, the DOE may propose to reopen the definition for reconsideration in order to assess whether it should be amended prospectively. The proposed rulemaking would seek to establish whether the definition should be expanded again to include Notices of Probable Violation, or to include all orders issued by the DOE pursuant to its authority under the EPAA, or should be amended in any other way.

It has not been determined whether a regulatory analysis is required.

Status: No notice concerning the regulation has yet been published.

Authority: Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159 as amended; Energy Policy and Conservation Act, Pub. L. 94-163, as amended.

Contact: Bryan Perilman, 202-254-8700.

ENERGY INFORMATION ADMINISTRATION

1. *Collection of foreign oil supply agreement information.* DOE will consider amending 10 CFR Part 215 which requires U.S. companies to report details of their foreign oil supply agreements. The most significant amendment would be extension of the amount of time allowed to report agreements.

It has not been determined whether a regulatory analysis is required.

Status: No notice concerning the regulation has yet been published.

Authority: Department of Energy Organization Act, Pub. L. 95-91.

Contact: Bernadette Michalski, 202-634-1160.

ENVIRONMENT

1. *Implementation of floodplain and wetlands Executive orders.* Doe is required to issue regulations with respect to floodplain management. The Office of Environment proposes to combine the floodplain regulations with related wetlands requirements into one set of procedures to be coordinated with existing NEPA regulations.

No regulatory analysis is required.

Status: A Notice of Proposed Regulation has been issued.

Authority: Executive Order 11988; Executive Order 11990.

Contact: Carol Borgstrom, 202-566-9760.

2. *DOE NEPA regulations.* DOE has proposed regulation for compliance with the National Environmental Policy Act.

A regulatory analysis is not required.

Status: A Notice of Proposed Rulemaking has been issued.

Authority: National Environmental Policy Act.

Contact: Robert Stern, 202-566-9760.

OFFICE OF EQUAL EMPLOYMENT OPPORTUNITY

1. *Comprehensive EEO regulations for all federally assisted DOE programs and activities.* EEO will develop comprehensive regulations to implement the Equal Employment Opportunity Requirements for all federally assisted DOE programs and activities.

A Regulatory analysis is not required.

Status: No notice concerning the regulation has yet been published.

Authority: Rehabilitation Act of 1973, Sec. 504; E.O. 11914; Title VI of 1964 Civil Rights Act.

Contact: Marion Bowden, 202-376-4663.

GENERAL COUNSEL

1. *Proposed regulations on standards of conduct for Department of Energy employees.* DOE is preparing regulations prescribing standards of conduct for employees of DOE as mandated by DOE Organization Act, section 601-608.

No regulatory analysis is required.

Status: A Notice of Proposed Regulation has been issued.

Authority: DOE Organization Act, section 601-608.

Contact: Ralph D. Goldenberg.

2. *Privacy Act regulations.* DOE will promulgate regulations to implement DOE compliance with 5 U.S.C. 552(a), Privacy Act of 1974. The rulemaking will provide Department-wide regulations to replace Privacy Act regulations implemented by FEA and ERDA which are presently in force.

A regulatory analysis is not required.

Status: No notice concerning the regulations has yet been published.

Authority: Department of Energy Organization Act, Pub. L. 95-91 and authorities incorporated by reference in 5 U.S.C. 552(a).

Contact: William Luck, 202-566-9296.

2. *DOE licensing regulations.* The resolution governs licensing of inventions owned or controlled by the Department of Energy. The regulation is needed to provide guidence to the public or procedures for obtaining nonexclusive and exclusive licenses and on standards under which such licenses may be granted and the terms and conditions of the licenses.

A regulatory analysis is required.

Status: No notice concerning this regulation has yet been published.

Authority: Federal Nonnuclear Energy Research and Development Act of 1974 42 U.S.C. 5908(g); the Atomic Energy Act of 1954 as amended, 42 U.S.C. 2186 and general authorities available to the Department due to transfer of functions from other agencies under the DOE Organization Act and other acts.

Contact: Robert Marchick, 301-353-4970.

3. *DOE administrative patent and copywrite infringement claims.* The regulations will provide policy and procedures for filing and processing administrative claims alleging infringement of U.S. patents and copy rights by or on behalf of the Department of Energy. The regulation is needed to provide guidance to the public as to requirements and procedures that will be followed in settling, denying, or otherwise disposing of administrative infrigement claims.

A regulatory analysis is required.

Status: No notice concerning this regulation has yet been published.

Authority: Department of Energy Organization Act 42 U.S.C. 7261, Energy Reorganization Act 42 U.S.C. 5817; Atomic Energy Act of 1954, as amended, 42 U.S.C. 2201(g), 2223.

Contact: Jack Lever, 301-353-5093.

4. *Regulations for implementation of the Foreign Gifts and Decorations Act.* DOE will propose regulations to establish procedures and policies relating to the acceptance, use and disposition of gifts and decorations from foreign governments.

A regulatory analysis is not required.

Status: No notice concerning this regulation has yet been published.

Authority: Foreign Gifts and Decorations Act 5 U.S.C. 7342, as amended, Pub. L. 95-105 6977.

Contact: Ralph Goldenbery, 301-353-5285.

OFFICE OF PROCUREMENT AND CONTRACTS MANAGEMENT

1. *DOE organizational conflicts of interest.* The regulation will provide policies, procedures, and contract clauses concerning organizational conflicts of interest, such as bias and unfair competitive advantage. The regulation is needed to aid in identifying or mitigating potential organizational conflicts of interest before entering into contracts, agreements and other arrangements.

A regulatory analysis is not required.

Status: A Notice of Proposed Rulemaking has been issued.

Authority: Department of Energy Organization Act, Pub. L. 95-91, Federal Nonnuclear Energy Research and Development Act of 1974 (Pub. L. 93-577), as amended by Pub. L. 93-39; Federal Energy Administration Act of 1974 (Pub. L. 93-275), as amended by Pub. L. 95-70.

Contact: Martin Kestenbaum, 353-4541.

2. *DOE procurement regulations.* The regulation, along with the Federal Procurement Regulations, governs procurement by the Department of Energy. The regulation is needed to provide a wide range of implementation necessary to the Department's extensive procurement activities.

A regulatory analysis is not required.

Status: A Notice of Proposed Rulemaking has been issued.

Authority: Department of Energy Organization Act, and general authorities available to the Department due to the transfer of functions from agencies conducting substantial procurement (e.g., the Atomic Energy Act of 1954, the Energy Reorganization Act of 1974, and the Federal Nonnuclear Energy Research and Development Act of 1974).

Contact: Martin Kestenbaum, 353-4541.

3. *DOE assistance regulation.* The regulation provides general financial assistance policies and procedures (Subpart A General), and applicable to grants (Subpart B). The regulation is needed to provide guidance to the public as to what requirements must be met and what standards will be followed in making grant awards.

A regulatory analysis is not required.

Status: A Notice of Proposed Rulemaking has been issued.

Authority: Department of Energy Organization Act, section 644, and general authorities available to the Department due to the transfer of functions from other agencies (e.g. the Federal Nonnuclear Energy Research and Development Act of 1974).

Contact: Carl Blakely, 301-353-4692.

4. *DOE assistance regulation (Subpart C—Cooperative Agreements).* The regulation will provide polices and procedures concerning the use of cooperative agreements to award financial assistance. The regulation is needed to provide guidance to the public as to what requirements must be met and

what standards will be followed in entering into cooperative agreements.

A regulatory analysis is not required.

Status: No notice concerning the regulation has yet been published.

Authority: Department of Energy Organization Act, section 644, and general authorities available to the Department due to the transfer of functions from other agencies (e.g. the Federal Nonnuclear Energy Research and Development Act of 1974).

Contact: Carl Blakely, 301-353-4692.

5. *DOE assistance regulation—Loans, Loan Guarantees, Price Supports, Other Incentives* (Subparts D, E, F). The regulation will provide policies and procedures concerning the use of loans, loan guarantees, price supports, and other methods to award financial assistance. The regulation is needed to provide guidance to the public as to what requirements must be met and what standards will be followed in entering into agreements.

A regulatory analysis is not required.

Status: No notice concerning this regulation has been published.

Authority: Department of Energy Act, section 644, and general authorities available to the Department due to the transfer of functions from other agencies (e.g. the Federal Nonnuclear Energy Research and Development Act of 1974).

Contact: Carl Blakely, 301-353-4692.

6. *DOE property management regulation.* The regulation, along with Federal Property Management Regulations (FPMR), will generally govern the management of property of the Department. The regulation is needed to provide implementation of the FPMR necessary to manage the property for which the Department is responsible.

A regulatory analysis is not required.

Status: No notice concerning this regulation has been published.

Authority: Department of Energy Act, section 644, and general authorities available to the Department due to the transfer of functions from agencies which had substantial property for which they were responsible (e.g. the Atomic Energy Act of 1954, the Energy Reorganization Act of 1974, and the Federal Nonnuclear Energy Research and Development Act of 1974).

Contact: Francis Roche, 301-353-3703.

RESOURCE APPLICATIONS

1. *OCS bidding regulations.* DOE is drafting proposed regulations to establish bidding systems to be used in the sale of oil and gas leases on the Outer Continental Shelf (OSC), and to provide coordination between DOE and Department of Interior in their implementation.

A regulatory analysis will be completed.

Status: No notice concerning the regulation has yet been published.

Authority: Department of Energy Organization Act, section 302(b)(2) Pub. L. 95-91.

Contact: Robert Kalter, 202-566-9421.

2. *Initial geothermal bidding system regulations.* DOE is drafting proposed regulations establishing the bidding system to be used for the sale of geothermal leases on Federal lands. The regulations will also establish the procedures to be followed by DOE and Department of Interior in carrying out their responsibilities regarding geothermal lease sales.

A regulatory analysis will be completed.

Status: No notice concerning the regulation has yet been published.

Authority: Department of Energy Organization Act, section 302(b)(2), Pub. L. 95-91.

Contact: Robert Kalter, 202-566-9421.

3. *Royalty oil regulations.* DOE is preparing proposed regulations regarding the disposal of Government royalty oil taken in kind pursuant to section 302(b)(5) of the DOE Organization Act. These regulations would continue in a slightly modified form a program established and administered by the Department of Interior for the disposal of Government royalty oil.

A regulatory analysis will be completed.

Status: No notice concerning the regulation has yet been published.

Authority: Department of Energy Organization Act, section 302(b)(5), Pub. L. 95-91.

Contact: Robert Kalter, 202-566-9421.

4. *Revision of geothermal loan guaranty regulations.* DOE intends to analyze, simplify, and amend the geothermal loan guarantee regulations, including environmental review procedures.

A regulatory analysis will be completed.

Status: No notice concerning the regulation has yet been published.

Authority: Department of Energy Organization Act, Pub. L. 95-91.

Contact: Larry Falick, 202-566-6719.

5. *Power rate adjustment procedures.* Procedures will be established for Federal power authorities to contact their customers and encourage participation in rate-setting procedures. Procedures for public hearings conducted in consumers' communities will be developed.

A regulatory analysis is not required.

Status: No notice concerning the regulation has yet been published.

Authority: Bonneville Project Act of 1927, as amended.

Contact: Daniel Ogden, 202-566-9615.

6. *Sequential bidding regulations.* DOE is preparing proposed regulations to establish a new bidding process, known as sequential bidding, for use in certain Outer Continental Shelf (OCS) oil and gas lease sales. The purpose of these regulations is to increase competition by increasing both the number of participants in an OCS lease sale and the number of bids submitted.

A regulatory analysis will be completed.

Status: No notice concerning the regulation has yet been published.

Authority: Department of Energy Organization Act, section 302(b)(1), Pub. L. 95-91.

Contact: Robert Kalter, 202-566-9421.

7. *Loan guarantees for alternative fuel demonstration facilities.* DOE will promulgate rules enabling DOE to guarantee loans for alternative fuel demonstration facilities.

It has not been decided whether a regulatory analysis is required.

Status: No notice concerning the regulation has yet been published.

Authority: Federal Nonnuclear Energy Research and Development Act of 1974, section 19(b), Pub. L. 93-577, as amended.

Contact: Michael Perper, 202-376-9052.

8. *Post-sale competitive review regulations.* DOE is preparing proposed regulations to establish a process by which the Secretary of the Interior would perform a compctitive review of bids for Outer Continental Shelf oil and gas leases prior to their award to the highest qualified responsible bidder. The purpose of the regulation is to foster competition for Federal leases.

A regulatory analysis will be completed.

Status: No notice concerning the regulation has yet been published.

Authority: Department of Energy Organization Act, section 302(b)(1), Pub. L. 95-91.

Contact: Robert Kalter, 202-566-9421.

9. *Coal regulations.* DOE is in the initial stages of analysis prior to preparation of regulations concerning bidding systems, competition and diligence. The purpose of these regulations would be to foster competition and establish diligence requirements.

Status: No notice concerning the regulation has yet been published.

Authority: Department of Energy Organization Act, section 302(b) (1), (2), (3), Pub. L. 95-91.

Contact: Robert Kalter, 202-566-9421.

10. *University coal research laboratories grants.* DOE will promulgate

rules which set forth criteria for selecting institutions to receive grants to

[17 CFR Part 225]

SUMMER FOOD SERVICE PROGRAM FOR CHILDREN

AGENCY: Food and Nutrition Service, USDA.

ACTION: Proposed rule.

SUMMARY: The Department is issuing proposed regulations for the Summer Food Service Program for Children as required by section 13 of the National School Lunch Act, as amended. It is intended that interested parties be given an opportunity to comment on these regulations prior to the publication of final regulations which is required by January 1.

DATE: To be assured of consideration, comments must be received on or before November 20, 1978.

ADDRESS: Written comments should be sent to Mr. Jordan Benderly, Acting Director, Child Care and Summer Programs Division, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250. Copies of all written comments received will be available for inspection by the public during normal business hours in room 3300B Auditor's Building, 14th Street and Independence Avenue SW., Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT:

Mr. Benderly at the above address or by telephone at 202-447-8211.

SUPPLEMENTARY INFORMATION: The Summer Food Service Program for Children is authorized by section 13 of the National School Lunch Act, as amended by Pub. L. 95-166, approved November 10, 1977. That section requires, in part, that the Department issue proposed regulations for the summer program annually by the first day of November. Final regulations must be issued by January 1 of each year.

Based on a year's experience administering the summer program under regulations issued on March 28, 1978 (43 FR 13020) and comments and suggestions received from various sources, including a national program meeting held in October of this year for the purpose of soliciting public comment, the Department has determined it appropriate to propose certain changes in program regulations. The following describes the proposed changes.

DEFINITIONS

Food service management company. It has been suggested that the term "vendor" (meaning a commercial provider of meals) be defined in regulations in place of or in addition to "food service management company." This latter term has the traditional meaning of a firm which provides management services in addition to meals. The Department recognizes the fact that most sponsors' food service contracts are with vendors not food service management companies. It is acknowledged that there is the potential for confusion based on the use of references to food service management companies in the act and regulations and a distinction made in industry between that term and vendor. Therefore, the Department proposes to include the definition of vendor within the definition of food service management company to point out the distinction. All references to food service management companies in the regulations thereby include vendors.

Rural. As a result of the legislative rural outreach mandate, the Department and many States conducted outreach last year. However, the Department has been criticized for not defining "rural" and not providing more guidance and assistance to the States in this area. This year the Department is proposing a definition of rural, establishing more specific objectives and developing a rural outreach plan. Special outreach attention will be directed to migrants and American Indians. The Department will provide information to the States to assist them in formulating and implementing rural outreach efforts. In addition, new provisions in the proposed rule, specifically in the management and administration plan require the State to detail its proposed activities in rural areas.

Areas in which poor economic conditions exist/migrants. Due to the nature of the migrant population, the Department recognizes the need to simplify documentation of program eligibility for the children of migrant workers. Therefore, it is proposed that the definition of "areas in which poor economic conditions exist" be expanded so that eligibility for the children of migrant workers may be based upon documentation provided by recognized migrant organizations, and may serve to support the eligibility of the children, as a group.

Another proposed provision to lessen the documentation requirement allows sponsors with the same sites for 2 consecutive years to submit new documentation every other year, rather than every year.

RESPONSIBILITIES OF STATE AGENCIES

Sponsor visits. Changes are proposed for State agency preoperational visits to sponsors. The first change would require the State agency to determine which applicant sponsors, aside from those which have never previously participated in the program, should receive preoperational visits. The purpose of this proposed change is to give the State agencies flexibility in determining when such visits are necessary. Last year this visit was required for all sponsors which would earn more than $50,000 in program reimbursement. However, the Department feels that the size of the sponsor's program in and of itself should not determine the need for a preoperational visit.

Facility inspections. A second provision would require each State agency, during the first 4 weeks of program operations, to provide for inspections of all program preparation facilities in the State. If a State agency cannot conduct these inspections, the 1 percent health inspection and meal quality test funds may be used for this purpose to contract out these inspections.

Sponsor/food service management company contract. Two new provisions are proposed in the sponsor and food service management company contract. The first would require the sponsor to pay the food service management company for all meals delivered in accordance with the contract. Sponsors have always had this contractual obligation, and this provision will serve to clarify this obligation as a regulatory requirement as well.

The second provision would require all nongovernmental sponsors whose contract or aggregate amount of contracts with one food service management company would exceed $10,000 to establish a special account for the deposit of payments by the State agency for operating costs. A separate special account would be required for each company under contract with a sponsor. Both parties to the contract would formally agree to an equitable distribution of the funds deposited to the account.

Food service restrictions. Under program regulations in effect last year, only residential camps were exempted from the requirement to serve supper beginning no later than 6 p.m. The proposed regulations would allow for State agencies to waive this requirement for any site, provided that special arrangements are made by the sponsor and the State agency to monitor these sites.

Training requirements. Proposed regulations expand the training requirements and require that State agencies make training available to food service management company representatives and health inspectors which will participate in the program in each State. While food service management companies and health departments are not required to attend this training, the Department believes that they would benefit from doing so. Such training must occur prior to the beginning of program operations.

Use of small and minority-owned business. In keeping with the legislative intent that sponsors make efforts to utilize small and minority-owned businesses as sources of supplies, State agencies are to encourage sponsors to use such businesses. To assist the States in this activity, the Department will provide information to State agencies on sources of financial and technical assistance for such businesses and suggests that State agencies familiarize themselves with local resources and assistance so that they can carry out this requirement in a meaningful fashion.

Audit requirements. State agencies continue to be responsible for audits of each sponsor on an every-other-year basis, in accordance with Federal Management Circulars. For those sponsors receiving less than $50,000 in program reimbursement, it is proposed that the cost of auditing them be borne solely by the State agency and be considered a legitimate State administrative expense. The Department believes that such sponsors do not receive enough program funds to cover the cost of such an audit.

Statistical sampling. The Department continues to support the use of statistical sampling techniques in the program. As in the past, the Department's Office of Audit will conduct statistical sampling in selected areas. In addition, the Department is proposing to require that State agencies conduct statistical sampling in a select number of the Nation's largest cities. It is in the large cities that the biggest problems with program operations have occurred in the past. These problems, if uncorrected, can lead to substantial dollar losses. The Department's principal interest in using statistical sampling is as a monitoring and management tool, not simply as a billing device. These selected State agencies would be required to have a system whereby adverse findings generated by sampling would be immediately communicated to sponsors and translated into corrective action. These States would consider sampling as one factor, along with other considerations, in the settlement of claims. The Department would expect greater weight to be given to sampling results in settling a claim in instances where a sponsor ignored the results and failed to institute corrective action after being duly notified, than in circumstances where a sponsor acted promptly to correct its deficiencies.

The Department recognizes that extensive training in this technique at all levels is essential if it is to work successfully. The Department is prepared to offer training to those State agencies that will be required to conduct sampling, and to all other State agencies that elect to use sampling.

PROGRAM MANAGEMENT AND ADMINISTRATION PLAN

Additional provisions. The Department has received several suggestions regarding this plan. In an effort to be responsive to these concerns several changes have been proposed in this section. Provisions have been added which require the State to define its priority areas of program expansion, its plan and schedules for training food service management company representatives and health inspectors, and its procedures for soliciting and insuring that timely comments or recommendations made by interested parties regarding this plan receive full consideration. The latter provision is primarily intended to serve as a method of providing for public involvement in the development of the plan. Plan approval for the upcoming summer will be delegated to the FNS Regional Offices and specific approval deadline dates will be established to facilitate timeliness of the complete process.

PAYMENT AND USE OF STATE ADMINISTRATIVE FUNDS

Assured funding level. The Department believes it is in the best interest of the program to facilitate advance planning to the greatest degree possible. Therefore, an assured administrative funding level to the States is proposed. This level would be an amount equal to the lesser of 80 percent of administrative funds earned based on program payments actually made within the State during the prior fiscal year, or, 80 percent of the estimated amount of administrative funds which could be earned in the current fiscal year, assuming, of course, that the State's actual expenditures equal or exceed that level. The States would be assured of receiving no less than this level unless FNS determines that the State failed to meet its responsibilities as contained in the regulations or did not make a good faith effort to implement its plan.

ADMINISTRATIVE PAYMENTS

The Department has proposed a method of funding sponsors for administrative costs which is based on budgets submitted by sponsors to the State agencies. The concept outlined in regulations is a new approach and has not been tested either on a selected basis or nationwide. Hence, comments are solicited on the specific proposal included in regulations, as well as the additional approaches discussed below. Comments on these approaches and other approaches which may surface during the comment period will be fully considered before final regulations are issued.

Sponsor budget approach. Under this approach, a State would be required to vary the rate of reimbursement it pays to individual sponsors, based on their individual needs. Under this approach, States would earn a total amount of money for distribution for sponsor administrative costs, and would then divide these funds up according to individual sponsor's needs as reflected in sponsor administrative budgets. Thus, while the State would earn a certain amount for each lunch served, it would pay some sponsors more per lunch than this amount, while others wuld receive less per lunch than this amount. (The total reimbursement that a State provided to all its sponsors for administrative costs could not, of course, exceed the total amount that the State earned.)

States would need to evaluate sponsor administrative budgets carefully, and have justification for the varying rates assigned. This approach allows flexibility to States to meet the needs of those sponsors who must incur higher administrative costs in order to run the program successfully.

That approach would require skilled administration by States. It would work best if all sponsor budgets were reviewed simultaneously, but this is not always entirely possible. States would also need to plan for contingencies if a sponsor which had been provided a lower-than-average rate served fewer meals than planned, while a sponsor given a higher-than-average rate served more meals than planned. Some mid-course adjustments in the rates provided to sponsors might be necessary in such a circumstance, in order that a State have sufficient funds to make its reimbursement payments.

States would be required, rather than simply permitted, to vary reimbursement rates. The basic purpose of this approach would be undermined if a State, instead of budgeting skillfully, simply assigned a uniform rate to all sponsors.

In conjunction with this approach, the Department would endeavor to provide guidance to State agencies to assist States in determining those categories of sponsors that may need higher administrative reimbursement rates. The Department is currently completing a study mandated by Public Law 95-166 which is intended to evaluate reimbursement levels for operating and administrative costs to determine if adjustments are needed. Based on the results of the study, if appropriate, FNS will provide State agencies with guidance regarding those types of sponsor characteristics that may justify higher administrative cost payment. State agencies may then

V 4 3 / 2 1 1 0 C 3 1 7 8

use this guidance in determining sponsor payments. As an example, if the study so indicated, final regulations could specify that factors such as the following should be considered when assigning higher levels to certain sponsors for operating and administrative costs:

(1) Whether the sponsor will prepare meals on-site or contract with a food service management company.

(2) The proposed number of sites to be operated by the sponsor and the location of such sites.

(3) Resources available from other sources to finance the food service program.

ADDITIONAL APPROACHES TO SPONSOR ADMINISTRATIVE PAYMENTS

Consumer Price Index Set-Aside

This approach is a variation of the approach described above. Once again, States would earn a total amount of money and would distribute it according to sponsors' individual needs. Rates of reimbursement would again vary by sponsor. The principal difference is that under this approach, there would be a *minimum* per-meal reimbursement. So long as a sponsor's approved administrative budget (and actual costs), at least equalled this minimum, sponsors would receive reimbursement at least at this level.

The minimum reimbursement levels would be the reimbursement rates in effect during the summer of 1978, i.e., 7.25 cents per lunch and supper, 3.75 cents per breakfast, and 2.00 cents per snack. The State earning factors would be somewhat higher because they would be computed by indexing this past summer's reimbursement rates in accordance with the change in the food away from home series of the Consumer Price index for the 12-month period ending November 30, 1978. Thus, for every sponsor to which the State assigned the minimum rate, the State would have a small amount of funds available (the difference between last summer's rates and the new rates), to provide a higher payment to another sponsor which the State had determined to need additional assistance. This would allow States some flexibility to provide increased payments to sponsors needing such payments, while protecting other sponsors by providing a floor below which States could not reduce their payment rates. States would, of course, have less flexibility than under the first approach.

States would still need to practice the same type of skillful budgeting as would be required under the first alternative. States would still need to balance various sponsor budgets, and the number of meals served, to assure that they remained within the amount of funds available on a statewide basis.

The Department would plan, as under the first approach, to provide guidance as to sponsor characteristics to be considered in assigning higher rates of reimbursement, provided that the FNS study now nearing completion sufficiently identifies these characteristics.

Discretionary Additional Payments Approach

Under this approach, a State would not assign to a sponsor a reimbursement rate that was below the statewide earning factor unless the sponsor's administrative budget or actual costs dictated a lower rate. The State would earn ¾ cent per lunch and supper, ½ cent per breakfast, or ¼ cent per supplemental food beyond the statewide earning factor for every meal served. The aggregate amount of the additional reimbursement would constitute a pool of money which States could use to augment the administrative budgets of certain sponsors.

The assignment of such additional reimbursement would be up to the State. As in the Consumer Price Index Set-Aside Approach, this approach would allow States some flexibility to provide increased payments to sponsors needing such payments, while protecting other sponsors by providing a floor below which States could not reduce their payment rates. States would, again, have less flexibility than under the Sponsor Budget Approach, and would still need to practice skillful budgeting. This approach requires a slightly higher level of Federal expenditures which the Department may not be able to provide.

Assigned Additional Payments Approach

Under this approach, a State would not assign to a sponsor a reimbursement rate that was below the statewide earning factor, unless the sponsor's administrative budget or actual costs dictated a lower rate. These sponsors in need of additional reimbursement could receive higher rates, but these rates could not exceed the statewide earning factor by more than ¾ cent per lunch or supper, ½ cent per breakfast, or ¼ cent for supplemental food. This approach resolves the budgeting complexities otherwise faced by States, but in so doing it has two significant consequences: (1) It restricts the additional assistance that any sponsor may receive, and (2) it requires a slightly higher level of Federal expenditure, which the Department may not be able to provide.

Under this approach, as under the previous three alternatives, guidance would be made available concerning sponsor characteristics that may justify higher payment rates, if such guidance can be derived from the results of the study.

SUMMARY

The following summary illustrates each of the four approaches. The summary assumes, for the sake of illustration, that the basic statewide per meal earning factor for 1979 is 7.75 cents per lunch, as opposed to last summer's rate of 7.25 cents per lunch, in view of the adjusted CPI. Total reimbursement to sponsors in a State cannot exceed the total amount earned by the State.

Under the Sponsor Budget Approach, which is contained in the body of these proposed regulations, a State would earn 7.75 cents per lunch. Out of these funds, the State would pay some sponsors more than 7.75 cents per lunch and others less than 7.75 cents per lunch. There would be no minimum or maximum limit on the rate a State could provide any individual sponsor.

Under the CPI Set-Aside, the State would again earn 7.75 cents per lunch, and would again vary rates by sponsor. Sponsors would receive no less than 7.25 cents per lunch (last summer's rate). The State would use the difference to pay some sponsors more than 7.75 cents per lunch.

Under the Discretionary Additional Payment Approach, sponsors would receive 7.75 cents per lunch unless their administrative budget or costs failed to justify this level. States would also be allowed to make additional payments to sponsors needing additional assistance. There would be no limit on the rate a State could provide any such sponsor.

Under the Assigned Additional Payment Approach, sponsors would receive 7.75 cents per lunch unless their administrative budget or costs failed to justify this level. States would also be allowed to make additional payments to sponsors needing additional assistance, but total reimbursement to these sponsors could not exceed 8.25 cents per lunch.

DEVELOPMENTAL PROJECTS

The Department will also consider several developmental projects in selected areas. The purpose of the projects would be to test the feasibility of requiring that State agencies vary levels of payments to certain categories of sponsors by certain specified amounts. Comments on the desirability of such projects are welcome.

FUNDING EVALUATIONS

Last year's regulations provided for FNS to conduct initial and mid-program evaluations of State administrative costs. The Department believes that these evaluations are still necessary but proposed regulations give FNS more latitude in determining when to conduct such evaluations. Programmatic evaluations should be an ongoing responsibility of FNS and the two proposed fiscal evaluations should be viewed as one component of the evaluation process.

FOOD SERVICE REQUIREMENTS

Supplemental meal. The Department has received a few suggestions that the supplemental meal, as currently structured is not adequately covered by existing reimbursement rates. The Department has also received suggestions in the past that the portion sizes for the supplemental meal may not be appropriate. The Department is not making any changes in the portion sizes of, or reimbursement rates for, the supplement as this time, but is seeking further comment on this matter. If public comment and the results of the Department's food cost study so indicate, the Department will seriously consider making appropriate changes in final regulations.

COMMENT PERIOD

The Department is providing for a 20-day comment period on these regulations. It is recognized that this period of time is shorter than that normally allotted but legislation mandates that final regulations be published by January 1. Administering agencies at all levels must have an adequate amount of time to plan and prepare for the summer program. A delay in the issuance of regulations results in severe timing problems and hence the Department believes that it is in the best interest of the program and that the public will not be adversely affected by this shortened period. This determination has been made by Gene P. Dickey, Deputy Administrator, Special Nutrition Programs, Food and Nutrition Service, USDA.

Accordingly, the Department is issuing a proposed Part 225 as follows:

PART 225—SUMMER FOOD SERVICE PROGRAM FOR CHILDREN

Subpart A—General

Sec.
225.1 General purpose and scope.
225.2 Definitions.
225.3 Administration.

Subpart B—State Agency Provisions

225.4 Procedures for approval of sponsors and sites.
225.5 Responsibilities of State agencies.
225.6 Program management and administration plan.
225.7 Payment and use of State administrative funds.
225.8 Payments to State agencies and use of Program funds.

Subpart C—Sponsor Provisions

225.9 Requirements for participation.
225.10 Food service requirements.
225.11 Food service management companies.
225.12 Program payments.
225.13 Program payments procedures.
225.14 Claims against sponsors.

Subpart D—Miscellaneous Provisions

225.15 Procurement provisions.
225.16 Prohibitions.
225.17 Free meal policy.
225.18 Other provisions.
225.19 Program information.

AUTHORITY: Sec. 2, Pub. L. 95-166, 91 Stat. 1325 (42 U.S.C. 1761); Sec. 7, Pub. L. 91-248, 84 Stat. 211 (42 U.S.C. 1759a).

Subpart A—General

§ 225.1 General purpose and scope.

This part announces the policies and prescribes the regulations under which the Secretary will carry out a Summer Food Service Program for Children to assist States through grants-in-aid to initiate, maintain, and expand nonprofit food service programs for children during the summer months and at other approved times. The food service to be provided under the program is similar to that provided under the National School Lunch and School Breakfast Programs and is intended to serve as a substitute for those programs for children who are on school vacation, except that it is primarily directed toward children from needy areas.

§ 225.2 Definitions.

(a) "Act" means the National School Lunch Act, as amended.

(b) "Administrative costs" means costs incurred by a sponsor related to planning, organizing, and managing a food service under the program (excluding interest costs and operating costs).

(c) "Advance payments" means financial assistance made available to a sponsor for its operating costs or administrative costs prior to the end of the month in which such costs will be incurred.

(d) "Areas in which poor economic conditions exist" means (1) the local areas from which a site draws its attendance in which at least 33⅓ percent of the children are eligible for free or reduced price school meals under the National School Lunch Program and the School Breakfast Program, as determined by information provided from departments of welfare, zoning commissions, census tracts, and recognized migrant organizations, by the number of free and reduced price lunches or breakfasts served to children attending public and nonprofit private schools located in the areas of program sites, or from other appropriate sources, or (2) an enrollment program in which at least 33⅓ percent of the children are eligible for free or reduced price school meals as determined by statements of eligibility based on the size and incomes of the families of the children enrolled.

(e) "Camps" means (1) residential summer camps which offer a regularly scheduled food service as part of an organized program for enrolled children and which serve up to four meals a day, and (2) nonresidential programs which offer a regularly scheduled organized cultural or recreational program for enrolled children and which serve such children four meals a day or three meals consisting of a breakfast, lunch and supper.

(f) "Children" means (1) persons 18 years of age and under, and (2) persons over 18 years of age who are determined by a State educational agency or a local public educational agency of a State to be mentally or physically handicapped and who participate in a public school program established for the mentally or physically handicapped.

(g) "Costs of obtaining food" means costs related to obtaining agricultural commodities and other food for consumption by children. Such costs may include, in addition to the purchase price of agricultural commodities and other food, the cost of processing, distributing, transporting, storing, or handling any food purchased for, or donated to, the Program.

(h) "Continuous school calendar" means a situation in which all or part of the student body of a school are on a vacation for periods of 15 continuous school days or more during the period October through April.

(i) "Department" means the U.S. Department of Agriculture.

(j) "Fiscal year" means the period beginning October 1 of any calendar year and ending September 30 of the following calendar year.

(k) "FNS" means the Food and Nutrition Service of the Department.

(l) "FNSRO" means the appropriate FNS Regional Office.

(m) "Food service management company" means a commercial enterprise or a nonprofit organization which contracts with a sponsor to manage any aspect of the food service. References to food service management companies in the Act and in this part shall include vendors which contract with a sponsor to prepare unitized meals, with or without milk.

(n) "Income accruing to the program" means all moneys (other than program payments) received by a sponsor for use in the program from Federal, State and local governments; from food sales to adults, and from any other source, including cash donations or grants.

(o) "Meals" means food which is served to children at a food service site at which children consume meals in a supervised setting.

(p) "Special account" means an account established by a sponsor for the purpose of receiving and disbursing funds for the program. Such account may be established by the sponsor in a bank, credit union, or other financial institution. Such account shall be established in the name of the sponsor and shall be separate from any other account of the sponsor. Such agreement shall cover the operation of the program during the period specified therein and may be

(iv) The simultaneous service of more than one meal to each child;

(2) The number of meals, by type, proposed to be served to children at

services to migrant communities in prior years. State agencies, when ap-

V 4 3 / 2 1 1 0 C 3 1 7 8

(o) "Meals" means food which is served to children at a food service site and which meets the nutritional requirements set out in this part.

(p) "Milk" means fluid types of pasteurized flavored or unflavored whole milk, lowfat milk, skim milk, or cultured buttermilk which meet State and local standards for such milk. In Alaska, Hawaii, American Samoa, Guam, Puerto Rico, the Trust Territory of the Pacific Islands, the Northern Mariana Islands, and the Virgin Islands of the United States, if a sufficient supply of such types of fluid milk cannot be obtained, reconstituted or recombined milk may be used. All milk should contain vitamins A and D at the levels specified by the Food and Drug Administration and consistent with State and local standards for such milk.

(q) "Needy children" means children from families whose income is at or below the applicable Secretary's Income Poverty Guideline for Determining Eligibility for Free and Reduced Price Meals.

(r) "OIG" means the Office of the Inspector General of the Department.

(s) "Operating costs" means the cost of operating a food service under the program, including (1) cost of obtaining food, (2) labor directly involved in the preparation and service of food, (3) cost of nonfood supplies, and (4) rental and use allowances of equipment and space, but excluding (i) the cost of the purchase of land, acquisition or construction of buildings, (ii) alteration of existing buildings, (iii) interest costs, (iv) the value of inkind donations, and (v) administrative costs; less income accruing to the program.

(t) "Private nonprofit" means tax exempt under the Internal Revenue Code of 1954, as amended.

(u) "Program" means the Summer Food Service Program for Children authorized by section 13 of the Act.

(v) "Program funds" means financial assistance made available to State agencies for the purpose of making program payments.

(w) "Program payments" means financial assistance in the form of startup payments, advance payments or reimbursement to sponsors for operating and administrative costs.

(x) "Rural" means any county which is not a part of a Standard Metropolitan Statistical Area as defined by the Office of Management and Budget.

(y) "Secretary" means the Secretary of Agriculture.

(z) "Session" means a specified period of time during which an enrolled group of children attend camp.

(aa) "Site" means a physical location at which a sponsor provides or will provide a food service for children and at which children consume meals in a supervised setting.

(bb) "Special account" means an account between applicable sponsors and food service management companies with a State or federally insured bank in which operating costs payments are deposited by the State agency and released only in accordance with the terms of the special account agreement.

(cc) "Sponsors" means public or private nonprofit (1) camps and (2) nonresidential institutions which provide a year round service to the community, or provide a food service for the children of migrant workers, or provide a food service for a significant number of needy children which would not otherwise have reasonable access to the program. Such camps and institutions shall develop special summer or school vacation programs providing food service similar to that available to children during the school year under the National School Lunch and School Breakfast Programs. (Sponsors are referred to in the Act as "service institutions.")

(dd) "Start-up payments" means financial assistance made available to a sponsor for administrative costs to enable it to effectively plan a food service and to establish appropriate management procedures therefor.

(ee) "State" means any of the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands of the United States, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Northern Mariana Islands.

(ff) "State agency" means the State educational agency or an alternate State agency that has been designated by the Governor or other appropriate executive or legislative authority of the State and approved by the Department to administer the program within the State.

§ 225.3 Administration.

(a) Within the Department, FNS shall act on behalf of the Department in the administration of the program.

(b) Within the States, responsibility for the administration of the program shall be in the State agency, except that FNSRO shall administer the program in any State where the State agency is not permitted by law or is otherwise unable to disburse Federal funds paid to it under the program to any sponsor in the State. Each State agency shall notify the Department by each November 1 as to whether or not it intends to administer the program.

(c) Each State agency desiring to take part in the program shall enter into a written agreement with the Department for the adminsitration of the program in the State in accordance with the provisions of this part. Such agreement shall cover the operation of the program during the period specified therein and may be extended by consent of both parties.

(d) When the Secretary determines that the State is not operating the program in accordance with the provisions of this part, he shall, through FNSRO, assume the administration of the program in the State as provided for in § 225.18(b).

(e) FNSRO shall, in the States in which it administers the program, assume all responsibilities of State agencies set forth in this part.

Subpart B—State Agency Provisions

§ 225.4 Procedures for approval of sponsors and sites.

(a) The State agency shall determine the eligibility of applicant sponsors applying for participation in the program in accordance with the applicant sponsor eligibility criteria outlined in § 225.9(a).

(b) The State agency shall not approve the application of any applicant sponsor, identifiable through its organization or principals as a sponsor which participated previously and was seriously deficient in its program operations. In the event that an applicant sponsor's application is denied, the State agency shall inform such applicant sponsor of the procedure to request a review of the denial. The official making the determination of denial must notify the applicant sponsor in writing stating all of the grounds on which the State agency based the denial. Serious deficiencies, which are grounds for nonapproval include, but are not limited to, any of the following:

(1) Noncompliance with the applicable bid procedures and contract requirements of program regulations;

(2) The submission of false information to the State agency;

(3) Failure to return to the State agency any startup or advance payments which exceeded the amount earned for serving eligible meals, or failure to submit all Claims for Reimbursement in any prior year: *Provided, however,* That failure to return any advance payments of Claims for Reimbursement which are under dispute from any prior year shall not be grounds for disapproval in accordance with this paragraph.

(4) Program violations at a significant proportion of the sites which include, but are not limited to, the following:

(i) Noncompliance with the between meal time requirements;

(ii) Failure to maintain adequate records;

(iii) Failure to adjust meal orders to conform to variations in the number of participating children;

(iv) The simultaneous service of more than one meal to each child;

(v) The claiming of program payments for meals not served to participating children;

(vi) Service of a significant number of meals which did not include required quantities of all meal components;

(vii) Excessive instances of off-site meal consumption;

(viii) Continued use of food service management companies that are in violation of health codes.

(c) Pending the outcome of a review of a denial of an application for program participation, the State agency shall proceed to approve other applicants in accordance with its responsibilities under paragraph (h) of this section, without regard to the application under review.

(d) The State agency shall not approve the application of any applicant sponsor which submits fraudulent information or documentation when applying for program pariticpation or knowingly withholds information which may lead to the disapproval of its application. Complete information regarding the disapproval of an applicant sponsor on the basis of fraudulent submission of information shall be submitted by the State agency to OIG.

(e) The State agency shall develop, in accordance with the requirements of this part and such other guidance as furnished by the Department, a site information sheet, on which applicant sponsors shall provide, for each site, information to demonstrate or describe:

(1) An organized and supervised system for serving meals to attending children;

(2) The type or types of meals to be served and the times of service;

(3) Arrangements, within acceptable standards prescribed by the State or local health authorities, for delivery and holding of meals until time of service, and if there are excess meals, arrangements for storing them until they are served;

(4) Arrangements for food service during periods of inclement weather;

(5) Access to a means of communication for making adjustments as needed in the number of meals delivered in accordance with the number of children attending daily at each site;

(6) The geographic area to be served by the site; and

(7) The percentage of children served by the site who meet the eligibility requirements for free or reduced price school meals.

(f) The State agency shall, when evaluating proposed sites, insure that:

(1) If not a camp, the proposed site serves an area in which poor economic conditions exist;

(2) The number of meals, by type, proposed to be served to children at the site does not exceed the number of children residing in the area to be served, or, if applicable, the number enrolled; and

(3) The area which the site proposes to serve is not or will not be served in whole or in part by another site, unless it can be demonstrated to the satisfaction of the State agency that each site will serve children not served by any other site in the same area for the same meal and that the total number of meals, by type, served to children at all sites does not exceed the number of children residing in the area.

(g) The State agency shall not approve any applicant sponsor to operate more than 200 sites or to serve an average daily attendance of more than 50,000 children unless it can demonstrate to the satisfaction of the State agency that it has the capability of managing a program of that size.

(h) The State agency shall use the following order of priority in approving sponsors to operate sites which propose to serve the same area or the same enrolled children:

(1) Applicant sponsors which are public or nonprofit private schools and other applicant sponsors which have demonstrated successful program performance in a prior year;

(2) Applicant sponsors which propose to prepare meals at their own facilities or which operate only one site;

(3) Applicant sponsors which propose to utilzed local school food facilities for the preparation of meals;

(4) Other sponsors which have demonstrated ability for successful program operations; and

(5) Applicant sponsors which plan to integrate the program with Federal, State, or local employment or training programs.

(i) State agencies may approve the application of an otherwise eligible applicant sponsor which does not provide a year-round service to the community which it proposes to serve under the program only if it is a residential camp, or an applicant sponsor which provides a food service for the children of migrant workers, or when a failure to do so would deny the program to an area in which poor economic conditions exist, or if a significant number of needy children will not have reasonable access to the program: *Provided, however,* That such an applicant sponsor shall not be approved to operate more than 50 sites. The State agency may approve applicant sponsors which provide a food service for the children of migrant workers to operate more than 50 sites if the State agency determines that such sponsors have adequate capabilities and facilities and have provided services to migrant communities in prior years. State agencies, when approving the applications of such applicant sponsors shall take particular care to insure that such applicant sponsors are timely in their program planning and thoroughly prepared to assume and carry out all program responsibilities.

(j) Applicant sponsors which qualify as camps shall be approved for reimbursement only for meals served free to children enrolled who meet the eligibility requirements for free and reduced price school meals.

§ 225.5 Responsibilities of State agencies.

(a) *State agency personnel.* Each State agency shall provide sufficient qualified consultative, technical, and managerial personnel to administer the program and monitor performance and to measure progress toward achieving program goals. The State agency shall assign specific program responsibilities to such personnel so as to insure that all applicable requirements under this part are met. All administrative personnel shall be employed and available for program duties at least 30 days prior to the State agency's sponsor application deadline date and all field staff personnel shall be employed and available at least 15 days prior to the beginning of program operations: *Provided, however,* That the State agency shall hire additional personnel subsequent to these dates if, due to unanticipated program growth or program irregularities, additional personnel are needed. State agencies may submit to FNSRO written requests for exceptions to these hiring dates. Such requests shall include information in sufficient detail for FNSRO to determine that the exception is necessary for and will not adversely affect optimal program administration and operation.

(b) *Program assistance.* Each State agency shall provide program assistance as follows:

(1) Each State agency shall visit, prior to the approval of the application, all applicant sponsors which have not participated in the program in the previous year and all applicant sponsors which participated in the previous year and have been determined by the State agency to need a preoperational visit. Grounds for such a visit include, but are not limited to, sponsors with sites which were terminated for cause in the previous year and sponsors which had sites in violation of the meal service requirements in the previous year. These visits shall be utilized to provide the State agency the opportunity to further assess the applicant sponsor's potential for successful program operations, assess information submitted on the application, and assure the State agency that the appli-

cant sponsor is aware of its responsibilities under the program.

pany, if applicable, promptly receive a copy of the review reports and are

(1) The sponsor shall provide to the food service management company a

specifications contained in the contract;

application deadline date: *Provided, however,* That the 30 days may be ex-

The service of supper shall begin no later than 6 p.m.: *Provided, however,*

V 4 3 / 2 1 1 0 C 3 1 7 8

cant sponsor is aware of its responsibilities under the program.

(2) Each State agency shall, prior to approval, visit each new proposed nonschool site located in cities whose total elementary and secondary public school enrollment exceeds 75,000 for the purpose of evaluating its suitability for the food service proposed.

(3) Each State agency shall, prior to approval of any site with a proposed average daily attendance of more than 300 children, visit each such site to evaluate its capability of serving the number of children expected: *Provided, however,* That the State agency may elect to not carry out such a preapproval evaluation if the site has been used under the program in a prior year and the State agency has documentation on file which supports the capability of the site and gives evidence of successful prior program operations at the site.

(4) Each State agency shall review during the first 4 weeks of operations, all sponsors which operate 10 or more sites, and, at a minimum, an average of 15 percent of the sites of such sponsors, to insure compliance with program regulations and with the Department's nondiscrimination regulations (Part 15 of this title) and other applicable instructions as issued by the Department.

(5) In addition to the review requirements described in paragraph (b)(4) of this section, each State agency which expects to receive more than $250,000 in State administrative funds shall meet additional review requirements for all sponsors which operate 10 or more sites and which are located in cities whose total elementary and secondary public school enrollment exceeds 75,000. These additional requirements shall be to conduct reviews of an average of 75 percent of nonschool sites, and 25 percent of school sites, during the first 4 weeks of operation. In determining which sites shall be reviewed under this paragraph and under paragraph (b)(4) of this section, the State agency shall consider, at a minimum, whether or not the site has been used in prior years, the performance of the site in prior years, the performance of other sites operated by the same sponsor in both prior years and the current year and the performance of the applicable sponsor in prior years and in the current year.

(6) Each State agency shall, in addition, review 80 percent of the remaining sponsors, and an average of 10 percent of the remaining sites of such sponsors, at least once during the period of program operations.

(7) In the conduct of reviews, each State agency shall develop a monitoring system to insure that sponsors, including site personnel, and the appropriate food service management company, if applicable, promptly receive a copy of the review reports and are promptly notified of violations which might result in a program disallowance. Sponsors and site personnel shall be afforded every opportunity to make necessary corrections in a timely manner. In cases where corrective action of sites is not taken in accordance with this paragraph, and such sites are canceled, each State agency shall insure that food service management companies are notified of all sites which are canceled within a reasonable time.

(8) Documentation of program assistance and results of such assistance shall be maintained on file by the State agency.

(9) Each State agency shall during the first 4 weeks of program operations, provide for inspections of all facilities in its State in which food is prepared to be served in the program. Funds provided for in § 225.8(i) may be used for this purpose.

(c) *Program availability.* Each State agency shall, by February 1 of each fiscal year, announce the purpose, eligibility criteria, and availability of the program throughout the State, through appropriate means of communication. As part of this effort, each State agency shall compile a listing of potential sponsors which have not previously participated in the program, and shall contact such potential sponsors. State agencies shall identify rural areas which qualify for the program and actively seek eligible applicant sponsors to serve such areas. States shall identify priority outreach areas in accordance with FNS guidance, for targeting outreach efforts in such areas.

(d) *Financial management system for sponsors.* Each State agency shall establish a financial management system which is in compliance with attachment G of the Office of Management and Budget Circular A-102, under which sponsors shall maintain and report the information required in this part. The system shall also be consistent with the cost principles found in Federal Management Circular 74-4 and any applicable instruction issued by FNS.

(e) *Payment of claims.* A State agency may make full or partial reimbursement upon receipt of a claim for reimbursement from a sponsor, but shall first make any necessary adjustments in payments.

(f) *Sponsor and food service management company contract.* Each State agency shall develop a standard form of contract for use by sponsors in contracting with food service management companies. The contract shall expressly and without exception provide that:

(1) The sponsor shall provide to the food service management company a list of State agency approved food service sites and shall notify the food service management company of all sites which have been approved or canceled subsequent to the submission of the initial approved site list. Such notification shall be provided within the time limits mutually agreed upon in the contract;

(2) The food service management company shall maintain such records (supported by invoices, receipts, or other evidence) as the sponsor will need to meet its responsibilities under this part, and shall report to the sponsor promptly at the end of each month, at a minimum;

(3) The food service management company shall have State or local health certification for the facility in which it proposes to prepare meals for use in the program and it shall insure that health and sanitation requirements are met at all times. In addition, the food service management company shall provide for meals which it prepares to be periodically inspected by the local health department or an independent agency to determine bacteria levels in the meals being served. Such levels shall conform to the standards which are applied by the local health authority with respect to the level of bacteria which may be present in meals served by other establishments in the locality. Results of such inspections shall be submitted to the sponsor and to the State agency;

(4) The meals served under the contract shall conform to the cycle menus and meal quality standards and food specifications approved by the State agency upon which the bid was based;

(5) The books and records of the food service management company pertaining to the sponsor's food service operation shall be available for inspection and audit by representatives of the State agency, of the Department, and the U.S. General Accounting Office at any reasonable time and place, for a period of 3 years from the date of receipt of final payment under the contract;

(6) The sponsor and the food service management company shall operate in accordance with current program regulations;

(7) The food service management company shall be paid by the sponsor for all meals delivered in accordance with the contract and this part, and shall not be paid for departures from the contract such as meals which are delivered to nonapproved sites or for meals which are delivered to approved sites outside of the agreed upon delivery time, are spoiled or unwholesome at the time of delivery, or do not otherwise meet the meal requirements and meal quality standards and food

specifications contained in the contract;

(8) Unitized meals shall be delivered in accordance with a delivery schedule prescribed in the contract;

(9) Increases and decreases in the number of meal orders shall be made by the sponsor, as needed, within a prior notice period mutually agreed upon;

(10) All meals served under the program shall meet the requirements of § 225.10;

(11) In cases of nonperformance or noncompliance on the part of the food service management company, the company shall pay the sponsor for any excess costs the sponsor incurs by obtaining meals from another source; and

(12) Each nongovernmental sponsor whose contract or aggregate amount of contracts with one food service management company exceeds $10,000 shall establish a special account for the deposit of payments by the State agency for operating costs. A separate special account as provided for in § 225.9(i) shall be established for each food service management company under contract with a sponsor.

(g) *Advance and startup payment procedures.* Each State agency shall inform sponsors of the procedure whereby, they may apply for advance program payments and advance administrative costs payments as provided for in § 225.13 and, where applicable, each State agency shall inform sponsors of the procedure whereby they may apply for startup payments provided for in § 225.12(c).

(h) *Use of onsite facilities or school food service facilities.* State agencies shall make a positive effort to encourage sponsors to use the sponsors' own facilities or the facilities of public or nonprofit private schools to the maximum extent feasible, in the preparation, service, and delivery of meals under the program.

(i) *Sponsor application deadline date.* Each State agency shall establish and inform all applicant sponsors of a deadline date for submission of a written application for participation in the program: *Provided, however,* That State agencies shall approve the application of an otherwise eligible applicant sponsor submitted after the date established by the State agency, when the failure to do so would deny the program to an area in which poor economic conditions exist or a significant number of needy children will not have reasonable access to the program. The State agency shall inform potential sponsors inquiring after the sponsor application deadline date of the possibility of approval if the sponsor qualifies under these terms. The State agency must act on all applications within 30 days after the sponsor application deadline date: *Provided, however,* That the 30 days may be extended upon approval by FNS. In the case of applicant sponsors which apply after the deadline date and qualify in accordance with the terms of this paragraph, the State agency shall act on such applications as soon as possible after receipt.

(j) *Meal service restriction.* (1) A State agency shall restrict to one meal service per day (i) any site determined to be in violation of the meal service requirements as set forth in this paragraph when corrective action is not taken within a reasonable time as determined by the State agency, and (ii) all sites under a sponsor if more than 20 percent of the sponsor's sites are determined to be in violation of the meal service requirements as set forth in this paragraph. If such action results in children not receiving any meals under the program, the State agency shall make every reasonable effort to locate another source of meal service for such children. In addition, the State agency shall not approve the service of more than one meal per day at any site unless each type of meal is delivered separately within 1 hour of the beginning of the meal service or facilities capable of holding hot or cold meals within the temperatures required by State or local health regulations are available at the site.

(2) Meals which may be served under the program shall be breakfast, lunch, supper, and supplemental food served between such other meals. Only camps may be approved to serve supplemental food and also participate in the special milk program (7 CFR Part 215), provided that those camps keep separate records for each program. Except for camps, sponsors shall be approved to serve only up to three meals a day at each site, provided that at least one of the three meals is a supplement. Residential camps shall be approved to serve up to four meals a day, and nonresidential camps shall be approved to serve four meals a day or three meals consisting of a breakfast, lunch, and supper, provided that camps have the administrative capability and where applicable, the food preparation and holding facilities, and provided that the service period of different meals does not coincide or overlap. No sponsor shall be reimbursed for meals served outside of the meals service limitations contained in the subparagraph. No sponsor shall be approved for more than two supplements a day.

(3) Three hours shall elapse between the beginning of one meal service, including supplements, and the beginning of another, except that 4 hours shall elapse between the service of a lunch and supper when no supplement is served between lunch and supper. The service of supper shall begin no later than 6 p.m.: *Provided, however,* That a State agency may consider a waiver of this requirement for extenuating circumstances. Such waivers shall be granted only when the State agency and the sponsor insure that special arrangements shall be made to monitor these sites. In no case may the completion of supper end later than 8 p.m. None of the preceding time restrictions of this subparagraph shall apply to residential camps. The duration of the meal service shall be limited to 2 hours for lunch or supper and 1 hour for all other meals. Meals served outside of the period of approved meal service shall not be eligible for program payments. Any permanent changes in meal service pereiods must be approved by the State agency. Each sponsor shall serve only the type or types of meals for which it is approved in its agreement with the State agency.

(k) *Records and reports.* (1) Each State agency shall maintain current accounting records of its program operations which will adequately identify funds authorizations, obligations, unobligated balances, assets, liabilities, income, and expenditures for administrative costs and operating costs. The records may be kept in their original form or on microfilm, and shall be retained for a period of 3 years after the date of submission of the final financial status report, except that, if audit findings have not been resolved, the records shall be retained beyond the 3-year period as long as required for the resolution of any issues raised by the audit. (2) No later than September 30 of each year, the State agency shall provide the Department with information on the scope of program operations within the State, including information on program levels in rural areas. (3) Each State agency shall report information on the use of program funds and on program operations to FNS on forms provided by FNS, as instructed by FNS.

(l) *Investigations.* Each State agency shall promptly investigate complaints received or irregularities noted in connection with the operation of the program, and shall take appropriate action to correct any irregularities. State agencies shall maintain on file all evidence relating to such investigations and actions. The Department may make investigations at the request of the State agency, or where the Department determines investigations are appropriate

(m) *Commodity distribution information.* A list of sponsors which are to receive food commodities, with accompanying information on the average daily number of eligible meals to be served by such sponsors, shall be prepared not later than June 1 of each

year by the State agency. Such a list shall contain only the names of spon-

agencies shall encourage sponsors to use small and minority-owned busi-

(5) State agencies shall provide FNS and OIG with full opportunity to con-

contracts between sponsors and food service management companies.

address or addresses of the company's food preparation and distribution facilities which will be used in the pro-

spection requirement if a facility was registered last summer and operated in accordance with program require-

V 4 3 / 2 1 1 0 C 3 1 7 8

year by the State agency. Such a list shall contain only the names of sponsors which will prepare the meals to be served at their sites and the names of sponsors which have entered into an agreement with a school or school district for the preparation of meals to be served under the program. If the State agency is other than the agency of the State which handles the distribution of food commodities donated by the Department, this information shall be forwarded to the agency of the State which handles the distribution of donated commodities. The State agency shall be responsible for promptly revising the information to reflect additions or deletions of sponsors and for providing such adjustments in participation data as are determined necessary by the State agency. Availability of commodites and other foods which are not donated commodities but are in plentiful supply shall be summarized and made available to all sponsors upon the approval of their application for participation.

(n) *Training.* Each State agency shall plan for and carry out program training for sponsors, food service management company respresentatives, and health inspectors which will participate in the program in that State. Each State agency shall, prior to program operations, insure that the sponsor's supervisory personnel responsible for the food service receive training in all necessary areas of program administration and operations. Such training shall be structured and scheduled to reflect the fact that individual sponsors or groups of sponsors require different levels and areas of program training. State agencies are encouraged to utilize sponsors which have previously participated in the program in such training, and to train site personnel regarding their responsibilities. Training should be made available at convenient locations. Each State agency shall make available, prior to the beginning of program operations, training in all necessary areas of program administration for representatives from all food service management companies and each health department which will participate in the program in the current year.

(o) *Program materials.* Each State agency shall develop and make available in a timely manner all necessary program materials so that applicant sponsors have sufficient time to adequately prepare for their participation in the program.

(p) *Procurement provisions.* State agencies shall require sponsors to adhere to the procurement provision set forth in § 225.15 in addition to any other procurement provisions contained in this part. In addition, State agencies shall encourage sponsors to use small and minority-owned businesses, as sources of supplies and services. The Department will provide guidance on technical and financial assistance available to such businesses.

(q) *Management evaluation and audits.* (1) Each State agency shall insure that the requirements of this part are met and upon approval of applicant sponsors' applications whose total claims for reimbursement are expected to exceed $50,000 shall provide those sponsors with an audit guide to be used in the conduct of the audit required by § 225.9(k) and any other guidance necessary to enable them to comply with the requirements set out in § 225.9(k). The audit guide developed by the State agency shall, at a minimum, contain the standards set forth in the audit guide issued by the Department for the program.

(2) In accordance with the plan submitted under § 225.6(a)(14), the State agency shall provide for audits, at least once every 2 years, of all sponsors within the State. The audit requirement outlined in § 225.5(q)(1) may be included by the State to meet a portion of the requirement contained in this section. In addition, any audit of an organization which is conducted in accordance with the program audit guide and includes the program covered by this part may be included to meet a portion of the audit requirement contained in this section. The State agency shall provide for audits of sponsors whose total claims for reimbursement are expected to be less than $50,000 and the cost of such audits shall be considered an allowable State administrative expense. In no case may States require that sponsors earning less than $50,000 pay for the cost of such audits, in whole or in part. These audits shall be conducted by State agency internal auditors, State Auditors General, State Comptrollers, other comparable independent State audit groups, Certified Public Accountants or State licensed public accountants.

(3) Each State agency shall coordinate its monitoring review findings under paragraph (b) of this section and the audit reports provided for under § 225.9(k). Each State agency shall insure that monitoring is conducted to result in a representative review of the sponsor's operations under the program.

(4) While OIG shall rely to the fullest extent feasible upon State-sponsored audits, it shall, whenever it considers necessary, (i) make audits on State-wide basis, (ii) perform on-site test audits, and (iii) review audit reports and related working papers of audits performed by or for State agencies.

(5) State agencies shall provide FNS and OIG with full opportunity to conduct management evaluations (including visits to sponsors) and audits of all operations of the State agency. Each State agency shall make available its records, including records of the receipts and expenditures of funds upon a reasonable request by FNS or OIG. OIG shall also have the right to make audits of the records and operations of any sponsor.

(6) The Department shall require State agencies to utilize statistical sampling procedures in audits, management evaluations, and other monitoring activities conducted in a select number of large cities that shall be chosen by the Department. State agencies may elect to utilize statistical sampling procedures in other areas. Such statistical sampling must be conducted in accordance with guidelines issued by the Department. The Department will provide training on these procedures to all State agencies, as requested. Whenever statistical sampling procedures are used, State agencies shall establish a system for prompt communication of adverse findings to sponsors and for corrective action by sponsors. State agencies that are required to use statistical sampling shall also consider sampling results as one factor in the settlement of claims. Greater weight should generally be given sampling results, when assessing claims, in instances where a sponsor has failed to take corrective action, after being notified of the results and their potential consequences, than in instances where a sponsor has acted promptly to correct its deficiencies.

(7) Use of program audit guide available from OIG is encouraged. When this guide is utilized, OIG will coordinate its audits with State-sponsored audits to form a network of intergovernmental audit systems.

(8) In conducting management evaluations or audits for any fiscal year, the State agency, FNS or OIG may disregard overpayment which does not exceed $35 or, in the case of State agency administered programs, does not exceed the amount established under State law, regulations, or procedures as a minimum for which claims will be made for State losses generally. No overpayment shall be disregarded, however, where there are unpaid claims for the same fiscal year from which the overpayment can be deducted, or where there is substantial evidence of violation of criminal law or civil fraud statutes.

(r) *Food specifications and meal quality standards.* Each State agency shall, with the assistance of the Department, develop and make avialable to all sponsors minimum food specifications and model meal quality standards, which shall become part of the

contracts between sponsors and food service management companies.

(s) *Food quality and preparation facility inspection procedures.* Each State agency shall, with the funds authorized in § 225.8(i), establish a procedure for inspections of food preparation facilities and food service sites. The procedures for carrying out work such as inspections and testing shall be consistent with procedures used by local health authorities. Copies of the results of the inspections of the facilities of food service management companies shall be provided to the company, the sponsor, and the State agency.

(t) *Food service management company registration.* (1) Each State agency shall by February 1 provide to all food service management companies which participated in the program in either of the prior years in that State a notification of mandatory registration. Such notification shall contain at a minimum (i) a statement of the requirement for registration with the State agency as a prerequisite to participation in the program during the applicable fiscal year, (ii) a summary of those items which are required to be submitted in the application for registration as set forth in paragraph (u)(2) of this section, (iii) an enumeration of the specific criteria developed by the State agency upon which registrant eligibility shall be based, and (iv) other relevant information necessary to make application for registration. In addition, each State agency shall, by the same date, issue through the appropriate media a notification of mandatory registration and information necessary to make application for registration.

(2) By March 15 each food service management company which desires to participate in the program within the State during such fiscal year shall submit an application for registration to the State agency. At a minimum, registration shall require (i) submission of name and mailing address and any other names under which such food service management company presently or in the past 2 years has marketed its services, (ii) a certification that the food service management company meets applicable State and local health, safety, and sanitation standards, (iii) disclosure of past and present company owners, directors and officers, and their relationship, if any, to any sponsor or food service management company which participated in the program in the past 2 years, (iv) records of contract terminations, disallowances, and health, safety, and sanitation code violations related to prior program participation during the past 2 years, (v) records of any other contract terminations and health, safety, and sanitation code violations during the past 2 years, (vi) the address or addresses of the company's food preparation and distribution facilities which will be used in the program and the local officials responsible for the operation of such facilities, (vii) the number of meals which may be prepared in each preparation facility in a 24-hour period for use in the program, (viii) a certification that the food service management company will operate in accordance with current program regulations, and (ix) a statement that the food service management company understands that it will not be paid for meals which are delivered to nonapproved sites or for meals which are delivered to approved sites outside of the agreed upon delivery time or meals that do not meet the meal requirements and food specifications contained in the contract between the sponsor and the food service management company.

(3) No food service management company shall be registered by the State agency if the State agency determines that the company lacks the administrative and financial capability to perform under the program or if it is identifiable through its organization or principals as a food service management company which participated in the program during any previous year and was seriously deficient in its program operation. Serious deficiencies which are grounds for nonregistration include, but are not limited to, any of the following:

(i) Noncompliance with the applicable bid procedures, contract requirements, or program regulations;

(ii) Submission of false information to the State agency;

(iii) Failure to conform meal deliveries to meal orders;

(iv) Delivery of a significant number of meals which do not meet contract requirements;

(v) Failure to maintain adequate records;

(vi) Significant health code violations which were not corrected upon reinspection;

(vii) Failure to deliver meals; or

(viii) The conviction of any officer, owner, partner, or manager of the company for a crime in connection with a prior program operation.

(4) The State agency shall provide for inspections prior to registration of all food service management companies' food preparation facilities listed on the applications for registration, except those located outside the State. The State agency shall promptly notify FNSRO of the name and location of any out-of-State facility, and FNSRO shall insure that such facility is inspected prior to registration. The purpose of the inspection is to evaluate each facility's suitability for preparation of meals for use in the program. The State agency may waive this inspection requirement if a facility was registered last summer and operated in accordance with program requirements.

(5) The State agency shall notify in writing each food service management company which applied for registration of its determination on the application within 30 days after receipt of the complete application. The State agency shall inform any food service management company whose application for registration has been denied of the procedures to request a review of the denial as provided for in paragraph (w) of this section. The official making the determination of denial must notify the food service management company in writing, stating all the grounds on which the State agency based the denial.

(6) By April 15 of the current year, each State agency shall forward to the Department, on a form provided by FNS, information on all food service management companies which applied for registration to the State agency and their registration status. The Department shall allow any food service management company to review any information concerning that company which was submitted to FNS as required by this paragraph.

(7) A State agency shall consider a food service management company's application for registration submitted after March 15 of the current year, if the State agency determines that the lack of registration could result in an area in which poor economic conditions exist not being served or a significant number of needy children not having reasonable access to the program.

(8) Each State agency shall require food service management companies submitting applications for registration to certify that the information submitted on the form is true and correct and that the food service management company is aware that misrepresentation may result in prosecution under applicable State and Federal statutes.

(u) *Bid opening monitoring.* Each State agency shall have a representative present at all procurement bid openings of sponsors which expect to receive more than $100,000 in program payments.

(v) *Sponsor certifications.* Each State agency shall require applicant sponsors submitting program applications, site information sheets, program agreements or claims for reimbursement, and sponsors requesting advance payments, to certify that the information submitted on these forms is true and correct and that the sponsor is aware that deliberate misrepresentation or withholding of information may result in prosecution under applicable State and Federal statutes.

(w) *Sponsor and food service management company hearing procedures.* (1) Each State agency shall establish a

of this procedure State agencies shall require each sponsor to submit a detailed administrative budget which the

State during the prior fiscal year, or, 80 percent of that obtained by applying the formula to the estimated

V 4 3 / 2 1 1 1 0 C 3 1 7 8

(w) *Sponsor and food service management company hearing procedures.* (1) Each State agency shall establish a procedure to be followed by an applicant requesting a review of a denial of an applicant sponsor's application for participation, a sponsor's approved level of administrative costs, a denial of a request by a sponsor for an advance payment, a denial of a claim by a sponsor for reimbursement, a denial of a sponsor's site or a denial of a food service management company's registration.

(2) At a minimum the procedure shall provide that:

(i) The denied applicant be advised in writing of the grounds upon which the State agency based the denial;

(ii) The denied applicant be advised in writing that the request for review must be made within a specified time. The State agency may establish this period of time at not less than 1 week nor more than 2 weeks from the date of receipt of the letter of denial;

(iii) The denied applicant be afforded the opportunity to review any information upon which the denial was based;

(iv) The hearing official be an official other than the one directly responsible for the original determination;

(v) The review be held within 2 weeks of the date of the receipt of the request for review;

(vi) The applicant may refute the charges contained in the letter of denial either in person or by mailing written documentation to the reviewing official. The applicant may retain legal counsel, or may be represented by another person;

(vii) Within 3 days after the applicant's hearing, or within 3 days after receipt of written documentation, the reviewing official must make a determination based on a full review of the administrative record; and

(viii) The State agency must inform the applicant of the determination of the review by certified mail, return receipt requested. The determination by the State reviewing official is the final administrative determination to be afforded an applicant.

(x) *Advance payment estimates.* Each State agency shall, when determining the amount of advance operating costs payments to be made to each sponsor under § 225.13(d) make the best possible estimate based on the amount requested by the sponsor and any other data available to the State agency.

(y) *Sponsor's budget approval process.* Each State agency shall, based on guidance provided by the Department, develop a budget approval procedure for the purpose of determining amounts of administrative costs payments to be made to sponsors. As part of this procedure State agencies shall require each sponsor to submit a detailed administrative budget which the State shall evaluate to determine the level of administrative payments for which the sponsor is eligible. State agencies shall vary the levels of such payments taking into consideration (1) whether or not proposed administrative expenses are both allowable and reasonable; (2) variables such as the proposed number of sites, the location of sites, whether food will be prepared onsite or by a food service management company, and any other factors which are unique to a sponsor or group of sponsors, and (3) the availability of funding from other sources. State agencies shall be required to the extent practicable and within the funding limitations found in § 225.8(c) to meet the reasonable and necessary administrative expenses of each sponsor as set forth in the sponsor's budget. State agencies which fail to vary the levels of administrative costs payments to sponsors shall provide justification to FNS that the administrative expenses among sponsors within the State do not differ.

§ 225.6 Program management and administration plan.

(a) Not later than February 15 of each fiscal year, each State agency shall submit to FNSRO a program management and administration plan for that fiscal year. The plan shall have the original signature of the chief official (Commissioner or Superintendent) of the State agency. Approval of the plan by FNS shall be a prerequisite to the payment of program funds, or to the donation by the Department of any commodities for use in the program. The plan shall include the following information at a minimum:

(1) How the State plans to use program funds and funds from within the State to the maximum extent practicable to reach needy children, including needy children in rural areas. The State should clearly define its methods for assessing need, the total number of children reached by the program last year, its priority areas for program expansion, and its plans and schedule for informing potential sponsors of the availability of the program;

(2) Estimated number and type of sponsors expected to participate and estimated number of sites and average daily attendance, and a description of the estimating methods used, including data on the number of sponsors which participated in the prior year;

(3) Estimated amount of program funds, by month, needed for operating costs payments to sponsors;

(4) Estimated amount of program funds, by month, needed for administrative costs payments to sponsors;

(5) The State's plans and schedule for providing technical assistance and training for sponsors, food service management company representatives and health department officials, including the number of such training sessions planned and number of reviews planned, including data on the number of reviews conducted in the prior fiscal year;

(6) The State agency budget, by month and function on the use of State administrative funds, including, but not limited to staffing (part-time and full-time), salaries, travel and per diem;

(7) The State's plan to comply with the Department's standards for disbursing administrative costs payments to sponsors;

(8) The actions to be taken by the State agency to maximize the use of onsite meal preparation and the use of school food service facilities;

(9) The actions to be taken by the State to insure compliance with the requirements of the Department's regulations respecting nondiscrimination (7 CFR Part 15);

(10) The States plan for monitoring and inspecting sponsors, sites, and food service management companies and for insuring that such companies do not enter into contracts for more meals than they can provide effectively and efficiently;

(11) The State's plan for timely and effective action on program violations;

(12) The State's plan and schedule for submission and approval of sponsor applications;

(13) The State's plan for determining the amounts and timing of program payments to sponsors and for disbursing such payments;

(14) The State's plan for insuring fiscal integrity by auditing sponsors as provided under § 225.5(q), including data on the number of audits performed in the prior fiscal year;

(15) The State's plan and procedure for registering food service management companies;

(16) The State's procedures for granting a hearing and prompt determination to any sponsor wishing to appeal a State's ruling denying its application for program participation, its site participation, its approved level of administrative costs, program advance payments, or program reimbursement and the State's procedure for granting a hearing and prompt determination to any food service management company wishing to appeal a State's ruling denying the food service management company registration in the State;

(17) The State's plan for utilizing the funds provided for under § 225.8(i) to provide for health inspections and meal quality tests, including the estimated number and frequency of such inspections and tests and a description of the arrangements made by the State with the agencies which will perform these services;

(18) The amount of non-Federal funds made available to the State through direct State appropriations for the program;

(19) An explanation of significant deviations in last year's actual program operations and administration from that proposed in the plan for last year; and

(20) The State's procedures for soliciting and insuring that timely coments or recommendations made by interested parties regarding this plan receive full consideration.

(b) The State agency shall give the Governor, or his delegated agency, the opportunity to comment on the relationship of the program management and administration plan to comprehensive and other State plans and programs and to those of affected areawide or local jurisdictions. A period of 45 days from the date of receipt of the program management and administrtion plan shall be afforded to make such comments.

(c) All plans shall be approved or acted on by March 15, or if it is submitted late, within 30 days following receipt of the plan. In cases where the plan initially submitted is not approved, the State agency and the approval authority shall work together to insure that changes to the plan, in the form of amendments, shall be submitted so that the plan shall be approved within 60 days following the initial submission of the plan.

§ 225.7 Payment and use of State administrative funds.

(a) For each fiscal year, the Secretary shall pay to each State agency for administrative expenses incurred in the program an amount equal to (1) 20 percent of the first $50,000 in program funds properly payable to the State in the preceding fiscal year; (2) 10 percent of the next $50,000 in program funds properly payable to the State in the preceding fiscal year; (3) 5 percent of the next $100,000 in program funds properly payable to the State in the preceding fiscal year; and (4) 2 percent of any remaining funds properly payable to State in the preceding fiscal year: *Provided, however,* That FNS may make appropriate adjustments in the level of State administrative funds to reflect changes in program size from the preceding fiscal year as evidenced by information submitted in the State program management and administration plan and any other information available to FNS.

(b) State administrative funds paid to any State shall be used by State agencies to employ personnel, including travel and related expenses, and to supervise and give technical assistance to sponsors in their initiation, expansion, and conduct of any food service for which program funds are made available. State agencies may also use administrative funds for such other administrative expenses as set forth in their approved program management and administration plan.

(c) Not later than October 1 of each fiscal year, the Secretary shall make available to each State agency by letter of credit an initial allocation of State administrative funds for use in the fiscal year beginning on that October 1 and in an amount not to exceed one-third of the State administrative funds which are determined in accordance with the formula set forth in paragraph (a) of this section. For States which did not receive any program funds during the fiscal year immediately preceding the fiscal year for which the initial allocation is being made, the amount to be made available by October 1 of each fiscal year shall be determined by the Department.

(d) An additional amount of State administrative funds shall be made available upon the receipt and approval by FNS of the State's program management and administration plan. The amount of such funds, plus the initial allocation, shall not exceed three-fourths of the State administrative funds which are determined in accordance with the formula set forth in paragraph (a) of this section and based on the estimates set forth in the approved program management and administration plan.

(e) The balance of State administrative funds shall be paid to each State agency as soon as practicable after the conduct of the second funding assessment provided for in paragraph (g) of this section, and shall be in an amount equal to that obtained by applying the formula set forth in paragraph (a) of this section to the State's actual program size as determined by information obtained during the second funding assessment, less the amounts paid under paragraphs (c) and (d) of this section. As provided for in paragraph (g) of this section, further adjustments in the levels of State administrative funding paid or payable to a State may be made.

(f) Notwithstanding the levels of payments provided for in this section, each State agency shall at the time FNS approves the State's management and administration plan, be assured of receiving State administrative funding in an amount equal to the lesser of 80 percent of that obtained by applying the formula set forth in paragraph (a) of this section to the total amount of program payments made within the State during the prior fiscal year, or, 80 percent of that obtained by applying the formula to the estimated amount of program funds as contained in the management and administration plan. The State agency shall be assured that it will receive no less than these levels unless FNS determines that the State agency has failed or is failing to meet its responsibilities as contained in this part.

(g) FNSRO shall at the times it deems most appropriate conduct assessments of the need for program and State administrative funding within each State agency. At a minimum, such funding assessments shall be made at least twice during each fiscal year. The first of these assessments shall be conducted prior to the beginning of sponsor operations when FNSRO determines that there is adequate information available at the State agency upon which a reasonable projection of program size can be made. Based on information obtained during the initial assessment, FNS may make adjustments in the level of State administrative funding paid or payable to the State agency to reflect changes in the size of the State's program as compared to that contained in its management and administration plan. The second assessment shall be conducted at some time during the period of program operations, but not later than August 1, or when information is available on the actual size of program operations. Immediately following such assessment, any remaining payment of State administrative funds shall be made to the State agency. Such payment may reflect adjustments in the level of State administrative funding, based on the information collected in the second assessment. FNS shall not decrease the amount of a State's administrative funds unless the State did not make reasonable efforts to administer the program as it proposed in its management and administration plan, or unless the State incurred expenses that were not necessary.

(h) In no event may the sum of the amounts properly payable under this section for a fiscal year exceed the total amount of expenditures incurred by the State agency for its administrative costs in the same fiscal year. Each State agency shall report to FNS information on the use, in the prior year, of program funds and State administrative funds, on a form provided by FNS, not later than November 30 of each fiscal year. FNS shall make, prior to November 15 of each fiscal year, any adjustments necessary in the letter of credit to reflect actual expenditures in the prior fiscal year.

§ 225.8 Payments to State agencies and use of Program funds.

(e) The Secretary shall make available any remaining program funds due,

trative and operating budget, staffing and monitoring plan.

(e) Each applicant sponsor shall

agreements with the Department. Such agreements shall provide that the sponsor shall:

(10) Purchase, in as large quantities as may be efficiently utilized in the program, foods designated as plentiful

V 4 3 / 2 1 1 0 OCT 31 1978

§ 225.8 Payments to State agencies and use of Program funds.

(a) Upon approval of the State's program management and administration plan, the Secretary shall make available by letter of credit to the State agency program funds to be used to make start-up payments, where applicable, to sponsors as provided for in § 225.12(c).

(b) Not later than April 15, May 15, and July 1 of each fiscal year the Secretary shall make available to each State agency by letter of credit program funds to be used by the State agency to make advance operating costs payments to sponsors in the months for which letter of credit is issued. The amount of each of these payments shall be equal to 65 percent of the amount derived by multiplying the number of operating days in the month times the average daily attendance by meal type as estimated in the State's approved program management and administration plan, times the maximum allowable rates payable to sponsors for operating costs payments as set forth in § 225.12(e).

(c) Not later than April 15, May 15, and July 1 of each fiscal year the Secretary shall make available, by letter of credit, program funds to be used by the State agency to make advance administrative costs payments to sponsors. The amount of each of these payments shall be equal to one-third of the sum of the products obtained by multiplying: the estimated nuimber of breakfasts times 3.75 cents; the estimated number of lunches times 7.25 cents; the estimated number of suppers times 7.25 cents; and the estimated number of supplemental meals times 2.00 cents. The estimated number of meals shall be those which are contained in the approved program management and administration plan. FNS may make appropriate changes in the amounts of these payments based on information obtained during the conduct of the funding assessments provided for in § 225.7(g) and any other information available to FNS upon which determinations as to actual program size may be made.

(d) For sponsors which operate under a continuous school calendar, the Secretary shall make available program funds by letter of credit to the State agencies to make advance payments to sponsors in an amount equal to the amount needed by the State agencies to make advance program payments and advance administrative costs payments to such sponsors, as set forth in the State's approved program management and administrative plan, on the first day of the month prior to the month during which the food service will be conducted.

(e) The Secretary shall make available any remaining program funds due, no later than 60 days following receipt of valid claims from sponsors by the State agency. Any funds advanced to a State agency for which valid claims have not been established within 180 days after the sponsor's operation shall be deducted from the next monthly payment to the State.

(f) Program funds shall be used by State agencies to make program payments to sponsors in connection with meals served to children in accordance with the provisions of this part.

(g) Each State agency shall release to FNS any program funds which it determines are unobligated as of Septemgber 30 of each fiscal year. Release of funds by the State agency shall be made as soon as practicable, but in no event later than 30 days following demand by FNS, and shall be accomplished by an adjustment in the State agency's letter of credit.

(h) The State agency may use in carrying out special developmental projects an amount up to 1 percent of program payments made in any fiscal year: *Provided, however,* That such projects have been included in the State's program management and administration plan and have been approved in writing by FNS.

(i) By April 15 of each fiscal year, the Secretary shall make available by letter of credit to each State agency an additional amount equal to 1 percent of program funds estimated to be needed by the State agency for program payments in the State's approved program management and administration plan and any amendments thereto for the current fiscal year. These funds shall be used solely to enable State or local health departments of other governmental agencies charged with health inspection function, to carry out health inspections and meal quality tests: *Provided, however,* That, if such agencies cannot perform such inspecitons or tests, the State agency may use such funds to contract with an independent agency to conduct either the inspection or the meal quality tests, or both. An adjustment may be made in the amount provided for in this paragraph based on the evaluation required in § 225.7(e) if such an adjustment is warranted. Program funds so provided but not expended or obligated shall be returned to the Department by September 30 of the same fiscal year.

Subpart C—Sponsor Provisions

§ 225.9 Requirements for participation.

(a) No applicant sponsor shall be eligible to participate in the Program unless it:

(1) Demonstrates financial and administrative capability for program operations and accepts final financial and administrative responsibility for total program operations at all sites at which it proposes to conduct a food service;

(2) Has not been seriously deficient in operating the Program in prior years;

(3) Will conduct a regularly scheduled food service for children from areas in which poor economic conditions exist or qualifies as a camp;

(4) Has adequate supervisory and operational personnel for overall monitoring and management of each site, including adequate personnel to visit all sites at least once in the first week of operation under the program, to promptly take such actions as are necessary to correct deficiencies found at the time of the initial visit, to review food service operations at every site at least once during the first 4 weeks of program operations, and thereafter to maintain a reasonable level of site monitoring. During these visits and reviews a monitoring form developed by the State agency shall be completed by the monitor;

(5) Provides an ongoing year-round service to the community which it proposes to serve under the program except as provided for in § 225.4(i);

(6) Certifies that all sites have been visited and have the capability and the facilities for the meal service planned for the number of children anticipated to be served;

(7) Is a public or private nonprofit entity;

(8) If not a camp, provides documentation that its food service will serve children from an area in which poor economic conditions exist. If a camp, certifies that it will collect family-size and income information to support its Claim for Reimbursement; and

(9) If a summer school, is open to serve children in addition to those enrolled in the accredited school program or is a school serving children outside of the summer school hours.

(b) Applicant sponsors shall make written application to the State agency for participation in the Program as sponsors. Such application shall be made on a timely basis in accordance with the requirements of § 225.5(i).

(c) Each applicant sponsor shall submit, as part of the application, a site information sheet, as developed by the State agency, for each site where a food service operation is proposed.

(d) Applications shall include information in sufficient detail to enable the State agency to determine whether the applicant sponsor meets the criteria for participation in the program as set forth in paragraph (a) of this section and the extent of program payments needed, including requests for advance payments and start-up payments, if applicable, and administrative and operating budget, staffing and monitoring plan.

(e) Each applicant sponsor shall submit to the State agency, as part of the application for participation, a complete administrative budget for State agency review and approval. The budget shall contain a detailed itemization of the projected administrative expenses which a sponsor expects to incur during the operation of the Program, and shall include information in sufficient detail to enable the State agency to effectively determine the amount of administrative moneys needed by a sponsor to effectively and efficiently operate under the program. A sponsor's approved administrative budget shall be subject to subsequent review by the State agency for adjustments in projected administrative costs.

(f) Each applicant sponsor shall submit to the State agency, along with its application, a plan for and a synopsis of its invitation to bid for food service, if a bid is required under § 225.11, and a copy of its letter of engagement with a certified public accountant or an independent State or local government accountant if required under paragraph (k) of this section. In addition, the selected accountant shall within the first 2 weeks of operation under the Program, submit a copy of the management letter to the sponsor and to the State agency.

(g) Each applicant sponsor, except a camp, shall submit, along with its site information sheet, documentation supporting the eligibility of each site as serving an area in which poor economic conditions exist. For those sites at which applicant sponsors will serve children of migrant workers, the documentation requirement may be met by providing the State agency with data from a recognized migrant organization, which supports eligibility for those children as a group. When a sponsor proposes to serve a site which it served in the previous year, documentation from the previous year may be used to support the eligibility of the site. Therefore, for such sites applicant sponsors shall only be required to obtain new documentation every other year. Camps shall submit to the State agency, prior to filing their claims for reimbursement for each session or at such time as specified by the State agency, family-size and income information which documents the number of children enrolled in each session whose family incomes meet the eligibility requirements for free or reduced price school meals.

(h) Sponsors approved for participation in the Program shall enter into written agreements with the State agency, or in those States in which FNSRO administers the program, sponsors shall enter into written agreements with the Department. Such agreements shall provide that the sponsor shall:

(1) Operate a nonprofit food service during any period from May through September for children on school vacation or at some other time or times during the year for children on school vacation under a continuous school calendar system;

(2) Serve meals which meet the requirements and provisions set forth in § 225.10 during a period designated as the meal service period by the sponsor, and serve the same meals to all children;

(3) Serve meals without cost to all children, except that camps may charge for meals served to children who are not eligible for free or reduced price school meals;

(4) Issue a policy statement in accordance with § 225.17;

(5) Hold training sessions for its administrative and site personnel with regard to program duties and allow no site to operate until site personnel have attended such training sessions. Training of site personnel, at a minimum, shall include: purpose of the program, site eligibility, recordkeeping, site operations, meal pattern requirements, and duties of a monitor. Each sponsor shall ensure that its administrative personnel attend State agency training provided to sponsors under § 225.5(n) and sponsors shall provide training throughout the summer to ensure that administrative and site personnel are thoroughly knowledgeable in all requisite areas of program administration and operation and are provided with sufficient information to enable them to carry out their program responsibilities;

(6) Provide for an audit under any program agreement for which it may receive over $50,000 in program payments, as outlined in § 255.9(k);

(7) Claim reimbursement only for the type or types of meals specified in the agreement and served without charge to children at approved sites during the approved meal service period; except that camps shall claim reimbursement only for the type or types of meals specified in the agreement and served without charge to children who are eligibie for free or reduced price school meals. No permanent changes may be made in the time of any meal service period until such changes are approved by the State agency;

(8) Submit claims for reimbursement in accordance with procedures established by the State agency, and those stated in § 225.13(a);

(9) Maintain, in the storage, preparation and service of food, proper sanitation and health standards in conformance with all applicable State and local laws and regulations;

(10) Purchase, in as large quantities as may be efficiently utilized in the program, foods designated as plentiful by the State agency or the Department;

(11) Accept and use, in as large quantities as may be efficiently utilized in the program, such foods as may be offered as a donation by the Department;

(12) Have access to facilities necessary for storing, preparing, and serving food;

(13) Maintain a financial management system as prescribed by the State agency;

(14) Maintain on file documentation of site visits in accordance with paragraph (a)(4) of this section;

(15) Upon request, make all accounts and records pertaining to the Program available to State, Federal, or other authorized officials for audit or administrative review, at a reasonable time and place. Such records shall be retained for a period of 3 years after the end of the fiscal year to which they pertain, except that, if audit findings have not been resolved, the records shall be retained beyond the 3-year period as long as required for the resolution of any issues raised by the audit; and

(16) Maintain children on site while meals are consumed.

(i) In addition to the provisions described in paragraph (h) of this section, all agreements between State agencies and sponsors shall provide that all nongovernmental sponsors whose contract or aggregate amount of contracts with one food service management company exceeds $10,000 shall agree to set up a special account with a State or federally insured bank for the deposit of program payments for operating costs payable to the sponsor by the State. The special account agreement must specify that any disbursement of monies from the account must be authorized by both the sponsor and the food service management company. The special account agreement may contain other terms as are agreed to by both sponsor and food service management company, *Provided, however,* That such terms are not inconsistent with the terms of the contract between the sponsor and the food service management company. A copy of the special account agreement shall be submitted to the State agency and another copy maintained on file by the sponsor. Any charges made by the bank for the account described in this section shall be considered an allowable sponsor administrative cost.

(j) Upon notificiation of their approval, sponsors selected for participation in the program shall submit evidence to the State agency that they have advised the appropriate health

department of their intention to provide a food service during a specific

(i) One-half pint (1 cup) of milk as a beverage,

is used in the preparation of the components of all meals. In addition, the

food service management company shall remain responsible for assuring

unless such special requirements are

shall be sufficient grounds for the State agency to terminate participation by the sponsor in accordance with

V 4 3 / 2 1 1 0 C 3 1 7 8

department of their intention to provide a food service during a specific period at specific sites. Such evidence shall be in the form of a letter to the health department.

(k) Each sponsor whose total program payments under any Program agreements are expected to exceed $50,000 shall have an audit conducted of its program claims and the supporting documentation for those claims by an independent certified public accountant or an independent State or local government accountant and shall submit to the State agency a copy of the letter of engagement with the accounting firm or individual which is to conduct the audit. The sponsor's final claim for reimbursement under the agreement shall not be eligible for payment until the audit has been completed and the results have been reviewed by the State agency. The cost of the audit may be considered an administrative cost. All such audits shall be subject to review by the Department.

(l) Sponsors shall not claim reimbursement under Parts 210, 215, 220, or 226 of this chapter, or any other federally funded program for meals served under the program.

(m) Each sponsor shall, to the maximum extent feasible, utilize either its own food service facilities, or obtain meals from a school food service facility. If the sponsor obtains meals from a school food service facility the applicable requirements of this part shall be embodied in a written agreement between the sponsor and the school.

(n) Sponsors shall operate the food service in accordance with the provisions of this part and any instructions and handbooks issued by FNS under this part or issued by the State agency which are not inconsistent with the provisions of this part.

§ 225.10 Food service requirements.

(a) Except as otherwise provided in this section and any appendices to this part, each meal served in the program shall contain, as a minimum, the indicated food components:

(1) A breakfast shall contain:

(i) One-half pint (1 cup) of milk as a beverage or on cereal or used in part for each purpose,

(ii) One-half cup serving of fruit or vegetable, or both or full-strength fruit or vegetable juice, and

(iii) One slice of whole-grain or enriched bread; or an equivalent quantity of cornbread, biscuits, rolls, muffins, etc., made of whole-grain or enriched meal or flour; or ¾ cup (volume) or 1 ounce (weight), whichever is less, of whole-grain or enriched or fortified cereal, or an equivalent quantity of any combination of these foods.

(2) A lunch or supper shall contain:

(i) One-half pint (1 cup) of milk as a beverage,

(ii) Two ounces (edible portion as served) of cooked lean meat, poultry, or fish; or 2 ounces of cheese; or one egg; or ½ cup of cooked dry beans or peas; or 4 tablespoons of peanut butter; or an equivalent quantity of any combination of the above-listed foods. To be counted in meeting this requirement, these foods must be served as a main dish or in a main dish and one other menu item,

(iii) A three-fourths cup serving consisting of two or more vegetables or fruit, or both. Full-strength vegetable or fruit juice may be counted to meet not more than one-fourth cup of this requirement,

(iv) One slice of whole-grain or enriched bread, or an equivalent quantity of cornbread, biscuits, rolls, muffins, etc., made of whole-grain or enriched meal or flour.

(3) Supplemental food shall contain two of the following four components:

(i) One-half pint (1 cup) of milk,

(ii) One ounce of meat or meat alternate,

(iii) Eight fluid ounces of full-strength fruit or vegetable juice (juices shall not be served when milk is served) or one cup of fruit or vegetable,

(iv) One slice of whole-grain or enriched bread, or an equivalent quantity of cornbread, biscuits, rolls, muffins, etc., made of whole-grain or enriched meal or flour; or three-fourths cup (volume) or one ounce (weight), whichever is less, of whole-grain or enriched or fortified cereal, or an equivalent quantity of any combination of these foods.

(b) The quantities of food specified in subparagraphs (1) and (2) of paragraph (a) of this section are approximate amounts of food to serve 10 to 12 year-old boys and girls. Greater or lesser amounts of these foods may be served if participating children are older or younger and if the sponsor can demonstrate to the satisfaction of the State agency that it has the capability of controlling portion size so as to insure that variations in portion size are in accordance with the age levels of the children served.

(c) If emergency conditions prevent a sponsor normally having a supply of milk from temporarily obtaining delivery, the State agency may approve the service of breakfast, lunches, suppers, or supplemental food without milk during the emergency period.

(d) The inability of a sponsor to obtain a supply of milk on a continuing basis shall not bar it from participation in the Program. In such cases the State agency may approve the service of meals without milk, provided that an equivalent amount of canned, whole dry, or nonfat dry milk is used in the preparation of the components of all meals. In addition, the State agency may approve the use of nonfat dry milk in meals served to children participating in activities which make the service of fluid milk impracticable, and in locations which are unable to obtain fluid milk. Such authorization shall stipulate that nonfat dry milk be reconstituted at normal dilution and under sanitary conditions consistent with State and local health regulations.

(e) In American Samoa, Guam, Puerto Rico, the Virgin Islands of the United States, the Trust Territory of the Pacific Islands and the Northern Mariana Islands, the following variations from the meal requirements are authorized: A serving of a starchy vegetable, such as ufi, tanniers, yams, plantains, sweet potatoes, or a serving of enriched rice or enriched or whole-grain cereal products such as macaroni, dumplings, or noodles may be substituted for the bread requirement.

(f) Substitutions may be made by sponsors in paragraph (a) of this section if individual participating children are unable, because of medical or other special dietary needs, to consume such food. Such substitutions shall be made only when supported by a statement from a recognized medical authority which includes recommended alternate foods. Such statements shall be kept on file by the sponsor.

(g) FNS may approve variations in the food components of the meals on an experimental or a continuing basis for any sponsor where there is evidence that such variations are nutritionally sound and are necessary to meet ethnic, religious, economic, or physical needs.

(h) Sponsors approved to serve children under 1 year of age shall be required to comply with the applicable meal patterns contained in the Child Care Food Program regulations (7 CFR Part 226).

§ 225.11 Food service management companies.

(a) Any sponsor may contract with a food service management company for the preparation of unitized meals, with or without milk. Sponsors may, prior to issuance of bids, submit in writing to the State agency, requests for exceptions to unitizing certain components of a meal. Such requests shall include sufficient reasons for the State agency to determine that the exception is necessary to effectively meet the meal requirements of this part. Each State agency shall notify the sponsor in writing of its determination in a timely manner. Any sponsor may contract with a food service management company to operate its entire blood service: *Provided, however,* That a sponsor that so employs a food service management company shall remain responsible for assuring that the food service operation is in conformity with its agreement with the State agency and all applicable provisions of this part. Sponsors may contract only with food service management companies registered with the State in which the sponsor will operate, as provided for under § 225.5(t). A food service management company entering into a contract with a sponsor under the program shall not subcontract for the total meal, with or without milk, or for the assembly of the meal. Any sponsor entering into a contract with a food service management company shall use the standard form of contract established by its State agency. For sponsors which are public institutions, sponsors desiring to contract only for the management of the program, and sponsors whose contract with a food service management company will not exceed $10,000 this may be their existing or usual form of contract if such form of contract has been submitted to and approved by the State agency. In any event, sponsors shall adhere to the procurement standards set forth in § 225.15. Each proposed additional provision to the established form of contract shall be submitted to the State agency for approval.

(1) In the absence of any State or local law, sponsors whose proposed contracts are subject to competitive bidding procedure shall; at a minimum, insure that:

(i) All proposed contracts shall be publicly announced at least once, not less than 14 days prior to the opening of bids, and the announcement shall include the time and place of the bid opening;

(ii) The bids shall be publicly opened;

(iii) All bidders shall be notified at least 14 days prior to the opening of the bids of the time and place of the bid opening; and

(iv) The State agency is notified at least 14 days prior to the opening of the bids, of the time and place of the bid opening.

(2) In addition, sponsor shall, at a minimum, when advertising for bids adhere to the following requirements:

(i) The invitation to bid shall not specify a minimum price;

(ii) The invitation to bid shall contain a cycle menu approved by the State agency upon which the bid shall be based;

(iii) The invitation to bid shall contain food specifications and meal quality standards approved by the State agency upon which the bid shall be based;

(iv) The invitation to bid shall not specify special meal requirements to meet the ethnic or religious needs unless such special requirements are necessary to meet the needs of the children to be served;

(v) Neither the invitation to bid nor the contract shall provide for loans or any other monetary benefit or term or condition to be made to sponsors by food service management companies;

(vi) Nonfood items shall be excluded from the invitation to bid, except where such items are essential to the conduct of the food service;

(vii) A copy of the health certification required in this section and a copy of the food service management company registration determination issued by the State agency shall be submitted by the food service management company with each bid;

(viii) Sponsors shall submit to the State agency copies of all bids received and the reason for selecting the food service management company chosen;

(ix) All bids totaling $100,000 or more shall be submitted to the State agency for approval before acceptance. All bids in an amount which exceeds the lowest bid shall be submitted to the State agency for approval before acceptance. State agencies shall respond to a request for approval within 5 working days of receipt.

(b) Copies of all contracts between sponsors and food service management companies, along with a certification of independent price determination, shall be submitted to the State agency prior to the beginning of program operations.

(c) Each food service management company which submits a bid over $100,000 shall obtain a bid bond in an amount not less than five (5) percent nor more than ten (10) percent, as determined by the sponsor, of the value of the contract for which the bid is made. A copy of the bid bond shall accompany each bid.

(d) Each food service management company which enters into a food service contract for over $100,000 with a sponsor shall obtain a performance bond in an amount not less than ten (10) percent nor more than twenty-five (25) percent of the value of the contract as determined by the State agency. Any food service management company which enters into more than one contract with any one sponsor shall obtain a performance bond covering all contracts if the aggregate amount of such contracts exceeds $100,000. Sponsors shall require the food service management company to furnish a copy of the bond within ten days of the awarding of the contract.

(e) Food service management companies shall obtain bid bonds and performance bonds only from surety companies listed in the current Department of the Treasury Circular 570.

(f) Failure by a sponsor to comply with the provisions of this section shall be sufficient grounds for the State agency to terminate participation by the sponsor in accordance with § 225.18(b).

§ 225.12 Program payments.

(a) Program payments shall be made to sponsors only after execution of and in accordance with the terms of the agreement with the State agency or the Department. No program payments shall be made for meals served at a site before the sponsor has received written notification of approval for the site from the State agency.

(b) Reimbursement shall be made to camps only for meals served to children whose eligibility is documented on the basis of family size and income information. Any nonresidential camp reduced to less than four meals per day under § 225.5(j)(1) shall continue to receive reimbursement for only those meals served to children eligible for free or reduced priced school meals.

(c) Sponsors which have executed an agreement may, at the discretion of the State agency, receive start-up payments not earlier than 2 months before beginning food service operations. Start-up payments shall not exceed 20 percent of the amount estimated by the State agency to be needed by a sponsor to administer the Program in accordance with the sponsor's approved administrative budget, as provided for under § 225.9(e). Start-up payments shall be deducted from the first advance payment made to a sponsor for allowable administrative costs.

(d) Payments to all sponsors for administrative costs shall, within the total amount of funds available to the State for sponsor administrative costs as prescribed by § 225.8(c), equal the full amount of administrative costs as approved in the sponsor's budget by the State agency. A sponsor's administrative budget shall be subject to subsequent review by the State agency, and based on such a review, the State agency may make adjustments in the level of administrative costs payments to the sponsor which reflect a change in the level of the sponsor's administrative function or the quality of the sponsor's administrative effort. No sponsor shall receive administrative costs payments in excess of actual administrative expenditures.

(e) Payment to a sponsor for operating costs shall not exceed 92.75 cents for each lunch or supper, 51.50 cents for a breakfast and 24.25 cents for supplemental food: *Provided, however,* That the total program payments paid to a sponsor for operating costs do not exceed the lesser of:

(1) The above rates times the meals by type actually served to eligible children during the Program operation, or

(2) The actual operating costs.

(f) Sponsors shall maintain accurate

tion requirements set forth in § 225.5(v), each sponsor shall certify

significant change in its project administrative costs since approval of

determines that a larger payment is necessary for the effective operation

utilized, first, to make program payments to sponsors for the period for which the funds were initially availa-

ficers, employees, or agents in contracting with and expending program payments. The officers, employees, or

V 4 3 / 2 1 1 0 OCT 31 '78

(2) The actual operating costs.

(f) Sponsors shall maintain accurate records to justify the operating costs and administrative costs claimed. Sponsors who wish to claim only for the costs of obtaining food shall maintain accurate records to justify their food costs. In no instance shall Program payments for the costs of obtaining food exceed the per meal operating costs payment rates.

(g) Sponsors shall plan for and prepare or order meals on the basis of participation trends, with the objective of providing only one meal per child at each meal service. Records of participation and of preparation or ordering of meals shall be maintained to demonstrate positive action toward this objective. In recognition of the fluctuation in participation levels which makes it difficult to precisely estimate the number of meals needed and to reduce the resultant waste, any excess meals that are prepared or ordered may be served to children and may be claimed for reimbusement unless the State agency determines that the sponsor has failed to plan and prepare or order meals with the objective of providing only one meal per child at each meal service. In monitoring the number of meals served at a site, the State agency shall withhold reimbursement for those meals served to children which exceed the number of children being served by the site when the State agency determines that the sponsor has not complied with the provisions of this paragraph.

§ 225.13 Program payment procedures.

(a) To be reimbursed under this part, each sponsor shall submit claims for reimbursement to the State agency monthly by the 10th day following the period of operations covered by the claim. Claims may be submitted more frequently at the discretion of the State agency. Sponsors whose final period of operation is less than 10 days in duration shall submit a combined claim covering the final period and the period immediately preceding the final period. The State agency shall not be responsible for acting upon any claim for reimbursement which is not received by the State agency within 30 days after the close of the sponsor's food service operations, except where the State agency determines that the claim has been filed late because of circumstances beyond the control of the sponsor. Appropriate payments may then be made if the claim submitted by the sponsor is valid.

(b) Claims for Reimbursement shall include data in sufficient detail to justify the reimbursement claimed and to enable the State agency to provide the required information for program reports. In submitting a claim for reimbursement, in addition to the certification requirements set forth in § 225.5(v), each sponsor shall certify that records are available to support the claim.

(c) Not later than June 1, July 15, and August 15 of each fiscal year, or in the case of sponsors which operate under a continuous school calendar, the first day of each month of operation, the State agency shall forward advance operating costs payments to each sponsor if a request for such payment was received from the sponsor no later than 30 days prior to the date for each such payment: *Provided, however,* That the State agency shall not release the second month's advance operating costs payment to any sponsor which has not certified that it has held training sessions for its own personnel, including site personnel, with regard to program duties and responsibilities: *And provided, further,* That no advance operating costs payment shall be made for any month in which the sponsor will serve meals under the Program for less than 10 days. Requests by sponsors for advance operating costs payments received less than 30 days preceding the applicable payment date shall be paid by the State agency within 30 days of receipt.

(d) Each month's advance operating costs payment to any sponsor shall be in an amount equal to: (1) The total operating costs payment for meals served by such sponsor in the same calendar month of the preceding calendar year, or (2) 50 percent of the amount determined by the State agency to be needed by the sponsor for meals, if the sponsor contracts with a food service management company or (3) 65 percent of the amount determined by the State agency to be needed by the sponsor for meals, if the sponsor prepares its own meals, whichever amount is greater: *Provided, however,* That the advance operating costs payment may not exceed the total amount estimated by the State agency to be needed by the sponsor for meals to be served in the month for which the advance operating costs payment is made.

(e) Not later than June 1 and July 15 of each fiscal year, or in the case of sponsors which operate under a continuous school calendar, the first day of each month of operation, the State agency shall forward advance administrative costs payments to each sponsor if a request for such payment was received from the sponsor no later than 30 days prior to the date for each such payment: *Provided, however,* That (1) the State agency shall not release the second month's advance administrative cost payment to any sponsor until the sponsor has certified that it is operating the number of sites for which the administrative budget was approved, and that there has been no significant change in its project administrative costs since approval of the administrative budget, (2) no advance administrative costs payment shall be made for any month in which the sponsor will operate under the program for less than 10 days, and (3) in the case of a sponsor that operates less than ten (10) days in June but at least ten (10) days in August, the second month's advance administrative costs payment shall be made on August 15. Requests by sponsors for advance administrative costs payments received less than 30 days preceding the applicable payment date shall be paid by the State agency within 30 days of receipt.

(f) Each sponsor's first month's advance administrative costs payment shall be in an amount equal to one third of the amount established by the State agency to be needed by the sponsor to administer the program. Each sponsor's second month's advance administrative costs payment shall be in an amount equal to one-third of the amount established by the State agency to be needed by the sponsor to administer the Program. In the case of sponsors which will operate ten (10) days or more in only one month and thereby will qualify for only one advance administrative costs payment the State agency shall provide an advance administrative costs payment of no less than one-half and no more than two-thirds of the amount established by the State agency to be needed by the sponsor as indicated in its approved administrative budget. The State agency shall forward any remaining payment due to a sponsor no later than 45 days following receipt of valid claims: *Provided however,* That the State agency shall not pay any sponsor for its final claim until the sponsor has certified that it did operate all sites approved in the administrative budget and that there has been no significant change in the projected administrative costs since the preceding claim or, in the case of sponsors which will receive only one month's advance, that there has been no significant change in the projected administrative costs since payment of the initial advance administrative costs payment. The total program payment paid to a sponsor for administrative costs shall not exceed the lesser of: (1) The approved administrative budget and any amendments thereto or (2) actual expenditures incurred for administrative costs.

(g) The sum of any advance operating costs payment and any advance administrative costs payment to a sponsor for one month shall not exceed $40,000: *Provided, however,* That a State agency may make advance payments totalling more than $40,000 to a sponsor for a given month if the State determines that a larger payment is necessary for the effective operation of the program and the sponsor demonstrates sufficient administrative and management capability to justify a larger payment.

(h) Any prior program payment which is under dispute or which is part of a demand for recovery under § 225.14(a) or § 225.14(d) shall be deducted from any advance operating costs payment or advance administrative costs payment.

(i) If the State agency has reason to believe that a sponsor will not be able to submit a valid Claim for Reimbursement covering the period for which advance operating costs payments and advance administrative costs payments have been made the subsequent month's advance operating costs payment and advance administrative costs payment shall be withheld until such time as the State agency has received a valid claim. Sponsors shall repay advance program payments which are not subsequently deducted from a valid claim for reimbursement upon demand by the State agency. Any interest earned by a sponsor on advance operating costs payments and advance administrative costs payments shall be returned to the State agency. In States where FNSRO administers the program, such interest shall be returned to FNS.

§ 225.14 Claims against sponsors.

(a) State agencies shall disallow any portion of a claim for reimbursement and promptly recover any program payment made to a sponsor that was not properly payable under this part. State agencies shall use their own procedures to disallow claims and recover overpayments already made. This shall include court actions, where appropriate. However, the State agency shall notify the sponsor of the reasons for any disallowance or demand, and allow the sponsor full opportunity to submit evidence on appeal as provided for in § 225.5(w). If, in the determination of FNS, a State agency has acted in conformity with the provisions of this part and has made every reasonable effort to recover any overpayment, the State agency shall not be liable for failure to collect an overpayment.

(b) The State agency shall maintain all records pertaining to action taken under this section. Such records shall be retained for a period of 3 years after the date of the submission of the final financial status report, except that, if audit findings have not been resolved, the records shall be retained beyond the 3-year period as long as required for the resolution of any issues raised in the audit.

(c) The amounts recovered by the State agency from sponsors may be utilized, first, to make program payments to sponsors for the period for which the funds were initially available, and second, to repay any State funds expended in the payment of claims for reimbursement under the program not otherwise repaid. Any amounts recovered which are not so utilized shall be returned to FNS in accordance with the requirements of this part.

(d) When a State agency disallows a claim for reimbursement or a portion of a claim, or makes a demand for refund of an alleged overpayment, it shall notify the sponsor of the reasons for such disallowance or demand, and the sponsor shall have full opportunity to submit evidence as provided for in § 225.5(w) or to resubmit a claim for any amount disallowed or demanded.

(e) If a State agency has reason to believe that a sponsor or food service management company has engaged in unlawful acts with respect to program operation, evidence found in audits, investigations or other reviews shall be a basis for nonpayment of claims for reimbursement.

Subpart D—Miscellaneous Provisions

§ 225.15 Procurement provisions.

(a) This section provides standards for use by sponsors in establishing procedures for the procurement of food, supplies, goods, and other services with program payments. These standards are furnished to insure that such goods and services are obtained in an effective manner and in compliance with the provisions of applicable Federal laws and Executive orders.

(b) The standards contained in this section do not relieve the sponsor of the contractual responsibilities arising under its contracts. The sponsor is the responsible authority, without recourse to the State agency and the Department regarding the settlement and satisfaction of all contractual and administrative issues arising out of procurements entered into under the program. This includes but is not limited to: disputes, claims, protests of award, source evaluation or other matters of a contractual nature. Matters concerning violation of law are to be referred to such local, State, or Federal authorities as may have proper jurisdiction.

(c) Sponsors may use their own procurement regulation which reflect applicable State and local law, rules and regulations: *Provided,* That procurements made with program payments adhere to the provisions outlined in the Office of Management and Budget Circulars A-102 and A-110 and to the standards set forth as follows:

(1) The sponsor shall maintain a code or standards of conduct which shall govern the performance of its officers, employees, or agents in contracting with and expending program payments. The officers, employees, or agents, of a sponsor shall neither solicit nor accept gratuities, favors, or anything of monetary value from contractors or potential contractors on their own behalf or for others. To the extent permissable by State or local laws, rules or regulations, such standards shall provide for penalties, sanctions, or other disciplinary actions to be applied for violations of such standards by either the sponsor's officers, employees, or agents, or by contractors or their agents.

(2) All procurement transactions, regardless of whether negotiated or advertised and without regard to dollar value, shall be conducted in a manner so as to provide maximum open and free competition. The sponsor shall be alert to organizational conflicts of interest or noncompetitive practices among contractors which may restrict or eliminate competition or otherwise restrain trade.

(3) All sponsors shall establish procurement procedures which provide for, as a minimum, the following procedural requirements:

(i) Proposed procurement actions shall be reviewed by sponsor's officials to avoid purchasing unnecessary or duplicative items. Where appropriate, an analysis shall be made of lease and purchase alternatives to determine which would be the most economical, practical procurement.

(ii) Invitations for bids or requests for proposals shall be based upon a clear and accurate description of the technical requirements for the material, product, or service to be procured: Such description shall not, in competitive procurements, contain features which unduly restrict competiton. "Brand name or equal" description may be used as a means to define the performance or other salient requirements of a procurement, and, when so used, the specific features of the name brand which must be met by offerors should be clearly specified.

(iii) Positive efforts shall be made by the sponsors to utilize small business and minority owned business as sources of supplies and services. Such efforts should allow these sources the maximum feasible opportunity to compete for contracts to be performed utilizing program payments.

(iv) The type of procuring instruments used (i.e., fixed price contracts, cost reimbursable contracts, purchase orders, incentive contracts, etc.), shall be appropriate for the particular procurement and for promoting the best interest of the program. The "cost-plus-a-percentage-of-cost" method of contracting shall not be used.

(v) Formal advertising, with adequate purchase description, sealed

bids, and public openings shall be the required method of procurement

Consideration shall be given to such matters as contractor integrity, record

less than 1½ times the basic rate of pay for all hours worked in excess of 8

this section. Applicant sponsors shall not be approved for participation

oral and documentary evidence presented at the hearing and made a part

writing of the termination and reason for the termination, together with the

V 4 3 / 2 1 1 0 C 3 1 7 8 V 4

bids, and public openings shall be the required method of procurement unless negotiation pursuant to paragraph (3)(vi) below is necessary to accomplish sound procurement. However, procurements of $10,000 or less need not be so advertised unless otherwise required by State or local law or regulations. Where such advertised bids are obtained the awards shall be made to the responsible bidder whose bid is responsive to the invitation and is most advantageous to the sponsor, price and other factors considered. (Factors such as discounts, transportation costs and taxes may be considered in determining the lowest bid.) Invitations for bids shall clearly set forth all requirements which the bidder must fulfill in order for his bid to be evaluated by the sponsor. Any or all bids may be rejected when it is in the sponsor's interest to do so, and such rejections are in accordance with applicable State and local law, rules, and regulations.

(vi) Procurements may be negotiated it it is impracticable and unfeasible to use formal advertising. Generally, procurements may be negotiated by the sponsor if:

(1) The public exigency will not permit the delay incident to advertising; or

(2) The material or service to be procured is available from only one person or firm: (All contemplated sole source procurements where the aggregate expenditure is expected to exced $5,000 shall be referred to the State agency for prior approval); or

(3) The aggregate amount involved does not exceed $10,000; or

(4) The contract is for personal or professional services, or for any service to be rendered by a university, college or other educational institutions; or

(5) No acceptable bids have been received after formal advertising; or

(6) The purchases are for highly perishable materials, for materials or services where the prices are established by law, if procured at the lowest applicable price for technical items or equipment requiring standardization and interchangeability of parts with existing equipment for experimental, developmental or research work, for supplies purchased for authorized resale, and for technical or specialized supplies requiring substantial initial investment for manufacture; or

(7) Otherwise authorized by law, rules, or regulations. Notwithstanding the existence of circumstances justifying negotiaton, competition shall be obtained to the maximum extent practicable.

(vii) Contracts shall be made only with responsible contractors who possess the potential ability to perform successfully under the terms and conditions of a proposed procurement. Consideration shall be given to such matters as contractor integrity, record of past performance, financial and technical resources, or accessibility to other necessary resources.

(viii) Procurement records or files for purchases in amounts in excess of $10,000 shall provide at least the following pertinent information: Justification for the use of negotiation in lieu of advertising, contractor selection, and the basis for the cost or price negotiated.

(ix) A system for contract administration shall be maintained to assure contractual conformance with terms, conditions, and specifications of the contract or order, and to assure adequate and timely followup of all purchases.

(d) The sponsor shall include, in addition to provisions to define a sound and complete agreement, the following provisions in all contracts and subcontracts:

(1) Contracts shall contain contractual provisions or conditions which will allow for administrative, contractual, or legal remedies in instances where contractors violate or breach contract terms, and provide for such sanctions and penalties as may be appropriate.

(2) All contracts in amounts which are in excess of $10,000 shall contain suitable provisions for termination by the sponsor, including the manner by which it will be effected and the basis for settlement. In addition, such contracts shall describe conditions under which the contract may be terminated for default as well as conditions where the contract may be terminated because of circumstances beyond the control of the contractor.

(3) All contracts awarded by sponsors and their contractors or ubcontractors having a value of more than $10,000 shall contain a provision requiring compliance with Executive Order 11246, entitled "Equal Employment Opportunity," as amended by Executive Order 11375, and as supplemented in Department of Labor regulations (41 CFR Part 60).

(4) Where applicable, all contracts awarded by sponsors in excess of $2,500 which involve the employment of mechanics or laborers shall include a provision for compliance with sections 103 of the Contract Work Hours and Safety Standards Act (40 U.S.C. 327-330) as supplemented by Department of Labor regulations (29 CFR Part 5). Under section 103 of the Act, each contractor shall be required to compute the wages of every mechanic and laborer on the basis of a standard workday of 8 hours and a standard workweek of 40 hours. Work in excess of the standard workday or workweek is permissible provided that the worker is compensated at a rate of not less than 1½ times the basic rate of pay for all hours worked in excess of 8 hours in any calendar day or 40 hours in the workweek.

(5) Contracts or agreements, the principal purpose of which is to create, develop, or improve products, processes or methods, or for exploration into fields which directly concern public health, safety, or welfare, or contracts in the field of science or technology in which there has been little significant experience outside of work funded by Federal assistance, shall contain a notice to the effect that matters regarding rights to inventions, and materials generated under the contract or agreement are subject to the regulations issued by the Department and the sponsor. The contractor shall be advised as to the source of additional information regarding these matters.

(6) All negotiated contracts (except those of $10,000 or less) awarded by sponsors shall include a provision to the effect that the State agency, the Comptroller General of the United States, or any of their duly authorized representatives shall have access to any books, documents, papers, and records of the contractor which are directly pertinent to a specific program for the purpose of making audits, examinations, excerpts, and transcriptions.

(7) Contracts and subcontracts of amounts in excess of $100,000 shall contain a provision which requires the recipient to agree to comply with all applicable standards, orders, or regulations issued pursuant to the Clean Air Act of 1970. Violations shall be reported to the State agency and the regional office of the Environmental Protection Agency.

§ 225.16 Prohibitions.

(a) The value of benefits and assistance available under the program shall not be considered as income or resources of recipients and their families for any purpose under Federal, State, or local laws, including, but not limited to, laws relating to taxation, welfare, and public assistance programs.

(b) Expenditure of funds from State and local sources for the maintenance of food programs for children shall not be diminished as a result of funds received under the Act and a certification to this effect shall become part of the agreement provided for in § 225.3(c).

§ 225.17 Free meal policy.

(a) The State agency shall require each applicant sponsor to develop, at the time the applicant sponsor applies for program participation, a written policy statement concerning free meals to be used uniformly at all sites under its jurisdiction as required in this section. Applicant sponsors shall not be approved for participation unless the free meal policy statement has been approved.

(b) A sponsor which serves all meals free to attending children shall develop a policy statement which consists of an assurance to the State agency that all children are served the same meals at no separate charge, regardless of race, color, or national origin, and that there is no discrimination in the course of the food service.

(c) A camp which serves meals at no separate charge to attending children shall develop a policy statement which consists of an assurance to the State agency that all children are served the same meals at no separate charge, regardless of race, color, or national origin and that there is no discrimination in the course of the food service.

(d) A camp which charges separately for meals shall develop a policy statement for determining eligibility for free meals which shall include the following:

(1) The specific criteria to be used in determining eligibility for free meals. The camp's standards of eligibility shall be in conformity with the State's family size and income standards for free and reduced price school meals.

(2) A description of the method or methods to be used in accepting applications from families for free meals.

(3) A description of the method or methods to be used to collect payments from those children paying the full price of the meal which will protect the anonymity of the children receiving a free meal.

(4) An assurance that the camp will establish a hearing procedure which provides: (i) A simple, publicly announced method for a family to make an oral or written request for a hearing; (ii) an opportunity for the family to be assisted or represented by an attorney or other person in presenting its appeal; (iii) an opportunity to examine, prior to and during the hearing, the documents and records presented to support the decision under appeal; (iv) that the hearing shall be held with reasonable promptness and convenience to the family and that adequate notice shall be given to the family as to the time and place of the hearing; (v) an opportunity for the family to present oral or documentary evidence and agreements supporting its position without undue interference; (vi) an opportunity for the family to question or refute any testimony or other evidence and to confront and cross-examine any adverse witnesses; (vii) that the hearing shall be conducted and the decision made by a hearing official who did not participate in making the decision under appeal; (viii) that the decision of the hearing official shall be based on the oral and documentary evidence presented at the hearing and made a part of the hearing record; (ix) that the family and any designated representatives shall be notified in writing of the decision of the hearing official; (x) that a written record shall be prepared with respect to each hearing, which shall include the decision under appeal, any documentary evidence and a summary of any oral testimony presented at the hearing, the decision of the hearing official, including the reasons therefor, and a copy of the notification to the family of the decision of the hearing official; and (xi) that such written record of each hearing shall be preserved for a period of 3 years and shall be available for examination by the family or its representatives at any reasonable time and place during such period.

(5) An assurance that there will be no identification of free meal recipients and no discrimination against any child on the basis of race, color, or national origin.

(e) The hearing procedure prescribed under paragraph (d)(4) of this section shall be followed when a camp challenges the eligibility of any child for a free meal. During the pendency of the challenge, the child shall continue to receive the free meal to which he is entitled under the eligibility standards announced by the camp based upon the information supplied in the application made by the family.

(f) Each sponsor shall make available on an annual basis to the information media serving the area from which the sponsor draws its attendance a public release announcing the availability of free meals to children. Each camp shall make available on an annual basis to all participants an announcement of the availability of free meals to children meeting the approved eligibility criteria. The public announcement must also state that meals are available to all children in attendance without regard to race, color, or national origin.

§ 225.18 Other provisions.

(a) *Grant closeout procedures.* Grant closeout procedures for the program shall be in accordance with Attachment K of the Office of Management and Budget Circular A-110 (41 FR 32016, July 30, 1976), or Attachment L of the Office of Management and Budget Circular A-102 (42 FR 45828, September 12, 1977), whichever is applicable.

(b) *Termination for clause.* The Department may terminate a State agency's participation in the program in whole, or in part, whenever it is determined that the State agency has failed to comply with the conditions of the program. The Department shall promptly notify the State agency in writing of the termination and reason for the termination, together with the effective date and shall allow the State 30 days to respond. In instances where the State does respond the Department shall inform the State of its final determination no later than 30 days after the State responds. A State agency shall terminate a sponsor's participation in the program by written notice whenever it is determined by FNS or the State agency that the sponsor has failed to comply with the conditions of the program. When participation in the program has been terminated for cause, any funds paid to the State agency or a sponsor or any recoveries by FNS from the State agency or by the State agency from a sponsor shall be in accordance with the legal rights and liabilities of the parties.

(c) *Termination for convenience.* The Department and the State agency may terminate the State agency's participation in the program in whole, or in part, when both parties agree that the continuation of the program would not produce beneficial results commensurate with the further expenditure of funds. The two parties shall agree upon the termination conditions, including the effective date and, in the case of partial termination, the portion to be terminated. The State agency shall not incur new obligations for the terminated portion after the effective date, and shall cancel as many outstanding obligations, as possible. The Department shall allow full credit to the State agency for the Federal share of the noncancellable obligations properly incurred by the State agency prior to termination. A State agency may terminate a sponsor's participation in accordance with this paragraph.

(d) *State requirements.* Nothing contained in this part shall prevent a State agency from imposing additional operating requirements which are not inconsistent with the provisions of this part: *Provided, however,* That such additional requirements shall not deny the program to an area in which poor economic conditions exist, and shall not result in a significant number of needy children not having access to the program. The State agency shall, prior to imposing any additional requirements, receive approval from FNSRO.

§ 225.19 Program information.

Persons desiring information concerning the program may write to the appropriate State agency or regional office of FNS as indicated below:

(a) In the States of Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont: New England Regional Office, FNS, U.S. Department of Agriculture, 33

North Avenue, Burlington, Mass. 01803.

(b) In the States of Delaware, District of Columbia, Maryland, New Jersey, New York, Pennsylvania, Puerto Rico, Virginia, Virgin Islands, and West Virginia: Northeast Regional Office, FNS, U.S. Department of Agriculture, 1 Vahlsing Center, Robbinsville, N.J. 08691.

Economic Regulatory Administration

"TRANSFER" OR "PLANT GATE" PRICING OF NATURAL GAS LIQUIDS BY GAS PROCESSORS AND REFINERS

[3128-01]

Title 10—Energy

No. ERA-R-77-5, Department of Energy, Room 2313, 2000 M Street NW., Washington, D.C. 20461, Washitions for rulemaking concerning the "transfer price" issue. These petitions in effect request us to stay the effec-

that we did not, and did not intend to, establish a new substantive rule concerning transfer pricing in our Sep-

group or class or persons that has such an interest, and to give a concise summary of your proposed oral pres-

time limitations permit it to be presented for answer.

The presiding office will announce

V 43 / 211 OCT 31 1978

[3128-01]

Title 10—Energy

CHAPTER II—FEDERAL ENERGY ADMINISTRATION [1]

[Docket No. ERA-R- 77-5]

PART 212—MANDATORY PETROLEUM PRICE REGULATIONS

"Transfer" or "Plant Gate" Pricing of Natural Gas Liquids by Gas Processors and Refiners

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Suspension of effective date of amendment; notice of public hearing concerning certain rulemaking petitions.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby suspends until further notice the effective date of that portion of amendment No. 1 to subpart K of the Mandatory Petroleum Price Regulations (10 CFR 212.161 et seq.), issued on September 14, 1978 (43 FR 42984, Sept. 21, 1978), which would delete the phrase, "including transfers between affiliated entities," from the provisions of 10 CFR 212.161(a). All other amendments to subpart K set forth in the above-cited notice become effective as scheduled on November 1, 1978.

The ERA also hereby gives notice of a public hearing to receive comments upon certain matters raised in recent petitions for rulemaking concerning the subject of "transfer" or "plant gate" pricing of natural gas liquids under subpart K, namely, whether the prohibition on "transfer pricing" under subpart K should be eliminated or modified, and allegations of procedural deficiencies in deleting the phrase in question. In addition to gas processors, ERA hopes to hear from independent marketers of natural gas liquid products and consumer groups and other members of the public.

Nothing in this notice or in the issuance of this notice is to be construed as a revision or modification of the agency's previously stated position that "transfer" pricing is not permitted under the current provisions of subpart K.

DATES: Hearing dates: Washington, D.C. hearing: December 7, 1978, 9:30 a.m., and continued if necessary at 9:30 a.m., at the same location of the next day or days.

Requests to speak by November 24, 1978, 4:30 p.m.

ADDRESSES: Requests to speak to: Public Hearing Management, Docket No. ERA-R-77-5, Department of Energy, Room 2313, 2000 M Street NW., Washington, D.C. 20461. Washington, D.C. hearing: 2000 M Street NW., Room 2105, Washington, D.C. 20461

SUPPLEMENTARY INFORMATION:

I. Background and general purpose of this proceeding.
II. Hearing procedures.

I. Background and General Purpose of This Proceeding

On September 14, 1978 (43 FR 42984, September 21, 1978), we issued a final rule amending portions of subpart K of the mandatory Petroleum Price Regulations (10 CFR 212.161 et seq.). Subpart K generally governs the pricing of natural gas liquids (NGLs) and natural gas liquid products (NGL products) produced in natural gas processing plants. The principal purpose of the final rule was to provide specific rules for the calculation and passthrough of allowable processing and marketing costs in NGL and NGL product prices.

As part of the final rule, we adopted an amendment to 10 CFR 212.161 which, among other things, deleted the phrase, "including transfers between affiliated entities," from the provisions of § 212.161(a). This was done, for the reasons generally set forth in 43 FR 42984, at 42994-42996, primarily to clarify the application of the existing regulations. We recognized the possibility that there might be some policy reasons for making a prospective change to the regulations to permit "transfer" or "plant gate" pricing, but we did not believe that we had adequate information upon which to assess the reasons pro and con or the impact of such a change.

Since the issuance of the September 14 notice, we have received several petitions for rulemaking concerning the "transfer price" issue. These petitions in effect request us to stay the effective date of the deletion of the phrase, "including transfers between affiliated entities," and to initiate further rulemaking proceedings to adopt a "transfer" or "plant gate" price approach.

The petitions assert various reasons for their requests. Some assert that the interpretation embodied in the September 14 notice is erroneous, or that in any event the issue should be decided in the context of pending formal requests for interpretation. Some also allege that they were unaware that the "transfer pricing" issue was under consideration in this proceeding, and that they therefore did not have adequate opportunity to comment on the subject. They also allege that the use of a "transfer price" is pervasive throughout the industry, and that a failure to permit transfer or plant gate pricing would have a number of undesirable effects, including aggravation of price disparities in the NGL industry, reduction in NGL supplies, and disruption of royalty or "net-back" arrangements, among other things.

You may inspect and copy the pertinent petitions at the ERA Office of Public Information, Room B-110, 2000 M Street NW., Washington, D.C. 20461 between the hours of 8 a.m. and 4:30 p.m., Monday through Friday. We have received petitions from the following parties to date: Gulf Oil Corp., dated October 20, 1978; Standard Oil Co. (Indiana), dated October 24, 1978; MAPCO Inc., et al., dated October 24, 1978; and Exxon Co., U.S.A., dated October 26, 1978.

These matters deserve public discussion. We are therefore scheduling a hearing for the receipt of public comment upon certain matters raised in these petitions, in order to assess what if any further action on our part may be appropriate. In addition to gas processors, we specifically invite independent NGL product marketers and consumer groups to participate.

In connection with our decision to conduct a hearing on these matters, we have determined to, and do hereby, suspend until further notice the effective date of that portion of the September 14 amendments that would delete the phrase, "including transfers between affiliated entities," from § 212.161(a). All other provisions adopted in the September 14 notice become effective as scheduled on November 1, 1978.

Our purpose in suspending the effective date of the particular language change discussed above is merely to assure gas processors, who have alleged that substantial confusion and uncertainty within the industry will result in the absence of this action, that we did not, and did not intend to, establish a new substantive rule concerning transfer pricing in our September 14 notice. We adhere to the position that the prior regulations did not permit transfer pricing, and we are therefore of the view that the particular language change was unnecessary. Accordingly, neither the amendment deleting this phrase nor the suspension of the effective date of this amendment represents a substantive change. However, because it has been represented to us that the action we took has caused confusion and uncertainty, we have decided to suspend the effective date of this amendment until we have had adequate opportunity to evaluate the petitioners' assertions of the desirability of a change in Subpart K to permit "transfer pricing" and their allegations of procedural deficiencies in deleting the phrase in question.

[1] Chapter II will be renamed at a later date to reflect that it contains regulations administered by the Economic Regulatory Administration of the Department of Energy.

II. Hearing Procedures

A. Procedure for Requests to Make Oral Presentations

The times and places for the hearings are indicated in the "DATES" and "ADDRESSES" section of this notice. If necessary to present all testimony, hearings will be continued at 9:30 a.m. of the next business day following the first day of the hearing.

You may make a written request for an opportunity to make an oral presentation at the hearings. The request should contain a phone number where you may be contacted through the day before the hearing. Since it may be necessary to limit the number of persons making such presentations, you should be prepared to describe your interest in this proceeding, and why you are a proper representative of a group or class or persons that has such an interest, and to give a concise summary of your proposed oral presentation.

We will notify each person selected to be heard before 4:30 p.m., November 29, 1978. Persons scheduled to speak at the hearings must bring 100 copies of their statement to the appropriate address indicated in the "ADDRESSES" section of this notice before December 6, 4:30 p.m., for the Washington, D.C. hearing.

B. Conduct of the Hearings

We reserve the right to select the persons to be heard at these hearings; to limit, consistent with this notice, the subjects on which they may be heard; to schedule their respective presentations; an to establish the procedures governing the conduct of the hearings. The length of each presentation may be limited, based on the number of persons requesting to be heard.

We will designate a DOE official to preside at the hearings, which will not be judicial or evidentiary-type in nature. Questions may be asked only by those conducting the hearings. We will base our decisions on all information available to the DOE. At the conclusion of all initial oral statements, each person who has made an oral statement may make a rebuttal statement. The rebuttal statements wil be subject to time limitations.

You may submit questions to be asked of any person making a statement at the hearings. Such questions must be submitted to the address indicated above for requests to speak, for the location concerned, three days before the hearings. If you wish to ask a question at the hearings, you may submit it, in writing, to the presiding officer. We will determine whether the question is relevant, and whether the time limitations permit it to be presented for answer.

The presiding office will announce any further procedural rules needed for the proper conduct of the hearing.

We will have transcripts of the hearings made and we will retain the entire record of the hearings, including the transcripts, and make them available for inspection at the ERA office of Public Information, Room B-110, 2000 M Street NW., Washington, D.C., between the hours of 8 a.m and 4:30 p.m, Monday through Friday. You may purchase a copy of the transcript from the reporter.

In the event that it becomes necessary for us to cancel or postpone the hearing, we will make every effort to publish advance notice in the Federal Register of such cancellation or postponement. Morcover, we will notify all persons scheduled to testify at the hearings. However, it is not possible to give actual notice of cancellations or schedule changes to persons not identified to us as participants. Accordingly, persons desiring to attend a hearing are advised to contact us on the last working day preceding the date of the hearing to confirm that it will be held as scheduled.

would you like to know

if any changes have been made in certain titles of the CODE OF FEDERAL REGULATIONS without reading the Federal Register every day? If so, you may wish to subscribe to the LSA (List of CFR Sections Affected) the "Federal Register Index," or both.

LSA (List of CFR Sections Affected)
$10.00
per year

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register, and is issued monthly in cumulative form. Entries indicate the nature of the changes.

Federal Register Index **$8.00**
per year

Indexes covering the contents of the daily Federal Register are issued monthly, quarterly, and annually. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers: FR Indexes and the LSA (List of CFR Sections Affected) will continue to be mailed free of charge to regular FR subscribers.

Mail order form to:
Superintendent of Documents, U S. Government Printing Office, Washington, D C 20402

There is enclosed $_____ for _____ subscription(s) to the publications checked below:
